Quality Control of Douglas Fir Doors To Be Intensified

TACOMA.— Douglas fir door manufacturers, who in 1938 established through the U. S. Bureau of Standards the first industry quality specifications for stock doors, are embarking upon an intensive new program of product refinement.

"Determined to improve constantly fir doors for maximum utility and beauty, our industry is launching a more elaborate and exacting system of quality control during production and industry grade-marking for ready identification in the field," according to N. O. Cruver, newly-elected president of the door institute.

The intensified vigilance, he said, will go hand-in-hand with emphasis on increased output to fill as fast as possible the re-housing demands of the nation. The industry inspection service will soon be instituted for all Tru-fit entrance closures (produced under U. S. CS91-41) and for Factri-fit interior doors (produced under CS73-45). Also involved are the two specialty products marketed by the Douglas fir door producers —Craw-Fir-Dor, a low-cost, overhead garage door, and the Sav-a-Space framework for sliding doors.

Production Up

Although production is concentrated on the interior and entrance doors vital to the housing program and relatively few of the specialty items are being made, still output is far short of apparent demand at the moment. A measure of encouragement can be gleaned, the institute president announced, from the fact that production is on the upswing.

In reviewing recent history of the 50-year-old Douglas fir door industry, the association president focused attention on the importance of the new advancement known as factory-fitting of interior doors. Stock closures now are manufactured to exact size, thus precluding hand cutting and fitting on the job. Not only does this result in over-all construction economies, but of even greater importance, a more attractive closure is assured the ultimate consumer as the danger of mis-fitting or marring due to dull hand tools is eliminated.

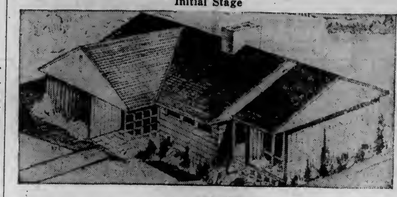
Factory-fit doors also are resin sealed at the plant to provide protection during shipment, to save on-the-job painting time and contribute to a superior finish. Fir door makers now offer Factri-fit doors that, when so specified, are gained for hinges and bored for standard tubular locks.

Proved Technique

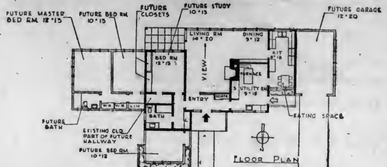
Adoption of precise-size manufacture of interior Douglas fir doors follows the successful prefitting of entrance doors of the Tru-fit line produced by the same concerns. The entrance closures, offered in 27 different architecturally-correct designs, too, are precision-made for beauty and economy and are ready to hang without hand-cutting at the building site.

Two outstanding products—Craw-Fir-Dor overhead garage doors and Sav-a-Space sliding door frames—remain attractive to home owners and builders alike.

When first introduced by the fir door industry in 1939, the low cost Craw-Fir-Dor immediately put the retail lumber dealer back in the garage door business. Of lighter construction with plywood panels and simplified operating hardware than previously known, the item at once became a leader. Two improved, postwar models of the door again are being made, and as before, the door together with hardware, is sold as a complete package by retail lumber dealers.



New Officers



Cruver, who told of the products and objectives of the Douglas fir door makers following his election to the industry presidency,

(Continued on Page 10)

THE HOME OF THE MONTH

Initial Stage

Completed Stage

No. 15

An excellent conception of basic planning is presented in this one-story expandable house that can grow with the family and income. Designed by William Arild Johnson, Everett, Washington in collaboration with David Dykeman, this home was the February winner of the "Practical Miracle Home Contest," sponsored by Practical Builder Magazine, Chicago 5, Ill.

Adding garage and 3 bedrooms to original plan shows finished home of artistic distinction. The exterior is a sturdy and attractive combination of vertical and horizontal clapboard and brick. The interior even at its initial stage has such outstanding features as closet in entryway, kitchen with separate breakfast room, heating room and utility room, plenty of storage space and entrances arranged to any room without having to pass through the other rooms in both stages.

Any or all of the additions may be completed without disturbing the original house during construction periods.

Better Homes and Gardens Exhibit Interests Thousands of Home Builders at Convention

The unveiling of their New exhibit "Homes for Today", by Better Homes and Gardens was of outstanding interest to thousands of builders who attended the National Association of Home Builders Convention and Exposition at the Stevens Hotel, Chicago, February 23-27. The exhibit, which was shown for the first time prior to a nation-wide tour, gave the builders and manufacturers of equipment and appliances the opportunity of seeing the type of homes to be built in 1947. Six distinctively designed new homes—in colorful scale models completely furnished and landscaped and ranging in style from Cape Cod to contemporary—were presented.

"These homes," says Architect-editor John Normile, "are what you will see being built in 1947." He describes them as "compact, economical houses" with a "generous bonus of living space not attainable in ordinary small houses."

"The homes are realistic and practical," Normile adds, "since each of them is designed to be built on today's market under present building conditions." Moreover, they represent the best trends in today's architecture—a blend of tradition and contemporary feeling, with simple details and modern color schemes inside and out."

More Spacious

"Homes for Today" consists of six exterior models of new homes with every piece of furniture, every picture and every detail done in exact half-inch scale.

The exhibit reveals what American families want in their new homes—trends disclosed by a national survey. American architects were commissioned by Better Homes & Gardens to design the homes with these preferences in mind.

The homes have more bedrooms and perches. Garages are attached to or are part of the house. Separate dining spaces (a majority of families still do not want a combination living-dining room), built in storage walls and cupboards and many double-purpose rooms are included.

Displayed Nationally

Two of the most dominant trends—for one story or story-and-a-half homes, and lots twice the size of prewar lots—are shown in the design and lot planning of all the model homes.

The exhibit will be displayed nationally on a tour of department stores and public expositions. Better Homes & Gardens original "Homes for Today" has been seen by more than 1,250,000 persons in 45 showings.

VICTRON VENTILATING FAN IS INSTALLED IN CEILING; GUARANTEED

Designed to give the utmost in home ventilation, the new Victron ventilating fan is installed in the ceiling of a room and will move 600 cubic feet of free air per minute.

Two self-acting shutters open and close automatically with the starting and stopping of the fan, preventing heat loss and back draft. A positive self-acting outside shutter (protected by a metal hood) prevents heat loss and back draft. This is fully weather-proof and finished in acid resisting paint.

It features bronze, self-lubricating bearings and is adjustable for any length ceiling installation. Listed and approved by the Underwriters Laboratory, it has a one year guarantee against electrical, mechanical or manufacturing defects. It is manufactured by Victor Electric Products, 2950 Robertson Ave., Cincinnati, Ohio.

#

DISTRIBUTE REDWOOD GRADE DATA SHEETS

To aid lumber dealers, architects and other specifiers to select the proper grade of Redwood lumber for each specific application, two new and helpfully illustrated data sheets, "Yard Grades" and "Grade Use Guide," are being distributed by the California Redwood Association.

Featured in each of the publications are the new lumber grades adopted by the California Redwood Industry as of December 1, 1946.

IMPROVING BUILDING METHODS FILM TOPIC

The Twentieth Century Fund's new film "Building America's Houses" made a successful bow recently at two previews in December, one in New York and one in Washington.

This one-reel, 16mm. film, produced jointly by the Fund and Encyclopaedia Britannica Films, probes the present fundamental weaknesses of housebuilding and shows how housing costs can be reduced so we can build more houses for more people at lower cost. At the same time, we can have a more stable, prosperous housing industry with higher employment and earnings, the film says.

A printed discussion guide, including background facts, problems for discussion and reading references, is available for use with the film. It is included in a 10-cent packet that also contains two-pamphlets on housing problems. With the aid of these materials and the new film, any program chairman can plan a lively, well-rounded program on housing problems and prospects.

"Building America's Houses" can be rented for a small fee from many film libraries. The 20th Century Fund at 330 W. 42nd, New York 18, will furnish a list of rental sources. The film may be purchased from Encyclopaedia Britannica Films for $50, with a 10 per cent discount.

Erbco Services Its Equipment, Trains Buyers' Operators

A staff of four experienced men, under the direction of Willard Kidder, now offers increased customer field service to the construction industry, according to an announcement from Jack How, General Manager, Edward R. Bacon Company, San Francisco.

Under Kidder's supervison are John Lyon, Al Koehn and W. Mathews. Kidder has been with Erbco since 1945. His previous experience includes 8 years of field service with Sullivan Machine Co., 5 years as master mechanic at the Empress Gold Mines, 6 years as master mechanic with Idaho-Maryland Gold Mining Co. Seeing naval service in both World Wars I and II, Kidder was chief engineer of a sub chaser in 1918 and officer in charge of engine overhaul at a ship repair base in the South Pacific during the Japanese campaign.

The Erbco field service program includes service with each piece of equipment sold, new or used, to start it up and to train the buyer's operator. Regular calls will be made on users of Erbco equipment to render free service. Interest in the performance of Erbco equipment does not stop after the sale is made, it was pointed out, but continues throughout the life of the equipment.

Iron Firemen Line Expanded to Include Self-Firing Heaters

PORTLAND. — Iron Fireman Manufacturing company's expanded line of automatic heating equipment features the luminous flame as a "source of true heating comfort." The bright, yellow, highly luminous flame is declared the best source of heat because it gives off the greatest amount of radiant heat, according to Iron Fireman's staff of combustion engineers.

For the entire line, which now includes not only automatic coal burners, but also new oil burners, and self-firing furnaces and boilers, the luminous flame theme is stressed.

Unit Compact

The coal stokers include the new Coal-Flow model with unique features permitting its installation even in homes where basement obstructions have made use of a bin feed stoker heretofore impossible. For example, the new universal joint in the coal conveying tube, introduced by Iron Fireman, allows the by-passing of obstructions, no matter where coal storage bins may be located. Improvements in the conveying mechanism make it the most feed model as dependable and accessible for inspection as the hopper models.

Iron Fireman's added products include two oil burner units, the Luminous Flame Vortex and the M-2 (gun type).

The Luminous Flame Vortex has outstanding performance features. Important among these is the efficiency attained in furnaces designed originally for hand firing. The handfired furnace is constructed with a flat hearth, so that direct heat is applied against the crown and sidewalls of the furnace. The Vortex saucer-shaped luminous flame, which covers the hearth and sweeps the sidewalls, therefore, is the same as that for which the furnace was designed. The M-2 burner has a wide capacity range (from .6 gallons to 4.5 gallons per hour) and a high combustion efficiency.

The Iron Fireman has also designed a self-contained furnace unit (Airborne) and a boiler unit (Waterborne) which will give maximum operating efficiencies with either oil firing or automatic coal firing. Firing units are interchangeable.

The warm air furnice unit heats, cleans, humidifies, and circulates the air. All of the necessary elements for effective warm air heating are built into the Airborne's trim space-saving cabinet.

Automatic Features

Automatic control instruments of Iron Fireman's exclusive design are available and include room thermostat, synchrostat or time switch, limit control to prevent overheating of flue or furnace, fan control and (in the coal model) an automatic refueling instrument to keep the fire banked ready for instant action.

Unusually large primary heating surfaces, exposed to the direct radiant heat of the luminous flame, are provided in the Waterborne's self-contained, automatically fired boiler units for steam, hot water or vapor heating. Both the coal and oil firing units operate under full automatic control. The Waterborne contains a boiler, a built-in Luminous Vortex oil burner or Coal-Flow stoker, an instrument panel neatly recessed into the side of the cabinet, and, if desired, a built-in hot water coil which provides instantaneous hot water throughout the home.

Cast Iron Grates

Iron Fireman has a complete

Partners, Smedberg, Schammel Reorganize Prewar Firm Into Associated Lighting Service

Associated Lighting Service, located at 488 Bryant Street, was known as Associated Theatrical Service before the war. Now the firm has been reorganized into a partnership headed by Carlton Schammel and George C. Smedberg.

As specialists for many years

CARLTON SCHAMMEL

in the planning of stage and auditorium lighting facilities the copartners built up a background in the design of imaginative lighting for stores and show windows.

Featuring use of such equipment as recessed lens units, louvred downlights, adjustable eyeball spotlights, pin-hole downlights, sharp-framing mural projectors and adjustable louvre spotlights,

GEORGE SMEDBERG

the partnership is backed by many years in the field of functional lighting design.

The firm is now manufacturing lighting equipment in its San Francisco plant under the trade name Westlite. Units all carry the union and underwriters' labels. Plaster rings to meet construction requirements are delivered immediately from stock. The units are available within 30 days from the time an order is accepted.

#

PLASTICS AWARD NOMINATIONS DUE

NEW YORK.—Nominations for the John Wesley Hyatt Award, for outstanding work in plastics during 1946, will close March 3, the award committee said today.

Any molder, tool-maker, laboratory technician, executive or other person engaged in production or development of plastics is eligible to submit one or more entries, the committee secretary, William T. Cruse, explained. His office is at 295 Madison Avenue, New York City.

The John Wesley Hyatt Award, a gold medal and one thousand dollars, has been presented annually since 1941, under the sponsorship of Hercules Powder Company.

#

DISCUSS BRIDGE PLAN

The proposed second San Francisco Bay crossing will be discussed when members of the Structural Engineers Association meet for dinner at the Engineers' Club, March 4.

Five speakers will discuss various aspects of the state and army-navy proposals. They are R. S. Chew, John G. Little, L. H. Nishkian, all of San Francisco, and Fred W. Panhorst, state bridge engineer.

President William W. Moore will introduce the speakers.

PLANNING COMMISSIONS SERVE 95 PER CENT OF CALIFORNIA'S PEOPLE

SACRAMENTO.—More than 95 per cent of California's population is served by official planning commissions, covering 53 of the 58 counties and 171 of the 295 cities.

This is shown in the second report on California planning issued by the state reconstruction and reemployment commission, for the fiscal year, 1945-46.

A. Earl Washburn, state director of reconstruction and reemployment, said: "California's problems of planning have been intensified by the enormous increase in population. Almost every community and its surrounding area have been faced with difficulties in supplying the facilities which will take care of the new residents as an immediate necessity, and in addition, to measure and estimate what may be needed in the future."

#

5 BUILDING MATERIALS STILL ON SHORT LIST

Five building materials are still giving the average home builder trouble, according to the National Association of Home Builders.

The Association says that men who want to put up houses these days have their biggest job in finding gypsum board and rock lath.

Other items on the "critical list" are millwork, hardwood flooring, cast iron soil pipe and pressure pipe, and many types of plumbing fixtures.

On the brighter side of the picture, formerly scarce items—including kitchen sinks and asphalt roofing—are now being produced a record rates.

#

HOLD MARCH HEARING ON RIO VISTA FILLS

SACRAMENTO. — The army corps of engineers will hold a hearing on an application for Reclamation Districts No. 1601 (Twitchell Island- and No. 2067 (Brannan Island) near Rio Vista, Calif., for a War Department permit to construct two fills across Seven Mile Slough in Sacramento County.

The hearing wil be held at the courthouse in Sacramento on Tuesday, March 11, at 10 a. m. The proposed fills wil be located near the easterly and westerly ends of the slough, and would close to navigation approximately three miles of the waterway.

#

ROOF TRUSS DESIGN BOOKLET AVAILABLE

WASHINGTON.—The 1947 edition of typical lumber designs with quantities and materials lists for light and heavy frame structures, prepared by Timber Engineering Company, is now available to architects, engineers and builders.

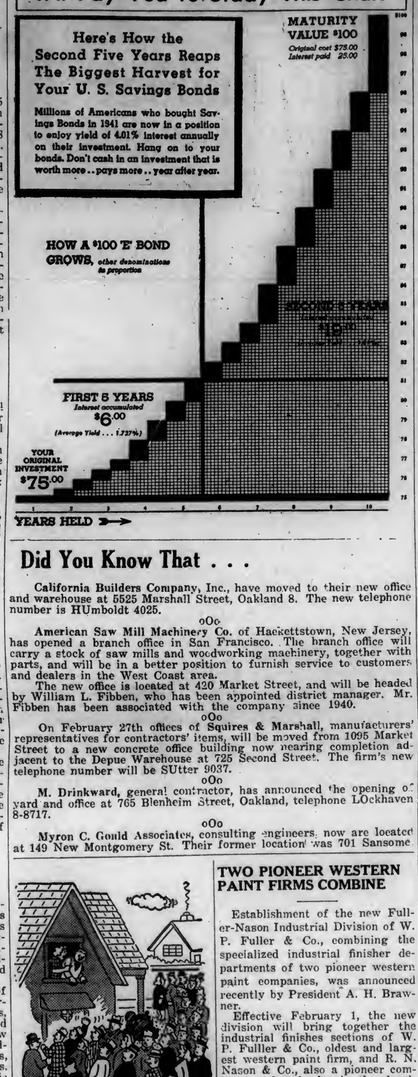
Over 200 typical lumber roof truss designs are listed for garages, stores, churches, theaters, gymnasiums, warehouses and hangars. Other designs cover low cost prefabricated houses, grandstands, various types of towers, bridges, and railway structures. Timber Engineering Company is located at 1319 18th St., N. W.

#

DIESEL BOOKLET OUT

The many and varied work applications of Diesel engines—industrial engines, electric sets and marine engines are chronicled in the new booklet "Caterpillar" Diesel Engines, at Work Form 9360 published by Caterpillar Tractor Co. Peoria, 8, Ill.

Its 24-page story includes mention of such applications as those industrial engines utilized in crushing plants, sawmills, mines, cotton gins, hatcheries, oil pumps and oil drilling, steel mills, pipeline pumping, feed mills, asphalt plants, ice plants, waterworks, irrigation pumps, paper mills, brewing companies, locomotives, ditchers, compressors, cranes and shovels.



#

FABRICATOR DIRECTORY

WASHINGTON.—Growth of the prefabricating lumber business in recent years from a mere handful of companies to more than 76 companies with 131 locations in 38 states is shown in a new directory just issued by the Timber Engineering Company.

The listing gives the names and addresses of firms and shows the type of structures they fabricate.

It'll Pay You to Study This Chart

Did You Know That . . .

California Builders Company, Inc., have moved to their new office and warehouse at 5525 Marshall Street, Oakland 8. The new telephone number is HUmboldt 4025.

oOo

American Saw Mill Machinery Co. of Hackettstown, New Jersey, has opened a branch office in San Francisco. The branch office will carry a stock of saw mills and woodworking machinery, together with parts, and will be in a better position to furnish service to customers and dealers in the West Coast area.

The new office is located at 420 Market Street, and will be headed by William L. Fibben, who has been appointed district manager. Mr. Fibben has been associated with the company since 1940.

oOo

On February 27th offices of **Squires & Marshall,** manufacturers' representatives for contractors' items, will be moved from 1095 Market Street to a new concrete office building now nearing completion adjacent to the Depue Warehouse at 725 Second Street. The firm's new telephone number will be SUtter 9037.

DELIVERY PROVISION IS MAJOR POINT IN TRANSIT PROPOSALS

A proposed building code provision requiring off-street parking facilities in major buildings and stores for deliveries is one of the points of Utilities Manager James Turner's recommendations to solve the city's acute traffic problem, it was learned Thursday.

Other recommendations Turner's council is expected to make include parking lots at the fringe of the business district, with short bus line from lots to business points; additional one-way, no parking streets to handle rush hour traffic, and staggered business hours to relieve transit congestion.

It is rumored that San Franciscans may get a chance to vote on whether or not to keep the city's cable cars.

TWO PIONEER WESTERN PAINT FIRMS COMBINE

Establishment of the new Fuller-Nason Industrial Division of W. P. Fuller & Co., combining the specialized industrial finisher departments of two pioneer western paint companies, was announced recently by President A. H. Brawner.

Effective February 1, the new division will bring together the industrial finishes sections of W. P. Fuller & Co., oldest and largest western paint firm, and R. N. Nason & Co., also a pioneer company and a leader in the development of many modern industrial and automotive finishing products and techniques.

Outside the field of industrial finishes, the two companies will continue their independent operations.

Construction of $1,000,000 plant specially designed to provide the most modern production, control and research facilities for all of the many types of specialized industrial finishes has been started at Fuller's South San Francisco factory.

Until this new plant is completed, present Fuller and Nason facilities at San Francisco, South Francisco, Los Angeles and Portland will be utilized.

Roll-Away Screen Made At Berkeley Plant Saves Labor

It is a toss-up which of the advantages claimed for a new type of window screen manufactured by a Berkeley concern is likely to be most attractive to prospective home owners.

This new screen rolls up out of sight when not in use, and allows an unobstructed view, and more natural light.

Probably just as attractive a feature is the fact that it precludes the job of taking down the screens, mending the wire and painting the frames, putting them back and suddenly discovering that the last one won't fit the only window that remains uncovered.

For these screens are made of bronze, which needs no protective coating and there are no frames exposed to the weather as with wood framed screens. Attached at the time of construction, they are installed so that they are easy to handle and operate without friction in a guide. The mesh is attached to a roller at the top of the window; the screen is pulled down from a metal draw bar at the bottom of the bronze mesh.

The draw bar operates in a guide freely; an automatic lock feature stops the screen at any desired height. There is no space between the drawn screen and the sill, for a felt cushion closes any opening remaining.

These screens are made to order in any size desired by the Rudiger-Lang Company of Berkeley ,whose plant is at Eighth and Carlton Streets. Telephone Thornwall 0340.

#

AED CONVENTION HEARS OF DANGER TO MARKETS

CHICAGO. — That millions of dollars worth of construction equipment is likely to be dumped back on U. S. markets at greatly reduced prices by speculators who obtained it from surplus markets in foreign countries and insular possessions was the warning given by F. Gerald Moyer to the Associated Equipment Distributors during their recent 28th Annual Convention in Chicago.

"The State Department, foreign liquidation commission, has adopted a broad policy in disposal overseas predicated upon one word, i.e., 'feasible' contained in Section 33 of the Surplus Property Act. Under this policy huge quantities of equipment have been sold in bulk with monetary return to the government not exceeding 25 per cent of the original cost," said Moyer. field representative of the A.E.D. committee on disposal of government surplus.

Douglas Fir Doors

(Continued from Page 9)

succeeds J. P. Simpson, also of Tacoma.

Other new officers of the door institute include: R. E. Sceley, of Seattle, vice president; A. C. Peterson, treasurer; Herman Snider, of Hoquiam, Wash., secretary; and Herman E. Tenzler, of Tacoma, trustee.

The officers act as a management committee for affairs of the ten-factory industry. Five of the plants are located at Tacoma while others are scattered in other cities of western Washington and Oregon.

For Better Building . . . . . .

ELECTRIC FURNACE

A new electric home furnace resembles more closely kitchen equipment than the conventional central heating plant. Heart of the furnace consists of six patented elements used in heaters manufactured for submarines during the war, and Moduflow heating-coil control, developed by Minneapolis-Honeywell Regulator Co. The furnace, which is most suitable for Tenessee Valley states and the Pacific Northwest where utility rates are low enough to make this kind of heating practical, is being made in two sizes, one for houses with up to 11,000 cu. ft. of space and the other for houses with up to 24,000 cu. ft. Installed in a 10-room house of brick in Chattanooga, Tenn., well-built but not completely insulated, consumption for the 1945-46 heating season was said to be about 26,700 kilowatt hours at a cost of approximately $205, which complete insulation of the house would have reduced. Electromode Corp., Rochester, N. Y.

MIDGET FURNACE

Following the design principles of airplane heaters, South Wind Midget Furnace will soon be available as a unit of unique compactness for furnishing automatic gas heat. Key feature is the sealed flame system which makes it possible to burn the gas fuel in a confined space, permitting the use of small sealed metal tubes leading outside the house for venting instead of a chimney. The furnace is of stainless steel and "about the size of a suitcase," 30 in. by 14 in. by 9¼ in. Weight is 70 lb., or 45 lb. without the cabinet. It may be installed beneath the floor, in the floor, in the ceiling, in the attic, or even on the top shelf of a closet. Heat is distributed to rooms through short lengths of duets, perhaps 1 ft. or 1½ ft. in length. Each unit has a capacity sufficient to heat about 2½ rooms, with individualized thermostatic control. Heater Division, Stewart-Warner Corp., Indianapolis, Ind.

MULTI-BREAKER

For use as a service entrance breaker and distribution load center, the MO 4 **Multi-Breaker** incorporates in a 4-pole unit both thermal and high speed magnetic tripping action. Dual protection is provided as follows: The bimetal element functions only when a sustained overload or heavy short circuit occurs, and does not trip under harmless momentary overloads. The magnetic trip which is coiless, clears the circuit instantly under moderate or heavy short circuit conditions. The multi-breaker measures only 5 1/16 in. wide, 7 3/16 in. high, and 2⅞ in deep. It will be available in single pole branch circuit capacities of 15, 20 and 30 amperes. By means of a handle tie furnished with each unit, the multi-breaker can be converted to a device with one or two double pole 3 wire circuits. Federal Electric Co., Newark, N. J.

TRANSPARENT MIRRORS

First large-scale production of transparent mirrors has been announced. When viewed from one side the glass functions as a reflective surface, while on the other it acts as a window. Key to its double qualities is the almost incredible thinness of the film of chromium alloy with which it is mirrored. This film is about four ten-millionths of an inch thick and while constituting an effective reflecting surface, also permits the passage of light. Suggested uses are in doors of apartments and houses, to permit a secret glance at callers, as observation windows in child behavior clinics and psychiatric wards of hospitals, and as security windows in banks and commercial institutions. Libbey-Owens - Ford Glass Co., Toledo, Ohio.

PACKAGED MEALS

Recently announced is a stainless steel airtight container for delivery of indivdual servings of prepared meals, which will keep them hot or chilled for as long as three hours after packing. **Meal-pack Container,** model 11, is casserole-size, 10½ in. in diameter, and sectionalized so that it can contain cutlery and baked goods as well as different types of prepared food. Smooth surfaces throughout are designed for easy cleaning and sterilizing. This individual container is the basic element of an entire line of kitchen packing, mobile handling, and serving equipment. Mealpack Corp., of America, 152 West 42nd St., New York 18, N. Y.

HUMIDIFIER

The saying, "Furnace heat is dry heat," need no longer be true, according to the manufacturer of **Humidair,** a humidifier which reportedly has an evaporating capacity that will maintain 35 to 40 per cent relative humidity with either high- or low-temperature warm-air furnaces. The device is connected to city water system for its water supply, which is replenished and shut off automatically. It is said to have four times as much evaporating surface as ordinary dome-type humidifiers, and can be used in hardwater districts. Skilbeck Mfg. Co., Kenosha, Wis.

INSULATING SLABS

Manufactured in 1-in., 2-in., and 3-in. slabs, 4 ft. by 4 ft., with or without paper backing, **Cemex** is offered as a structural fireproof insulating material. It is reported to be made of scientifically treated long tough wood fibers, coated with Portland cement, compressed to desired thickness, and air dried and cured for maximum strength. The manufacturer recommends it for the following uses: as combination sheathing and nailing, fireproof wall partitions, interior plaster base, industrial roof deck, and insulation for walls, floors, and steel roof framing. Cemex can be sawed like lumber when cutting and fitting is required. Structural Insulation Corp., 333 N. Michigan Ave., Chicago 1, Ill.

CORRUGATED PLASTIC

The transparency and light-diffusing qualities of Plexiglas plastic are now available in corrugated sheet that has greater strength in thinner sections. It is suggested for use as lighting shields, freestanding screens, inner partitions in homes and offices, and a lighting aid in window and display fixtures. Rohm & Haas Co., Philadelphia, Penn.

PROVIDES LAUNDERETTE COMFORT.—Heat given off by Bendix washers created a summer time problem that was solved by installation of a two-speed ILG self-cooled motor propeller fan and an ILG unit heater. Running at low speed on colder days, the fan exhausts steam and soap odors without removing necessary heat. The same hot water storage tanks and circulating pump supplying the washers also provide hot water for the unit heater.

'Ranch Style House Gains Popularity In East, Midwest'

Will eastern homes in the west win over western homes in the east?

Strong intercoast competition is developing between two radically different styles of house architecture both striving for the lead among home builders. The attraction of opposites seems to be conspicuously in force, according to John E. McNamara, former associate editor of American Builder, and author of the book "How to Get the Most House for Your Money," published in January by American Technical Society, Chicago.

The Colonial style, identified with New England, which includes the Cape Cod as well as the conventional two-story house with center entrance and symmetrically located windows, is steadily gaining favor in cities throughout the west, particularly on the coast. Its competitor, the ranch-type house indigenous to the west and southwest, is winning out in eastern cities. Some of the best examples of Colonial and Cape Cod architecture appearing in the book were furnished by builders and architects of the west coast.

"Curiously," says Mr. McNamara, "the designs supplied by designers of the north and east show a growing preference for the ranch-type house, which came out of the west. The middle west, too, follows this trend.

The ranch-style house is one to be reckoned with because it fits into the scheme of today's living requirements. Nearly every advance in kitchen, laundry, and heating utilities and equipment takes direction from the horizontal rather than vertical house plan."

Building Officials to Play Prominent Role At President's Fire Prevention Conference

WASHINGTON.—Faced with an average annual toll of 10,000 deaths from fire, together with property loss which exceeded $560,000,000 in 1946, President Truman is sponsoring a nation-wide effort to cope with the fire menace.

The President's Conference on Fire Prevention is now past the formative stage and a volunteer staff is at work preparing for the meeting, which will be held May 6-8 in the Departmental Auditorium in Washington.

Representatives of municipal and State governments, Federal agencies, and of non-official organizations iwth a basic interest in fire prevention have been organized into a coordinating committee to draft an agenda for the Conference and to appoint committees which will prepare recommendations to be submitted to the Conference as a whole.

President Truman has appointed Major General Philip B. Fleming, federal works administrator and administrator of the Office of Temporary Controls, to be general chairman of the fire prevention conference. W. E. Reynolds, commissioner of public buildings, Federal Works Agency, has been named chairman of the coordinating committee, and A. Bruce Bielaski, assistant general manager of the National Board of Fire Underwriters, has been amed executive director.

"The fire toll has been rising since 1934, and 1946 was the most destructive year in our recent history, with a property loss of $561,487,000," General Fleming said. "This was 23 per cent greater than in 1945. December, 1946, showed the heaviest fire loss for any single month in the last 10 years, $58,094,000. This unnecessary, appalling wate of lives and property can be reduced by an all-out nation-wide effort.

"The Highway Safety Conference found that education, enforcement and engineering are the keys to highway safety. I believe these 'three E's' also are the keys to fire prevention. We need wide-spread education in methods of fire prevention and control, more adequate laws and their rigid enforcement, and better engineering to make buildings fire resistant."

More than 2,000 delegates are expected to attend the conference, representing federal departments, state, county and municipal governments and business and civic organizations with a basic interest in the fire prevention problem.

Members of the coordinating committee appointed to draft plans and policies for the conference include: James R. Edmunds, Jr., president of the American Institute of Architects, Washington, D. C.; James H. Mooney, president of the Building Officials' Conference of America, Boston; James H. Park, president of the Pacific Coast Building Officials Conference, Compton, Calif., and Mrs. Pearl Wanamaker, president of the National Education Assn., Olympia, Wash.

Stores Need Better Interior Displays, Lighting, Wide Aisles

NEW YORK.—Sparks of consumer resentment against retailers, which smoldered beneath the surface during the war years, are starting to break into flame. Women shoppers from one end of the country to the other are expressing themselves in very specific terms about the housecleaning and face-lifting job retailers must undertake soon if they expect to soothe ruffled feelings and build the goodwill and acceptance that spell more sales.

These are the major conclusions that emerge from a survey just completed by the First Annual Store Modernization Show, which is formulating a broad educational merchandising program to be held at Grand Central Palace during the week of July 7.

The study encompassed 29 large and small cities in every section of the country, representing a trading area population of 12,500,000.In each instance opinions were secured from competent observers intimately acquainted with conditions in their locality. The survey sought to determine what factors women shoppers regard as synonomus with a "modern store", and which of these elements were lacking in the respective communities.

Number one symbol for "modern store," cited by 72 per cent of those questioned, was better interior display. Better lighting was ranked second, with 48 per cent of the vote. Next in order came periodic redecoration, 44 per cent; wide aisles, 38 per cent; rapid charge system, 17 per cent; elevator and escalator service, 14 per cent; adequate comfort facilities, 14 per cent; attractive window displays, 10 per cent; related selling departments, 10 per cent.

Track Hardware Is Principle of New Roll-Inside Door

Birmingham, Mich.—The Berry Door Corporation has announced the development of a new and revolutionary type of track hardware for the production of a Berry Aluminum garage door that tilts up and rolls completely inside the garage. The door fits a standard 8 ft. x 7 ft. opening, and needs only 2 inches of head room and 2-5/8 inches of side clearance. Installation is greatly simplified by factory assembling of the mechanism.

An ingenious new linkage development insures perfect balance throughout the travel of the door. The pressure of a finger is enough to open the Berry "track" door. Power is supplied by a completely enclosed power unit on east side of the door. There are no exposed springs, and no weights are needed.

Installation is an easy one-man job. It involves little more than attaching the power unit to the jamb with screws, and hanging the track. Weatherstripping, lock and striker plate are factory applied.

ARCHITECTS WORK FOR UNIFORM BUILDING LAW

The California Council of Architects went on record today endorsing an all-industry legislative program, and will seek to bring about uniformity of building ordinances between state and city governments, abolishment of over-lapping codes and more representative direction of the state department of public works.

Announcement of the legislative program followed the Council's recent annual meeting in Santa Barbara.

Closer cooperation between the architect and the state in school house planning were discussed in a conference between John Lyon Reid, AIA, and Dr. Charles Burach, director of the division of school house planning, and Charles D. Gibson, his assistant, both of Los Angeles.

Schlage Lock Sees No Immediate Price Increase—Kendrick

"There is no anticipated increase in the price of the Schlage general line of residential locks," said a recent statement issued by Marron Kendrick, vice president in charge of sales of the Schlage Lock Company, San Francisco.

"This decision", his statement continued, "is based on the hope that the determination of the Schlage Lock Company to hold its prices will contribute somewhat toward the stabilization of prices throughout the building industry. The present condition of confused prices and rapidly changing property values is greatly impeding the building of much needed veteran homes."

Although it has become necessary to increase prices on low volume and luxury items to offset higher costs, the Schlage Lock Company will continue to hold the price line of general residential locks as long as porsible, it was stated.

Owner Taking Bids—Due April 10, 10 A. M.
Earthwork and Structures; Spec. 1690

TUCUMCARI PROJECT, New Mexico. 5 to 11 miles southwest of Tucumcari

Owner—U. S. Bureau of Reclamation, Tucumcari, New Mexico
Plans by Engrg. Dept. of Owner.
Earthwork and structures, Conchas Canal, station 3539 plus 38.1 to station 4402 plus 46.3 and lateral unit No. 6
Estimated quantities are:

Schedule No. 1
Conchas Canal, stations 3717 plus 38.5 to 3742 plus 76.0, 3803 plus 60.0 to 3807 plus 35.5, and 3912 plus 92 to 3914 plus 96

(1) 1,800 cubic yards of excavation, common, for canal;
(2) 430 cubic yards of excavation, rock, for canal;
(3) 200 cubic yards of excavation for core banks;
(4) 500 station cubic yards overhaul;
(5) compacting 100 cubic yards of embankments;
(6) 15,900 cubic yards of excavation, common, for structures;
(7) 2,260 cubic yards of excavation, rock, for structures;
(8) 14,900 cubic yards of backfill;
(9) compacting 600 cubic yards of backfill;
(10) 200 cubic yards of riprap;
(11) 150 cubic yards of concrete in structures, except siphon barrels;
(12) 1,670 cubic yards of concrete in siphon barrels;
(13) furnishing and handling 2,590 barrels of cement;
(14) furnishing and placing 311,000 pounds of reinforcement bars ¾ inch diameter and larger;
(15) placing 90 square feet of elastic filler material in joints;
(16) placing 190 linear feet of rubber water stops in joints;
(17) placing 9,070 pounds of metal water stops in joints;
(18) furnishing and erecting 1.4 M b.m. of timber in structures; and
(19) installing 6,500 pounds of gates and miscellaneous metalwork.

Schedule No. 2
Earthwork and structures for Conchas Canal, Stations 3539 plus 38.1 to 3717 plus 38.5, 3742 plus 76.0 to 3803 plus 60.0; 3807 plus 35.5 to 3912 plus 92, and 3914 plus 96 to 4003 plus 00; for all laterals diverting therefrom, together with their sublaterals; and for a timber bridge across the Hudson Canal

(20) 186,000 cubic yards of excavation, common, for canal;
(21) 28,000 cubic yards of excavation rock for canal;
(22) 30,000 cubic yards of excavation, for core banks;
(23) 100,000 station cubic yards of overhaul;
(24) compacting 56,000 cubic yards of embankment;
(25) 7,900 cubic yards of excavation, common, for structures;
(26) 1,900 cubic yards of excavation, rock, for structures;
(27) 5,700 cubic yards of backfill;
(28) compacting 3,500 cubic yards of backfill;
(29) 1,700 square yards of dry-rock paving, 10-inch over-all thickness;
(30) 250 square yards of dry - rock paving, 15-inch over-all thickness;
(31) 1,340 cubic yards of concrete in structures;
(32) furnishing and handling 1,870 barrels of cement;
(33) furnishing and placing 106,000 pounds of reinforcement bars ¾-inch diameter and larger;
(34) placing 10 square feet of elastic filler material in joints;
(35) furnishing and erecting 76 M b.m. of timber in structures;
(36) laying 3,300 linear feet of 18-inch diameter concrete pipe;
(37) laying 240 linear feet of 24-inch diameter concrete pipe;
(38) laying 260 linear feet of 30-inch diameter concrete pipe;
(39) laying 540 linear feet of 36-inch diameter concrete pipe; and
(40) installing 25,300 pounds of gates and miscellaneous metalwork.

Schedule No. 3
Earthwork and structures for Conchas Canal from Station 4003 plus 00 to end, and for all laterals diverting therefrom together with their sublaterals

(41) 280,000 cubic yards of excavation common, for canal;
(42) 35,000 cubic yards of excavation, rock, for canal;
(43) 10,000 cubic yards of excavation for core banks;
(44) 125,000 cubic yards of overhaul;
(45) compacting 275,000 cubic yards of embankment;
(46) 11,400 cubic yards of excavation, common, for structures;
(47) 2,900 cubic yards of excavation, rock, for structures;
(48) 10,700 cubic yards of backfill;
(49) compacting 7,700 cubic yards of backfill;
(50) 2,770 square yards of dry-rock paving, 10-inch over-all thickness;
(51) 410 square yards of dry-rock paving, 15-inch over-all thickness;
(52) 2,830 cubic yards of concrete in structures;
(53) furnishing and handling 3,970 barrels of cement;
(54) furnishing and placing 222,000 pounds of reinforcement bars ¾-inch diameter and larger;
(55) placing 270 square feet of elastic filler material in joints;
(56) placing 350 linear feet of rubber water stops in joints;
(57) furnishing and erecting 46.5 M b.m. of timber in structures;
58) laying 3,720 linear feet of 18-inch diameter concrete pipe;
(59) laying 1,050 linear feet of 24-inch diameter concrete pipe;
(60) laying 290 linear feet of 30-inch diameter concrete pipe;
(61) laying 1,380 linear feet of 36-
(62) laying 1,580 linear feet of 42-inch diameter concrete pipe;
(63) jacking 32 linear feet of 42-inch diameter concrete pipe under railroad and road;
(64) installing 31,500 pounds of gates and miscellaneous metalwork.

Copies of the standard forms and of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, Custodian, U. S. Customhouse, Denver 2, Colorado; W. R. Nelson, Regional Director, P. O. Box 1609, Old Post Office Building, 7th and Taylor, Amarillo, Texas; M. M. Starr, Construction Engineer, Tucumcari, New Mexico; and Michael W. Straus, Commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the Construction Engineer.

No charge to prospective bidders for copies of the specifications and drawings; to others $3.00 per copy, not returnable.

2/26/47
Plans To Be Completed About Feb. 25—Owner Will Ask Bids Soon—Due About March 20
Water System Improvements Cost $697,200

RATON, New Mexico.
Owner—City of Raton, City Hall, Raton, New Mexico.
Engineers—Crocker & Ryan, 1st National Bank Bldg., Denver, Colo.
Includes (1) enlargement of Lake Maloya earth dam and extension of control works, at an estimated $377,000; (2) construction of a 2,000,000 gallon storage tank and 20 and 18-in. water supply lines within the city, at an estimated $145,100, (3) construction of 20 and 18-in. lines to connect two existing reservoirs and new reservoir, pressure control valves and 6-in., 8-in., and 10-in. connecting lines, at an estimated $115,000, (4) air release and pressure control valves in the supply line from Lake Maloya, at an estimated $16,200 and (5) construction of a water treatment plant adjacent to the existing North Side storage reservoir, including coagulation and settling basins at an estimated cost of $213,600.

2/19/47
Owner Taking Bids—Due March 20, 2 P. M. (Bidders Figuring)
Dorena Dam and Appurtenant Work; Spec. 47-265 Cost $9,894,000

DORENA, Ore., Lane County. Row River, a tributary of the coast fork of Willamette River, approximately two miles below village of Dorena.
Owner—Portland District Corps of Engineers, War Department, Col. O. E. Walsh, district engineer, 628 Pittock Block, Portland, Ore.
Plans by owner.
Earthfill type structure with crest length of 4650 ft. and having a storage capacity of 75,000 acre feet water; completion time 1200 days.
Unit quantities were published on February 13.
The following contractors have taken out plans:
A. Teichert & Son, Inc., Box 1113, Sacramento, Calif.
United Construction Co., Winona, Minn.
W. E. Kier Construction Co., 1462 N. Stanley Ave., Los Angeles, Calif.
Peter Kiewit Sons Co., 1024 Omaha National Bank Bldg., Omaha, Neb., and 442 Post St., San Francisco, Calif., and 345 Kleways Ave., Arcadia, Calif.
George Pollock Co., Box 903, Sacramento, Calif.
Utah Construction Co., 1 Montgomery St., San Francisco, Calif.
McLaughlin, Inc., Great Falls, Mont.
H. N. Rodgers & Sons Co., Memphis, Tenn.
Bressi & Bevanda Constructors, Inc., 417 S. Hill St., Suite 764, Los Angeles, Calif.
Vinnell Co., Inc., 1145 Westminster Ave., Alhambra, Calif.
Nat. McDougall Co., 552 Sherlock Bldg., Portland, Ore.
McNutt Bros., 351½ E. Broadway, Eugene, Ore.
Morrison - Knudsen Co., Inc., 785 Market St., San Francisco, Calif., and Hoge Bldg., Seattle, Wash.
Pacific Bridge Co., 333 Kearny St., San Francisco, Calif.
Kramme & Jensen Construction Co., 1901 Easton Blvd., Des Moines 16, Iowa.
Guy F. Atkinson Co., 806 Cascade Bldg., Portland, Ore., and 10 W. Orange St., South San Francisco, Calif.

36— PARKS, AIRPORTS & PLAYGROUNDS

2/20/47
Engineers Retained To Draw Up Contour Maps
Fairgrounds

VALLEJO, Calif., Solano Co. Solano County Fairgrounds.
Owner—Solano County Fairgrounds Board, Dr. A. E. Chappell, board president, City Hall, Vallejo, Calif.
Engineer—Solan Engineers Associated, 1856 Capitol St., Vallejo, Cal.

37— RAILROADS, SUBWAYS & TUNNELS

2/21/47
Low and Only Bidders
Railroad Track Spur; Spec. 218 Cost $19,500

EL CENTRO, Calif., Imperial County. El Centro steam station.
Owner—Imperial Irrigation District, El Centro, Calif.
Plans by owner.
Includes appurtenant equipment.
Low Bidder—W. A. Smith Contracting Co., 514 Central Bldg., Los Angeles, Calif., $19,500.
Other bids February 18 were:
A. D. Schader, San Francisco, $20,997.
H. F. Kretiow, $22,666.
Morrison-Knudsen, Inc., $24,040.80.
Clifford C. Bong & Co., $28,913.
L. V. Mulherron General Contractors, $30,630.92.

38— ELECTRIC LIGHTING TRANSMISSION LINES

2/20/47
Contract Awarded
Traffic Signal Systems Cost $24,845

MANHATTAN BEACH, and HERMOSA BEACH, Calif., Los Angeles County. Intersections of Sepulveda Blvd., with Center St. and Gould Lane.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
The work involves furnish and installing:
(1) traffic signal system at intersection of Sepulveda Blvd. and Center St.;
(2) traffic signal system and concrete curbs and gutters at intersections of Sepulveda Blvd. and Gould Lane.

Contractor — Econolite Corp., 3517 W. Washington Blvd., Los Angeles, Calif.

2/18/47
REA Funds in Amount of $465,000 Granted
Transmission Line

MODOC and LASSEN COS., Calif., and LAKE CO., Ore.
Owner— Surprise Valley Electric Corp., Alturas, Calif.
Includes 230 miles of transmission line

39—SEWERS

2/21/47
Owner Taking Bids—Due March 6, 2 P. M. (Unit Quantities)
Culvert; Pro. Calif. FH-58-D

SAN BERNARDINO COUNTY, Calif. Mill Creek, San Bernardino National Forest.
Owner—Public Roads Administration, C. C. Morris, division engineer, 720 Phelan Bldg., San Francisco, Calif.
Plans by engineering department of owner.
About 1,730 miles.
Henry Gunderson, Public Roads Administration engineer, will be on the project from February 25 to March 5, inclusive, to assist contractors viewing the work. Mr. Gunderson may be contacted at Igo's store, near the beginning of the project.
The work involves:
(1) $7500 extra and miscellaneous force account work;
(2) 26 acres clearing and grubbing;
(3) 339,000 cu. yds. unclassified excavation;
(4) 2650 cu. yds. unclassified excavation for structures;
(5) 1,100,000 sta. yds. overhaul;
(6) 1.73 miles earth graded road;
(7) $3200 force account debris deflectors;
(8) 21 cu. yds. concrete, class A;
(9) 600 lbs. reinforcing steel;
(10) 222 lin. ft. 12-in. corrugated galvanized sheet metal culvert pipe, asphalt dipped;
(11) 1776 lin. ft. 24-in. corrugated galvanized sheet metal culvert pipe;
(12) 168 lin. ft. 30-in. corrugated galvanized sheet metal culvert pipe;

Prefabricated Steel Bldg. (Furnish) Low and Only Bidders

BOISE PROJECT, Idaho.—The following submitted bids February 19 to the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1651 for furnishing and delivering f.o.b. cars at Notus, Idaho, one (1) 40-foot by 60-foot prefabricated steel building for a machine shop at Notus, Idaho, Payette Division, Boise Project. The building will be erected by the government:

Dempster Steel Co., North Platte, Neb., item $2970; ship anchor bolts and base plates 30 days, balance 60 days; 16,000 lbs.; f.o.b. North Platte; terms net; no equalization offered.

Titan Metal Products Corp., Portland, Ore., item 1, $3840; ship anchor bolts and base plates 5 days, balance 20 days; 16,900 lbs.; f.o.b. Portland; terms net. No equalization offered.

Truscon Steel Co., Denver, Colo., item 1, $7000; ship anchor bolts and base plates 90 days, balance 180 days; no weight given; f.o.b. destination; terms net; price not to exceed 20% time of shipment. No equalization offered.

2/24/47 43
Traveling Crane
Contract Awarded

BOISE PROJECT, Idaho.—Judson-Pacific-Murphy Corp., 1200 17th St., San Francisco, Calif., at $11,719, was awarded contract by the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1596 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Jenness, Idaho, one 3-motor, floor-operated, 15-ton traveling crane and one lifting beam for the "C" line canal pumping plant, Payette Division, Boise Project, Ida. The crane and lifting beam will be installed by the government.

2/24/47 43
Sale of Electrical Equipment

SAN FRANCISCO, Calif. — Until March 11, 10 a. m. bids will be received by the Inspector of Naval Material, Property Disposal Division, 600 Bryant St., San Francisco 7, Calif., under Sales No. C-85-47 for sale of usable electrical items located at Bathlehem Steel Co., 20th and Illinois Sts., San Francisco, Cal.

2/24/47 43
Parking Meters
Bids Wanted

CHICO, Calif., Butte Co.—Until March 4 bids will be received by the City of Chico, H. H. Hume, city clerk, City Hall, Chico, Calif., for 608 parking meters.

Specifications obtainable from the above office.

2/24/47 43
Transformers
Bids Wanted

SAN FRANCISCO, Calif.—Until March 7, 3 P. M., bids will be received by Purchaser of Supplies M. H. Gerry, 270 City Hall, San Francisco, Calif., under bid No. 3850 for furnishing and delivering 14-15 KVA 2300 to 460/230-volt transformers.

Specifications obtainable from the above office.

2/24/47 43
2/24/47 42
Asphalt—Bids Wanted

SACRAMENTO, Calif., Sacramento Co.—Until March 3 bids will be received by State Purchasing Agent, Sacramento, Calif., under Quo. 44183, Req. 78369, for:

50 to 60 tons air-refined asphalt, delivered state equipment, vendor's plant in Los Angeles metropolitan area.

70 to 80 tons air-refined asphalt, delivered vendor's equipment, point on Coast Highway, 10 miles southeast of Oxnard.

2/24/47 43
Refrigerators—Bids Wanted

RIVERSIDE, Calif., Riverside Co. and CEDAR CITY, Utah. — Until March 5, 10 a. m. bids will be received by the U. S. Treasury Dept., 7th and D Sts., SW, Washington 25, D. C., under Inv. 2L-49021-R-3-5-47 for furnishing 5 refrigerators, mechanically operated, electric, right hand door, to operate on 110-120-volt 60-cycle alternating current, 6 cu. ft. capacity, one for Riverside, Calif., and four for Cedar City, Utah.

2/24/47 43
Gate Valve—Bids Wanted

COLORADO - Big Thompson Proj., Colo.—Until March 25, 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Customhouse, Denver, Colo., under Spec. 1709 for furnishing and delivering fob cars at the shipping point or fob cars at Fort Collins, Colo., one (1) 24-inch diameter wedge gate valve for the outlet works at Soldier Canyon dam, Colorado-Big Thompson Proj., Colo. The valve will be installed by the Government. No charge for copies of the specifications to prospective bidders; to others, $0.75, not returnable.

2/24/47 43
Motor Truck Chassis
Low and Only Bidders

OAKLAND, Calif., Alameda Co.—Following submitted bids Feb. 19 to the East Bay Municipal Utility District Room 312, 512 16th St., Oakland, Calif., under Pro. 1803 for furnishing 7 motor truck chassis.

Clarence Bullwinkle $1513.34; total $10,593.38;

F. H. Daley, $1721.20; total, $12,048.40;

Reid & Rude, $1723.36; total $12,063.52.

Dahl Chevrolet Co., $1773.51; total $12,414.57;

Cochran & Celli, $2024.91; total $14,174.37;

Reo Motors Inc., $2251.31; total $15,759.52;

International Harvester, $1981; no total.

2/24/47 9
Owner Taking Bids—Due March 19, J. P. M.
School Addn.

BANNING, Calif., Riverside Co. Central School.
Owner—Banning Elementary School District, Banning, Calif.
Engineers—Bowen, Rowe, Rule & Bowen, 2835 Gilroy St., Los Angeles, Calif.
Reinf. concrete addition including 10 classrooms, service rooms, boiler room and toilets consisting of 3 bldgs. connected with walks.
Specifications obtainable from office of the school district upon deposit of $10 refundable.

Load Protection Equipment
Low and Only Bidders

OAKLAND, Calif., Alameda Co.—Following submitted bids Feb. 19 to the East Bay Municipal Utility District, Room 312, 512 16th St., Oakland, Calif., under Pro. No. 1816 for furnishing overload protection equipment for 11 kv power distribution system, as follows:

(1) 8 each overload protection equipment for Kelman Oil Circuit breakers, type F2;

(2) 1 each potential trip assembly for Kelman Oil Circuit breaker type FSS;

(3) 1 each relay, induction type, drawout ⅛ to 2½ amperes capacity;

(4) 1 each overload protection equipment for General Electric Oil circuit breaker, type FKO-37;

(5) 1 each current transformer typs KF-58 or equal;

(6) 5 each storge batteries, 12 volts

(7) 5 each battery chargers for 12-volt battery.

Kelman Electric Mfg. Co., (1) $456; total $3472; (2) $74;

Electric Storage Battery Co., (6) $23; total $115.

44— SUB-CONTRACT INFORMATION

2/21/47 44
New Partitions—All Bids Will Be Rejected

PORTLAND, Ore.—All bids received February 19 by the Federal Works Agency, Public Buildings Administration, office of the district engineer, 833 U. S. Appraiser's Bldg., San Francisco, Calif., for new partition changes, etc., at the OPA office, foot of SW. Gibbs St., Portland, Ore., will be rejected and project readvertised at a later date.

2/21/47 44

CENTRAL VALLEY PROJECT, California.—The U. S. Bureau of Reclamation, Denver, Colo., rejcted bids submitted January 10 under Spec. 1565 for construction of sheet metal work for ventilating system, Shasta power plant, Central Valley Project, California. The power plant is situated at the Shasta Dam on the Sacramento River. Work includes furnished and installing sheet metal ducts with hangers and accessories for the ventilating system for Shasta power plant.

As previously reported, Emil Brown & Co., 300 E. 9th St., Los Angeles, Calif., at $36,600, submitted low bid.

2/24/47 44
Rewiring and Electrical Alterations Bids Wanted

MERCED, Calif., Merced Co.—Until March 17, 11 A. M., bids will be received by the Board of Supervisors of Merced County at the chambers of the board in the Merced County Courthouse, Merced, for rewiring and electrical alterations to Merced General Hospital, Merced County, Calif.

Plans and specifications prepared by Clyde E. Bentley, consulting engineer, may be obtained from the office of W. E. Bedesen, county engineer, Merced County Courthouse, Merced, Calif., upon deposit of $10, refundable.

Each bid must be accompanied by cashier's check or bid bond in amount of 5% of bid, payable to the Board of Supervisors.

No more of this!

It's hard work, isn't it, when you have to plug in a lamp, radio or vacuum cleaner by the grunt and groan method?

This situation is common in many homes. It is simply a case of too few outlets, too far apart and connected to too few wiring circuits.

What is the remedy? For your present home, or the new home you are planning to build, insist on and get—"Certified Adequate Wiring." That means your home will have a "tailor-made" job of wiring that will be modern and stay modern for years to come. Write in or come in to any P. G. and E. office for details on "Certified Adequate Wiring" and get your copy of the 16-page booklet—"Electricity in Your Home Plans."

PLANS and Speculations

An unexpected financial windfall will enable Carmel to pay $20,000 for a new city hall, to match $4500 state funds for improvements to the drainage system and build a $5000 police department headquarters building.

oOo

Plans for an underpass proposed at Roseville will be protested by the chamber of commerce as it creates dead ends on each side of Washington Street.

oOo

The forest service has approved use of its equipment for widening and improving the Watts Valley Road in the Sierra foothill district near Fresno.

oOo

Merced County Farm Bureau has asked a congressional appropriation of not less than a million dollars to start a Merced County federal flood control program.

oOo

Yuba County Farm Bureau has requested federal aid to complete aerial surveys of the district in line with the plan of increasing water supplies for farmlands.

oOo

Santa Clara city officials have okayed improvements of the Washington Center baseball park lighting system for night games. The new system would be similar to that used in Seals Stadium.

oOo

Garrett-Bromfield Company of Denver has applied to make a preliminary survey for a plan to utilize water from Lake Meade for a water district in Vegas Valley south of Las Vegas.

oOo

An associate right of way agent will be employed by the state personnel board following exams March 29. College graduation and four years professional experience are required.

oOo

A committee of 25 civic and industrial leaders will be named by the Bay Area Council to attempt to obtain a unanimous decision on a second Bay crossing.

oOo

Construction will begin soon on a mammoth midwestern center for development of atomic energy for industrial purposes and research in military uses, on a 3,645-acre site 26 miles from Chicago.

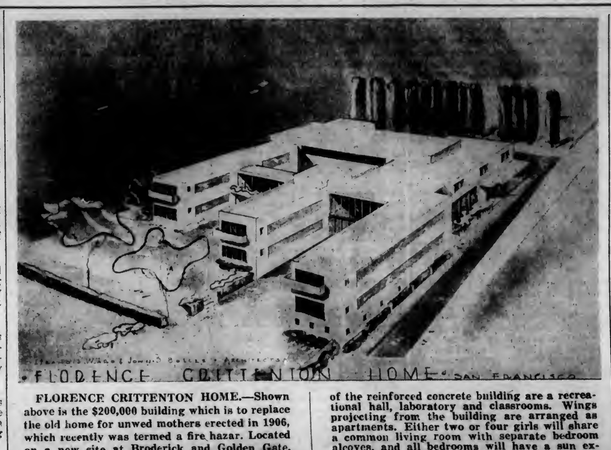
oOo

Sacramento City Manager B. W. Cavanaugh has obtained a $270,000 federal grant for the Twelfth Street Subway. State Highway Engineer George T. McCoy said his department will start immediately on plans for the underpass.

oOo

Preliminary surveys have been started on a proposed 80-mile canal which would catch flood runoff waters from mountain creeks in the Arvin-Edison area, near Bakersfield.

oOo



W. D. Hadeler, bridge director of San Francisco, reportedly will interview engineering firms selected as possible advisors to the bridge board in revising plans and specifications for a new Marin approach to Golden Gate Bridge.

oOo

The state highway commission recently voted $798,700 additional funds for various highway projects to meet increased costs of construction.

oOo

Construction of a new public library was urged by the El Cerrito Junior Chamber of Commerce recently in a letter to the city council.

FLORENCE CRITTENTON HOME, SAN FRANCISCO

FLORENCE CRITTENTON HOME.—Shown above is the $200,000 building which is to replace the old home for unwed mothers erected in 1906, which recently was termed a fire hazar. Located on a new site at Broderick and Golden Gate, the new home will provide bedrooms for 45 to 50 girls and a 25-bed baby ward. Other features of the reinforced concrete building are a recreational hall, laboratory and classrooms. Wings projecting from the building are arranged as apartments. Either two or four girls will share a common living room with separate bedroom alcoves, and all bedrooms will have a sun exposure. The inner courts are designed to provide an outdoor living space.

GBC's Marshall Forces to Forestall Move To Delay $45 Million Airport Aid Program

WASHINGTON.—General and all heavy construction contractors were marshalling their forces this week to meet opposition to the country's $45,000,000 airport program which developed on Capital hill.

A senate subcommittee has recommended virtual scrapping of the airport construction program calling for improvement of some 800 fields.

This committee action stemmed from the senate's consideration of immediate need for a complete air safety program which would, according to a report from the Civil Aeronautics Administration, require the larger sum of $54,540,000. This money would cover the installation of instrument landing facilities at 166 airfields and ground control at 30. with tower surveillance radar at 140 more air centers.

President Economizes

The subcommittee of the senate's interstate and foreign commerce committee has recommended that the $45 million appropriated for new construction and improvement work be transferred in full to the safety program.

Since a large share of the original appropriation already has been allocated for state use, and much of the programming already has begun on a local level, technical and legal complications are expected. On the basis of these, contractors hope to keep the construction and improvement program intact, going ahead with much of the building this year.

Of the $45 million appropriated for the airport construction program, $2,250,000 is authorized for administrative expense. This leaves $42,750,000 for actual federal outlay to the various states and U. S. possessions.

President Truman has ordered that only $4 million of this amount be spent this year. The fact remains, however, that the balance allocated (as reported previously in the Daily Pacific Builder) and this action is expected to form the basis of the effort to forestall the transfer of money.

Equip Existing Ports

If the subcommittee's report should be adopted, and congress felt the appropriation could be changed from construction work to the highly technical installation of safety devices, it is doubtful that additional funds would be set aside for the federal airport program as initiated last fall. With congress presently in a clear mood to econ-

Realty Financing Reaches New High At $10,400 Million

WASHINGTON. — The nation's non-farm real estate financing continued to a new high in 1946 when about -10,400,000,000 of mortgages were recorded, the Federal Home Loan Bank Administration reported yesterday. The year's total is 85 per cent above 1941.

The rise in recent years is due not only to a sustained demand for loans on houses and today's high prices, but the almost 100 per cent financing of homes under the GI loan act and a larger volume of credit extended for new construction. Fifty per cent more mortgages were recorded than in 1945 and the average loan was 45 per cent above the average for 1941, the last pre-war year.

Showing a usual seasonal decline, mortgage financing last December totaled $836 million, four per cent below the previous month, but 59 percent over December 1945.

Revealing the trend of financing activity of types of lenders, the 1946 increases over 1945 in dollar totals of mortgages recorded were as follows: mutual savings banks, 153 percent; commercial banks and trust companies, 146 per cent; miscellaneous lenders, 91 per cent; insurance companies 94 percent; savings and loan associations, 70 per cent and individuals, 44 percent.

The average mortgage recorded in 1946 amounted to $4206, wich is 22 percent more than in 1945. The average for mutual savings banks in 1946 was $5416, up 29 percent over 1945. Other increases in averages were: for commercial banks and trust comnanies, 25 per cent; for miscellaneous lenders, 21 percent; savings and loan associations, 19 per cent, and for insurance companies, 10 per cent.

GROOVER AND I

FEDERAL HOUSING AID

We Americans manage to upset native economic harmony wherever we go.

☆ ☆ ☆

Before our "do-gooding" 25 pesos would buy almost any native bamboo-and-nipa shack you could find in the Pacific area. For $50 the natives would throw in two pigs, a goat, a taro patch, his eldest daughter and mother-in-law — and also think you were crazy.

☆ ☆ ☆

The value of a house was not in money, but time required to build it. Time depended upon several things, for instance, the proximity of neighbors, the condition of fishing and hunting, the lure of nearby shade trees—and especially whether it be six weeks or six months until the rainy season.

☆ ☆ ☆

On July 21, 1944, Marines of the Third Divison went ashore on the Island of Guam. Some of them never got across the sand—others got blistered hands from hot gun barrels.

☆ ☆ ☆

In rescuing Guam from the Japs many native houses were destroyed. This really didn't affect the Chamorros as all weather - proof shacks had already been seized by the Japs.

☆ ☆ ☆

Today the native is very upset and unhappy. He is "Saturday night rich", and doesn't know what to do about it. Each family is trying to hire some other family to do their laundry.

☆ ☆ ☆

The reason for this is your government has now reimbursed each native whose "house" was destroyed.

☆ ☆ ☆

You will be very happy to know that the minimum you paid any native for his shack was $7,500.

WAA has up for sale an $8 million steel foundry at Pittsburg, Calif. Sealed bids will be opened at San Francisco WAA offices on March 18.

Legion Committee Airs Vet Hospital Program in March

WASHINGTON.—Veterans' hospital construction holds top priority for discussion when Chairman Robert M. McCurty of Pasadena raps the gavel opening the American Legion's national rehabilitation conference here March 4 to 7.

In attempting to push ahead all veteran rehabilitation to a faster pace, the delegates will lay particular emphasis on the building of new hospitals for ex-servicemen.

First day speakers will include Dr. Paul R. Hawley, chief medical director of the Veterans Administration, who will represent VA on a panel discussion devoted to veterans' hospitals and medical services.

Other speakers during the conference will include Commander Paul H. Griffith and General Omar N. Bradley, administrator of veterans' affairs.

#

Vitrified Sewer Pipe Manufacturers Face Monopoly Charges

CHICAGO.—Eighteen manufacturers of vitrified sewer pipe and their trade association, the Clay Products Association, have been charged in a federal trade commission complaint with unlawfully combining to fix prices and suppress competition, and engaging in price discrimination.

The complaint is directed primarily against collusive use of a zone system of delivered prices which, it alleges, has resulted in elimination of price competition among the respondent manufacturers and "monopolistic, unfair and oppressive" price discrimination against portions of the purchasing public "in large areas," and also think you were crazy.

So discriminatory is the pricing system, the trade commission charged, that the net prices paid by customers located at or near the factory door of a manufacturer in many instances amount to much more than the net prices realized on products of like grade and quality sold to customers located hundreds of miles distant.

#

FBI MAN ADDRESSES COST ACCOUNTANTS

H. C. Van Pelt, Assistant Special Agent in charge of the San Francisco division, Federal Bureau of Investigation will address the San Francisco chapter of the National Association of Cost Accountants on Thursday evening, Feb. 27, 1947, at the Engineer's Club.

While in Washington, D. C., Van Pelt served as administrative assistant to J. Edgar Hoover, supervising investigations of fraud and violations of the National Bankruptcy Act. He will discuss proper control necessary in internal audit systems to permit the exercise of care in performance of the accountant's responsibilities in order to help combat crime in the field of finance.

#

CHICAGO HAS SLOW RENTAL RECORD TOO

CHICAGO.—With approval of 14 applications to build rental housing units expected from the local office of Federal Housing Administration soon, the new year's total of approved rental housing construction will be 356 units.

E. J. Kelly, district director of FHA, conceded that that record was a "slow start toward a 1947 objective of 30,000 new units." Since January 1, he reported, commitments have been issued for mortgage insurance on four projects designed to include 71 units.

Sacramento Area Contractors and Builders Ask Recall of Premature Wage Demands

The Builders' Exchange of Sacramento called a meeting of General Contractors and Home Builders on Tuesday, Feb. 25, to discuss the existing high wage and material costs in the Sacramento area and the increased wage demands made by the Building and Construction Trades Council of Sacramento-Yolo Counties. The meeting was held in a meeting room of the Sacramento Chamber of Commerce and was attended by 75 General Contractors and Home Builders. Jos. C. Burr, Manager of the Builders' Exchange presided and called attention to the fact that there was much opposition from investors against cost of new construction — homes, commercial and industrial construction.

Wm. E. Hague, Manager of Central California Chapter, The Associated General Contractors of America, Inc., was a guest speaker and reviewed the material and labor situation in Northern California. In particular, he reported on the existing six 46-County Northern California Agreements which have now been in effect for almost one year. He advised that negotiations were to be opened immediately with the Carpenters, Laborers, Cement Finishers, Operating Engineers, Teamsters and Pile Drivers. All of these Agreements covering the 46 counties of Northern California will expire May 1. Mr. Hague particularly commented on the fact that the Carpenters Agreement had met with almost universal endorsement from all the general building contractors and home builders of Northern California and advised that a meeting of all the endorsing associations of contractors and home builders was to be held next week for the purpose of discussing the proposed new agreement. In concluding his remarks, Mr. Hague stated that th Bay Area general building contractors appreciated the cooperation which the Sacramento general building contractors and home builders had given to the existing Agreement by their endorsement and participation in same one year ago. He prophesied that these Northern California trade agreements would gather in strength during succeeding years and reported that the Master Plumbers, Master Electricians, Master Painters, and other crafts of the building industry were also now beginning negotiations for Northern California agreements.

Contractors and home builders present criticized the wages being paid in some of the crafts, particularly plastering and brick-laying and the following resolution was unanimously adopted:

"WHEREAS, the Sacramento-Yolo Building Trades Council has notified the Contractors that the wages of Carpenters will be increased $4.00 per day, effective May 8, 1947, Laborers increased $2.00 per day, effective April 30, 1947, and Cement Finishers increased $5.00 per day, effective May 13, 1947, and

"WHEREAS, the notification was sent without prior negotiation, and

"WHEREAS, the existing agreements provide for orderly negotiation for changes in wage scales and working conditions, and

"WHEREAS, the Cement Finishers received an increase of $1.00 per day less than 60 days ago, and

"WHEREAS, the Carpenters received an increase of $2.00 per day last July 8th, and

"WHEREAS, the Laborers received an increase of $1.50 per day last May 20th on new work, and

"WHEREAS, it is the opinion of this conference of General Contractors of the Sacramento area that the payment of these demands would put a definite curb to building construction, and

"WHEREAS, the ability of the G I veteran to buy a home of his own at present prices has reached a top limit of loan value,

"THEREFORE BE IT RESOLVED that this conference of General Contractors and Home Builders of Sacramento Area in assemblage this 25th day of February, 1947, do request the above concerned Labor Unions and the Council to:

"1. Recall all demands for wage increases at this time;

"2. Cooperate with the industry in its effort to supply the Veteran and other with a low cost home;

(Continued on Page 7)

Billion Dollar Fund May Be Concentrated On Improving Roads

WASHINGTON.—It begins to look as though much of the $1 billion dollars to be spent during 1947 on the nation's road construction program would go for improvements on existing highways.

Widening Necessary

Since last fall there has been a concerted safey campaign in progress with Major General Philip B. Fleming of the Federal Works Agency heading up the President's safety committee. One of the recommendations closely affecting road contractors is that for wider highways to provide a margin safety for automobile traffic.

Claude C. Blair, president of the Paving Brick Institute, who stated recently that increasing the width of the thousands of miles of existing 18- and 20-foot roads will reduce frequency of accidents and lower death toll which has been growing by leaps and bounds since wartime restrictions were imposed on motoring.

"Fully half of the country's most frequently travelled roads and highways are too narrow for present day high-speed requirements, according to recent surveys. Some of the narrow pavements are in such bad condition that they should be entirely rebuilt, but a good portion can be made safe by adding strips on one side or both sides."

Enhance Visibility

Blair shows also the similar benefits to be gained by widening narrow streets in cities and towns. This is especially true, he points out, in downtown districts where parking at the curb narrows the usable width of the pavement.

"In addition to increasing the width of highways, motoring travel can be made safer by eliminating sharp curves and removing obstacles which reduce visability at points where roads curve," Blair's observations continued. "More gradual slopes and wider bridges also are needed on many roads.

Education Important

"The rising accident rate can be halted and the number of accidents and fatalities can be cut sharply by building safety into highways and continuing to educate motorists to follow safer driving practices."

#

AIA HONORS HOLDEN, BUILDING AUTHORITY

The Northern California chapter of the American Institute of Architects has called a special luncheon meeting to honor Thomas S. Holden, president of the F. W. Dodge Corporation, who will be in San Francisco on Wednesday, Mar. 5. It will be held in the private dining room of the Marine Memorial Building.

Holden will address the architects on "New Architectural Horizons". He is a nationally-known authority on building statistics and trends.

#

NORTHERN CHAPTER OF AGC HAS NEW OFFICE

Members and friends are invited to visit the new quarters of the Northern California Chapter of Associated General Contractors in the Humboldt Bank Building, 785 Market Street.

The organization's telephone number remains the same—GArfield 7107.

OKAY LEGISLATIVE STUDY OF WATER

Insisting that temporizing must end in settling California's acute industrial waste and sewage disposal problems, the California State Chamber of Commerce has endorsed Assemblyman Randall F. Dickey's resolution to create a legislative fact-finding interim committee to study water pollution and recommend a plan for unified state control.

James Mussatti, general manager of the State Chamber, announced the policy today. Dickey's measure, House Resolution No. 27, creates an adequately financed interim committee to exhaustively study problems of water pollution resulting from sewage and industrial waste disposal.

GROOVER AND I

PACKAGED PROPAGANDA

Last month President Truman got his name in the papers by an off-the-record refusal to endorse "National Cat Week".

☆ ☆ ☆

The reason became apparent when, last week Spring Was Busting Out All Over with "Brotherhood Week". This package deal in propaganda was presented some time ago and time-fused to explode concurrently with the announcement of further International Relief.

☆ ☆ ☆

Of course, we are now dealing only in hundreds of millions where we were recently tossing billions around. But the strategists realized that we would not again go for the sucker ride we were given on UNRRA.

☆ ☆ ☆

The next deal, involving relief and the International Refuge Organization will only cost us an initial take of 350 million.

☆ ☆ ☆

It is explained that "this is only 4/7 of the amount required, and it is felt sure that other Nations will contribute the remainder. (Helzbelz—4/7—MORE than half, isn't it?)

☆ ☆ ☆

We were supposed to pay about 70% of UNRRA—the boys admit we paid 80%—and as I read it we paid the entire amount! We made direct or compensating loans to every other nation joining in that deal.

☆ ☆ ☆

This squawk isn't against the principle of helping needy people. I'm in favor of it. In fact, we may eventually get around to helping ourselves. I'm protesting the organized propaganda technique used.

☆ ☆ ☆

I'm sharpening a spear for one effective" of this relief deal — that we lower the immigration bars.

#

STATE INDUSTRY GROWS

Records of local chambers of commerce indicate that nearly 1150 new manufacturing plants [were built or announced in California during 1946, with a capital investment of $153 million, the State Chamber of Commerce announced today.

Factory expansions of existing firms totaled about 984 with a capital investment of $171 million in 1946. The unprecedented volume of new factory location activities rose again during January, with numerous national firms seeking industrial sites, the State Chamber said.

'Industry Has Little or No Control Over Many Cost Factors; Prices Going Up'

CHICAGO.—The construction industry will build 960,000 homes during 1947, Robert P. Gerholz, past president, National Association of Home Builders, predicted here yesterday.

In a keynote address before the NAHB's 1947 annual convention and exposition at the Stevens Hotel, Gerholz appealed to fellow builders to set their sights to that objective.

Many cost factors over which the industry has had little or no control, Gerholz asserted, gradually are forcing builders to price their houses out of the market which admittedly exists.

"It looks as though we will have to work in our shirt sleeves to find new ways to build better and cheaper homes," he said.

Declaring that this is the first time since NAHB was organized that the industry is practicaly free from controls, Gerholz appealed to his hearers to continue to fight to rid the industry of the remaining government controls.

Addressing the NAHB Tuesday, Frank Creedon and Raymond M. Foley assured the industry that remaining government controls over housing will be maintained to avoid a "mad scramble for scarce materials and labor." He said both the $50 million weekly limit on commercial building and the 1500 square foot limit on the size of houses, etc., will be continued.

"More than ever home builders must maintain quality," he continued.

Outlining means for stimulating home production, Gerholz offered the following suggestions:

1. Volume production through the industry;
2. Eliminate the 1500 sq. ft.;
3. Remove rent ceilings on new houses;
4. Permit new houses to be sold to any buyer upon completion;
5. Insist that veterans be given the first chance;
6. Remove price ceilings on starts made prior to Dec. 24;
7. Permit 608's to include individual units built for rent for which land is available.

"The above changes alone," Gerholz asserted, "would immediately increase the number of starts by at least 20 per cent.

What NAHB Needs

Comenting on his interpretation of free enterprise and how that system affects the construction industry, Gerholz said:

"NAHB must have a long-range comprehensive, constructive peacetime housing program. Home builders of the country must be geared to the tremendous postwar market, must prepare a program that will meet the needs of this great republic.

"For five years we have been fighting to get our business back. Now let's fight to keep it. We'll never throw in the towel in our fight against public housing."

Barring drastic price increases or prolonged strikes, the homebuilders should establish a new all-time high in 1947, the past president stated.

Viewing in retrospect, contemplated housing legislation, Gerholz declared "we should shun the fantastic and cockeyed economic theories and foreign ideologies incorporated in the WET bill, which have brought one major European nation after another to the brink of collapse," he concluded.

In another addres Paul H. Griffith, national commander, American Legion, asserted that upon conclusion of a national survey the legion found that many communities were not producing rental housing and housing for sale simply because of lack of know-how to proceed with construction programs.

Approving the present national housing plan, in principle, as it parallels a plan previously offered by the Legion, Griffith said that the Legion is implementing the

(Continued on Page 8)

PT&T Developments Lead Week's List of Industrial Approvals

Sixty major industrial construction projects, totaling $2,105,591 in the northern California area were approved by Civilian Production Administration during the week ended February 20.

Approvals include a $360,000 plant for production of soluble coffee by Nestle's Milk Products at Ripon; a $186,000 plant for Dewey & Almy Chemical Company, manufacturers of can end lining compounds, at Bayshore Blvd. and Davis St., Mt. Eden Township, Alameda County, to replace present facilities condemned by the State for highway purposes; a $128,600 loing dock at Stockton for the Santa Fe Railway; and a $45,000 Garden City Pottery Company plant at San Jose for the manufacture of terra cotta water coolers.

Other principal approvals were Pacific Telephone & Telegraph Co. central offices at Marysville to cost $311,000, at Watsonville to cost $288,000, and at Turlock to cost $134,000; classroom additions to cost $67,000 by Reedley Joint School Districts at Reedley; $85,000 for bank alterations by Capital Company at Sacramento; and a $50,000 elementary school at Concord for Clayton Valley School District.

Denied as deferrable were 43 projects involving $962,073 estimated cost.

#

Month's Brick Rate 37% Over Last Year

WASHINGTON.—Brick output during January of 1947 exceeded production of January a year ago by 37 per cent, the Census Bureau announced today.

In spite of this encouraging showing over the early part of 1946, the production of 370 million units this January was three per cent less than in December of 1946. The seasonal decline was not so noticeable during the past month, however, as it had been during the war years.

While January production of brick lagged three per cent behind the previous month, the figure for structural clay tile was announced as 112,000 tons. This product thus was off one per cent from the December, 1946, run. At the same time, the January structural clay tile production was 60 per cent over that of January, 1946.

According to Roy A. Shipley, president of the Structural Clay Products Institute, the manufacture of both brick and tile products has been discouraged in many plants by the freight car shortage and government restrictions on non-residential building. The non-housing construction normally uses more than half the industry's total output, he said.

The output of both brick and tile has exceeded for more than a full year the rate needed to meet current home building requirements," Shipley said.

#

PROPOSE RENT RISE

WASHINGTON.—The senate banking committee Wednesday voted to permit a 10 per cent rise in rents and to transfer all rent controls from OPA to "any court". The vote was 9 to 2.

FHA PERMITS ISSUED

SAN FRANCISCO.—The Federal Housing Administration, D. C. McGinness, district director, 315 Montgomery St., San Francisco, has announced the following list of permits granted by the above office for the construction of dwelling or rental units (other than for owner-occupancy) in the San Francisco area for applicants as noted:

2 UNITS—Fresno; Ed Beecham, Rte 11, Box 1113, Fresno.
4 UNITS—Richmond; Thomas Steinberg, 1810 Virginia St, Berkeley.
1 UNIT—San Francisco; August Cavia, San Francisco.
1 UNIT—Fresno; Albert M King, 625 Palm Ave.
21 UNITS—San Anselmo; San Francisco Theological Seminary, 140 Bolinas Ave, San Anselmo.
4 UNITS—San Bruno; Dunlap & Magnuson, 904 Crystal Springs Rd, San Bruno.
1 UNIT—San Leandro; Joe Fache, 470 Hepburn St, San Leandro.
2 UNITS—El Cerrito; Mark Valory, 2134 Parker St, Berkeley.
2 UNITS — Sacramento; Myron W. Weimore, 2216 23rd St, Sacramento.
7 UNITS—Stockton; F S Berry, 1973 S Tuxedo, Stockton.
1 UNIT—Corning; Landers & Hendrix, Box 91, Corning.
1 UNIT—Fresno; Ray Allsion, 4223 Lyell Ave, Fresno.
1 UNIT—Healdsburg; Carl B Young, 433 Sherman, Healdsburg.
2 UNITS — San Francisco; Henry Doelger, San Francisco.
64 UNITS — Stockton; Golden Gate Construction Co, 2254 E Poplar St, Stockton.
10 UNITS—Salinas; P H Haley, 287 Noice St, Salinas.
1 UNIT—Palo Alto; E Carlson, 2202 Louis Rd, Palo Alto.
3 UNIT—Oakland; Adams & Carlson, 98 6MacArthur Blvd, Oakland.
2 UNITS—Carmel; General Engineering & Construction Co, Box 45, Carmel.
2 UNITS — Oakland, John Militelo, 5825 Fremont St, Oakland.
1 UNIT—Stockton; C E Smith, Rte 2, Box 216C, Stockton.
1 UNIT—Stockton; I R Dryden, Rte 2, Box 279M, Stockton.
2 UNITS — San Carlos; Nelson M Welbanks, 1355 Whipple Ave, Redwood City.

Schedule A (f.o.b. truck and/or railroad cars at Rutherford, Calif.):
(1) approximately 7500 lin. ft. 36-in. I.D. x ¼-in. (i.e. 36¼-in. O.D.) fusion welded sheet steel pipe, double dipped only:
(a) 282 sections each 30 ft. long, one end belled, one end plain, both ends designed for field welding, per ft.;
(b) 14 sections each 20 ft. long, one end belled ,one end plain, both ends designed for field welding, per ft.;
(c) 7 sections each 10 ft. long, one end belled for field welding, the owner end to take a long sleeve Dresser coupling, per ft.;
(d) 7 sections each 10 ft. long, one end plain for field welding, the other end to take a long sleeve Dresser coupling, per ft.;
(2) 2 each manifolds complete;
(3) 3 each 6-in. hat flanges to be furnished and welded on pipe;
(4) 4 each 36-in. pip eflanges to be furnished and welded on pipe;
(5) 7 each long sleeve Dresser couplings for 36½-in. O.D. pipe;
Schedule B (f.o.b. truck and/or railroad cars at Napa, Calif.):
(1) approximately 97,000 lin. ft. 24-in. I.D. x ¼-in. (i.e. 24½-in. O.D.) fusion welded sheet steel pipe, double dipped and wrapped:
(a) 3130 sections each 30 ft. long, one end belled, one end plain, both end designed for field welding, per ft.;
(b) 46 sections each 20 ft. long, one end belled, one end plain, both ends designed for field welding, per ft.;
(c) 97 sections each 10 ft. long, one end belled for field welding, the other end to take a short sleeve Dresser coupling, per ft.;
(d) 97 sections each 10 ft. long, one end plain for field welding, the other end to take a short sleeve Dresser coupling, per ft.;
(2) specials;
(a) elbows, 4 each 90-degree, 3 each 40-degree and 26 each 30-degree;
(b) 1 each 36x24-in. tapers;
(3) hat flanges to be furnished and welded on pipe;
(a) 282 hat flanges to be furnished and welded on pipe;
(b) 20 each 12-in. hat flanges to be furnished and welded on pipe;
(c) 97 sections each 10 ft. long, one end belled for field welding, one end to take a short sleeve Dresser coupling, per ft.;
(d) 97 sections each 10 ft. long, one end plain for field welding, one end to take a short sleeve Dresser coupling, per ft.;
(2) specials;
(a) elbows, 4 each 90-degree, 3 each 40-degree, 26 each 30-degree;
(b) 10 each 30x30-in. tapers;
(3) hat flanges to be furnished and welded on pipe;
(a) 50 each 6-in. hat flanges to be furnished and welded on pipe;
(b) 20 each 12-in. hat flanges to be furnished and welded on pipe;
(4) 10 each 36-in. pipe flanges to be furnished and welded on pipe;
(5) 97 each short sleeve Dresser couplings for 36½-in. O.D. pipe.
(Schedule B, item 1 (a) will be amended to permit the submission of a proposal covering 4962 sections each 20 ft. long in lieu of 3130 sections each 30 ft. long.)
Specifications obtainable from the office of the city clerk or from the office of Consulting Engineer A. Kempkey, Balboa Bldg., San Francisco, Calif.; no deposit required.

Recall Wage Demands

(Continued from Page One)

"3. To meet the demand of government agencies for their postwar construction program without further cost increases.

"FURTHER BE IT RESOLVED, that copies of this Resolution be forwarded to all Contractors Associations and interested governmental agencies."

The meeting considered the advisability of having the Associated General Contractors of America do the negotiating for the Northern California Agreements. All the speakers were agreed that the Carpenters Agreement had been well carried through with stable conditions despite a past considerable shortage of carpenters in some of the areas. From reports made, it developed that there was a fair supply of carpenters obtainable at this imediate time—and a speaker attributed this fact to existing CPA controls under which commercial construction was still being held back.

Some unfavorable comment was made on the failure of cement finishers to give full cooperation to general building contractors and home builders in the area and Mr. Hague advised that it was hoped to further unify these conditions under the new agreements, pointing out that these State-wide agreements had only been in effect for one year but were heartily supported by the national officers of the unions and would no doubt become increasingly enforced documents in the future. Harold W. Smith, President of Central California Chapter, A.G.C., was present and expressed appreciation of the Chapter at the cooperation which has always been extended by the general building contractors and home builders through the Sacramento Builders' Exchange. He urged continued support of the Northern California Agreements and state-wide cooperation among the industry.

Wm. D. Coughlin of Northern California Chapter, A.G.C., spoke on the value of the existing Northern California Agreements with the various unions employed by general contractors in all lines. He stated these agreements were working out quite well and urged that they be supported. He pointed out that the Building and Construction Trades Council of Sacramento-Yolo Counties was not living up to the National Rules of the Building Trades Department of A. F. of L. when they approved wage increases for their several crafts without collective bargaining having taken place.

Harry Pefley, Manager of the Associated Home Builders of Sacramento, stated the home builders were well satisfied with the Northern California Carpenters Agreement in particular — and others present commented favorably on the Northern California Agreements as being a move in the right direction. The Sacramento contractors and home builders stated they would like to have a representative present with the Associated General Contractors when negotiating and entering into new agreements with the Carpenters, etc. In conclusion, the following motion was unanimously carried:

"That those present go on record that the Associated General Contractors of America, Inc., shall be bargaining agents for union agreements covering Northern California and the Sacramento area in particular."

Mr. Hague reported that not only the general building contractors and home builders in the Sacramento area, but also all the members of the two A.G.C. chapters had been notified of increased wages demanded by the Sacramento-Yolo BTC,—reporting these demands to be as follows: Carpenters to be increased from $1.75 to $2.25 an hour to take effect 90 days after Feb. 8; Laborers to be increased from $1.25 basic wage to $1.50 90 days after Jan. 30; Cement Finishers to be increased from $1.87½ to $2.50 90 days after Feb. 18.

In this connecton, Mr. Hague read replies from Central California Chapter, A.G.C., calling attention to existing agreements arrived at by collective bargaining with all three of the above trades and pointing out that the Building and Construction Trades Council of Sacramento-Yolo Counties had no right to increase wages of crafts under agreement in this unauthorized manner. He stated that the By-Laws of the Buildings Trades Dept. of A. F. of L., under Section 34, provided "demands for increased wages or reduction of hours, must be submitted to the local Council for endorsement after approval of the National or International Union interested has been obtained."

NAHB Meet

(Continued from Page One)

housing program on two broad fronts.

The first is the vast network of 16,000 American Legion posts, and the second is the Congress of the United States, he said.

The Legion will sponsor legislation to stimulate the housing program now under way, he asserted, adding that the legislation will provide that government agencies play their constitutional role of co-ordination rather than direction.

Critical of some theorists' belief that the federal government should accomplish the housing of all veterans through usurpation of the entire responsibility and entire promotion of veterans' housing, Griffith said that the Legion's single aim is to eliminate the shortage without further intolerable delay.

The volume of construction can not reach the $20 billion level which has been generally predicted for this year unless restrictions on non-residential construction and on housing construction are relaxed or removed in the immediate future, Douglas Whitlock, chairman of the Building Products Institute, stated Tuesday at the annual convention of the National Association of Home Builders.

"Every week that the $50 million weekly limitation on non-housing construction is kept in effect reduces the possibility that 1947 goals can be met," Whitlock said.

POSITIONS OPEN

NEW Improved SCOOPMOBILE
Five NEW IMPROVEMENTS!
1 NEW "Shovel Action" BUCKET
A full load . . . plus! No more ramming into stock pile. Simply ease SCOOPMOBILE into pile and lift bucket with a full load . . . easier on the machine . . . faster, fuller!
2 HAND LEVER CONTROL
Two hand levers at operator's fingertips give positive, flexible control of bucket action. No more trip rope and "shock dumping" from unhandy elevations.
3 DISCHARGE ACTION
Full loads can now be discharged from very top of rack. (Up to 8 ft.) Partial loads can be discharged by closing bucket at any height while pouring.
4 NEW COUNTER BALANCE
The new SCOOPMOBILE keeps its feet on the ground! New counter balance (optional) is easy to attach to rear of Scoopmobile to accommodate heavy loads at top of rack.
5 CONTROLLED DIGGING ACTION
Improved double sheaves and mechanical improvements give entirely new control of digging angle. New design of bucket means NO spillage over rough terrain.

PLANS and Speculations

Candidates for state positions as associate estimator of building construction ($365-$445) will be given exams. May 10; and for senior transportation operations supervisor ($365-$445), May 3.

oOo

Idaho's Senator Taylor has announced he will introduce a hill to provide a billion dollars in federal aid to local housing authorities for construction of low - cost rental housing.

oOo

WAA today announced that the Department of Justice has approved sale of the Big Inch and Little Inch pipe lines to the Texas Eastern Transmission Corporation for $143,127,000.

oOo

A recently allocanted fund of $59,250 for improvement of Mt. Diablo (yet to be approved by the Legislature) would be used for improvement of the service area ($15,000); of camp units ($14,500); for sewerage projects ($3500-; for two comfort stations ($6000); for water systems ($10,750); for road repair ($5000); for grading and minor repairs ($3000); for power lines ($1500).

oOo

A survey is being made in **Orland** leading to organization of a community hospital.

oOo

California motorists could finance a toll express highway system costing a billion and a quarter dollars and construction could start almost imemdiately, according to the Associated Farmers of California.

oOo

Exams. will be given candidates for a state position as junior physical testing engineer on April 12. A college major in civil engineering and two years' professional experience is required.

oOo

The San Francisco police commission has unanimously stated opposition to the state's proposed twin to the present Bay Bridge on grounds it "would aggravate the existing traffic congestion in downtown San Francisco."

oOo

Governor Warren's special housing committee has recommended elimination of federal rent ceilings on newly constructed multiple rental units.

oOo

County supervisors of the **San Joaquin Valley** recently met to study the long-range state highway program based on the Collier recommendations. The state association of county supervisors will meet at Sacramento Wednesday through Friday, Feb. 26-28.

oOo

P. T. & T. has started a $30,000 cable project extending from **Mill Valley** to the peak of Mt. Tamalpais and down the west side of the mountain to open wire leads to Bolinas and Stinson Beach.

oOo

Formation of an improvement district at **Walnut Creek** was authorized by the city council at its last meeting to give the city legal power for forcing installation of needed sidewalks and similar improvements.

Did You Know That . . .

Anticipating the growth of the Sacramento Valley, **L. D. Reeder Company** of San Francisco, has opened what may be the first office and warehouse in that territory handling acoustical correction material. The firm is authorized contractors for Armstrong Cork Company's complete acoustical line of treatment materials and resilient floor coverings in northern California. Edward P. Clark is manager of the new Sacramento branch.

oOo

Gerth-Pacific Advertising Agency, San Francisco and Los Angeles, announces the opening of a Seattle office at 931 Republic Building. Jean Hadley, former manager of the Seattle office of the Manson-Gold Agency, has been appointed manager. Prior to coming to the west coast, Miss Hadley was active for more than seven years in radio and agency work in the twin cities, having served as president of the Women's Advertising Club of Minneapolis.

65% of Dwellings Started in 1946 Were Completed

WASHINGTON. — Housing Expediter Frank R. Creedon's monthly report for January, issued today, states that 1,003,600 dwelling units were placed under construction in 1946 and that 661,900 units were completed.

Final "box score" for the year:

Total units begun	1,003,600
New permanents	670,900
Conversions	64,500
New trailers	48,000
Temporaries	191,000
Other public bodies, schools	29,200
Total units completed	661,900
New permanents	453,800
Conversions	45,300
New trailers	48,000
Temporaries	101,900
Other public bodies, schools	12,900

The 1,003,600 units begun in 1946 compares with the original goal of 1,200,000 units set a year ago for the Veterans Emergency Housing Program in 1946. No goal had been fixed for completions.

Dollar value of new housing in 1946 was nearly five times as large as in 1945, and the last quarter of 1946 exceeded the first quarter of 1946 in this respect by 123 per cent. Housing put in place during the year was 96 per cent of the total for all new construction, as against 16 per cent for 1945. During the 1934-41 period, housing averaged 30 per cent of all new construction.

#

BECHTEL BROTHERS TO BUILD 600 MILES OF ARABIAN PIPELINE

Bechtel Brothers of San Francisco have contracted to build 600 miles of more than 1,000 miles of pipeline extending from the Arabian oil fields near Ras Tanera to the Mediterranean, it was announced today. The local firm also will build four pump stations at the eastern end.

Trans-Arabian Pipeline Co. said that line surveys are still in progress and no costs have been set, although industry reports have it that the figure is $100 million.

An order for 980 miles of pipe has been placed with Consolidated Steel Company of Los Angeles.

NEW CONCRETE SUPPLY HOUSE IN EAST BAY

Gil Ballou, former manager for an equipment company in Oakland, today disclosed the formation of a new company handling concrete accessories. It will be known as the Superior Concrete Supply Co., and has offices at 321 Sixth Street in Oakland.

Ballou said that the company has just received a car load of snap ties and re-inforcing accessories, and more are on the way. The firm features its engineering service to contractors, and furnishes form layouts and estimates on difficult forming jobs.

#

SANITARY DISTRICT

Establishment of a sanitary district at **Warm Springs** will be discussed by local chamber of commerce committees and state engineers.

GROOVER AND I

LUMBER AVAILABLE

Hannaford & Talbot, dealers in investment securities frequently interest themselves in items of value other than stocks and bonds.

☆ ☆ ☆

In the basement they have just discovered a stock of new lumber, never used. The planks are air-cured, vertical grain clear, 8/4s and cut to lengths as follows:

☆ ☆ ☆

RESOLVED: To support the **American principles of Constitutional Government; To restrain the growth of bureaucracy; To encourage enterprise and to safeguard the industries of the country; To abstain from foreign entanglement; To encourage stability to the shaken Federal Finances by diminishing the oppressive burden of rapacious taxation; By maintaining the solvency of the dollar; By stopping the deficits which are ruinously augmenting the national debt.**

☆ ☆ ☆

Belden S. Gardner of "H & T" who has some old-fashioned ideas regarding "values", states these planks would make a good Republican platform for 1948—in fact, they were cut to measure:

☆ ☆ ☆

They were the resolutions in the Democratic platform for 1932.

#

WOMEN VOTERS BACK $100 MILLION FUND FOR LOW RENT HOMES

SAN JOSE.—The Northern Conference of the California League of Women Voters meeting here have endorsed a series of housing proposals including a state constitutional amendment to set up a $100 million fund for low rent housing projects.

The CLWV also pledged backing to grants for local low rent housing authorities and standby state rent control should federal control be abandoned.

#

STATE TRYING VAINLY TO RETURN VETS' MONEY

The State Department of Veterans Affairs has nearly half a million dollars to refund to 1500 California veterans of World War I, but so far has not been able to locate them to give them the money.

The refunds, averaging $287.73 per veteran, represent a "loading" charge, which was collected for many years as part of the down payment on property purchased for veterans by the state under the California Farm and Home Purchase Program.

Purpose of the charge was to build up a reserve fund to meet possible contingencies in operation of the program. Far from losing money, however, the department built up a reserve of nearly $10 million over a 25-year period while assisting more than 15,000 World War I veterans to obtain homes and farms.

#

REVOKE VHP-2

WASHINGTON. — Veterans' Housing Program Order 2, issued last July to channel hardwood lumber into flooring for veterans' homes, will be revoked effective March 1, the Civilian Production Administration announced today. The order limited deliveries and use of beech, birch, hard maple, oak and pecan for housing purposes other than flooring.

Channeling now is unnecessary because production of hardwood lumber is at an annual rate of approximately 10 billion board feet, of which two billion board feet are in grades suitable for flooring. This is double the present capacity of the hardwood flooring industry.

Senate Banking Committee Recommends 10% Rent Hike; Fleming Pleads OPA Funds

WASHINGTON.—The senate banking subcommittee this week began work on legislation designed to extend rent control beyond the present expiration date of June 30.

Working over a multitude of various proposals that range from complete discontinuance of the law to its retention in present form, the committee unit heard one of its members, Senator John J. Sparkman of Alabama, urge that suggestions for a nation-wide boost in rent ceilings be scrapped. He proposed the substitution of a system whereby home towns would fix their own rent figures.

Advocate WET Bill

His recomendation coincides with a growing clamor for placing the rent control machinery entirely in the hands of states or their municipalities.

While the subcommittee hearings were in progress, General Philip B. Fleming, Federal Works administration and head of the Office of Temporary Controls, appeared before a senate appropriations subcommittee and pleaded for funds to keep the subordinate Office of Price Administration in business.

The House has approved a measure to recall $9 million from OPA operating funds, a move that would leave the agency bankrupt and automatically take its duties out of the temporary agency class. These duties would, of course, be transferred to some other agency.

Meanwhile, the Citizens Housing Council of New York City has called for support of a program of federal, state and municipal action that can result in new housing construction this year.

The Council's plan would include passage of the subsidized housing provisions of the Wagner-Ellender-Taft bill. In addition, it favors retention of rent controls on existing housing, continuation of effective allocation of materials, and the control of non-residential construction.

These measures were proposed as an effective stimulus to the rate of new housing construction. According to the New York Council, homes produced "at the current rate" can make only a dent in existing shortages.

Need Very High

Two - thirds of the residential units needed in the New York area are of a type that should rent for $50 a month, or less.

Some relief has come from the small percentage of homes completed in the last year, a Council spokesman said, but the prospect for the citizens of modest means are actually less promising now then the hope held out to them by public officials last June.

This spokesman continued:: It is heartwarming to see housing going up, but realistic officials will compare the small amount now underway or in prospect with the huge need and will recognize that the housing projected makes a minor dent upon the shortage. It would be comforting if we could rest upon the assurance that 'business as usual' would supply the deficiency. But 'business as usual' has not for a generation been able to supply adequate new housing for the lower income groups and at the present time it cannot (in New York) supply housing to rent for much under $80 a unit. Even the investment institutions with partial tax exemptions, purchasing materials in the existing market, cannot meet the $50 figure."

Okay 10% Figure

Carl S. Stern, chairman of the council's housing emergency committee, said the New York City Housing Authority estimated that it could construct housing projects without a cash subsidy in which rentals would average slightly under $50 per unit a month. With a cash subsidy the Authority says it can supply housing for lower income groups to rent for an average of $32 per unit, he added.

The Senate subcommittee late Tuesday voted a recommendation for a legal maximum rent ceiling 10 per cent above that of December 31, 1946. This would go into effect (if it were approved by the

(Continued on Page 7)

Skilled Workers Is Prime Need As Tile Production Moves Up

Floor and wall tile, for which California's building boom has created an unprecedented demand, will be available in this state at the rate of more than 1 million square feet a month within the next 30 days, Richard F. Bailey, west coast advisory committee member of the Tile Council of America, predicted today.

Bailey, a Hynes and Los Angeles tile manufacturer, said a statewide survey by the Tile Council indicated installation of the tile would require the services of approximately 1250 skilled mechanics, many more than are on hand now to meet the situation.

Apprenticeship training classes being conducted one night a week at the Wiggins Trade School, Los Angeles, and similar programs about to start in San Francisco and other population centers, Bailey explained, will relieve some of the pressure, but training programs are urgently needed thruout the state.

Meantime, a local director of a national trade school, which has some 1300 students in non-building trades' courses in Los Angeles alone, is exploring the feasibility of establishing concentrated, five-days-a-week classes for aspiring tile setters, plasterers and bricklayers, majority of whom would be former GI's. The course would last between 15 and 24 weeks.

Tile, produced at the average yearly rate of more than 74 million square feet last month, Bailey said, will keep in step with the record home-building pace expected to erect more than a million homes this year. Tile availability in California was expected to rise monthly.

The Tile Council's west coast spokesman quoted Department of Commerce figures indicating floor and wall tile manufacture for the least year reached 61,528,000 sq. ft., 24,501,000 sq. ft. more than in 1945, or an increase of 66 per cent.

The 1946 output will be exceeded by about 30 million sq. ft. in 1947, according to Tile Council estimates," Bailey said. "This has been made possible through improvements in production methods, installation of new machinery in many plants and re - opening of some plants closed during the war period."

December volume of 5,114,000 sq. ft., 1,000,000 more than 12 months ago, was achieved despite a strike that tied up one of the largest plants during November and December, it was pointed out.

California firms in the Tile Council, whose members manufacture more than 93 per cent of the nation's floor and wall tile, include Gladding, McBean & Co., Pomona Tile Co., Pacific Tile & Porcelain Co., Pacific Clay Products, and General Tile Company.

STATE FAIR REPAIRS TO COST $438,625

SACRAMENTO—Plans to spend $438,625 for repairing and renovating the buildings on the state fair grounds were announced today by Ned Green, secretary-manager of the California State Fair which will be resumed this fall after a lapse of five years.

No major buildings will be constructed, but more than 40 repairing, painting and minor construction projects ranging from $500 to $40,000 are involved.

CPA PERMITS GRANTED

SAN FRANCISCO. — The Civilian Production Administration, A. J. Grier, regional director, 1355 Market St., has announced the following permits granted for construction of commercial and industrial buildings in the San Francisco area:

FEBRUARY 25, 1947

COMMUNITY bldg., $40,000; 19th Ave and Eucalyptus, San Francisco, owner, College City Lakeside Presbyterian Church, Ocean and 19th Aves., San Francisco.

MEAT processing plant, $20,000; nr. Watsonville; owner, Watsonville Meat Co., Box 839, Watsonville.

ALTER bldg. for State Div. of Arch., $5815; 1120 N St., Sacramento; owner, State of California.

CHURCH, $35,000; Walnut Creek; owner, First Baptist Church, Walnut Creek.

ALTER elevator penthouse, $37,500; 225 Bush St., San Francisco; owner, Standard Oil of Calif., 225 Bush St., San Francisco.

SCHOOL, elementary, $144,000; Fitzuren Road, Antioch; owner, Antioch-Live Oak Unified School Dist., Antioch.

CENTRAL office, $245,000; Douty and Irwin, Hanford; owner, Pacific Tel & Tel Co, 140 New Montgomery St., San Francisco.

COMMERCIAL bldg., $25,500; 989 41st St., Oakland; owner, Calif. Linen Supply Co., premises.

DRUG Store and offices, $6500; 3800 E 14th St., Oakland; owner, J P Dean, Route 1, Walnut Creek.

ICE CREAM plant, $21,420; 800 P St., Fresno; owner, Swift & Co, South San Francisco.

FROZEN food locker, $9000; RDF No 1, Box 1395, Elk Grove; owner, Frank Schulz, RDF 1, Elk Grove.

EXTEND office space, $9500; 351 California St., San Francisco; owner, Balfour Bldg. Inc., premises.

ALTER bldg. for restaurant, $25,000; SW Cor City and Leidesdorff, San Francisco; owner, Buieh Bros., 545 Clay St., San Francisco.

ENLARGE and fireproof press box, $9000; 16th and Bryant Streets, San Francisco; owner, S. F. Baseball Club, Inc.

ALTER bank bldg., $39,500; 1455 Stockton St., San Francisco; owner, Capital Co., 1 Powell Street, San Francisco.

RESTAURANT, $9950; 734 South P St., Tulare; owner, Cecil W. Berkley, 734 South P St., Tulare.

RESTAURANT, $5500; Highway 33; owner, H. C. Kisling, P. O. Box 605, Firebaugh.

9-10— EDUCATIONAL BUILDINGS

2/28/47 • 9
Bond Issue Approved Feb. 25 in Amount of $118,000
School Addition
ROSS, Calif., Marin County. Ross Grammar School.
Owner—Ross School District, Dr. W. Scott Poland, Louis H. Carlson and Dudley F. Miller, board members.
Includes 3 classrooms, all-purpose room and extension of playground facilities.

11— HOSPITALS

2/28/47 • 11
Construction Under Way
Sanitarium (Addition) Cost $100,000
MILLBRAE, Calif., San Mateo Co. Millbrae Sanitarium, 150 Hemlock Ave.
Owner—Millbrae Sanitarium, Dominick Muzzi, owner-manager, 150 Hemlock Ave, Millbrae, Calif.
Architect—James H. Mitchell, 407 Sansome St., San Francisco, Calif.
Concrete and steel; includes quarters for 52 patients in rooms of one-, two- and three-patient capacity.
Contractor—S. J. Amoroso Construction Co., 2100 Oakdale Ave., San Francisco, Calif.

12-13— INDUSTRIAL BUILDINGS

2/28/47 • 12
Architect Taking Bids From Selected Contractors—Due March 18, 3:45 P. M.—Plans on File in Builder Office—Bidders Figuring
Manufacturing Plant (Oil Burners) Cost $170,000
OAKLAND, Calif., Alameda County. 940 Arlington St.
Owner—S. T. Johnson Co., J. C. Johnson, president, 940 Arlington St., Oakland, Calif.
Architects—Clarence O. Peterson and Wendell R. Spackman, Balboa Bldg., San Francisco, Calif.
Structural Engineer—John A. Blume, 68 Post St., San Francisco, Calif.
Mechanical Engineer—James Gayner, Balboa Bldg., San Francisco, Calif.
Reinforced concrete, one-story and part mezzanine (100x250'), includes loading docks.
The following contractors are figuring plans:
Barrett & Hilp, 918 Harrison St., San Francisco, Calif.
MacDonald, Young & Nelson, Inc., 127 Montgomery St., San Francisco, Calif.
Harry K. Jensen, 4024 MacArthur Blvd., Oakland, Calif.
Stolte, Inc., 8451 San Leandro St., Oakland, Calif.
H. H. Larsen, 64 South Park, San Francisco, Calif.
Haas & Rothschild, 326 Merchants' Exchange Bldg., San Francisco, Calif.

2/28/47 • 12
CPA Permit Granted—Construction to Start as Soon as Possible
Manufacturing Plant (Soluble Coffee) Cost $300,000
RIPON, Calif., San Joaquin County. Genevieve and Meyenburg Sts.
Owner—Nestle's Milk Products Co.,

SUB - BIDS WANTED

General contractors desiring sub-bids on any job are invited to make known their requirements in this column. There is no charge for this service.

Cellular Structures For Slide Area, Vet. Adm. Pt. Miley: Bids Due Feb. 28 2:30 P. M.
Stolte, Inc., 8451 San Leandro St., Oakland (TRinidad 1064).
Erbentraut & Summers, 696 Pennsylvania St., San Francisco, Calif., (ATwater 2420)

Contract Awarded
Test Borings; Spec. 20,192 Cost $1,770
SAN FRANCISCO, Calif. Site of the proposed North Point sewage treatment plant near Bay St. and Grant Ave.
Owner—City and County of San Francisco, Department of Public Works, Room 282 City Hall, San Francisco, Calif.
City Engineer—Ralph Wadsworth, City Hall, San Francisco, Calif.
The work involves:
(1) 550 lin. ft. test borings 100 ft. or less depth in material other than rock;
(2) 50 lin. ft. test borings in rock.
Contractor—John N. Pitcher, 170 Moltke St., Daly City, Calif.

2/28/47 32
Sanitation Area Boundaries Set at Hearing Feb. 24—Upon Completion of Engineering Survey to Determine Cost, Proposal Will Be Submitted to Voters Within Area
Sewage Disposal System
EAST MODESTO, Calif., Stanislaus County. Board industrial tract and land north running to Beard Creek (Dry Creek) and extending south to Tuolumne River.
Owner—East Modesto Sanitation District (yet to be formed), c/o Stanislaus County Board of Supervisors, George Macomber, county surveyor; C. E. Eastin, county clerk, Courthouse, Modesto, Calif.
Preliminary plans were prepared by Sanitary Engineer Harry N. Jenks, 345 California Ave., Palo Alto, Calif., including sanitary and industrial sewer lines, a complete sewage treatment plant and a pretreatment plant for industrial waste.

33— BRIDGES

2/28/47 33
Bid Rejected
Bridge
KERN COUNTY, Calif., Across Kern River, about six miles southwest of Bakersfield.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Reinforced concrete slab bridge.

BRYANT RESERVOIR, CONTRA COSTA COUNTY

Low and Only Bidders
Bryant Reservoir; Spec. LS-379 Cost $76,941.20
CONTRA COSTA COUNTY, Calif.
Owner—East Bay Municipal Utility District, Room 406, 512—16th St., Oakland, Calif.
District Engineer—John S. Longwell
512—16th St., Oakland, Calif.
Prestressed concrete structure, 3,-000,000-gal. capacity.
Low Bidder—Elmer J. Freethy, 1432 Kearny El Cerrito, Calif., $76,941.20.
Work involves:
(1) 2200 c.y. excav. for reservoir;
(2) 2000 c.y. compacted backfill;
(3) 942 c.y. reinf. concrete;
(4) lump sum, installation of pipe, valves and fittings;
(5) lump sum, installation of ⅞-in square steel bands;
(6) lump sum, furnish and install drains;
(7) lump sum, install gunite cover on outside of reservoir wall;
(8) lump sum, furnish and install misc. steel work;
(9) lump sum, furnish and install reservoir bottom seal;
(10) 82,000 lbs bending and placing reinf. steel;
(11) 923 barrels furnish high early strength portland cement;
(12) 635 bbls. furnish portland cement;
(13) lump sum, furnish and install 1½-in. pipe railing.
Total bids submitted February 26 were:

Low and Only Bidders
Bridge and Approaches Cost $29,324
TULARE COUNTY, Calif. Across White River Sink, about 2 miles north of Earlimart.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Low Bidder—Wheeler Construction Co., 875 Cleveland St., Oakland, Calif., $29,324.
Work involves:
(1) 75 c.y. remove concrete;
(2) 75 c.y. struc. excav.;
(3) 330 c.y. ditch and channel excavation;
(4) 1,800 c.y. import borrow;
(5) develop water supply and furnish water equip.;
(6) 155 M. gals. apply water;
(7) 4 sta. finish rdwy.;
(8) 500 tons untreated rock base;
(9) 2 tons asphalt emulsion, paint binder and seal coat;
(10) 500 tons min. agg., plant mix surfacing;
(11) 27 tons pave asph., plant mix surfacing;
(12) 2 tons liq. asph. MC-2, prime coat;
(13) 155 l.f. timebr bridge railing;
(14) 155 c.y. Class A portland cement concrete;
(15) 540 l.f. furnish conc. piling;
(16) 24 cach drive piles;
(17) 28,500 lbs. bar reinf. steel;
(18) misc. items of work.
Total bids submitted February 26 were:
(A) Wheeler Construction Co., Oakland, $29,324.
(B) Thorsten & Dahl, Santa Monica, Calif., $36,205.
(C) Griffith Co., Los Angeles, Calif., $37,304.25.

Rent Hike

(Continued from Page One)

committee itself and passed by congress) on the first day of the first month after passage of the act.

Take It to Court

If this were made law, OPA's rent-controlling duties would end. Records and files would be transferred to the Commerce department and there be available to interested parties.

Tenants whose landlords raised rents above the legal maximum would go to court. The subcommittee recommended that landlords violating the ceiling be fined triple damages or $500, whichever is greater. The fine would be payable to the tenant.

That's how the matter stood as the consideration for new legislation passed from the subcommittee to the full committee.

TRAXCAVATE for PROFIT

The profitable machine on any job is the machine that keeps busy

The TRAXCAVATOR—front-end loader built by THE TRACKSON CO. and mounted on a "CATERPILLAR" diesel tractor—has been called "the busiest machine on the job" by many builders. It's the perfect machine for jobs that involve digging, loading, leveling, or backfilling, and for the handling and rehandling of materials.

HIGHLY VERSATILE
EASILY MOVED FROM JOB TO JOB

For information see your PETERSON REPRESENTATIVE *or call SWeetwood 5600*

37— RAILROADS, SUBWAYS & TUNNELS

2/26/47 37
Final Plans to Be Completed Within 30 Days Tunnel Cost $300,000
TOKETEE FALLS, Ore. Near Rosenberg.
Owner—California-Oregon Power Co., A. S. Cummings, president; John C. Boyle, general manager, 216 S. Main St., Medford, Ore.
Plans by engineering department of owner in collaboration with Public Engineering & Service Corp., 231 S. La Salle St., Chicago, Ill.
5600-ft. concrete-lined tunnel as the first phase of projected $4,000,000 hydroelectric development.

39—SEWERS

2/26/47 39
Owner Taking Bids—Due March 5, 2:30 P. M. (Unit Quantities) Outfall Trunk Line; Unit No. 4
LONG BEACH, Calif., Los Angeles County. From proposed pumping plant located at Reeves and Gaylord north on Fashion to near Hill St., Long Beach, Calif.
Owner—Los Angeles County Sanitation District No. 3, A. M. Rawn, chief engineer and general manager, 3rd floor, 1206 S. Maple Ave., Los Angeles, Calif.
Plans by owner.
Owner will furnish pipe.
The work involves:
(1) 3159 lin. ft. 54-in. centrifugal reinforced concrete pressure pipe (75 ft. of head, 1000-D loading) sanitary sewer with collars and cement joints, between Stations 251 plus 50 to 283 plus 09.14, complete in place;
(2) 586 lin. ft. 8-in, vit. clay pipe sanitary sewer, complete in place;
(3) 1 storm drain siphon structure including 2 manholes, the necessary pipe with concrete encasement, complete in place;
(4) 4 type "C" manholes, complete in place;
(5) 3 type "A" junction chambers, complete in place;
(6) 50 cu. yds. standard concrete bed to be placed where required;
(7) 200 tons of gravel bed to be placed where required under the pipe.
Specifications obtainable from the above office upon deposit of $5.00.

2/26/47 39
Owner Taking Bids—Due March 5, 2.30 P. M. (Unit Quantities) Joint Outfall B Sewer; Unit 1, Sec. 7
LOS ANGELES COUNTY, Calif. From Florence Ave., to Washington Blvd.
Owner—Los Angeles County Sanitation District No. 2, A. M. Rawn, chief engineer and general manager, third floor, 1206 S. Maple Ave., Los Angeles, Calif.
Plans by owner.
Approximately 16,000 ft. 57-in. and 63-in. reinforced concrete pipe.
The work involves:
(1) 997 lin. ft. 63 inch reinf. concrete pipe sanitary sewer between Stations 79 plus 87, 66 and 89 plus 63.09, complete in place;
(a) using centrifugal R. C. pipe, 1300 D loading;
(b) using precast R. C. pipe, 1300 D loading;
(2) 2731 lin. ft. of 63 inch reinf. concrete pipe sanitary sewer between Stations 60 plus 00.00 and 79 plus 87.66; 89 plus 63.09 and 97 plus 84.40 complete in place;
(a) using centrifugal R .C. pipe, 1200 D loading;
(b) using precast R. C. pipe, 1200 D loading;
(3) 1448 lin. ft. of 62 in. reinf. concrete pipe sanitary sewer between Stations 45 plus 42 and 60 plus 00, complete in place;
(a) using centrifugal R. C. pipe, 1000 D loading;
(b) using precast R. C. pipe, 1000 D loading;
(4) 24 linear feet of 57 in. reinf. concrete pipe sanitary sewer between Stations 121 plus 79 and 122 plus 03, complete in place;
(a) using centrifugal R. C. pipe, 250v D loading;
(b) using precast R. C. pipe, 2500 D loading;
(5) 1095 .in. ft. 57 in. reinf. concrete pipe sanitary sewer with collars and cement joints between Stations: 98 plus 98.00 and 109 plus 56.00; 144 plus 89.84 and 150 plus 55.27; 153 plus 50.00 and 157 plus 09.94 complete in place;
(a) using thick wall centrifugal R. C. pipe, 1800 D loading;
(b) using thick wall precast R. C. pipe, 1800 D loading;
(6) 2720 lin. ft. of 57 in. reinf. concrete pipe sanitary sewer between Stations: 121 plus 23.00 and 121 plus 79.000; 122 plus and 121 plus 79.00; 122 plus 55.27 and 153 plus 50.00 complete in place;
(a) using centrifugal R. C. pipe, 1500 D loading;
(b) using precast R. C. pipe, 1500 D loading;
(7) For approximately 5753 lin. ft. of 57 in. reinf. concrete pipe sanitary sewer between Stations 0 plus 00.00 and 45 plus 42.00; 97 plus 84.40 and 98 plus 98.00; 109 plus 88.60 and 121 plus 23.00 complete in place;
(a) using centrifugal R. C. pipe, 1000 D loading;
(b) using precast R. C. pipe, 1000 D loading;
(8) 21 standard manholes type "B", complete in place;
(9) 3 standard junction chambers type "B", complete in place;
(10) 100 cu. yds. of standard concrete bed to be placed where required under the pipe;
(11) 500 tons of gravel bed to be placed where required under the pipe.
Specifications obtainable from the above office upon deposit of $5, refundable.

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Engineer, Room 401, Public Works Building, Sacramento, California, until 2 o'clock p. m. Wednesday, March 19, 1947, at which time they will be publicly opened and read, in the Assembly Room of said building, for performing work in accordance with the specifications therefor, to which special reference is made as follows:
Pipe Line from the Rector Creek Reservoir to the Veterans' Home, Napa County, California
State Engineer's Estimate
Items included only in Plan 1
Item 1. 5980 lineal feet 18-inch No. 7 gage, asphalt dipped and asbestos felt wrapped welded steel pipe, in place.
Item 2. 9840 lineal feet 12 inch No. 10 gage, asphalt dipped and asbestos felt wrapped welded steel pipe, in place.
Item 3. Lump sum — Napa River Crossing, Station L/26 + 40 to L/28 + 00.
Item 4. Special connections at Sta L/59 + 17.67 to L/9 + 11.29 and Sta. L/21 + 32.6 to L/21 + 50.9.
Items included only in Plan 2
Item 1-a. 10,720 lineal feet 18-inch No. 7 gage, asphalt dipped and asbestos felt wrapped welded steel pipe in place.
Item 2-a. 5,100 lineal feet 12 inch No. 10 gage, asphalt dipped and asbestos felt wrapped welded steel pipe, in place.
Item 3-a Lump sum—Napa River Crossing, Station L/26 + 40 to L/28 +00.
Item 4-a. Special connections at Sta L/59 + 17.67 to L/0 + 06 99 and Sta. L/49 + 00.83 to L/49 + 10 16 and Sta. L/52 + 00 to L/52 + 183.
Items included in both Plans 1 and 2
Item 5. Lump sum—54 lineal feet 30-inch welded steel pipe—Install only, and furnish and install 30-inch by 22-inch reducer.
Item 6. 2980 lineal feet 22-inch No. 7 gage asphalt dipped and asbestos felt wrapped welded steel pipe, in place.
Item 7. 5740 lineal feet 10-inch cast iron pipe, recondition, transport and install only.
Item 8. 760 lineal feet 10-inch cast iron pipe, recondition and transport only.
Item 9. 8 1-inch Type A air valve assemblies, in place.
Item 10. 1 1-inch Type B air valve assembly, in place.
Item 11. 1 1-inch air valve, in place in valve house.
Item 12. 4 2-inch Type air valve assemblies, in place.
Item 13. 1 4-inch gate valve, flanged ends, 150 pounds working pressure, in place.
Item 14. 1 6-inch gate valve, flanged ends, 150 pounds working pressure, in place.
Item 15. Install 8-inch gate valve and furnish and install valve box.
Item 16. 1 8-inch gate valve, hub ends, 150 pounds working pressure, in place.
Item 17. Install 12-inch gate valve and furnish and install valve box.
Item 18. 1 6-inch Type A blowoff assembly, in place.
Item 19. 2 4-inch Type B blowoff assemblies, in place.
Item 20. 3 4-inch Type C blowoff assemblies, in place.
Item 21. 4 2-inch Type B blowoff assemblies, in place.
Item 22. 2 2-inch Type C blowoff assemblies, in place.
Item 23. 1 6-inch water meter, in place.
Item 24. 1 8-inch water meter, in place.
Item 25. 50 lineal feet 24-inch No. 10 gage corrugated metal pipe under State Highway and railroad, in place.
Item 26. 90 lineal feet 6-inch concrete pipe cover on 18-inch pipe.
Item 27. 75 lineal feet 9-inch concrete pipe cover on 18-inch pipe
Item 28. 233 lineal feet gravel surfacing over pipe trench.
Item 29. 331 lineal feet armor coat surfacing over pipe trench.
Item 30. 43 lineal feet concrete road surfacing over pipe trench.
Item 31. Lump sum—Connection to 6-inch pipe line at Sta. K15 + 60.5.
Item 32. Lump sum—Special connection at Sta. K30 + 22.3 to K30 + 39.4.
Item 33. Lump sum—Connection to 6-inch pipe line at Sta. L/53 + 58.
Item 34. Lump sum—Special connection at Sta. L/00 + 20.00 to L/00 + 23.33.
Item 35. Lump sum—Connection to 6-inch pipe line at Sta. L/06 + 95.3.
Item 36. Lump sum—Building for Chlorination Plant and Pit for Venturi meter.
Item 37. Lump sum—Equipment in Chlorination Plant, and Venturi Meter, in place.
Plans 1 and 2 are alternatives. Plan 1 comprises Items 1 to 4, inclusive, and Items 5 to 37, inclusive. Plan 2 comprises Items 1-a to 4-a, inclusive, and Items 5 to 37, inclusive. Bids are required for the entire work to be performed under either plan. Bids must be submitted on both plans. The Department of Public Works reserves the right to award a contract to perform the work embraced in Plan 1, or to perform the work embraced in Plan 2, whichever is considered to be to the advantage of the State after bids have been opened.
The foregoing quantities are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed necessary or expedient by the Engineer.
In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Boring Machine Operator	$1.95
Carpenter	1.75
Compressor Operator	1.60
Concrete finisher	1.875
Concrete mixer operator (up to one cu. yd.)	1.60
Concrete mixer operator (over one cu. yd.)	1.90
Concrete worker	1.25
Dragline or Shovel operator (up to and including one cu. yd.)	2.10
Dragline or Shovel operator (over one cu. yd.)	2.25
Electrician	2.00
Flagman	1.25
Guard	1.25
Derrickman - Crane operator	2.10
Laborer	1.25
Oiler and Helper	1.50

"STRAN-STEEL" *Quonsets* FOR FARM AND INDUSTRY

ALL-STEEL BUILDINGS AT LOW COST
Adaptable to hundreds of farm and industrial uses, Stran-Steel "Quonset" buildings are filling a steadily increasing need for low-cost, all-purpose structures.
Available in a variety of sizes, "Quonsets" are framed with Stran-Steel *nailable* framing members for strength and rigidity and the simple attachment of exterior and interior collateral materials.
Features include clear-span construction (except in the "Multiple"), for 100% usable floor space . . . all-steel materials, for fire-safety, permanence, and freedom from weather and rodent deterioration. The Stran-Steel framing system permits the easy addition of sections or the demounting of the entire building for re-erection elsewhere.
Stop in today for details and prices.
Stran-Steel "Quonset" buildings are products of Great Lakes Steel Corporation, a unit of National Steel Corporation.

The attention of bidders is particularly directed to the provisions of Section 7 of the Standard Specifications published by the Department of Public Works, Division of Highways, in April, 1945, regarding the laws to be observed, and Section 8, articles (a) and (b) of the Standard Specifications, and to Sections 4100 to 4108, inclusive, of the Government Code, State of California, regarding subcontracting and assignment of any subcontracts, respectively.

Plans, forms of proposal, bonds, contract, and specifications may be seen and obtained at the office of the State Engineer, Public Works Building, Sacramento, California, and they may be seen at the office of the State Engineer, 803 California State Building, Los Angeles, and at the offices of the Associated General Contractors in San Francisco.

A representative from the State Engineer's office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and contractors are urged to investigate the location, character, and quantity of work to be done with a representative of the State Engineer. It is requested that arrangements for joint field inspection be made as far in advance as possible.

No bid will be considered unless it is made on a blank form furnished by the State Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Fusion Welded Sheet Steel Pipe

NAPA CITY WATER WORKS
CONN CREEK PROJ. PIPE LINE

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the City Clerk at Napa, California, until 7:30 P. M. March 11, 1947, covering the supplying of fusion welded sheet steel water pipe together with certain of its accessories and appurtenances for use by the City of Napa in the construction of the proposed Conn Creek Project pipe Line, which pipe line is to be used for the conveyance of water from the existing Conn Creek Reservoir.

Prospective bidders are advised that the issuance of general obligation bonds in a sum ample to cover the cost of the said pipe line has been authorized at an election heretofore duly held.

Proposals as solicited will have particular reference to fusion welded sheet steel pipe as per specifications attached thereto, but proposals also will be received covering pipe which the bidder may consider to be in all respects the equivalent thereof and economically competitive therewith.

Proposal Schedules will cover the furnishing of pipe as follows:

Schedule A Approximately 7500 lineal feet of 36 in. I.D x 3/4 in. i.e. 36½ in. O.D. fusion welded sheet steel pipe, to be double dipped only, together with

Schedule B Approximately 97,000 lineal feet of 24 in. I.D. x ¼ in. i.e. 24½ in. O.D. fusion welded sheet steel pipe, to be double dipped and wrapped, or

Schedule C Approximately 97,000 lineal feet of 30 in. I.D. x ¼ in. i.e. 30½ in. O.D. fusion welded sheet steel pipe, to be double dipped and wrapped, or

Schedule D Approximately 97,000 lineal feet of 36 in. I.D. x ¼ in. i.e. 36½ in. O. D. fusion welded sheet steel pipe, to be double dipped and wrapped.

Attention is directed to the fact that the bidding schedules include certain accessories and appurtenances upon which bid figures will be required.

Specifications and proposal forms are on file at the office of the City Clerk, City Hall, Napa, California, and also at the office of A. Kempkey, Consulting Engineer, Balboa Building, San Francisco, California.

A certified check in the sum of not less than ten per cent of the maximum "Comparative Bid Total" as shown in the proposal must accompany each bid.

The City of Napa reserves the right to reject any and/or all bids, or to accept other than the lowest bid, as may appear to its best interests.

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on March 26, 1947, at which time they will be publicly opened and read in the Assembly Room of said building, for constructing Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Contra Costa County, across Pacheco Slough near Avon (IV-CC-797), a steel plate girder swing bridge with reinforced concrete approach spans to be constructed.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Carpenter	$1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity)	1.90
Derrick operator	2.10
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.25
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.35
Painter (brush)	1.75
Painter (spray)	1.75
Pile driver hoistman or operator	2.10
Pile driver man	1.86
Reinforcing steel worker	1.75
Roller operator	1.95
Structural steel worker	2.00
Tractor driver	1.95
Truck driver (8 cubic yards water level capacity or more)	1.875
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.50
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oiler power shovels or cranes	1.60
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.4075
Truck driver (less than 4 cubic yards water level capacity)	1.2825
Flagman	1.15
Laborer	1.25

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minium wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.25 per hour.

The minimum wage paid to unskilled labor for which rates are not shown above shall be not less than $1.25 per hour.

Overtime—one and one half (1½) times the above rates.

Sundays and holidays — one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, at the office of the Associated General Contractors in San Francisco, and at the office of the County Engineer or County Surveyor at the county seat of the county in which the work is to be performed.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Sundays and holidays one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefor all applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

Highway Improvements Tehama County

STATE OF CALIFORNIA DEPARTMENT of PUBLIC WORKS DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on March 19, 1947, at which time they will be publicly opened and read, in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Tehama County, between Mill Race Creek and Red Bluff (11-Teh-3-D), a net length of about Two and eight-tenths (2.8) miles, to be graded, surfaced with plant-mixed surfacing on crusher run base and on existing pavement.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate Per Hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Carpenter	1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity)	1.90
Motor grader operator	2.10
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Reinforcing steel worker	1.75
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oil distributor bootman	1.275
Oiler power shovels or cranes	1.50
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Unskilled Labor	
Flagman	1.15
Laborer	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.15 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays — one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal Statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

Concrete mixer operator (over one cubic yard capacity)	1.90
Motor grader operator	2.10
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.25
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.35
Pile driver hoistman or operator	2.10
Pile driver man	1.86
Reinforcing steel worker	1.75
Roller operator	1.95
Tractor driver	1.95
Truck driver (8 cubic yards water level capacity or more)	1.875
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.50
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oil distributor bootman	1.275
Oiler, power shovels or cranes	1.60
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.4075
Truck driver (less than 4 cubic yards water level capacity)	1.2825
Unskilled Labor	
Flagman	1.25
Laborer	1.25

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.25 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.25 per hour.

Overtime—One and one-half (1½) times the above rates.

Sundays and holidays—One and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

LARGEST CONSTRUCTION DAILY IN THE WEST

Vol. 57—No. 42 SAN FRANCISCO, MONDAY, MARCH 3, 1947

Copyright 1946 by F. W. Dodge Corporation

PLANS and Speculations

A route has been proposed for the Golden State Highway through **Tulare.** The center line of the new highway, the right of way of which would be 210 feet wide, would be 720 feet east of Blackstone Avenue, about a mile east of its present location and cutting through a comparatively new residential area. In addition, a service road approximately 40 feet wide, would be constructed on either side of the highway.

The new route would cross Blackstone Avenue from the west north of the city limits, dip under the Santa Fe tracks and under the Lindway Highway, coming up again about at Sierra Avenue.

oOo

Members of the building committee and directing board of the **Williams** Community Church are studying plans to either remodel and enlarge the present church or to rebuild. A fund campaign probably will get underway soon.

oOo

The **Elderwood** Citrus Association has requested the rec bureau to make a survey to determine the cost of getting CVP water to 6,500 acres in the vicinity of **Woodlake.** A new irrigation district may be organized in the area.

oOo

A gymnasium for citywide recreational purposes will be included in a large scale building program sought by the 55th District Agricultural Association. Other features proposed are a new grandstand, additional livestock barns and a judging ring.

oOo

Fencing of **Reno** ditches near street intersections is about a third completed. It is estimated that the total cost of the work will be $12,000. Temporary safety devices were discussed by a special committee appointed by the mayor.

Liquidate OPA by June 30th Is Proviso of Senate Committee in Allocating $22 Million

WASHINGTON. — A senate appropriations subcommittee voted over the weekend to give OPA a $9 million operating fund and an additional $13 million which it specifically stated to be for liquidating expenses to be carried out by June 30. Under the new budget OPA would have to cut down operations by a little more than one-half.

The economy warning by Major General Philip B. Fleming, administrator of the Office of Temporary Controls, that action limiting OPA's operating budget to a little over $6 million would put the veterans emergency housing program in danger of "virtual abandonment".

'Action Premature'

Further than this, General Fleming said its passage would cause curtailment of aids to industry through the distribution of tin, rubber, antimony and other items in short supply, as well as upsetting the balance of control of imports and exports of scarce materials and equipment.

The audit of subsidy payments involving millions of dollars would be dropped and $75 million in claims against price violators would be halted without final action.

This, in brief terms, sums up the peril to functions of the remaining temporary agencies carried in the deficiency bill as it now is being considered by the Senate committee.

Under present law the Patman Act, which provides for assistance to veterans' housing, continues in effect until December 31, 1947.

In connection with an apparent congressional desire to relieve the agencies of the above named functions by curtailing their spending power, General Fleming testified:

Truman Suggestion

"I cannot believe that it is the intent of congress, by the proposed rescission of funds, to abrogate existing legislation in advance of the time when the new congress shall have determined its policy on these matters."

Again, on the subject of rent control continuance, the witness told the senators public sentiment "seems to be" for holding onto this law, whether it be administered by OPA or some other agency.

"I can assure you," he said, "that rent control will be totally ineffective unless there is a well managed, adequately staffed organization to administer the law whether it by OPA—a division of the Office of Temporary Controls, or some other agency."

Throughout his appearance before the committee, the OTC administrator strongly supported President Truman's recommendation which would leave $21,344,000 available for OPA operations from March 1 to June 30, this year. An additional lump sum in leave payments resulting from normal employee separation from OPA jobs would add an estimated $547,740, leaving $20,796,260 for agency expenses during that period.

Anticipated Deficit

The proposed legislation, however, would take away immediately $9 million from the March 1 balance, leaving only $6,394,000 for operation to June 30. Liquidation costs would more than wipe out this balance, Gen. Fleming maintained, forcing the OPA books to show a deficit of $1,017,000 on June 30 if provisions of the H. R. 1068 measure are passed as drawn.

Commercial Order Change Infeasible, Declares Realtor

James C. Downs, Jr., president of the Real Estate Research Corp., of Chicago, told the nation's home builders convention in Chicago at the Stevens Hotel that today's housing market is not a balanced market. He declared that the present market is over-balanced with people in the young age level and in the lower income brackets.

He declared: "There is a good market for houses in the deluxe, custom-built field for people who were not able to build during the war. This market, however, is small and its complete saturation will not solve the housing problem.

"By far the biggest market exists for houses selling below $8500 where monthly payments can compare favorably with rental housing."

The speaker cited rent control as one of the factors contributing to the lack of balance in the present market. He added that a release of construction limitation orders would result in sharply higher prices for the residential market and that such action would deplete the materials and labor supply.

Morgan L. Fitch, Chicago, president of the National Association of Real Estate Boards, and Hobart C. Brady, Wichita, Kans., broker, warned that 1947 home production must reach families in the $2,000 to $3,000 income bracket to meet the threat of revived public housing legislation in congress.

DUST SUPPRESSION

HARVEY, Ill.—A 16-page free booklet entitled "Practical Pointers on Dust Suppression" has been revised and re-issued by Whiting Corporation, located in Harvey.

Discussed in detail are hoods, orifice loss, pipe resistance, fans, air pressures and other pertinent subjects.

GROOVER AND I
HOLD EVERYTHING

The War Assets Administration inventories almost anything you can name from railroads, islands and hotels to lipstick and toothpicks.

☆ ☆ ☆

It is rumored they will sell these items—provided you are able to run the obstacle course they set up.

☆ ☆ ☆

The S. F. Regional Office is offering a quantity of LEG IRONS. They are described as adjustable, made of case hardened, high polished steel, with 14-inch welded link chain, with two keys, stamped: "USMC Inspected".

☆ ☆ ☆

This is not a bunch of second-hand junk. They are all new and unused, offered at $5.00 per pair.

☆ ☆ ☆

Here's the bear trap in the obstacles course: minimum quantity—lots of ten pair.

☆ ☆ ☆

When I statred writing this column it was with the thought that some of my girl readers might be interested—as My Girl Tuesday reminded me that next year is Leap Year (already she's thinking about that!).

☆ ☆ ☆

The gals might do better at Room 327 City Hall—you only buy one and it costs two bucks.

BICB-AGC-AIA JOINT SPONSORS OF LUNCH HONORING HOLDEN

The west coast appearance of Thomas S. Holden before an audience of contractors, architects engineers, materials suppliers, and other segments of the building industry will be jointly sponsored by the Building Industry Conference Board, the Associated General Contractors, Central California chapter, and the American Institute of Architects, it was announced Monday.

Holden is scheduled to address a Wednesday luncheon meeting to be held in the main dining room (10th floor) of the Marine Memorial Building, southwest corner of Mason and Sutter Streets.

Persons who wish to attend are urged to contact either the AIA office or the AGC office for reservations.

Special Session on Highways Reconvenes Today; Highway Commission Under Fire

By PHILIP G. BRADY

SACRAMENTO.—Having supposedly sounded out the sentiment of their constituents, legislators are hurrying here from all sections of the state to reconvene the special session on highways Monday. In the two weeks remaining before resumption of the regular session optimists hope to have ironed out all the details of the proposed $2.8 billion highway program. The pessimists, who include most informed observers, don't expect such a quick settlement in view of the powerful opposition to the suggested method of financing the project.

This is one fight the construction industry is staying out of. Spokesmen for the industry here are sitting on the sidelines watching lobbyists for the oil interests, farmers and state officials go at it hammer and tong. Everybody, it appears, is for the road building but nobody, it appears, is agreed on how to pay for it.

Latest suggestion is by the farmers who advance a system of self-liquidating toll roads. Governor Warren has rejected this proposal vigorously as both impractical and tardy.

Alter Highway Group

Details of the program are contained in Senate Bill No. 5, a 45-page tome which is now on its third reading in the upper chamber. It provides for a new system of streets and highways, taxes and allocation of funds. S. B. 5 contains the bulk of the Collier recommendations and is the focal point of controversy.

Meanwhile, some other bills have been dropped in the hopper, of more vital concern to the construction industry than the method of paying for road buildings. One of these is S. B. 7 (A. B. 4), a Collier recommendation which would revamp the California Highway Commission by removing the Director of Public Works as ex-officio member and provides that the governor shall appoint the 7th member and allow the commission to elect its own chairman.

This proviso, if adopted, would relegate the Public Works Director to a purely administrative officer with none of the powerful policy-making authority he now wields. Other provisions of the measure increased the commissioners' per diem fee from $15 to $25, limited to $250 monthly, and gives the commission, full supervisorial and regulatory power over administration of state highway, county primary and city major street systems and makes it a duty of state and local highway officials to comply with all edicts of the commission.

Alternate Material

In addition, the bill requires notice of State Highway Engineer's recommended state highway construction budget and a public hear-

(Continued on Page 7)

Observe Bell Centennial Anniversary

Monday, March 3, will be the one hundredth anniversary of the birth of Alexander Graham Bell, inventor of the telephone, and will mark the beginning of centennial observances throughout the country.

According to Lyle M. Brown, telephone company division manager, highlights of the centennial will be a full hour radio program over NBC honoring Mr. Bell, beginning at 9 P. M., March 3, and the unveiling of a bust of the great inventor in the Bell Telephone Laboratories at Murray Hill, New Jersey on the same day.

Helen Traubel and Jascha Heifetz will be the guest artists on the "Telephone Hour" broadcast, which will also include a dramatic sketch and a short talk by President Walter S. Gifford of the American Telephone and Telegraph Company.

Though Scottish by birth, Mr Bell was an American by choice, entering the United States at the age of 24, when he went to Boston as a teacher of the deaf. A deep and scientific interest in the mechanics of speech led to his experiments which produced the telephone. On June 2, 1875 he first succeeded in transmitting sound over a wire, and on March 10, 1876 the first complete sentence was heard over one of his experimental telephones. This historic event occurred in Boston and the sentence was "Mr. Watson, come here, I want you!" It was heard by Thomas A. Watson, Bell's assistant, who was working at the other end of the line on which Bell was experimenting.

Bell was a scientist but, more than that, he was a man of such remarkable vision that only two years after the first telephone he was able to foresee the day when he said, "A man in one part of the country may communicate by word of mouth with another in a distant place." His rich life, which had such a great influence on the world, came to end on August 2, 1922.

Boke Outlines CVP Cost Distribution

SACRAMENTO. — Central Valley farmers will have to repay only 28% of the cost of the Central Valley Project's irrigation works, Regional Director Richard L. Boke of the Bureau of Reclamation announced as he reported that an allocation of costs of the initial CVP has been approved by both the Secretary of the Interior and President Truman and has been transmitted to congress. The allocations report is now a public document.

Sales of CVP electric power will pay 61% of the cost, Boke said, and the 11% balance will be paid off by selling water to towns and industries. The whole cost of the project will be paid out in 44 years after it is in full operation, he added.

Cost Breakdown

The initial features of the project will cost a total of $384,314,000 Mr. Boke said. These are: Shasta and Keswick dams; their power plants, transmission systems and the Delta Steam Power Plant; Friant Dam; and Delta Cross Channel; Contra Costa, Delta-Mendota, Madera and Friant-Kern canals.

#

CENTRAL AGC AIM TO LOWER BUILDING COST

The newly-elected board of directors of the Central California Chapter of the Associated General Contractors of America, recently elected these officers for 1947:

Harold W. Smith, president; Carl N. Swenson, vice-president; Robert McCarthy, treasurer; Wm. E. Hague, secretary-manager.

"The building industry is faced with many problems at this time," President Smith said in an interview Friday. "The Central California Chapter, AGC, is working hard to stabilize the industry, and to create attractive building costs. We anticipate a year to great building construction, not only in San Francisco, but thruout Northern California."

"Building materials are more plentiful", he continued. "Every month the situation improves and our labor supply is sufficient to meet demands, although there is some shortage in a few of the building trades. We are trying to overcome these shortages by an intensive apprenticeship campaign."

#

BUILDING PERMIT FEE PROCEEDINGS ORDERED

SAN CARLOS.—The city council here will crack down on building contractors found guilty of chiseling on building permit fees. It ordered the city attorney to instigate proceedings to recover additional building permit fees from builders.

According to Mayor Patrick J. Kearns, some contractors were selling newly-completed homes for as much as 25 per cent more than the prices for which the permits were issued.

#

KELLY APPOINTED

Governor Warrel has appointed William J. Kelly apprenticeship coordinator of the Bay Counties council of carpenters, to the state council on apprenticeship.

CPA PERMITS GRANTED

SAN FRANCISCO. — The Civilian Production Administration, R. J. Grier, regional director, 1355 Market St., has announced the following permits granted for construction of commercial and industrial buildings in the San Francisco area:

Feb. 25, 1947

ANNEX TO CITY HALL, $9,550; owner, City of Burlingame, 265 Park Rd, Burlingame.
ALTER RESTAURANT, $1,428; 1095 Hyde, San Francisco; owner, Nelson Hawks & Harold Pinto, 1068 Hyde, San Francisco.
ALTER RESTAURANT, news stand, $2,000; 35 E Santa Clara, San Jose; owner, Joe Wasserman, 802 N 5th St, San Jose.
SERVICE GARAGE, $27,588; 201 8th St, Hanford; owner, Wm H Stevenson, 1226 E Douty, Hanford.
LIGHT FIXTURES, toilet, facilities, cafe-bar, $695; 501 Van Ness, San Francisco; owner, Wm. G Cummings, 1775 40th, San Francisco.
GIFT SHOP (evicted), $4,200; Central Ave, Pacific Grove; owner, W L Bowdues, Box 2419, Carmel.
ELECTRIC MOTOR Repairs, $8,186; 8th Ave & E 12th, Oakland; owner, Alfred L Burror, 306 12th, Oakland.
FURNITURE WAREHOUSE (evicted), $170,000; 2100 E Fremont, Stockton; owner, John Bruener Co, 2100 Bdwy, Oakland.
RESTAURANT, $4,145; 1075 California, San Francisco; owner, Fritz Properties, Inc, 593 Market, San Francisco.
TRUST OFFICE (evicted), $2,691; 2063 Franklin, Oakland; owner, Insurance Securities, Inc, 325 13th St, Oakland.
FURNITURE STORE & living quarters, $6,752; 83 Leland Ave, San Francisco; owner, Sam F Leonetti, 458 Leland, San Francisco.
TEMPORARY KINDERGARTEN $4,000; Fremont School, Salinas; owner, Alisal School Dist, 1437 Del Monte, Salinas.
SERVICE STATION, $2,800; Ocean & Plymouth, San Francisco; owner, Minute Oil Co, Colma, Calif.
DRY CLEANING & LAUNDRY, $8,000; Isleton; owner, Tim P Young, Box 76, Isleton.
TRUCK & FARM MACHINERY repairs, $15,500; 15th & H, Modesto; owner, Carl P Stone, Box 322, Modesto
WALNUT STORAGE, dock, $71,000; California; owner, North Coast Walnut Assn, Calistoga.
RETAIL STORE (evicted), $4,418; 953 B, Hayward; owner, Belton Fleisher, 977 D St, Hayward.
STRUCTURAL STEEL FAB. plant, office & drafting room, $9,300; 1414 3rd St, Oakland; owner, Walter R Cole Co 560 Adeline, Oakland.
REPAIR PLUMBING & HEATING supplies retail store, $3,992; Burlo & Acequia, Visalia; owner, Sylvia K Johns, 433 Linda, Oakland.
SOFT DRINK BOTTLING PLANT $9,942; Richmond; owner, Gerald D Winger, 1620 4th, Sacramento.
MFG ROOF and Floor Covering, $3,600; Foot of Powell, Emeryville; owner, Paraffine Co. Inc, 475 Brannan, San Francisco.
OFFICE BLDG, at brick yards, $18,000; 202 W Scotts, Stockton; owner, San Joaquin Brick Co, 33 S Eldorado, Stockton.
RELOCATE ARMY CHAPEL for Japanese Church, $1300; Inyo and Collins, Stockton; owner, No Calif Congregational Conference, 801 E St, Fresno.
CABINET SHOP, $4,000; Near Santa Clara; owner, R W Marshall, 526 Liberty, Santa Clara.
PARTITION OFFICES & WORK Rooms (evicted), $2,000; 36 2nd St, San Francisco; owner, Victor Adding Machine Co, 63 2nd St, San Francisco.
DRUG STORE & POST OFFICE (fire loss), $16,000; Hilmar; owner, A Norman Renshaw, Hilmar.
GROCERY, $2,300; Beach Road, Watsonville; owner, Earl G Gallender, 614 Orchard, Watsonville.
MACARONI FACTORY, $75,000; Fresno; owner, Fresno Macaroni Mfg Co, 1145 E, Fresno.
REPAIR BARBER SHOP, $1,500; 217 W Yosemite, Manteca; owner, J E Jesse, Box 182, Manteca.
INSECTICIDE PRODUCTION, $28,910; Maple & Vine. Calwa; owner, Swift & Co, Chicago, Illinois.
PROCESSING DRIED FRUITS, $409,000; Alma & 7th St., San Jose; owner, Calif Prune & Apricot Growers, Market & San Antonio, San Jose.
GROCERY, $3,000; Firebaugh; owner, Hugh Del Rio, Box 535, Firebaugh.
AUTO REPAIR SHOP, $2,500; Merced; owner, Edward Rosa, Box 655, Merced
INSTALL ELEVATOR, $2750; 125 Grant, San Francisco; owner, Hale Bros Stores, Inc, 36 5th St, San
RESTAURANT, $2,945; 76th & San Leandro, Oakland; owner, Mac Mc Clure, 4128 Brookdale, Oakland;
VETERAN REHABILITATION, $15,900; 3333 I St, Sacramento; owner, VFW, Lansaie Post No 67, 3333 J St, Sacramento.
PLUMBING SHOP, $1,800; owner, Ernest R Edlund, 504 5th St, Richmond.
WEATHER-PROOF BLDG for glass containers, -mft, $89,000; 1200 17th, San Francisco; owner, Owens-Illinois Glass Co, 320 California, San Francisco.

Legislature

(Continued from Page One)

ing by the commission on the budget.

The final Collier bill (S. B. 15) makes certain formerly exempt contractors liable for fuel taxes. It provides that contractors working under U. S. contracts will be denied the general exemption on fuel given the United States.

A. B. 15, on the other hand, authorizes day's labor or negotiated contracts for public work in "emergency cases" or "where proceeding by contract does not meet the public interest." Bids, which may be rejected, would be required on all contracts in excess of $1000.

A. B. 19 provides $950,000 for preliminary engineering for a new toll crossing across San Francisco Bay.

A. B. 23 requires the Department of Public Works to call for bids and contract for highway pavement on alternative basis, specifying asphalt or cement, except in special circumstances.

A. B. 33 permits any person, by filing demand, to be notified of intention of Department of Public Works to adopt plans and specifications and to demand a hearing thereon. If department, after protest, does not grant hearing, protestant may appeal to the governor, who appoints committee of three highway engineers, which determines final plans and specifications to be used on project.

400 Affect Industry

The bills enumerated above will bear close watch in the next two weeks when most attention is being directed toward resolving the conflict on financing.

After that there are some 400 bills directly affecting the industry awaiting convocation of the regular session.

Official Proposals

Fusion Welded Sheet Steel Pipe

NAPA CITY WATER WORKS CONN CREEK PROJ. PIPE LINE

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the City Clerk at Napa, California, until 7:30 P. M. March 11, 1947, covering the supplying of fusion welded sheet steel water pipe together with certain of its accessories and appurtenances for use by the City of Napa in the construction of the proposed Conn Creek Project Pipe Line, which pipe line is to be used for the conveyance of water from the existing Conn Creek Reservoir.

Prospective bidders are advised that the issuance of general obligation bonds in a sum ample to cover the cost of the said pipe line has been authorized at an election heretofore duly held.

Proposals as solicited will have particular reference to fusion welded sheet steel pipe as per specifications attached thereto, but proposals also will be received covering pipe which the bidder may consider to be in all respects the equivalent thereof and economically competitive therewith.

Proposal Schedules will cover the furnishing of pipe as follows:

Schedule A Approximately 7500 lineal feet of 36 in. I.D. x¾ in. i.e. 36½ in. O.D. fusion welded sheet steel pipe, to be double dipped only, together with

Schedule B Approximately 97,000 lineal feet of 24 in. I.D. x ¼ in. i.e. 24½ in. O.D. fusion welded sheet steel pipe, to be double dipped and wrapped, or

Schedule C Approximately 97,000 lineal feet of 30 in. I.D. x ¼ in. i.e. 30½ in. O.D. fusion welded sheet steel pipe, to be double dipped and wrapped, or

Schedule D Approximately 97,000 lineal feet of 36 in. I.D. x ¾ in. i.e. 36½ in. O. D. fusion welded sheet steel pipe, to be double dipped and wrapped.

Attention is directed to the fact that the bidding schedules include certain accessories and appurtenances upon which bid figures will be required.

Specifications and proposal forms are on file at the office of the City Clerk, City Hall, Napa, California, and also at the office of A. Kempkey, Consulting Engineer, Balboa Building, San Francisco, California.

A certified check in the sum of not less than ten per cent of the maximum "Comparative Bid Total" as shown in the proposal must accompany each bid.

The City of Napa reserves the right to reject any and/or all bids, or to accept other than the lowest bid, as may appear to its best interests.

Harms Low on CVP

REDDING—(Exclusive)—Harms Brothers, Sacramento, presented a low bid of $814,273.50 on Specification 1667. Bids were opened Monday at Rec Bureau offices here.

Ten other firms bid on the million dollar Bureau of Reclamation project for construction of the Shasta Dam to Summit City Highway and Shasta Dam left abutment parking area. The job involves development of about 10 to 14 miles north of Redding.

Second low bidder was H. Earl Parker, Marysville, at $895,042. Other bidders include Fredrickson & Watson Construction Company, Oakland, $921,641.80; Piombo Brothers & Company, San Francisco, $939,106; Westbrook & Pope and D. McDonald, Sacramento, $1,029,380.

Guy F. Atkinson Company, South San Francisco, $1,042,-367; Fredrickson Brothers, Emeryville, $1,043,640.25; R. A. Heintz, $1,124,411.80; Fredricksen, Kafler & E. B. Bishop, Orland, $1,197,293; Morrison-Knudsen Company, San Francisco, $1,294,853, and A. Teichert & Son, Sacramento, Calif., $1,582,122.

Use of Machinery to Increase Productivity of Workmen Urged by Winkelman to Lower Cost

WASHINGTON.—The need for increasing productivity of construction workers, so strongly urged in the home building and commercial categories, now has been called for in the heavy building field by Dwight W. Winkelman, vice-president of the Associated General Contractors of America.

Speaking at the 23rd annual convention of the Association of Highway Officials of the North Atlantic States, Winkelman said that one of the methods by which contractors can cut highway construction costs is through the use of machinery which increases the productivity of workmen.

This would be a direct means toward lowering excessive costs which have hampered the highway program since the beginning of the war.

Equipment Cost Soars

The AGC vice-president explained that he always has been an advocate of mechanization in the highest degree possible in all types of construction operation.

"Much of the construction equipment being used now is war weary, worn and subject to more than the ordinary number of breakdowns," he said. "Manufacturers have indicated that 1947 is expected to be a fairly good production year, but it is expected that the majority of contracting organizations will not have fully renewed equipment until conditions improve."

The general contractors have been informed that distributors are concentrating on keeping bigger stocks of parts and adequate trained personnel to perform increasingly better service on machines in the field.

Cost of equipment has increased. Many observers say they expect equipment to be even more costly in the future.

Continuing his discussion of mechanization, Winkelman said: "There is no doubt that present labor conditions will have a tendency under the competitive contract system to bring about further mechanization. Better equipment will be developed, equipment designed to do more kinds of work efficiently, and at lower unit costs.

Officials Can Help

"I believe that highway departments which are interested in securing the best prices in the future should make a careful study of new equipment and the methods made possible by it, so that maximum advantage can be taken of improved methods in design and specification.

"Contractors must continue efforts to further mechanize their operations."

Suggesting measures by which highway officials might reduce their costs without hindering the quality of road construction, the speaker listed these points:

1—Eliminate hand labor items as much as possible, such as hand rubbing of concrete, fine grading, slope rounding.

2—Develop tolerances which will

Industry Fetes Well-Known Construction Statistics Authority

Thomas S. Holden will discuss a luncheon meeting of the Building Industry Conference Board, the American Institute of Architects, and the Associated General Contractors, Central California chapter. It will be held in the main dining room of the Marine Memorial Building, southwest Sutter at Mason.

Holden is president of the F. W. Dodge Corporation which publishes the Daily Pacific Builder, the Denver Journal, Chicago Construction News, Architectural Record, Dodge Construction Reports,

THOMAS S. HOLDEN

Sweet's Catalog Files, the Real Estate Record, Dodge Statistical Research Service and Home Owners' Catalogs.

He is well-known nationally as a construction statistics expert, is an architect holding degrees from the University of Texas and Massachusetts Institute of Technology, served on the editorial director of the Architectural Record for four years. Previously he had been vice-president in charge of statistics for the Dodge Corporation for many years.

He is active as a member of the business advisory council for the Department of the Commerce, and is a board member of the National Committee on Housing. Other organizations in whose activities he takes a prominent part are the New York Building Congress, the Commerce and Industry Association of New York, for which he is chairman of the slum redevelopment committee, the U. S. Chamber of Commerce, and the National Association of Manufacturers.

Sharp Gains Shown In Coal, Iron And Steel Production

WASHINGTON. — A national summary of business conditions just released by the board of governors of the Federal Reserve System shows that industrial output reached a new record peacetime level in January, a level one-sixth higher than that at the beginning of 1946.

Total output at factories and mines in the first month of this year was at a rate of 188 per cent of the 1935-1939 average. This compared with 181 per cent in December and the previous peacetime peak of 183 in November.

Translated into what this increase means to manufacturers of building tems, the large rise registered in January reflected sharp gains in output of coal, iron and steel, the FRS statement said.

Production of these materials had been curtailed in November and December because of the bituminous coal strikes.

Steel mills averaged 93 per cent of capacity in January and stepped up to a slightly higher scheduled rate during the first three months of February. This resulted in the largest volume in iron and steel production since May of 1945.

The FRS national survey shows further that output of building materials was maintained at "an unusually high level for this season" and activity in the nonferrous metals, machinery and transportation equipment industries was maintained close to the December figure.

Full results of the survey will appear in the March issue of the Federal Reserve Bulletin and in the monthly reviews of the Federal Reserve banks.

JAMISON HEADS WPA

Homer B. Jamison of Fresno was elected president of the Western Pine Association, it was announced at the conclusion of the organization's week-end convention here.

Al J. Glassow, Bend, Ore., and Percy V. Burke, Sacramento, were elected vice-presidents.

The new treasurer is A. C. Lighthall, Baker, Ore. Representatives-at-large are C. L. Billings, Lewiston, Idaho, and James P. Hennessy McCloud, Calif.

$141-2 Million San Diego Aqueduct A Works 'Test Case'

WASHINGTON. — The $14,500,-000 San Diego aqueduct which was started in 1945 as a measure for wartime expediency and at the same time a project for municipal benefit, is becoming a "test case" for public works designed to serve cities though built with federal funds.

A cleavage of opinion on methods of financing completion of this large public undertaking is developing in Washington.

The attorney's for the general accounting feel that tre navy should go ahead with its sponsored project on the basis of wartime authority. Opposed to this view is the comptroller general's office which is convinced that congress should pass on all public works intended to benefit municipalities.

Whether or not a technical legal battle will develop over continuation of work on the San Diego project remains to be seen, but however the current dispute is resolved, decisions in future public works of similar nature are expected to be affected.

MAYOR QUESTIONS LEWIS MOTIVE IN PROBING RAILWAY

San Francisco supervisors Monday afternoon voted unanimously to give the municipal railway management a full scale investigation to determine the extent to which management and equipment faults each contribute to admittedly deplorable transit service.

Calling for an investigation by a competent firm to reveal significant faults of municipal railway management, Supervisor Marvin E. Lewis was denounced by Mayor Lapham as capitalizing on the situation to bolster his (unannounced) candidacy for the district attorney post.

'BUILDING COST MAY DROP 20 PER CENT

CHICAGO.—There is good reason to believe that the peak in building costs has been reached and that the future trend will be downward, Tyles S. Rogers, president of the Producers' Council, national organization of building product manufacturers, said here Sunday in a statement before the Mortgage Bankers' Association.

"While it is possible that the cost of building homes and other structures might drop as much as 20 per cent below 1946 peaks during the year, the trend will depend go largely on wage rates and on the productivity of construction labor that no definite forecast can be made," Rogers aid.

'JUGGLE' RIVER

COULEE DAM, Wash.—How the mighty Columbia River, the nation's foremost power stream, was "juggled" to permit the construction of the Grand Coulee Dam is described in the February issue of The Reclamation Era, official publication of the Bureau of Reclamation.

Written by Luther E. Cliffe, Columbia Basin Project engineer stationed at Coulee Dam, the article includes several drawings that show clearly how the stream flow of the river was moved from side to side to permit excavation and the placing of concrete in man's largest masonry dam.

ARCHITECTURAL MEET

A sound moving picture, "More Than Shelter", will be shown at the Wednesday night meeting of the Architectural Club, which will be held in the Builders' Exchange, at 8 p. m. The movie is a presentation of the San Francisco Housing Authority.

Auto Association Opposes Increase Registration Fee

Increased highway user taxes are inevitable if California is to have an adequate and safe highway system, the California State Automobile Association said today in advocating a start as soon as possible on a statewide program of highway modernization.

New highway user taxes advocated by the motorists' organization were increases of 2 cents per gallon in the gasoline tax, 4½ cents per gallon in the diesel fuel tax, a proper increase in commercial vehicle taxes so that these vehicles will pay a proportionate share of the cost of highway improvements, and a nominal fee for driver's licenses to aid in support of the Division of Driver's Licenses and the California Highway Patrol. Recommended also is a simplified method of computing "in lieu" taxes to provide for annual depreciation, with a minimum fee of $1.00.

The Automobile Association stated its opposition to any increase in the $3 motor vehicle registration fee, as well as the proposal to finance the expressway system thru collection of tolls.

Allocation of state highway construction funds, the Association believes, should be made on a statewide basis of need so that continuity in construction of the statewide system will be achieved. The Critical Deficiency Report of the state highway engineer, when combined with the program for additional metropolitan freeways, is believed by the Association to justify an equal allocation of highway funds between the 45 northern and 13 southern counties. The Association also urges that a proper balance between rural and metropolitan highway improvements be insured by a further allocation of the funds to each of the two north and south county groups.

GROOVER AND I
CONGRESS AGREES

"The Treasury of this Republic has been hijacked by a super government, above and beyond the control of your elected Congress."

☆ ☆ ☆

As an example of how it works: A Spending Bureau will be created for some worthy and high-sounding purpose, for instance, "Promotion of Foreign Trade"—a proposition with which no one disagrees.

☆ ☆ ☆

An appropriation is made, the Agency given a bank account and check writing machine. You hear nothing more until the Agency comes back for more money.

☆ ☆ ☆

How familiar that sounds. It is one of the itchy spots this Column has been scratching for years. Something new has been added—now Your Congress agrees with Your Column!

☆ ☆ ☆

A resolution is now pending creating a committee to list, inventory and audit the various spending and lending Agencies of the Government!

☆ ☆ ☆

It is unanimous and official when Congress admits it does not know—

☆ ☆ ☆

Who spent how much for what!

FHA PERMITS ISSUED

SAN FRANCISCO.—The Federal Housing Administration, D. C. McGlinsea, district director, 215 Montgomery St., San Francisco, has announced the following list of permits granted by the above office for the construction of dwelling or rental units (other than for owner-occupancy) in the San Francisco area for applicants as noted:

6 UNITS, Richmond, C. M. MacGregor, 1391 Solano Ave., Albany.
2 UNITS, Salinas; A. C. Ambler, 330 Main St., Salinas.
2 UNITS, Sacramento; G. W. Bowen, 814 Eye St., Sacramento.
6 UNITS, Oakleigh Park; The Hedahl-Martin Co., San Francisco.
16 UNITS, San Mateo; David D. Bohannon, 859 San Mateo Drive, San Mateo.
2 UNITS, Los Altos; Bell Constr. Co. 2800 Cowper St., Palo Alto.
4 UNITS, San Francisco; Arnold Blum, 212 Silliman St., San Francisco.
10 UNITS, Sunnyvale; R. W. Pedersen, 274 S. Murphy Ave., Sunnyvale.
1 UNIT, Lodi; Floyd A. Thun, 106 Forest Ave., Lodi.
1 UNIT, Santa Cluz; Jack Zwelgle, Rte. 2 Box 258, Santa Cruz.
2 UNITS, San Francisco; Claude T Lindsey, Inc., San Francisco.
6 UNITS, Albany; G. D. Gaets, 928 San Pablo Ave., Albany.
1 UNIT, Richmond; G. D. Gaets, 928 San Pablo Ave., Albany.
2 UNIT, Calistoga; June Myrick, 50 Phillips St., Vallejo.
1 UNIT, Chico; The Diamond Match Co., 16th and Orange, Chico.
1 UNIT, Sacramento; Michael Furtado, 1819½ W St., Sacramento.
1 UNIT, Menlo Park; Jack B. DeBell. 495 Middlefield Road, Atherton.
1 UNIT, San Jose, R. W. Misener, Box 511-C, Route 3, Los Gatos.
1 UNIT, Oakland; Roy E. Johnson, 3491 38th Ave., Oakland.
12 UNITS, Richmond; Denis Lynch, 1133 Ohio Ave., Richmond.
18 UNITS, Oakland; Sol Scherman, 3805 Foothill Blvd., Oakland.
10 UNITS Hayward; Skormand Bros. 2927 Brookdale Ave., Oakland.
1 UNIT, Richmond; Vernon Franse, 430 32nd St., Richmond.
1 UNIT, Sonora; 29th Dist. Agri. Association, Box 108, Sonora.
UNITS, San Francisco; John Bertelsen, San Francisco.
2 UNITS, Redwood City; Stanton W. Voll, 764 6th Ave., San Bruno.
2 UNITS, Sacramento; Herbert. A. Rongen, 1357 62nd St., Sacramento.
6 UNITS, Redwood City; Gus Nordstrom, 144 Belvedere, San Carlos.
48 UNITS, San Francisco; United Housing Corp., 2701 udah St., San Francisco.
1 UNIT, Berkeley; Carl H. Perttu, 1640 Allston Way, Berkeley.
2 UNITS, Santa Cruz; J. Marengo. Route 2, Box 276-D, Stockton.
2 UNITS, Corcoran; L. H. Burton, Box 534, Corcoran.
2 UNITS, Oakland; B. H. Semple, 574 MacArthur Blvd., Oakland.

EARTHWORK, STRUCTURES AND SURFACING, CENTRAL VALLEY PROJECT

Low and Only Bidders
Earthwork, Structures and Surfacing, Spec. 1667 **Cost, $814,273.50**
CENTRAL VALLEY PROJECT, Cal.
Shasta Dam to Summit City Highway and Shasta Dam left abutment parking area, from 10 to 14 miles north of Redding.
Owner—U. S. Bureau of Reclamation, Redding, Calif.
Completion time 300 calendar days.
Plans by Engrg. Dept. of Owner.
Low Bidder—Harms Bros., Route 4, Box 2220, Sacramento, Calif., $814,273.50.
Work involves:
(1) clearing 45 acres of right of way
(2) 500,000 c.y. common excav. for roadway and parking area;
(3) 400,000 c.y. common excav. for do
(4) 4,000,000 sta. c.y. overhaul;
(5) 4,000 M. gals. watering;
(6) 600 roller hours rolling embankments;
(7) 4000 c.y. of common excav. for structures;
(8) 4000 c.y. rock excav. for do;
(9) 300 c.y. excav., all classes, for trail;
(10) 550 c.y. common excav., for pipe trenches;
(11) 1650 c.y. rock excav. for do;
(12) 7400 c.y. backfill;
(13) compacting 5600 c.y. backfill;
(14) 300 s.y. dry-rock paving;
(15) placing 600 c.y. gravel bedding;
(16) laying 90 l.f. 12-in. diam. corru. metal pipe;
(17) laying 520 l.f. 18-inch do;
(18) laying 1920 l.f. 24-inch do;
(19) laying 620 l.f. 30-inch do;
(20) laying 1000 l.f. 36-inch do;
(21) laying 860 l.f. 42-inch do;
(22) laying 480 l.f. 48-inch do;
(23) laying 520 l.f 4-in. diam. sewer pipe drains with cemented joints
(24) laying 520 l.f. 10-inch do;
(25) laying 800 l.f. 12-inch do;
(26) laying 560 l.f. 15-inch do;
(27) laying 220 l.f. 18-inch do;
(28) laying 140 l.f. 21-inch do;
(29) laying 450 l.f. 24-inch do;
(30) 1140 c.y. concrete in parapets;
(31) 1250 c.y. concrete in sidewalks, curbs and gutters;
(32) 85 c.y. concrete in flagpole shelter footings;
(33) 85 c.y. do, except footings;
(34) 50 c.y. concrete in left abutment drainage structures;
(35) 510 c.y. concrete in highway culverts;
(36) placing 282,000 lbs. reinf. bars;
(37) placing 2200 s.f. joint filler;
(38) installing 37,000 lbs. of lawn sprinkler system;
(39) 300 c.y. rubble masonry walls;
(40) 126 s.y. grouted paving gutters;
(41) furnishing and placing granite flagpole base, lump sum;
(42) furnishing and installing flagpole, lump sum;
(43) installing 9000 lbs. misc. metalwork;
(44) manufacturing and placing 120 highway monuments;
(45) placing 20 highway culvert markers;
(46) placing 350 highway guide posts
(47) erecting 20,000 l.f. of steel plate guardrail;
(48) 26,500 tons of crusher-run base course;
(49) applying 95 tons of liquid asphalt prime coat;
(50) 11,150 tons of oil-treated wearing surface for roads;
(51) 25 tons of do for trail;
(52) applying 95 tons liq. asph. seal coat;
(53) 900 tons stone chips for seal coat
(54) finishing 220 sta. of roadway;
(55) removing 1,500 l.f. of existing guardrail;
(56) installing 500 l.f. electrical metal conduit, 1¼-in. or less in diameter;
(57) installing 12,000 lin. ft. of electrical metal conduit, 1½-in. or more in diameter;
(58) installing 3000 lbs. of electrical ground wires.
Total bids submitted March 3 were:
(A) Harms Bros., Sacramento, Calif., $814,273.50.
(B) H. Earl Parker, Marysville, Cal., $895,042.
(C) Fredrickson & Watson Construction Co., Oakland, Calif., $921,641.80
(D) Piombo Bros. & Co., San Francisco, Calif., $939,106.

No more of this!
Sometimes the mistake of cheap and sub-standard house wiring is more quickly felt than seen. And its faults are as striking as a blow on the head.
In a good, modern house wiring job a lot of thought should be given to how you and your family are going to use that house for your comfort, convenience and safety. This forethought helps avoid dark halls, closets and stairways, dipping lights from overloaded circuits or the stringing of long, unsightly cords.
When you build or remodel, check these five important elements in good and adequate wiring:
1. enough outlets for lamps and appliances.
2. proper placement of outlets.
3. enough switches.
4. adequate wire size (at least No. 12 size).
5. plenty of circuits for present and future needs.
Write in or come in to any P. G. and E. office for details on "Certified Adequate Wiring" and get your copy of the 16-page booklet—"Electricity in Your Home Plans."

Cut Labor Costs

(Continued from Page One)

encourage maximum mechanization in grading, paving, etc.

3—Where feasible, particularly on secondary roads, reduce compaction requirements by use of modern equipment which is heavier than that formerly used.

4—In cases where compaction requirements with a view toward permitting greater tolerance in moisture content and material specifications.

5—Design concrete structures so as to permit the use of standard forms, thus saving labor and lumber. Research indicates that longer life in reinforced concrete structures results from larger sized members. This also reduces the cost per cubic yard.

6—Use pipe culverts instead of box culverts where possible until the present situation eases. In areas of light rainfall, "dips" can be used temporarily.

7—Lengthen the working season by every device possible in plans, specifications, timing of lettings, etc.

8—Set up projects which can be completed within one season.

9—Enforce any substantial changes in requirements. In some localities where changes have been made, contractors report that the hoped for decrease did not materialize, due to failure to get word down the line from the top officials, or over enthusiasm for refinements on the part of field engineers and inspectors.

The AGC highway contractor groups have requested suggestions from highway engineers on how they might cut their own costs and keep down their bid prices.

ESSENTIAL INGREDIENT FOR BETTER CONCRETE
Check These 6 Advantages
1. Workability Without Excess Water.
2. Plasticizes, Saving Time in Placing.
3. Reduces "Bleeding," Saving Time in Finishing.
4. Eliminates Segregation of Aggregates.
5. Minimizes Danger of Over-Vibrating.
6. Makes Concrete Uniformly Better.
Easy and Safe to Use . . . Surprisingly Low in Cost

Official Proposals

Treutdale - Wahkeena Creek Section, Columbia River Highway; Federal Aid Project No. FI-248 (11), 6.07 Miles of Hydraulic - dredged Embankment.

NOTICE TO CONTRACTORS

Sealed bids on the following projects will be received by the Oregon State Highway Commission in the auditorium on the third floor of the Public Service Building, Portland, Oregon, at 2:00 p. m. on Monday, March 24, and at 3:00 a. m. on Tuesday, March 25, 1947.
Bids To Be Opened at 2:00 p. m., on Monday March 24, 1947
Multnomah County: Treutdale-Wahkeena Creek Section of the Columbia River Highway. Federal Aid Project No. FI-248 (11). 6.07 miles of hydraulic - dredged embankment. Requires approximately 3,200,000 cu. yds. of embankment. This project may be bid in combination with Oregon Forest Highway Project No. 28-D, Unit 1, for similar work on an adjoining section and for which bids are to be received by the Public Roads Administration at their Portland, Oregon, office at 2:00 p. m., March 24, 1947.
Bids To Be Opened at 9:00 a. m., on Tuesday, March 25, 1947
Multnomah County: Treutdale-Wahkenna Creek Section of the Columbia River Highway, Federal Aid Project No. FA-248 (11). 0.9c/ mile of rock toe, 2.55 miles of rock slope protection, 8.43 miles of roadbed topping, and topsoiling and seeding. Requires approximately 185,000 cu. yds. rock excavation; 114,000 cu. yds. topsoil mixture; and 280 acres seeding.
Multnomah County: Construct concrete bridge over O.W.R.R. & N. Co. tracks at Bridal Veil on the Columbia River Highway. Federal Aid Project No. FGI-248 (12). Requires approximately 390 cu. yds. structural excavation; 3,300 cu. yds. concrete; 582,000 lbs. reinforcing; and 2,000 lin. ft. metal railing.
Unskilled labor employed for the Federal projects shall be obtained from lists prepared by agencies designated by the Oregon State Employment Service.
The minimum wage paid to all labor employed on the Federal projects shall be as follows: Skilled labor $1.40 per hour; intermediate labor $1.30 and $1.15 per hour; unskilled labor $1.00 per hour.
Prequalification of bidders will be required in accordance with provisions of Secs. 93-102 to 93-106, O. C. L. A. inclusive. Full information for bidders may be obtained at the office of the Oregon State Highway Commission, Room 319, State Office Building, Salem, Oregon. Proposal blanks, plans, specifications, and form of contracts may be inspected at the same place and may be obtained by eligible bidders upon payment of $2.00 per each set.
A complete set of plans and specifications may be inspected at the offices of the Associated General Contractors, in Los Angeles and San Francisco, California.
The right is reserved to reject any and all proposals or to accept the proposal deemed best for the State of Oregon.

Fusion Welded Sheet Steel Pipe

NAPA CITY WATER WORKS CONN CREEK PROJ. PIPE LINE

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the City Clerk at Napa, California, until 7:30 P. M. March 11, 1947, covering the supplying of fusion welded sheet steel water pipe together with certain of its accessories and appurtenances for use by the City of Napa in the construction of the proposed Conn Creek Project Pipe Line, which pipe line is to be used for the conveyance of water from the existing Conn Creek Reservoir.
Prospective bidders are advised that the issuance of general obligation bonds in a sum ample to cover the cost of the said pipe line has been authorized at an election heretofore duly held.
Proposals as solicited will have particular reference to fusion welded sheet steel pipe as per specifications attached thereto, but proposals also will be received covering pipe which the bidder may consider to be in all respects the equivalent thereof and economically competitive therewith.
Proposal Schedules will cover the furnishing of pipe as follows.
Schedule A Approximately 7500 lineal feet of 36 in. I.D x ¾ in. t.e. 36¼ in. O.D. fusion welded sheet steel pipe, to be double dipped only, together with
Schedule B Approximately 97,000 lineal feet of 24 in. I.D. x ¼ in. t.e. 24½ in. O.D. fusion welded sheet steel pipe, to be double dipped and wrapped, or
Schedule C Approximately 97,000 lineal feet of 30 in. I.D. x ¼ in. t.e. 30½ in. O.D. fusion welded sheet steel pipe, to be double dipped and wrapped, or
Schedule D Approximately 97,000 lineal feet of 36 in. I.D. x ¼ in. t.e. 36½ in. O. D. fusion welded sheet steel pipe, to be double dipped and wrapped.
Attention is directed to the fact that the bidding schedules include certain accessories and appurtenances upon which bid figures will be required.
Specifications and proposal forms are on file at the office of the City Clerk, City Hall, Napa, California, and also at the office of A. Kempkey, Consulting Engineer, Balboa Building, San Francisco, California.
A certified check in the sum of not less than ten per cent of the maximum "Comparative Bid Total" as shown in the proposal must accompany each bid.
The City of Napa reserves the right to reject any and/or all bids, or to accept other than the lowest bid, as may appear to its best interests.

PLANS and Speculations

Construction of the Firebaugh and Hardwick Bridges is one of the top projects on the list of Fresno County supervisors, who recently moved for its inclusion under the federal aid secondary program.

oOo

Formation of a new high shcool district (West Side) is the topic for discussion at a mass meeting at the Firebaugh City Hall, March 4.

oOo

Enlargement of the Roseville American Legion Hall (estimated cost $37,000) is contemplated.

oOo

Madison Farm Bureau Center Chairman Marcus Karlstad disclosed that formation of a drainage district is under consideration in Yolo County.

oOo

An Airport construction fund of $287,279 has been requested from the federal government, to be allocated as follows: Eureka, $146,890; Garberville, $86,300; and Rohnerville, $191,331.

oOo

An Idaho Power Company official announced that his firm would proceed with plans to construct a power plant in eastern Oregon. Reportedly, it will cost between $10 and $12 million.

oOo

Bids on Sacramento's 12th Street subway widening project may be asked in July.

oOo

Financial difficulties may delay construction of underpasses on the proposed Bayshore Freeway at Willow Road and University Avenue at Palo Alto, according to John H. Skeggs, district road engineer.

oOo

Pittsburg City Manager E. L. O'Hara has proposed that the Arnold Industrial Highway be relocated to prevent interference with that city's expanding residential areas in the southwest rection.

oOo

Livermore city council has approved a request for extension of South "O" and "P" Streets from West Sixth Street to College Ave.

oOo

Albion State Normal School, at Albion, Idaho, will obtain surplus structures to be converted into about 5,000 square feet of recreational facilities.

oOo

Surplus furniture and equipment will be allocated to Tacoma School District No. 10, Pierce County, Wash., through the war assets administration.

SITE AUTHORIZATION NEEDED—SPANAGEL

WASHINGTON. — Prompt authorization is required if the navy is to acquire the Del Monte Hotel property at Monterey, Calif., for a $28,750,000 naval postgraduate school, INavy officers made the statement Tuesday before a house armed forces subcommittee.
Capt. H. A. Spanagel, director of the Annapolis Naval Academy postgraduate school, said the Monterey site is ideal and that "additional delays will practically eliminate the possibility of ever getting it."
He said the navy's option on the property expires July 1.

#

RESALE PROGRAM GETS SUPPORT FROM NAVY

SACRAMENTO.—The navy will give immediate cooperation to the state in its program to purchase surplus war building materials for re-sale to veterans to ease the housing situation. This was announced Tuesday by Justin G. Child, superintendent of buildings and grounds of the state finance department, who recently conferred with high ranking navy officers in Washington.

CONSOLIDATE OFFICES.—Judson Pacific - Murphy Corporation today announced correlation of all its departments, including the general offices, at one location—4300 Eastshore Highway, Emeryville 8. The new telephone number is Piedmont 8260. Offices were moved at the first of the week. With three-quarters of a million dollars spent on new facilities, building and equipment, the Emeryville plant is one of the finest of its kind in the west. It will produce all types of steel fabrication and electric traveling cranes.

Old Firm Correlates All Departments In Emeryville Building

Judson Pacific-Murphy Corporation today announced that all its departments have been moved into its new offices at 4300 Eastshore Highway in Emeryville. Construction of the firm's large three-story concrete building was completed recently.
Judson Pacific-Murphy Corporation was created in February, 1945 as a merger of Judson-Pacific Co. and The J. Philip Murphy Corp., two of the west's outstanding firms, whose history dates back 79 years.
Paul F. Gillespie is its president. Other corporation officers are J. Philip Murphy, vice-president and general manager; G. F. Rotenkoiber, assistant general manager in charge of production; L. A. Peck, general sales manager; R. A. Fairbairn, manager of crane manufacturing, and W. T. Merriman, secretary.

#

Lumber Shipments Exceed Production 8.8% in Week–NLMA

WASHINGTON.—Lumber shipments of 387 mills reporting to the National Lumber Trade Barometer of the National Lumber Manufacturers Association, were 8.8 per cent above production for the week ending February 15, a report from the NLMA shows.
New orders from these reporting mills, for the same week, were 2.2 per cent above production and unfilled orders amounted to 63 per cent of stocks.
Softwood mills showed unfilled orders equal to 23 days' output at the current rate, and gross stocks equal to 35 days' production.
Year-to-date shipments of reporting identical mills were 16 per cent above production and orders were 16.8 per cent above production.
Comparison with the corresponding week of the years 1935-1939 showed 1947 production of the reporting mills to be 31.3 per cent above, shipments 23.3 per cent above, and orders 16.3 per cent above.
Also, the output of these mills was 26.4 per cent over the corresponding week for 1946; shipments were 29 per cent above the figure for the same week last year and new orders were 36.7 per cent over.

GROOVER AND I
ANOTHER ACCORD

On February 24 this column, in agreeing with a pronouncement made by Phil Murray of the CIO, also stated "Organized Labor has no better friend than Senator Morse".

☆ ☆ ☆

That angry roar was one of my friends from a Union Brotherhood who wanted to know if I had ever heard of Senator Wagner.

☆ ☆ ☆

The answer is yes, I know about Senator Wagner, the Patron Saint of the Wagner Labor Relations Act.

☆ ☆ ☆

Time is now proving what I have long felt regarding Senator Wagner. He grabbed everything in sight, regardless of right, title or ownership — wrapped it up in a package and give it to Labor.

☆ ☆ ☆

In the long run this will prove to be a dis-service to Labor. It pushed the pendulum too far and already reaction has started.

☆ ☆ ☆

There are many laws the New Deal has been unable to repeal. Among these is that for every action there is a reaction.

☆ ☆ ☆

Now comes William Green of the AFL who states he feels the Wagner Act should be amended, granting free speech to employers!

☆ ☆ ☆

Good start—now let's grant the entire Bill of Rights to ALL.

#

RESUME NEGOTIATIONS

The Refrigeration Contractors' Association of Northern California has re-opened labor negotiations with unions representing 400 employees in the San Francisco Bay Area, according to Zed E. Jones, association secretary.
The workers, he said, are demanding a 50-cent hourly increase over the present $1.75 rate now being paid, plus two weeks vacation with pay, instead of the present one week.
Consideration of these proposals is in the hands of the Association labor committee.

TICKETS AVAILABLE FOR HOLDEN LUNCHEON

Got your reservation for the joint AIA-BICB-AGC luncheon honoring Thomas S. Holden (one of the nation's leading building experts) today? You can still get it!
Organization dinner committees announced late Tuesday that tickets will be available Wednesday because the luncheon will be held in the Marine Memorial Building's main dining room (10th floor) to accommodate a larger crowd than was originally expected.
Holden will speak on "Architectural Horizons". He is president of the F. W. Dodge Corp., and is a former editorial director of the Architectural Record. Among Dodge Corporation's many other construction publications are Sweet's Catalogs, Dodge Reports, Home Owners' Catalogs and the Daily Pacific Builder.

Fluctuation in Home Costs Unlikely for Some Time–Builders

A brighter future for San Francisco home building and consequent relief for the acute housing shortage was predicted today by J. C. Johnson and Carl Gallert upon their return from the National Home Builders' convention held last week in Chicago. Both men were named directors of the National Association of Home Builders during the Chicago meeting.
"It seems certain," said Johnson, "that 1947 will see an end to a good part of current housing problems." We learned in the Chicago convention that a good part of the materials bottleneck has been broken. New factories have gone into production and pre-war materials manufacturers have increased their production capacity. In addition, inventories of building materials have increased because of the light winter building schedules in the East."
Johnson, who is president of the local Home Builders' Association, pointed out that materials supply alone will not solve the problem but that it will go a long way toward the speeding of local home building.

Decline Unlikely

A further prediction that the smooth flow of building supplies means not only faster building but a near end to rising costs was made by Carl Gellert, vice-president of the San Francisco Home Builders.
"Building costs have reached a plateau and they probably will not take any further appreciable rise," declared Geilert. "But we must remember that there will be very little decline in building costs for years to come. Builders from all sections of the country made that clear in Chicago. The costs of materials and the high level of wages in the building trades appears to be here to stay.

'Local Value High'

"All home builders know," Gellert continued, "that a new system of value is now controlling the home building field. This has been true in very other market and it is equally true of ours.
"But San Francisco home buyers can be sure of one important factor which has again been proved —they are still getting the best value in the country for their money."

#

STEEL OPERATION IS 94.4% OF CAPACITY

NEW YORK.—Steel mill operations will post a new postwar record this week, working at 94.4 per cent of capacity, the American Iron and Steel Institute announced today. Tonnage will be 1,651,900.
The week's record is the highest since 95.3 in the week of May 14,1945. Last week's operating rate was also a postwar high, at 94.1.

Senate Probes Lack Freight Cars; CPA Blundered—Reed

WASHINGTON. — Contractors and building materials men who have faced the headaches of scarce materials since before the end of the war now have their attention focused on a national shortage of freight cars and how this deficiency has affected their operations.

Allocate More Steel

Cause for centering new emphasis on the lack of freight cars to move brick, tile, cement, lumber, and all the other items needed for home and commercial construction was a meeting of the senate interstate and foreign commerce subcommittee to investigate the extent of the scarcity and recommend that something be done about it.
Bad enough last summer and fall, the situation has become increasingly worse this winter. It was not difficult to discern this from the meeting of railroads, car builders, steel manufacturers and others, called in Washington by Senator Clyde M. Reed of Kansas.
After thoroughly hashing over causes for the car shortage, the subcommittee concluded that only through greater steel allocations could more cars for transporting the nation's needed production be achieved.
Steel mill representatives have promised to allocate sufficient steel to build a minimum of 10,000 freight cars a month, or a total of 120,000 new freight cars per year. In the opinion of Senator Reed, however, it will require production of new cars at the rate of 10,000 per month for the next 24 to 36 months to entirely relieve the situation.

'CPA to Blame'

He did not hesitate to place the blame for lack of freight cars directly on the Civilian Production Administration's alleged lack of foresight. Following the conference with railroad, steel and government men, Senator Reed saidly brought about by a tragedy of miscalculation. After V-J Day, you will recall that government economists predicted that there would be a recession in business and great unemployment. Railroad economists, to some extent, accepted that point of view. Consequently, steel was not allotted for new freight cars ordered by the railroads.
"As of January, 1946, only about 40,000 new freight cars were on order. There should have been 140,000 on order . . . only about 40,000 new freight cars were made available.
"Through 1946, the CPA made another colossal blunder. It completely refused to recognize the vital need for additional railroad cars and refused to allocate steel for that purpose in any sufficient quantity. John D. Small was the Administrator of CPA. I never met Mr. Small, but on information that comes to me, he is responsible for this blunder.

Retire 85,000 Cars

"The Office of Temporary Controls, which succeeded CPA, and other agencies, has been unaware of the importance of this situation as was its predecessor. The OTC thought it had been generous by setting up a program of 7,000 new freight cars per month through 1947. Seven thousand cars per month would make 84,000 cars through the year. The railroads expect to retire 85,000 freight cars because of obsolescence through 1847. Therefore, under this confused program, we would have 1,000 fewer freight cars at the end of 1947 than we had to begin with."
A history of the developments that produced this shortage, brought out at the conference, re-

Freight Cars

(Continued from Page One)

vealed these interesting facts:

World War II wore out most of the freight cars in operation. The average age of those now running is something in excess of 20 years. During the war few additional freight cars were built. Through 1946, only 40,000 cars were built, both in the car building plants and in the railroads' own shops. Sixty-five thousand cars were retired.

25,000 Less Cars

As a result, the country entered 1947 with 25,000 fewer freight cars than it had at the beginning of 1946.

"The housing construction program involves huge amounts of material of all kinds," the senator said. "There simply are not enough freight cars to transport this mass of material."

Official Proposals

Change of Bids Opening Date—Project Calif. F. H. 68-D

FEDERAL WORKS AGENCY, PUBLIC ROADS ADMINISTRATION, San Francisco, California, March 3, 1947. Notice of Change of Bid Opening Date. Sealed bids will be received at the office of the Public Roads Administration, 720 Phelan Building, San Francisco, California, until 2:00 p. m. on March 20, 1947, and then publicly opened for furnishing the materials and performing the work for constructing project California F. H. 68-D, Mill Creek, San Bernardino National Forest, San Bernardino County, California. Bid opening for this project was originally scheduled for 2:00 p. m. on March 6, 1947. CHAS. C. MORRIS, Division Engineer.

(Daily Pacific Builder) (March 5, 1947)

Fusion Welded Sheet Steel Pipe

NAPA CITY WATER WORKS CONN CREEK PROJ. PIPE LINE

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the City Clerk at Napa, California, until 7:30 P. M. March 11, 1947, covering the supplying of fusion welded sheet steel water pipe together with certain of its accessories and appurtenances for use by the City of Napa in the construction of the proposed Conn Creek Project Pipe Line, which pipe line is to be used for the conveyance of water from the existing Conn Creek Reservoir.

Prospective bidders are advised that the issuance of general obligation bonds in a sum ample to cover the cost of the said pipe line has been authorized at an election heretofore duly held.

Proposals as solicited will have particular reference to fusion welded sheet steel pipe as per specifications attached thereto, but proposals also will be received covering pipe which the bidder may consider to be in all respects the equivalent thereof and economically competitive therewith.

Proposal Schedules will cover the furnishing of pipe as follows:

Schedule A Approximately 7500 lineal feet of 36 in. I.D x¼ in. i.e. 36½ in. O.D. fusion welded sheet steel pipe, to be double dipped only, together with

Schedule B Approximately 97,000 lineal feet of 24 in. I.D. x ¼ in. i.e. 24½ in. O.D. fusion welded sheet steel pipe, to be double dipped and wrapped, or

Schedule C Approximately 97,000 lineal feet of 30 in. I.D. x ¼ in. i.e. 30½ in. O.D. fusion welded sheet steel pipe, to be double dipped and wrapped, or

Schedule D Approximately 97,000 lineal feet of 36 in. I.D. x ¼ in. i.e. 36½ in. O. D. fusion welded sheet steel pipe, to be double dipped and wrapped.

Attention is directed to the fact that the bidding schedules include certain accessories and appurtenances upon which bid figures will be required.

Specifications and proposal forms are on file at the office of the City Clerk, City Hall, Napa, California, and also at the office of A. Kempkey, Consulting Engineer, Balboa Building, San Francisco, California.

A certified check in the sum of not less than ten per cent of the maximum "Comparative Bid Total" as shown in the proposal must accompany each bid.

The City of Napa reserves the right to reject any and/or all bids, or to accept other than the lowest bid, as may appear to its best interests.

Fenestra

RESIDENCE STEEL CASEMENTS

In 24 types and sizes approved by the Metal Window Institute

Fenestra Steel Windows provide many advantages that result in greater customer satisfaction with the houses you build.

- More daylight
- Better ventilation
- Easier opening
- Safer cleaning
- Superior weather-tightness
- Better screening

Why use ordinary, old-fashioned windows, when modern Fenestra Windows offer you all these plus values? Write or call us for further information.

World's Leading Architects to Attend Plans Conference at Princeton University Thursday

Ernest J. Kump, San Francisco, to Speak On "When We Know Man, Then We Can Plan"

PRINCETON, N. J.—To discuss the factors involved in planning man's physical environment, Princeton University is sponsoring a Conference of fifty of the world's leading architects. The Conference, which is a part of Princeton's Bicentennial, opened here Wednesday morning.

Chosen as a conference member and discussion leader is Consulting Architect Ernest J. Kump, of San Francisco, whose work in architecture and planning has won him international recognition. Among the other Conference members and discussion leaders are Frank Lloyd Wright, William Roger Greeley, Richard J. Neutra, George Howe and Walter Baerman, all of the U. S. A., and Siegfried Giedion of Switzerland, Alvar Aalto of Finland, Le Corbusier of France, Sir Patrick Abercrombie of England, Carlos Contreras of Mexico and Sven G. Markelius of Sweden. Arthur C. Holden is Conference Chairman.

Besides leading in Conference panel discussions, Kump, who was recently consulted by British and Canadian planning commissions, read a prepared paper to the Conference. The paper, entitled "When We Know Man Then We Can Plan", stressed the necessity of considering man's total needs—spiritual as well as material—before undertaking to plan his physical environment. At the conclusion of the Princeton Conference, Kump goes to Ann Arbor where he is to speak at the University of Michigan on "What An Architect Shouldn't Know".

Kump was born in California and educated at the University of California and Harvard, and is said to be one of the youngest architects ever to be recognized by Who's Who. He is the author of a section in Columbia University's forthcoming comprehensive treatise on Town and City Halls, and examples of his work are familiar to reader of the leading architectural and technical magazines of American and Europe.

#

HOLD POLICY MEET

An action meeting to resolve differences on pending legislation affecting the construction industry will be held at Sacramento Friday and Saturday, March 7-8. Representatives of all divisions of the industry are expected to attend this conclave. Donald E. Kirby, architect, is chairman.

House Subcommittee Set to Pare Down Interior's Budget

WASHINGTON.—(Exclusive)—If the interior subcommittee of the house appropriations committee has its way, the Department of the Interior is scheduled to take a heavy beating in financial quarters.

The subcommittee chairman, Representative Jones (R., Ohio), is said to be calling for a 40 per cent reduction in the President's budget for this department.

The reclamation service and public power projects, of particular interest to general contractors, stand to lose heavily in the legislative readjustment if congress follows through on the economy suggestions of the subcommittee.

There is this hope for construction men who benefit from the large-scale expenditures in reclamation work: each year for several sessions past, the house has tried to pare the Interior budget substantially. It has voted, in fact, to make sharp cuts in the monies that provide dams and other irrigation and public power projects. In each instance, however, the senate has voted to restore most of the reductions voted by the house.

This year, however, the department is expected to have more trouble with the senate appropriations committee which, along with other fiscal committees, is steeped in economy notions.

Interior Secretary J. A. Krug is quoted as saying, "If congress tries to cut my budget, I'll put the pressure on."

But Interior is said to be toward the top of a secret list showing where economies can be effected in the President's budget. Chairman Bridges of the senate committee has submitted this confidential list to the White House.

While GOP members of congress from the western states have warned that an Interior reduction would be poor politics at this time, it is difficult to guess what congress as a whole may do with the subcommittee suggestions.

CPA APPROVAL WON THROUGH 'INFLUENCE'

WASHINGTON. — A good example of "senatorial influence" was on display in Washington today following announcement that the Civilian Production Administration had approved construction of a $1,500,000 industrial plant to be built by the Westinghouse Electric Corporation at Little Rock, Arkansas.

The announcement came from the office of Senator McClelland (d. Ark.). It stated that the Westinghouse firm was granted CPA permission to go ahead with its projected Little Rock project after conferences between CPA officials and Sen. McClelland. The agency's action represented reversal of a denial issued previously.

GROOVER AND I

AN EPITAPH?

The ink is hardly dry upon the 3.75 billion dollar "loan" we made to England, there with settling some 39 billion dollars of accumulated debts owing us.

☆ ☆ ☆

Is there anywhere a person now claiming that any of these foreign loans will ever be paid?

☆ ☆ ☆

We will now take over British obligations in Greece. We get in easy—260 million as a start—but that is only a start.

☆ ☆ ☆

We are spending and "lending" money all over the World. This is done for the purpose of preventing the spread of Communism.

☆ ☆ ☆

Here at home we make the Commies welcome—legalizing their political party and inviting them to carry out their program of Government overthrow.

☆ ☆ ☆

The only way a People can be that stupid is by working overtime at it.

☆ ☆ ☆

The time has come when we need able and mature guidance not only in our self-appointed programs of rehabilitating, caring for and supporting the entire world—but also in the maintenance and preservation of this Nation.

☆ ☆ ☆

Time is carving the record on the headstones of History. We need steady hands, strong hearts and mature minds — that one of these headstones does not read:

☆ ☆ ☆

Glass Shattered In Los Angeles Blast Would Cover Blocks

LOS ANGELES. — More than enough glass to erect a canopy over five average city blocks was shattered during the recent explosion at the O'Connor Electroplating plant here which cost 15 lives and $2 to $3 million damage, a Libbey-Owens-Ford investigation indicated today.

Surveying the devastated area pending imminent arrival of special priority rail shipments of replacement glass from L-O-F's Toledo factory, J. L. Soutter, district sales manager, reported that more than 500,000 square feet of plate and residential glass were blown to bits by concussion from the perchloric acid blast.

The survey showed that most of the glass damage was confined to 1200 commercial and non-commercial buildings in a 400-square-block area, while plaster and other structural damage occurred in a 60-square-block area.

According to the department of building and safety, 135 structures were damaged by the explosion but are repairable, and 18 have either been razed or condemned and will be demolished.

#

METAL OUTPUT BIG

Preliminary estimates of the state division of mines place the 1946 total production at $516,685,000, or nine per cent above 1945. Petroleum production—316 million barrels—was slightly below 1945, but prices were higher.

Value of 1946 metal production rose to $22,143,000, due largely to increased gold output. Production of cement and structural materials, borates, soda and other saline products increased substantially, according to division of mines figures.

Materials Prices During Next Few Months To Determine Future of Construction Industry

Holden Talk Lauded as Best Organized Review of Current Conditions in Industry

Postwar recovery "is now in the somewhat critical second phase, the phase of price stabilization," Thomas S. Holden, president of the F. W. Dodge Corporation, told an overflow audience of industry leaders at a testimonial luncheon Wednesday at the Marine's Memorial Club.

"The trend of material prices during the next couple of months will likely determine whether the current recovery of construction activity is to be continuous or is to be interrupted by a price-deflation recession," he warned.

The address of the nationally-known statistics expert was warmly applauded and Hervey P. Clarke, president of the San Francisco AIA chapter, spoke the thoughts of the group when he lauded it as "the clearest, most conclusive and best organized description of current conditions yet heard here." (Full text of the speech will appear in subsequent editions of the Daily Pacific Builder.)

Price Danger

Holden held out a bright future picture with "a prosperity that will make that of the 1920's seem meager in comparison." This was conditioned on an expectation that "all will go well with the management of our economic and political problems during the present catching-up period."

Despite government interference, postwar recovery has passed thru its first phase of confusion, reconversion of productive industry, acute labor troubles, material shortages and commodity price inflation, Holden pointed out. Basing his conclusion on the latest information available from the vast Dodge statistical-gathering organization, he said: "The downcurve of actual contracted construction and the upcurve of material supplies have met approximately now."

This condition foreshadows the return of stabilization and competition, Holden declared. "Strong buying resistance is developing and many projects are being priced out of the market. The price situation has reached a critical stage."

Quoting government and private index figures, he stated: "A price level for building materials 88 per cent over the 1939 average is too high to stand up under buying resistance and competitive selling conditions. The sooner we get some reasonable price reductions the better will be the construction industry's prospect for continuous recovery."

Cost Stabilization

Costs can come down, he insisted. "The general public little realizes how much the slowdown of work added to construction costs in 1946. Excess costs added 15 to 25 per cent to the theoretical construction costs indicated by published index numbers. Those excess costs should disappear as material supply approaches normal."

"Once past this critical phase of price stabilization, construction industry recovery will swing into its third phase: the phase of progressive catching up with deferred demands. This phase is likely to be one of continuously increasing volume and is likely to last several years. After World War I it lasted to the end of 1924.

"After deferred demands have been taken care of will come the 4th phase. Some people are fearful of a depression at that time. These people have an inadequate comprehension of the dynamics of the free enterprise system. A dynamic economy thrives on new ventures, new needs and new standards of its people, not merely on a backlog of unfilled orders.

"The solutions we find now and in the near future for our problems of labor relations, of the federal budget and public spending and of our economic and political relationships to the rest of the world will largely determine whether that fourth phase will be one of ex-

Charles McGonegal, Sunol, Participates In Hospital Study

WASHINGTON. — Dr. Paul R. Hawley, chief medical director for the Veterans Administration, and Col. F. H. Dryden, assistant administrator for construction, supplies and real estate, carried the major portion of a panel discussion on veterans' hospital construction held in connection with the VA rehabilitation conference here today.

Panel members who discussed the medical and hospital services included Dr. Leonard G. Rowntree, Dr. H. D. Shapiro, Col. Louis H. Renfrow, Charles C. McGonegal, G. E. Heller, Claude A. Brown, and Washington, D. C. doctors Albert N. Baggs and Joseph E. Malcomson.

McGonegal is from Sunol, Calif., and is widely known for his work on the veterans hospital program.

More than 500 persons from all parts of the United States are attending the rehabilitation conference.

American Legion members have expressed their intention to try to increase the speed of the veterans' hospital building program. They cite the need for additional bed space as urgent and hope, by their deliberations here, to remove obstables in the paht of more rapid development of the hospital building program.

VA now is operating 32 former army and navy hospitals, six on a permanent basis and the remainder as temporary installations.

The 13 additions to VA hospitals under construction on January 31 will add more than 5,000 beds to VA's capacity when they are completed.

ADOLPH CAMISA NEW ROOFERS' PRESIDENT

Adolph Camisa was elected president of Associated Roofing Contractors of the Easy Bay Counties at the annual election meeting recently.

He succeeds R. F. Coffin. L. A. Elliott was elected vice-president, and H. H. Lockyer, secretary-treasurer. Sergeant-at-arms is P. C. Edwards.

Five directors were elected. They are: W. E. West. M. R. Kilgore, L. A. Elliott, E. A. Dobrusky and D. A. Peterson.

#

SELL EL MIRADOR

PALM SPRINGS.—Bids will be received until March 17 from priority holders and until June 5 from others for the now surplus El Mirador Hotel, once one of the most luxurious in this winter resort.

Included in the holdings are 28 acres of land, another building leased for five years by the Community Hospital, a theater and a gymnasium.

#

SELL WELDING SUPPLIES

A 10-million dollar inventory of surplus, government - owned general purpose welding equipment and supplies is being offered for sale by War Assets Administration at fixed prices. It is located in the Spokane and Los Angeles regions.

Chew, Nishkian, Little Discuss New Bay Crossing

San Francisco's expansion will require larger conceptions and the Bay Area must be developed as an entity, a succession of speakers told about 200 persons attending a dinner meeting of the Structural Engineers' Association, Wednesday night.

Speakers were Engineers L. H. Nishkian, R. S. Chew and John G. Little. They discussed past and present proposed Bay crossings, illustrating their talks with slide projections.

#

G. L. Fox, president of the San Francisco Chamber of Commerce, requested the Association's support of creation of a federal-state official commission to study state, army-navy, and other proposals.

Supervisor Marvin E. Lewis spoke briefly, emphasizing his contention that "what San Francisco needs is a good engineering job, and bold thinking."

#

URGES COMPLETION

SACRAMENTO. — Gov. Warren requested that President Truman immediately budget $4 million for prompt completion of 1,679 veterans' emergency housing units Wednesday. The figure represents units not ordered completed when the federal public housing lifted its termination order at the first of the year.

CPA PERMITS GRANTED

SAN FRANCISCO. — The Civilian Production Administration, A. J. Grier, regional director, 1355 Market St., has announced the following permits granted for construction of commercial and industrial buildings in the San Francisco area:

MAR. 3, 1947

MILK HOUSE & Barn, $1500; Sacramento; owner, Fred L Clawson R 2, Box 2115, Sacramento.

BATTERY WAREHOUSING & Repairs (to protect from acid fumes) $6000; 1411 Eye St, Sacramento; owner, Carl A Lamus, 1208 7th, Sacramento.

CHURCH PARISH Hall, $55,000; C at Seventh, Marysville; owner, St Joseph's Catholic Church, 319 7th, Marysville.

REBUILD SULPHUR houses, fruit processing, $60,000; 725 W San Fernando, San Jose; owner, Calif Packing Corp'n, 101 Calif, San Francisco.

LUNCH ROOM, $1,650; 2496 E Weber, Stockton; owner, Robert Brown, 2230 E Channel, Stockton.

GROCERY, $2,214; 15 Front, Watsonville; owner, V. A. Pipkin, 21 Main, Watsonville.

MUNICIPAL SWIMMING Pool, $7,000; Benicia.; owner, City of Benecia, Benicia.

MFG SAND blasting equip, $12,000; Woodside & Peninsula, San Mateo; owner, Lauder Brothers, 1060 Bdwy Burlingame.

FOOD PROCESSING, $22,000; Walnut Blvd, Brentwood; owner, H P Garth, Box 8, Brentwood.

RESTAURANT, STOREROOM, $2,950; 2331 S Street, Sacramento; owner, John A Peterson, 2617 1st, Sacramento.

DAIRY BARN, $9,000; Waterford; owner, George H Sawyer, Star Route, B 15, Waterford.

RESTAURANT (to complete) $2,000; 2400 Redwood Hiway, Santa Rosa; owner, Archie H Chevrier, 455 Monty, Napa.

PLANING MILL (fire loss) $17,000; Bayshore & Branston, San Carlos; owner, Peninsula Milling Co, 501 5th Ave, San Mateo.

FHA PERMITS ISSUED

SAN FRANCISCO.—The Federal Housing Administration, D. C. McGinness, district director, 315 Montgomery St., San Francisco, has announced the following list of permits granted by the above office for the construction of dwelling or rental units (other than for owner-occupancy) in the San Francisco area for applicants as noted:

1 UNIT—San Leandro; Stanley M Davis, 640 Bancroft Ave, San Leandro.
1 UNIT—Yuba City; Frank Accito, 773 Rosalind Ave, Yuba City.
3 UNITS—Santa Cruz; Geo O Wood, Route 2, Box 319F, Santa Cruz.
2 UNITS—Richmond; Fowler, Godwin & Barnes, 332 South St, Richmond.
1 UNIT—Albany; G D Gaeta, 928 San Pablo Ave, Albany.
1 UNIT—Merced; George Stark, 211 18th St, Merced.
9 UNITS—Sacramento; Paul R Wiersdams, 4128 Mariposa, Sacramento.
3 UNITS—Modesto; F Y Kraft, 1006-8 H St, Modesto.
2 UNITS—Clear Lake Park; Earl R Converse, Box 172, Clear Lake Park.
1 UNIT—San Mateo; Horace M Witbeck, 3724 T St, Sacramento.
100 UNITS—El Dorado Park; Mt Diablo Community Builders Corp, 1127 Solano Ave, Albany.
1 UNIT—San Francisco; Henry Doelger, Builder, Inc, 320 Judah St, San Francisco.
1 UNIT—Salinas; Wm M Goodman, Box 1563, Salinas.
1 UNIT—Salinas; Robert G Oakley, 235 E San Luis St, Salinas.
8 UNITS—Daly City; Huber Construction Co, Daly City.
14 UNITS—Redwood City; Coral W Maxon, 124 Ebener St, Redwood City.
3 UNITS—San Jose; J S Zimmerman, 196 N 9th St, San Jose.
5 UNITS—Rio Linda; Arnold C Lachenauer, Route 1, Box 40, Rio Linda.
4 UNITS—Hayward; Harry H Lee, 147 Prospect St, Hayward.
18 UNITS—Emeryville; Reid Maxwell, 959 33rd St, Oakland.
1 UNIT—Redwood City; August Loeffel, 955 Hudson St, Redwood City.

(25) 200 lin. ft. furnishing and laying 36-in. corrugated metal pipe;
(26) 100 lin. ft. furnishing and laying 48-in. corrugated metal pipe;
(27) 100 lin. ft. lay 24-in. corrugated pipe furnished by city;
(28) 1 each furnish and install 21-in. automatic drainage gate;
(29) 1 each furnish and install 24-in. automatic drainage gate;
(30) 1 each install 24-in. automatic gate furnished by city;
(31) 100 lin. ft. remove 24-in. corrugated metal pipe;
(32) 100 cu. yds. concrete for drainage inlets and minor structures;
(33) 5000 lbs. reinforcing steel in structures;
(34) 6800 lbs. inlet grating and supporting angles;
(35) 2000 lin. ft. reconstruct right-of-way fence.

Proposition B
(1) 2,400,000 cu. yds. fill construction;
(2) 50,000 cu. yds. compaction to 95% density;
(3) 5 M gallons watering;
(4) 5000 cu. yds. rehandling fill material;
(5) 25,000 cu. yds. leveling and benching;
(6) 25,000 cu. yds. excavation and removal of unsuitable material;
(7) 16,200 tons rock facing.

Proposition C
(1) 5,000,000 cu. yds. fill construction;
(2) 625,000 cu. yds. compaction to 95% density;
(3) 50 M gallons watering;
(4) 100,000 cu. yds. rehandling fill material;
(5) 60,000 cu. yds. leveling and benching;
(6) 225,000 cu. yds. excavation and removal of unsuitable material;
(7) 10,000 cu. yds. canal excavation;
(8) 26,000 tons rock facing;
(9) 110,000 sq. yds. subbase preparation;
(10) 10,000 tons crushed rock base;
(11) 4700 sq. yds. removing existing concrete pavement;
(12) 9500 cu. yds. trench and minor structure excavation and backfill;
(13) 220,000 sq. yds. fine grading of inlet ponding area;
(14) 3200 lin. ft. furnishind and laying 12-in. standard strength reinforced concrete pipe;
(15) 1150 lin. ft. furnishing and laying 15-in. standard strength reinforced concrete pipe;
(16) 200 lin. ft. furnishing and laying 18-in. standard strength reinforced concrete pipe;
(17) 1150 lin. ft. furnishing and laying 21-in. standard strength reinforced concrete pipe;
(18) 500 lin. ft. furnishing and laying 24-in. standard strength reinforced concrete pipe;
(19) 1200 lin. ft. furnishing and laying 27-in. standard strength reinforced concrete pipe;
(20) 2000 lin. ft. furnishing and laying 30-in. standard strength reinforced concrete pipe;
(21) 2150 lin. ft. furnishing and laying 33-in. standard strength reinforced concrete pipe;
(22) 200 lin. ft. furnishing and laying 36-in. standard strength reinforced concrete pipe;
(23) 100 lin. ft. furnishind and laying 21-in. corrugated metal pipe;
(24) 1000 lin. ft. furnishing and laying 24-in. corrugated metal pipe;
(25) 200 lin. ft. furnishing and laying 36-in. corrugated metal pipe;
(26) 100 lin. ft. furnishing and laying 48-in. corrugated metal pipe;
(27) 100 lin. ft. lay 24-in. corrugated pipe furnished by city;
(28) 1 each furnish and install 21-in. automatic drainage gate;
(29) 1 each furnish and install 24-in. automatic drainage gate;
(30) 1 each install 24-in. automatic gate furnished by the city;
(31) 100 lin. ft. remove 24-in. corrugated metal pipe;
(32) 100 cu. yds. concrete for drainage inlets and minor structures;
(33) 5000 lbs. reinforcing steel in structures;
(34) 6800 lbs. inlet grating and supporting angles;
(35) 2000 lin. ft. reconstruct right-of-way fence.
Plans and specifications obtainable from office of the architect upon deposit of $25, refundable.

Owner Taking Bids—Due March 18, 10 A. M.
Grading, Surfacing, Bridges
WASHINGTON.
Owner—State of Washington, Clarence B. Shain, director of highways, Olympia, Wash.
Plans by engineering department of owner.
Projects include:
1. Grading, constructing asphaltic concrete and cement concrete pavement, integral curb and concrete sidewalk on 0.588 mile of P.S.H. No. 1, Sales Rd. to Tacoma in Pierce County, F.A.P. No. U-171 (15), involving about 1740 cu. yds. unclassified excavation, 1920 cu. yds. structure excavation, 3060 tons asphaltic concrete, 4965 sq. yds. concrete pavement, 1855 sq. yds. concrete pavement base, 1712 sq. yds. cement concrete driveways, 2486 sq. yds. concrete sidewalk, 4950 lin. ft. concrete curb, 3290 lin. ft. sewer pipe and other items.
2. Improving portion of P.S.H. No. 3 as follows: Yakima, 1st St. from E. B St. to E. Beech St., resurfacing existing concrete pavement with asphaltic concrete; E. Beech St. to E. Lenox Ave., constructing concrete pavement strips 8 ft. wide along existing pavement, resurfacing existing pavement with asphaltic concrete, constructing concrete sidewalks and storm sewer; south corporate limits of Yakima at E. Lenox Ave. to Meade Ave., constructing 8-ft. concrete paving strips along existing pavement and concrete sidewalk in Yakima County, F.A.P. No. F-105 (9), U-105 (7) and U-132 (21), involving about 4280 cu. yds. unclassified excavation, 4005 cu. yds. structure excavation, 2675 cu. yds. selected roadway borrow, 13,272 sq. yds. concrete pavement 2322 sq. yds. concrete driveways, 5856 sq. yds. concrete sidewalk, 2530 lin. ft. reflecting curb, 11,662 lin. ft. integral concrete curb, 5446 tons asphaltic concrete, 9213 lin. ft. sewer pipe, 943 lin. ft. culvert pipe and other items.
3. Reconstructing a part of the drawrest of Snohomish River bridge No. 1-A/205 on S.S.H. No. 1-A, a state project in Snohomish County, involving lump sum removing portions of existing structure and about 41 M bm. timber and lumber (untreated), 4400 lin. ft. timber piling (untreated) and other items.
4. Constructing reinforced concrete flat slab bridges, Corbett Creek bridge on S.S.H. No. 4-C, F.A.S. No. S-20 (1), and Rock Creek bridge and approaches on S.S.H. No. 1-B, state project in Lincoln County, involving about 5590 cu. yds. unclassified excavation, 1100 cu. yds. selected roadway borrow, 366 cu. yds. crushed stone surfacing from stockpile, 415 cu. yds. structure excavation, 366 cu. yds. concrete, 46,000 lbs. steel reinforcing bars, 165 lin. ft. reinforced concrete bridge railing, 194 lin. ft. beam guard rail, 338 lin. ft. precast concrete piling and other items.
5. Surfacing and constructing light bituminous surface treatment on 4.5 miles of Steptoe Butte State Park Rd. in Whitman County, a state project, involving about 10,700 cu. yds. of crushed stone surfacing, 1140 cu. yds. crushed cover stone, 880 cu. yds. of crushed mineral aggregate, 133 tons of bituminous cement (MC-2) and other items.
6. Clearing, grubbing, grading and surfacing on 2.519 miles of Kalama River Road, Cowlitz County Road Project, F.A.S. No. S-145 (1), involving about 10 acres of clearing, 10 acres of grubbing, 33,809 cu. yds. of common excavation, 35,776 cu. yds. of solid rock excavation, 8166 cu. yds. of selected roadway borrow, 2847 cu. yds. of crushed stone surfacing from stockpile, 1090 lin. ft. of culvert pipe and other items.
7. Clearing, grubbing, grading and surfacing on 1.358 miles of Eatonville Cutoff, Alder Section, Pierce County Project, F.A.S. No. S-107 (2), involving about 12 acres of clearing, 8 acres of grubbing, 50,680 cu. yds. of unclassified excavation, 7195 cu. yds. of selected roadway borrow, 1950 cu. yds. of crushed stone surfacing, 768 lin. ft. of culvert pipe and other items.
8. Clearing, grubbing, grading, surfacing and constructing bituminous surface treatment road mix type on 7.61 miles of the Addy-Gifford Road, Stevens County Road Project, F.A.S. No. S-168 (1), involving about 34 acres of clearing, 19 acres of grubbing, 206,180 cu. yds. common excavation, 1600 cu. yds. of solid rock excavation, 35,190 cu. yds. of selected roadway borrow, 9490 cu. yds. crushed stone surfacing, 6400 cu. yds. mineral aggregate, 432 tons of bituminous cement (MC-2), 3309 lin. ft. of culvert pipe and other items.
Specifications obtainable from the above office upon payment of $2.

DUMB WAITERS' ELEVATORS
by WHITCO

NEW Improved SCOOPMOBILE
Five NEW IMPROVEMENTS!
1 NEW "Shovel Action" BUCKET
A full load . . . plus! No more ramming into stock pile. Simply ease SCOOPMOBILE into pile and lift bucket with a full load . . . easier on the machine . . . faster, fuller!
2 HAND LEVER CONTROL
Two hand levers at operator's fingertips give positive, flexible control of bucket action. No more trip rope and "shock dumping" from unhandy elevations.
3 DISCHARGE ACTION
Full loads can now be discharged from very top of rack. (Up to 8 ft.) Partial loads can be discharged by closing bucket at any height while pouring.
4 NEW COUNTER BALANCE
The new SCOOPMOBILE keeps its feet on the ground! New counter balance (optional) is easy to attach to rear of Scoopmobile to accommodate heavy loads at top of rack.
5 CONTROLLED DIGGING ACTION
Improved double sheaves and mechanical improvements give entirely new control of digging angle. New design of bucket means NO spillage over rough terrain.

Indefinite Control Of Rents Leading To Public Housing

Experience with rental control in European countries after World War I clearly indicates that indefinite control of rents in this country will prolong the acute shortage of rental housing, Douglas Whitlock, chairman of Building Products Institute, stated Sunday.

First War Record

"In addition, continued control also will discourage the building of new homes and lead to the unnecessary spending of Federal funds for public housing," Whitlock said.

"Studies of the effects of rent control in these countries, made in 1930 and 1940 by the International Labour office, also show that in France, where about half the housing supply remained under rent control up to the outbreak of World War II, the number of new buildings constructed during 1920-23, including housing, averaged little over one-third of the 1913 index, despite extensive reconstruction efforts during that period.

"In 35 German cities where rent controls were continued for some years, the number of dwelling units built during the first four years after World War I averaged only one-third of the number built in the two years preceding the war. Although inflation contributed to these poor showings, the International Labour Office concluded that rent control was one of the principal causes for the failure to revive residential construction quickly.

Decontrol Next Step

"The quantity of new rental housing was exceedingly small in the countries which kept the controls. The controls removed the incentives for private rental construction because the rent ceilings were too low to yield a return on investments.

"A comparable pattern already has developed in this country. There was very little construction of rental housing here in 1946, and there will be relatively little in 1947 unless there is assurance that the ceilings will be removed entirely at an early date. As the edge is taken off the housing shortage, there will be litle demand for new units which must be rented at 30 to 40 per cent more than the rents in comparable existing units which are controlled at prewar levels.

Housing Socialized

"With private home building stagnated, the result here, as in Europe, would be a reliance on governmental subsidy and publicly built housing, all at the expense of the Treasury. In England from 1919 to 1929, 64 per cent of all new housing was built by the government or with the aid of subsidies. In Austria, 73 per cent of all new dwellings built from 1913 to 1928 were built by the government. In Germany, from 1924 to 1928, the first five years after the currency was stabilized, 78 per cent of all new units were subsidized by the government.

Uneconomic Use

"Here, as in Europe, rent control already has resulted in the uneconomic use of the housing supply. Holding rents down, in the face of higher incomes, means that families are able to occupy and pay for larger units than ormally would be the case. This takes housing away from other families, including veterans, who were away at war and not able to compete for the available housing."

COLGAN IS CHAIRMAN LUMBER SURVEY GROUP

WASHINGTON.—The appointment of Richard A. Colgan as chairman of lumber survey committee to succeed Wilson Compton was announced today by Secretary of Commerce W. Averell Harriman.

Colgan is executive vice-president of the National Lumber Manufacturers' Association with headquarters in Washington, D. C.

The lumber survey committee was set up in April, 1931, to survey current conditions of lumber production and inventories in relation to prospective lumber consumption and to submit a record of its findings to the board.

In addition to Chairman Colgan, members of the lumber survey committee are Thomas S. Holden, president, F. W. Dodge Corp., New York City; Calvin Fentress of Baker, Fentress & Co., Chicago, and M. W. Stark of Columbus, Oh., all of whom have served on the committee since its inception.

Did You Know That . . .

Russell McIntosh has recently returned from service, and he and his father, William McIntosh, have opened general contracting offices at 740—36th Avenue in San Francisco (SK 9903) and in Alameda at 1525 Chestnut (2-7450). William McIntosh has been in the business for nearly 40 years.

Lumber Shipments Are Slightly Over Week's Production

WASHINGTON.—Country-wide reports to the trade barometer of the National Lumber Manufacturers' Association for the week ending February 22 indicate that lumber shipments of 399 mills were one per cent above production and that in the same week new orders for these mills were 12.7 per cent above production.

Unfilled orders of the reporting mills amounted to 66 per cent of stocks, the capitulation showed.

At the same time, in reporting softwood mills, unfilled orders equalled 24 days' production at the rate then current. Gross stocks were equal to 34 days' production on this same basis.

Year-to-date figures report that shipments of identical mills were 13.5 per cent above production, orders 15.6 per cent above.

Comparisons with the average corresponding week of 1945-1939 indicate that production of reporting mills was 28.8 per cent above, shipments were 10.2 per cent above and orders were 35.1 per cent over. Compared to the corresponding week of 1946, production of reporting mills was 19.7 per cent above, shipments were 16.8 per cent above, and new orders 32.7 per cent above.

Timber Engineering Research Has 250 Technical Problems

WASHINGTON.—The product development shop of the Timber Engineering Company of Washington, D. C., conducts a continuing research program to develop new uses for wood products. This enterprise is under sponsorship of the National Lumber Manufacturers Association and is making valuable contributions to all phases of the construction industry.

A 16-page booklet published recently by the company contains a description of the laboratory's function and some of the recent developments that have come from the researches carried on there.

The shop-laboratory is a cooperative, industry-sponsored establishment, which carries on research work for other wood-using industries. An increasing number of companies are bringing their problems on wood or wood products to the laboratory where approximately 250 technical problems facing the lumber industry now are awaiting development.

The booklet points out that the possibilities in well-conducted fact-finding are limitless. Two examples of recently developed research-derived hardwood products are wallboard from hardwood pulp with polyxcle (a resin from hardwood) binder, and a wood impregnated with low temperature melting alloy.

Realtors to Open Fight on Federal Compensation Tax

WASHINGTON.—The cause of the Boston Tea Party was just a "bush league" incident compared to a compulsory federal taxation assessed against real estate brokers, from which relief is being sought in the 80th Congress, asserted Calvin K. Snyder, secretary of the Realtors' Washington Committee of the National Association of Real Estate Boards recently.

"More than $120 million since 1940 is estimated to have been assessed against the nation's real estate brokers to pay a tax for unemployment compensation insurance from which their salesmen, upon whom the tax is paid, can obtain no relief, although the federal legislation has been in effect since 1935", Mr. Snyder explained.

Each broker pays an estimated $100 tax on each of his salesmen, Mr. Snyder added. A conservative estimate places the number of real estate salesmen in the nation at 200,000. These figures mean that approximately $20 million a year is being paid into the federal treasury by real estate brokers, yet their salesmen employees are ineligible to receive the benefits of the insurance.

To relieve the situation, he said, Congressman Carl Hinshaw (r., Calif.) has introduced a bill to exclude the service performed by real estate salesmen from the definition of "employment" under the Federal Unemployment Tax Act. It has been referred to the Committee on Ways and Means in the House of Representatives.

HIGHWAY PLAN DELAY WILL INCREASE COST

Unless action is taken now toward construction of California's highway system to modern engineering and safety standards, the cost to the highway user will be greatly increased, Dr. William B. Herms, president of the California Automobile Assn., warned today.

The Automobile Association is convinced, after long study, that the benefits to be derived from a safe and efficient highway system will far outweigh the additional cost ,estimated at $13 per year per motorist, Dr. Herms stated.

#

STEEL BOOKINGS UP

January fabricated structural steel estimated total bookings were 101,304 tons, five per cent more than the 96,601 tons in December, American Institute of Steel Construction reported.

Shipments were 126,868 tons, 37 per cent more than the 92,578 tons shipped in January of the average five pre-war years 1936 to 1940.

REILLY WARNS VETS DECLARE USE TAX

Veterans were warned today by George R. Reilly, member of the board of equalization, to declare the Use Tax on purchase of surplus war materials to avoid penalties which automatically accrue if the tax on such purchases is not declared on time.

Reilly stated: "It has been called to my attention that many veterans are not familiar with the state law which requires 2½% Use Tax to be paid on purchases of tangible personal property such as jeeps, trucks and other surplus commodities from the war assets administration and, therefore, fail to declare such purchases or pay tax thereon. As a result, penalty and interest charges are incurred and the board of equalization is powerless under the law to eliminate or cancel those additional charges."

RECORDED NOTICES

Holden Speaks

(Continued from Page One)

panding prosperity, comparative stagnation, or depression."

Industrialists are applying war techniques to projected construction and are finding that labor saving and time-saving space layouts are as important as labor-saving machinery, he declared, adding that the role of the architect was an important one.

Opposes Paternalism

Commercial construction has nowhere ran its course, Holden said. "For the year 1947, F. W. Dodge Corporation hs estimated an overall increase of 24 per cent in dollar volume of building and engineering contracts. Government estimates duplicate that figure."

Holden attacked rental controls as the most important bottleneck to apartment building, which he expects to increase relatively more than single-family houses. "It is my strong conviction that this and all other controls, except rent ceilings on existing housing, should be abandoned at once.

"For existing housing there should be an upward adjustment of ceilings, perhaps in several stages, with abandonment of rent control set for some definite and not too distant date. It appears now that congress will attack this problem shortly.

"Last year's defeat of the W-E-T bill, the failure of the Veterans' Emergency Housing program and the trend away from government paternalism lead to the hope that housing legislation will be sound and moderate."

Sees Promising Market

In the light of these facts, Holden predicted hat "once the construction industry passes the hurdle of price and rent stabilization" the American economy will enjoy the "most promising market for expanding construction activity and for expanded service of the architectural profession that we have been able to visualize for a very long time."

Nation's Economy 1946 Dollar Value Hits Wartime Peak

WASHINGTON.—By the fourth quarter of 1946 the total output of the nation's economy, measured in dollars, had returned to the wartime peak reached in the first half of 1945, the Department of Commerce said today.

However, a considerable part of the recent dollar increase in production was due to price increases, and the "real" level of the national economy for the entire year 1946 was approximately 1/7th below the highest war years.

Actual production during 1946 was, however, about one-fifth larger than in 1941, reflecting both a higher level of employment and a more productive utilization of the nation's resources.

Government expenditures for goods and services declined sharply during the first three quarters of 1946 and leveled off in the fourth quarter. The decline was confined to "war" expenditures, which at annual rates dropped from $24 billion in the first quarter to $10 billion in the fourth.

The deflationary impact of this decline was cushioned by loans made to finance international transactions and by increased payments to veterans. These loans and payments were a potent factor in the market demand for United States products.

Private capital outlays, including construction, purchase of machinery and equipment, changes in busines inventories and foreign investment, totaled $32 billion for 1946. This aws a record high, and more than three times the 1945 total. Private capital outlays were being made in the latter half of 1946 at a rate about double the dollar totals in the best prewar years of 1929 and 1941. The 1946 total is capable of providing an investment outlet for a very large volume of individual and corporate savings as well as for reinvestment of depreciation and other business reserves, the Department of Commerce said.

#

Output of Electric Wiring Not Likely To Improve–CPA

WASHINGTON — (Exclusive). The output of critically scare wiring devices is not expected to increase materially from the March allocation of phenolic resin molding compound announced by the Office of Temporary Controls, a CPA spokesman told the Daily Pacific Builder correspondent today.

For March, CPA has set aside 1,283,100 pounds of the important compound for shipment to designated manufacturers. Five of the seven producers of phenolic resin molding compound are affected. The allocation represents only 10 to 12 per cent of total production.

With the allocations not expected to continue much longer, the Dodge papers learned the names of the five firms affected by CPA's week-end action. They are Bakelite Corp. of New York City; Durez Plastics and Chemical of North Tonowanda, New York, Monsanto Chemical, Cleveland, O., and Reilay Tar and Chemical of New York City.

No requests for the allocation of this product to the other two producers was requested by manufacturers, the agency said. General Electric is understood to be using almost 100 per cent of its own output for GE products.

Monsanto and Bakelite are just beginning to get back into full production of the compound since strikes disrupted their manufacturing processes recently.

The combined March production of the five firms benefiting under the CPA allocation is estimated at 10,265,000 pounds. The directives were issued under schedule 121 to the general chemicals conservation order, M-300, which requires manufacturers receiving allocated molding compound to use it in the end products specified. All un-allocated phenolic resin compound may be bought or sold without restriction.

The allocation system is employed as a method of pinning down a certain percentage of the end products, the CPA spokesman said.

New Stokers Are Built to Give Eye Appeal, Efficiency

Designers have taken the automatic coal stoker in hand and given it a beauty treatment, a spokesman for the Plumbing and Heating Industries Bureau pointed out today.

Smoothly flowing contours, pleasing color harmony, and smart styling have given postwar stokers eye appeal comparable to the best in automotive design. The durable enamel finish will stand up under the rigors of daily use.

The combination of a colorful stoker teamed up with the handsome jacket of a modern boiler or furnace adds beauty to the basement and provides impetus to the conversion of basement space into recreation rooms, PHIB points out.

Both the hopper, and bin-feed types of stokers have been redesigned for beauty and efficiency to provide low cost per year service.

The bin-feed model entirely climinates coal handling because it carries coal from the bin to the fire automatically. In most cases bin-feed stokers can readily be installed in existing heating plants without special construction or major alterations

Stokers are shipped from the factory completely assembled. This simplifies on the job installation and insures proper setting and adjustment.

House Works Group To Limit Surveys of Flood Control Jobs

WASHINGTON. — New regulations promuligated by the public works committee of the house defer action on unapproved flood control and navigation projects, thereby saving an estimated $2 million of the taxpayers money each year.

The new regulation was announced by Senator Dondero of Michigan, committee chairman. Under its terms several score flood control and navigation jobs repeatedly considered by congress in the past will be deferred.

It works this way:

Any suggested project that is not approved by Army engineers will have to wait three years for resubmission. Heretofore even though these jobs were turned down, they were resubmitted time after time, running up survey expenses, Senator Dondero said.

Projects approved by Army engineers will not be affected, he said.

Congressional consideration of all projects submitted has cost taxpayers approximately $4 million each year, the Michigan senator explained. Now, he hopes this figure will be cut in half.

It was carefully pointed out that maintenance work on present waterway installations will not be influenced by the new decision.

Army engineers now have 1,150 flood control and navigation projects for which surveys have been asked. It is estimated that 60 per cent of such requests are reported unfavorably.

Running along with the economy wave in congress, Senator Dondero has opposed new appropriations for such jobs, claiming the engineers already have all they can cope with; that they won't need additional survey work "for a long time to come".

#

TIN STOCKS MAY BE EXHAUSTED IN 1947

Even with the continuation of use controls, it is estimated that the government's reserve stocks of tin, exclusive of those held for emergency stockpiling, will be exhausted by the end of 1947, the Civilian Production Administration forecast today in a report on the tin situation.

Without conservation controls such as those provided by orders M-43 and M-81, the government's tin stocks would be exhausted much more rapidly and consumers soon would be in extreme difficulty because of the lack of adequate imports to replenish stocks, the CPA said.

Since the 1947 allocations have not yet been made by the Combined Tin Committee, the CPA report does not discuss the outlook for new supplies during the year.

RFC Directed to Contract for 1550 Aluminum Prefabs

WASHINGTON. — Reasonably priced aluminum pre-fabricated houses will be rolling off the assembly line in Denver's Fox Metal Products Corporation when Reconstruction Finance Corporation negotiates a guaranteed market with the Colorado firm.

Frank R. Creedon, housing expediter, has requested RFC to negotiate such a contract for the manufacture of 1,550 of the aluminum homes this year.

The contract as announced calls for a one-story, two-bedroom prefabricated aluminum unit. It is designed conventionally with 707 sq. feet of floor space. Erected, without land, it will sell for approximately $5,100.

The Fox firm manufactures aluminum sheets shaped to resemble wood siding for the exterior walls and roof finish.

Interior wall finish and partitions and ceilings are of wall board construction. A blanket type insulation is used in walls and ceiling while the floor is a concrete slab poured on the site.

With the paper work completed in Washington, the production schedule will permit manufacture of 50 houses this quarter of 1947, 400 the second quarter, 500 the third and 600 the fourth. All the output will be marketed in the Rocky Mountain area.

In business since 1929, the Fox Metal Products Corporation has turned out sheet metal products, prefabricating metal hospitals for shipments overseas during the war.

#

Most Materials In The Clear; Brick, Plastic Paints Up

WASHINGTON.—The U. S. Department of Commerce has released figures showing that production of some building materials doubled during the past year.

Substantial gains by producers of building materials and supplies in the drive to relieve housing shortages have been registered, the Department of Commerce reported.

Most prominent gains were made in the fields of unglazed brick (up 113 per cent over 1945 to a total of 4,900 million units) and sales of plastic - texture water paints which reached 20 million pounds, surpassing sales figures for every year since 1930.

Shipments of porcelain enameled products in 1946 totaled $74,400,000, the highest in 10 years. Oil burner shipments skyrocketed to 579,000 units. This total represented more than the 1945 figure.

Commerce also reported that lumber stocks at the end of 1946 were 4,163 billion board feet, up 3% per ceut from the end of the previous year.

The following comparisons of December, 1945, data with December, 1946, figures were listed:

Production: Lumber, 2,602 billion board feet, up 75.7 per cent; softwood plywood, 122 million sq. ft., up 62.7 per cent; red cedar shingles, 255,000 squares, up 55.5 per cent; unglazed brick, 381 million, up 61.4 per cent; sewer pipe, 103,000 tons, up 45.1 per cent; structural tile, 114,000 tons, up 83.9 per cent; heating stoves, 456,000 units, up 58.3 per cent; water heaters (except electrical), 316,000 units, up 98.7 per cent

Shipments: Asphalt roofing, 5,200,000 squares, up 57.6 per cent; asphalt siding, 364,000 squares, up 19.7 per cent; warm air furnaces, 75,000 units, up 127.3 per cent; oil burners, 74,000 units, up 236.4 per cent; porcelain enameled products, $6,900,000, up 102.9 per cent.

Sales: Plastic - texture water paints, 2,300,000 pounds, up 135.4 per cent; paint, varnish, lacquer and filler, $73,500,000, up 69.4 per cent; sales of cold-water paints, $612,000, up 62.3 per cent.

#

CONTROL DROPPED

WASHINGTON — Rent controls were removed from 13 portions of rent areas, OPA announced Monday. Only one such area was in California, in a portion of Lassen County.

Residental Sales Volume in Metropolitan Areas Falls Off, Prices Slide; Interest Low

WASHINGTON. — Sales of residential property have dropped sharply in volume from a year ago and a definite trend to lower prices is apparent, the National Association of Real Estate Boards reported today, upon completion of a survey of 475 cities in 45 states.

The report revealed that the larger the city, the more general is the tendency toward a lower volume of residential sales. For the first time in eight years, the survey showed a trend to lower prices in about one city of four, although 54 per cent of the cities still recorded prices higher than they were a year ago. Price trends are down ward in 47 per cent of the largest cities but only 18 per cent of the cities under 10,000 population have felt the drop.

Selling prices of detached dwellings have risen so high that they are greater than reproduction cost of similar units today in 43 per cent of the reporting cities, but they continue to be less than reproduction cost in 25 per cent. They are about equal in 22 per cent of the cities. Replies showed little significant variation between cities of various sizes.

The median situation for cities over the country is a selling price approximately equal to the current reproduction cost.

Business Rents High

In commercial property, turnover is relatively slow because of lack of offerings, but prices are higher than they were a year ago in 62 per cent of the reporting cities. Retail business space is short in 85 per cent of the cities, compared with 88 per cent in May, 1946.

Volume of sales of commercial property was reported as higher in 32 per cent of the cities, the same in 40 per cent, and lower in 28 per cent, all in comparison with 12 months earlier. Prices, on the other hand, were listed as higher in 62 per cent of the cities, the same in 35 per cent, and lower in only 3 per cent, as compared with those a year ago.

For central business property the median situation is a selling price approximately equal to reproduction cost, but in the largest cities selling prices are still dominantly below reproduction cost. For cities of over 500,000 population the median situation is a selling price 20 per cent below reproduction cost.

Under the pressure of a growing demand for well-located business property, downtown rents have advanced in 85 per cent of the cities and subcenter business rents have climbed in 80 per cent of the cities, both compared with a year ago. Less than one-half of one per cent of the cities reported any drop in rents either downtown or in subcenters, while the remainder listed a stable rent level. Most general upsurge was in the cities of 100,000 to 500,000 population, where 55 per cent of them recorded rises, while the small cities under 10,000 had the least gain, with only 75 per cent of them listed as having increases.

'Factory Good Buy'

Rents on downtown office space followed the same general pattern. Of the reporting cities, 80 per cent had a higher level downtown, and 74 per cent insubcenters. A shortage of office space was noted by 84 per cent of the cities, but 15 per cent reported a balance between supply and demand, and 1 per cent even said they had some over-supply.

Volume of sales for industrial real estate is fairly well stabilized, compared with turnover last year, with a slight tendency to a lower total. Prices are on last year's level in 46 per cent of the cities, but higher in another 47 per cent and lower in 5 per cent. The trend to increase factory prices appears strongest in cities of 100,000 to 500,000 population, with 64 per cent of these recording a boost. It is the weakest in the largest cities of more than 500,000 population, however.

A used factory building today is a good buy if it is the type and in the location desired, replies to the survey indicated. The selling price of modern one-story factory buildings is less than reproduction cost in 39 per cent of the cities and no more than reproduction cost in 72 per cent.

FHA Insurance Less

Volume of farm sales is slightly lower than it was a year ago, the survey showed. Prices for farm lands are about the same as last year in 46 per cent of the areas, but they are still on the upgrade in 45 per cent.

Money for real estate investment continues to be favorable. The gross cost to the borrower on a first mortgage with good security is unchanged from last year in 85 per cent of the cities. It is falling in 10 per cent of the cities, and rising in 5 per cent.

The survey disclosed one pronounced change of recent years in home mortgage practice, a definite decline in the proportion of home mortgages now being made that are FHA-insured. During the depression years, FHA-insured mortgages comprised the great bulk of all mortgages issued on small omes. In 74 per cent of the surveyed cities today, however, FHA is insuring no more than one home mortgage of four.

Seek Investments

Current ability to secure home mortgage money without FHA insurance reflects clearly the degree to which mortgage lending institutions are still actively competing for loans and the degree to which capital in general is on the search for good investment. In as many as 41 per cent of the cities, for example, no more than 5 per cent of the home mortgages now being made are FHA-insured.

#

Lumber Controls to Be Revised March 31; Revoke L-358-9

WASHINGTON—All production controls on lumber, millwork, hardwood flooring and softwod plywood will be removed March 31 by revocation of limitation orders L-358 and L-359, the Civilian Production Administration announced today.

However, because of millwork shortages, certain restrictions on deliveries of Douglas fir and Western pine shop lumber will be retained, CPA said. These are contained in a new Veterans' Housing Program Order 5, to become effective April 1, which will require sawmills and distributors to deliver 85 per cent of their production or receipts in any quarter of 8/4-inch and thinner Douglas fir and Western pine shop lumber, including No. 3 clears, to millwork, cut-stock manufacturers, persons who certify in writing that they will deliver to these.

CPA pointed out that, revocation of orders L-358 and L-359 notwithstanding, producers and distributors will remain subject to other applicable regulations, such as Priorities Regulation 1 and 3, the basic orders which cover use and acceptance of materials, and Priorities Regulation 33, which was set up to provide rating assistance to builders of veterans' homes.

Reports required by orders L-358 and L-359 must be made for the month of March.

Schedule A of PR-33 will be amended April 1 to include housing construction lumber, millwork, hardwood flooring and softwood plywood (construction grades) in the list of building materials controlled by the regulation, and Schedule B will be extended to provide ceilings on the accentance of rated orders for these items. Also to be amended in Schedule B is the definition of distributors. Beginning April 1, both manufacturers and wholesale or retail distributors of these lumber items will be included in this category.

The amendment of Schedule B also will provide that HH and HHH ratings for these products are not extendible after March 31 and that the seller, either manufacturer or wholesale or retail distributor, need not accept rated orders in any quarter for more than the following percentages of production or receipts:

Housing construction lumber and construction plywood, 50%.

Hardwood flooring (all grades) and millwork, 75%.

Shop lumber, 85%.

Although HH ratings are not extendible after March 31, any ratings which were applied or extended before that date must be honored, CPA said.

#

CENTRAL COAST CHAMBER MEETS

Highway legislation, legislation affecting waste disposal and water pollution, residential rent control, legislation affecting forests and fish game, small harbor development and social security and tax matters are on the program of Friday's meeting of the Central Coast Council of the California State Chamber of Commerce.

Forenoon meetings of taxation, natural resources and social security committees will be held at the Bellevue Hotel. Frank M. Shay, San Jose, regional vice president, announced. Agricultural and industrial sessions will be held at the Clift Hotel.

33— BRIDGES

3/4/47 33
Contract Awarded
Grading and Bridges Cost $832,753.50
MULTNOMAH COUNTY, Ore. Front Ave. section of Pacific Highway West.
Owner—Oregon State Highway Commission, Public Service Bldg., Portland, Ore.
Plans by engineering department of owner.
0.69 mile grading and paving and 5 major reinforced concrete structures.
Contractor—Kuckenberg Construction Co., 11104 NE. Holman St., Portland, Ore.

3/5/47 33
Pile Driving Sub-Contract Awarded
SAN MATEO CO., Cal.—M. B. McGowan, Inc., 625 Market Street, San Francisco, Calif., awarded sub-contract by Carrieo & Gautier, 365 Ocean Ave., San Francisco, Calif., for pile driving work in connection with construction of substructures for four overcrossings on Bayshore Freeway between South San Francisco and Burlingame, for the State Division of Highways.

34—DAMS, RESERVOIRS & DREDGING

3/3/47 34
Owner Taking Bids—Due No Date Set
Concrete Revetment
JUNEAU, Alaska, left bank of Gold Creek.
Owner—War Dept Seattle District, Corps of Engineers, Colonel L. H. Hewitt, Dist. Engr., 1400 Textile Tower, Seattle 1, Wash.
Plans by owner.
Includes 400 lin. ft.
Specifications obtainable from the above office.

3/3/47 34
Owner Taking Bids—Due March 18, 10 A. M.
Concrete Conduit
PASADENA, Calif., Los Angeles Co. Arroyo Seco Channel, between Colorado St. and La Loma Ave.
Owner—Board of Supervisors of Los Angeles County Flood Control District, 501 Hall of Records, Los Angeles, Calif.
Plans by Chief Engineer H. E. Hedgen, 751 S. Figueroa St., Los Angeles, Calif.
Includes alterations to existing overflow dam and construction of a rectangular reinforced concrete conduit about 4000 ft. long, with two reinforced concrete bridges crossings.

Boilers . . . High Pressure & Heating
NEW AND REBUILT
All Sizes and Types of Steel Tanks
OCEAN SHORE IRON WORKS
550 Eighth Street Phone UNderhill 4310 San Francisco

The work involves:

Proposition 1

Contractor to furnish all materials except copper water seals.

Spillway Items

(1) 80 cu. yds. removal of concrete from crest of dam;
(2) 65 cu. yds. removal of reinforced concrete from dam aprons;
(3) 2050 cu. yds. class A spillway excavation;
(4) 300 cu. yds. class B spillway excavation;
(5) 280 cu. yds. bridle trail excavation;
(6) 15 cu. yds. bedrock excavation for spillway floor subdrain system;
(7) 5 cu. yds. excavation for spillway cutoff;
(8) 3870 cu. yds. fill and backfill of spillway walls and bridle trail;
(9) 1700 cu. yds. compacted fill in place;
(10) 400 sq. yds. each additional single roller trips covering 1000 sq. ft.;
(11) 325 lin. ft. furnish and placing 6-in. concrete pipe lateral subdrain;
(12) 45 lin. ft. same 8-in. center subdrain;
(13) 92 lin. ft. same 10-in.;
(14) lump sum, alterations to well box No. 1;
(15) 25 lin. ft. 8-in. drain and outlet for well box No. 1;
(16) 50 lin. ft. same for well box No. 2;
(17) 360 cu. yds. concrete in west spillway wall;
(18) 960 cu. yds. same in east spillway wall;
(19) 180 cu. yds. same in east wall below minimum depth;
(20) 31,000 lbs. placing reinforcing steel in spillway walls;
(21) 60 cu. yds. concrete in cutoff wall at toe of dam;
(22) 2 cu. yds. reinforced concrete in cutoff wall at sta. 348 plus 100;
(23) 100 cu. yds. same in spillway crest;
(24) 145 cu. yds. same in spillway floor, 12-in. slabs;
(25) 200 cu. yds. same, 18-in. slabs;
(26) 16 lin. ft. drilling 2-in. weepholes in existing rock walls;
(27) 425 lin. ft. drilling holes, placing and grouting steel dowels;
(28) 330 lin. ft. furnish and placing fence on spillway walls;
(29) 125 lin. ft. placing copper water seals;
(30) 2650 bbls. furnish portland cement;
(31) 59,745 lbs. furnishing reinforcing steel;

Conduit tems

(1) 54,700 cu. yds. class A conduit excavation;
(2) 6000 cu. yds. class B same;
(3) 1600 cu. yds. class A training channel excavation;
(4) 200 cu. yds. class B training channel excavation;
(5) 200 cu. yds. class A typical cutoff wall excavation;
(6) 1000 cu. yds. class A downstream cutoff wall excavation;
(7) 5 cu. yds. class B same;
(8) 200 cu. yds. bedrock excavation for subdrain trenches;
(9) 990 cu. yds. reinforced concrete invert slab, center strip;
(10) 1985 cu. yds. same, side strips;
(11) 3150 cu. yds. same, wall boxes;
(12) 2375 cu. yds. same, well stems;
(13) 13 cu. yds. same in spread footings of bridge;
(14) 19 cu. yds. same in abutment footings of bridge;
(15) 42 cu. yds. same in abutment walls of bridge;
(16) 84 cu. yds. same in decks of bridge;
(17) 10 cu. yds. same in bridge curbs;
(18) 75 cu. yds. same in typical cutoff wall;
(19) 77 cu. yds. same in downstream cutoff wall;
(20) 10 drain outlet boxes;
(21) 6 drain inlet boxes;
(22) 2 18-in. drain pipe inlets;
(23) 7992 lin. ft. furnishing and placing 6-in. concrete pipe, continuous pipe drain;
(24) 1305 lin. ft. same, center subdrain;
(25) 4460 lin. ft. same, lateral subdrain;
(26) 900 lin. ft. same, 8-in. center subdrain;
(27) 1670 lin. ft. same, 10-in.;
(28) lump sum, furnish and place equestrian bridge fences;
(29) lump sum, furnish and place truck bridge railings;
(30) 7964 lin. ft. furnish and place fence on conduit walls;
(31) lump sum, furnish and place riprap and rockfill at downstream cutoff wall;
(32) 13,200 bbls. furnish portland cement;
(33) 1,232,676 lbs. furnish reinforcing steel.

Proposition 2

Same as proposition 1, but contractor to furnish all material except copper water seals, tie wire and reinforcing steel.

Specifications obtainable from the above office of the chief engineer upon payment of $2.50, not refundable.

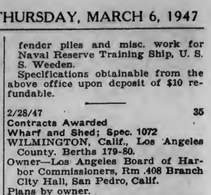
3/3/47 34
Owner Taking Bids—Due March 18, 10 A. M.—San Gabriel Dam No. 2 (Alterations)
LOS ANGELES CO., Calif. West fork of San Gabriel River approx. 8 miles west of junction with the north fork; 20 miles from City of Azusa.
Owner—L. A. County Flood Control District, 501 Hall of Records, Los Angeles Calif.
Plans by chief engineer H. E. Hedger, 751 S. Figueroa St., Los Angeles, Calif.
Alterations and reinf. concrete facing slabs.
Work involves:
(1) 60,000 cu. yds. excavation;
(2) lump sum diversion of water;
(3) lump sum, removal of timber facing;
(4) 70 cu. yds. removal of existing concrete and gunite;
(5) 158 tons furnish and place bituminous concrete;
(6) 121 fabricate and place Type A copper water seal joints;
(7) 66 same, Type B;
(8) 27 same, Type C;
(9) 8506 lin. ft. fabricate and place 18-in. and 24-in. copper water seal strips;
(10) 8956 lin ft. furnish, fabricate and place "Elastite" in joints;
(11) 8956 lin. ft. 2-in. boards, furnish, fabricate and place unimpregnated "Celotex" in joints;
(12) 9525 lin. ft. furnish and place asbestos putty in joints;
(13) 360 lin. ft. drilling dowel holes;
(14) 200 lin. ft. drilling holes in floater slabs for grouting;
(15) 500 sacks cement placed in low pressure grouting;
(16) 500 sacks cement, place in gunite;
(17) 100 cu. yds. sandblasting and straightening existing steel;
(18) 480,000 lbs. cutting and placing reinf. steel;
(19) 6490 cu. yds. placing unformed concrete in facing slabs;
(20) 8400 bbls. furnish portland cement.

Plans obtainable from the office of the chief engineer upon payment of $2.50, not refundable.

3/4/47 34
Owner Taking Bids—Due Apr. 1, 1 P. M.
Flood Control Channel and Levees; Serial 47-25
LOS ANGELES CO., Calif. From mouth of San Gabriel Canyon to Santa Fe Dam
Owner—Los Angeles District, Corps of Engineers, War Dept., 751 So. Figueroa St., Los Angeles, Calif.
Major items are:
(1) 634,000 cu. yds. channel excavation
(2) 446,000 cu. yds. levee and stabilizer excav.
(3) 227,000 cu. yds. levee and stabilizer fill
(4) 141,500 cu. yds. grouted stone blanket
(5) 19,500 cu. yds. stone blanket and apron ungrouted
(6) 48,000 tons derrick stone for stabilizer
(7) 211,000 cu. yds. backfill
(8) 56,800 cu. yds. grouting stone blanket
(9) 1100 cu. yds. concrete
(10) 45,000 lbs. reinf. steel
(11) 5450 sq. yds. 3 in. plant mixed bituminous pavement
(12) 107,700 bbls. Portland cement.

Specifications obtainable from the above office; no deposit required.

35— DOCKS, PIERS & HARBORS



3/4/47 35
Owner Taking Bids—Due March 25, 11 A. M.
Mooring Facilities: Spec. 18353
SANTA BARBARA, Calif., Santa Barbara Co.
Owner—Officer - in - Charge of Construction 11th Naval District, Public Works Dept., 1220 Pacific Highway, San Diego, Calif.
Includes construction of 4 12-pile dolphins with concrete caps and fender piles and misc. work for Naval Reserve Training Ship, U. S. S. Weeden.
Specifications obtainable from the above office upon deposit of $10 refundable.

2/28/47 35
Contracts Awarded
Wharf and Shed; Spec. 1072
WILMINGTON, Calif., Los Angeles County. Berths 179-80.
Owner—Los Angeles Board of Harbor Commissioners, Rm .408 Branch City Hall, San Pedro, Calif.
Plans by owner.
Includes timber and / or concrete wharf and steel frame transit shed extension, complete with railroad track facilities, pavement, clearing site, etc.
Contractors—M. H. Golden Construction Co., 3485 Noell, San Diego, Calif., $688,000 on Sec. "A," transit shed; Warren-Southwest, Inc., 2145 E. 25th St., Los Angeles, Calif., $232,965.72 on items 7 and 8, Sec. "E," making and impregnating piles; Guy F. Atkinson Co., 22233 S. Santa Fe Ave., Box 256, Long Beach, Calif., $466,308 on items 11 and 12, Sec. "E," transporting and driving piles, and one Sec. "F," concrete rear apron and concrete rear wharf.

PUMALITE
BUILDING BLOCKS
8" x 8" x 16 and smaller sizes now available
CHECK PUMALITE ADVANTAGES
1. LIGHTWEIGHT . . . weighs less than one-half of the average masonry block.
2. STRENGTH . . . to meet the requirements of uniform building codes.
3. *Economy* of laying . . . lightweight and convenient sizes cut building costs.
4. LOW UPKEEP and Insurance Cost (about half of frame construction rates).
5. High Insulation and Acoustic value.

Owner—City of San Diego, city clerk, City Hall, San Diego, Calif.
Plans by engineering department of owner.
The work is divided into two sections. Section 1 extends from San Vicente Dam to station 143 plus 10, a distance of about 14,300 ft., with two alternate bidding schedules: Schedule 1-a for reinforced concrete cylinder pipe and Schedule 1-b for welded steel pipe. Section 2 extends from station 143 plus 10 to Lakeside, a distance of about 7400 ft. Schedule 2 provides for the installation of reinforced concrete cylinder pipe.
The work involves:

San Vicente Second Pipeline Section 1

San Vicente Dam to Station 143 Plus 10
Schedule 1-a
Reinforced Concrete Cylinder Pipe and Miscellaneous Items

(1) 31,250 cu. yds. class 1 trench excavation, including disposal of excess material;
(2) 21,200 cu. yds. backfill of class 1 excavation, including cost of water;
(3) 100 cu. yds. sand for backfill where payment for sand is expressly provided in the specifications;
(4) 65 cu. yds. excavation, class 2, for structures, including cost of backfilling and disposal of excess material;
(5) 50 cu. yds. excavation, class 3, for small pipes, including cost of backfilling and disposal of excess material;
(6) 757 lin. ft. furnishing and installing 48-in. ID reinforced concrete cylinder pipe, class A;
(7) 460 lin. ft. furnishing and installing 48-in. ID reinforced concrete cylinder pipe, class B;
(8) 3519 lin. ft. furnishing and installing 48-in. ID reinforced concrete cylinder pipe, class C;
(9) 4095 lin. ft. furnishing and installing 48-in. ID reinforced concrete cylinder pipe, class D;
(10) 5405 lin. ft. furnishing and installing 48-in. ID reinforced concrete cylinder pipe, class E;
(11) 6 each field welded joint for 48-in. reinforced concrete cylinder pipe;
(12) 11 each 20-in. ID access manhole into pipe, complete with cover plate, liner plate, bolts, nuts and gaskets;
(13) 4 each loading, transporting and installing Simplex 4-in. flanged air inlet valve furnished by the city, and furnishing and installing outlet in pipe 4-in. flanged gate valve, Rensselaer list 13 or equal, with all solid bronze internal working parts, ¾-in. bronze petcock with threaded ends and bolts, nuts and gaskets;
(14) 4 each furnishing and installing 1-in. air release valve, Simplex or equal, with 1-in. bronze gate valve, Rensselaer list 1 or equal, and the required brass pipe fittings;
(15) 1 each furnishing and installing 8-in. blowoff assembly, type A, with 8-in. double square bottom vertical flanged gate valve, Rensselaer list 13 or equal, with all solid bronze internal working parts;
(16) 3 each furnishing and installing 8-in. blowoff assembly, type B, with 8-in. double square bottom vertical flanged gate valve, Rensselaer list 13 or equal, with handwheel and all solid bronze internal working parts;
(17) 12 tons loading, transporting, installing and connecting cast iron venturi meter tube;
(18) 2 each loading, transporting and installing at San Vicente Dam 30-in. flanged plug valve, Nordstrom Fig 1169, removing 36-in. blind flange and furnishing and installing bolts, nuts, gaskets;
(19) 1 each loading, transporting and installing at or near Sta. 137 30-in. S. Morgan Smith manually operated flanged cone stop valve and furnishing and installing bolts, nuts and gaskets;
(20) 2 each furnishing and installing on reducer at San Vicente Dam 4-in. flanged double square bottom gate valve, Rensselaer list 13 or equal, with hand-wheel and all solid bronze interior working parts, and furnishing and installing bolts, nuts and gaskets;
(21) 2 each furnishing and installing ¾-in. gage connection, including outlet in pipe, ¾-in. corporation cock, ¾-in. globe valve, ¾-in. copper tube not longer than 16 ft. and the required adaptors and connections;
(22) 2 each furnishing and installing

1-in. bronze corporation cock, including outlet in pipe;
(23) 10,000 lbs. furnishing and installing steel plate fabricated 125-lb. standard flanged wye and reducers at San Vicente Dam and miscellaneous steel pipe specials not covered by other bid items, enameled and wrapped where applicable, price based on weight of steel only;
(24) 4000 lbs. furnishing and installing steel plate pipe, fabricated bends, reducers, flanges and connection material not included in other bid items, 12-in. ID and smaller, coated and lined where applicable in accordance with the specifications, price based on weight of steel only;
(25) 4000 lbs. furnishing and installing miscellaneous steel work, trap doors, gratings, vents, etc., including cost of painting or coating where applicable;
(26) 600 lbs. loading, transporting and installing valves, fittings and miscellaneous metal work furnished by city and not included in other bid items;
(27) 4 each furnishing and installing 22-in. cast iron manhole frame and cover;
(28) 8 each furnishing and installing 6-in. cast iron valve cover;
(29) 600 lbs. furnishing and installing ladder rungs, genuine wrought iron, Byers or equal;
(30) 65 cu. yds. reinforced concrete in place in chambers and other thin or heavily reinforced structures, exclusive of reinforcing steel;
(31) 55 cu. yds. plain or lightly reinforced concrete in anchors, piers, footings, encasements, etc., exclusive of reinforcing steel;
(32) 1 cu. yd. miscellaneous concrete removed and replaced (where not covered in other items);
(33) 12,000 lbs. furnishing and placing reinforcing steel;
(34) 450 sq. ft. cutting and replacing 6-in. portland cement concrete pavement;
(35) 500 sq. ft. cutting existing pavement or oil surfacing and replacing with 4-in. plant mix pavement.

San Vicente 2nd Pipeline, Section 1
San Vicente Dam to Sta. 143 Plus 10
Schedule 1-b

Steel Pipe and Miscellaneous Items

(1) 25,100 cu. yds. class 1 trench excavation, including disposal of excess material;
(2) 18,300 cu. yds. backfill of class 1 excavation, including cost of water;
(3) 200 cu. yds. sand for backfill where payment for sand is expressly provided in the specifications;
(4) 60 cu. yds. excavation, class 2, for structures, including cost of backfilling and disposal of excess material;
(5) 50 cu. yds. excavation, class 3, for small pipes, including cost of backfilling and disposal of excess material;
(6) 14,236 lin. ft. furnishing and installing 48-in. ID, ¾-in. welded steel plate pipe enameled and wrapped;
(7) 2 each furnishing, installing and coating insulating joint on 48-in. ID steel plate pipe;
(8) 5 each electrical test station, including restoring pipe lining and coating;
(9) 20 hours cutting and welding in field ordered by engineer and not included in other bid items, including welder, helper, equipment and supplies;
(10) 4 each circumferential field cut in 48-in. ID ¾-in. plate pipe ordered by engineer;
(11) 4 each circumferential field butt weld, inside and outside, in 48-in. ID ¾-in. plate pipe where ordered by the engineer, including restoring pipe lining and coating;
(12) 11 each 20-in. ID access manhole into pipe, complete with cover plate, liner plate, bolts, nuts and gaskets;
(13) 12 each loading, transporting and installing Simplex 4-in. flanged air inlet valve furnished by city, and furnishing and installing outlet in pipe, 4-in. flanged gate valve, Rensselaer list 13 or equal, with all solid bronze internal working parts, ¼-in. bronze petcock with threaded end, and bolts, nuts and gaskets;
(14) 4 each furnishing and installing 1-in. air release valve, Simplex or equal, with 1-in. bronze gate valve, Rensselaer list 1 or equal, and the required brass pipe fittings;
(15) 1 each furnishing and installing 8-in. blowoff assembly, type A, with 8-in. double square bottom vertical flanged gate valve, Rensselaer list 13 or equal, with all solid bronze internal working parts;
(16) 3 each furnishing and installing 8-in. blowoff assembly, type B, with 8-in. double square bottom vertical flanged gate valve, Rensselaer list 13 or equal, with handwheel and all solid bronze internal working parts;
(17) 12 tons loading, transporting, installing and connecting cast iron venturi meter tube;
(18) 2 each loading, transporting and installing at San Vicente Dam 30-in. flanged plug valve, Nordstrom Fig 1186, removing 36-in. blind flange and furnishing and installing bolts, nuts, gaskets;
(19) 1 each loading, transporting and installing at or near Sta. 137 30-in. S. Morgan Smith manually operated cone stop valve and furnishing and installing bolts, nuts and gaskets;
(20) 2 each furnishing and installing on reducer at San Vicente Dam 4-in. flanged double square bottom gate valve, Rensselaer list 13 or equal, with handwheel and all solid bronze interior working parts and furnishing and installing bolts, nuts and gaskets;
(21) 2 each furnishing and installing ¾-in. gage connections, including outlet in pipe, ¾-in. corporation cock, ¾-in. globe valve, ¾-in. copper tube not longer than 16 ft. and the required adaptors and connections;
(22) 2 each furnishing and installing 1-in. bronze corporation cock, including outlet in pipe;
(23) 10,000 lbs. furnishing and installing steel plate fabricated 125-lb. standard flanged wye and reducers at San Vicente Dam and miscellaneous steel pipe specials not covered by other bid items, enameled and wrapped where applicable, price based on weight of steel only;
(24) 4000 lbs. furnishing and installing steel plate pipe, fabricated bends, reducers, flanges and connection material not included in other bid items, 12-in. ID and smaller, enameled and wrapped where applicable in accordance with the specifications, price based on weight of steel only;
(25) 4000 lbs. furnishing and installing miscellaneous steel work, trap doors, gratings, vents, etc., including cost of painting or coating where applicable;
(26) 600 lbs. loading, transporting and installing valves, fittings and miscellaneous metal work furnished by the city and not included in other bid items;
(27) 4 each furnishing and installing 22-in. cast iron manhole frame and cover;
(28) 8 each furnishing and installing 6-in. cast iron valve cover;
(29) 600 lbs. furnishing and installing ladder rungs, genuine wrought iron, Byers or equal;
(30) 50 cu. yds. reinforced concrete in place in chambers and other thin or heavily reinforced structures, exclusive of reinforcing steel;
(31) 75 cu. yds. plain or lightly reinforced concrete in anchors, piers, footings, encasements, etc., exclusive of reinforcing steel;
(32) 1 cu. yd. miscellaneous concrete removed and replaced (where not covered in other bid items);
(33) 10,000 lbs. furnishing and placing reinforcing steel;
(34) 400 sq. ft. cutting and replacing 6-in. portland cement concrete pavement;
(35) 500 sq. ft. cutting existing pavement or oil surfacing and replacing with 4-in. plant mix pavement.

San Vicente 2nd Pipeline, Section 11
Station 143 Plus 10 to Lakeside
Schedule 11

Reinforced Concrete Cylinder Pipe and Miscellaneous Items

(1) 21,850 cu. yds. class 1 trench excavation, including disposal of excess material;
(2) 16,450 cu. yds. backfill of class 1 excavation, including cost of water;
(3) 50 cu. yds. sand for backfill where payment for sand is expressly provided in the specifications;
(4) 55 cu. yds. excavation, class 2, for structures, including cost of backfilling and disposal of excess material;
(5) 10 cu. yds. excavation, class 3, for small pipes, including cost of backfilling and disposing of excess material;
(6) lump sum, all additional compensation to be received by contractor for San Diego River and San Vicente Creek crossings, over and above compensation to be received by him for the various items of work and materials at the respective unit bid prices, with all pay quantities measured in same manner as specified for remainder of the pipeline;
(7) 2112 lin. ft. furnishing and installing 48-in. ID reinforced concrete cylinder pipe, class E;
(8) 5237 lin. ft. furnishing and installing 48-in. ID reinforced concrete cylinder pipe, class F;
(9) 53 lin. ft. furnishing and installing 48-in. ID mortar lined and coated ⅜-in. steel plate pipe, bends, adaptors, reducers, flanges and connection to E1 Monte pipeline, Sec. II;
(10) 14 each field welded joint for 48-in. reinforced concrete cylinder pipe;
(11) 6 each 20-in. ID access manhole into pipe, complete with cover plate, liner plate, bolts, nuts and gaskets;
(12) 2 each loading, transporting and installing Simplex 4-in. flanged air inlet valve furnished by the city, and furnishing and installing outlet in pipe, 4-in. flanged gate valve, Rensselaer list 13 or equal, with all solid bronze internal working parts, ¼-in. bronze petcock with threaded ends and bolts, nuts, gaskets;
(13) 3 each furnishing and installing 1-in. air release valve, Simplex or equal, with 1-in. bronze gate valve, Rensselaer list 1 or equal, and the required brass pipe fittings;
(14) 1 each furnishing and installing 12-in. blowoff assembly, type A, with 12-in. double square bottom vertical flanged gate valve, Rensselaer list 13 or equal, with all solid bronze internal working parts;
(15) 1 each furnishing and installing 12-in. blowoff assembly, type B, with 12-in. venturi type tapered plug valve, Nordstrom Fig 149 or equal, with worm gears and handwheel;
(16) 1 each furnishing and installing 8-in. blowoff assembly, type B, with 8-in. double square bottom vertical flanged gate valve, Rensselaer list 13 or equal, with all solid bronze internal working parts;
(17) 1 each loading, transporting and installing at or near Sta. 217 30-in. S. Morgan Smith manually operated flanged cone stop valve and furnishing and installing bolts, nuts and gaskets;
(18) 2 each furnishing and installing ¾-in. gage connections, including outlet in pipe, ¾-in. corporation cocks, ¾-in. globe valve, ¾-in. copper tube not longer than 16 ft. and the required adaptors and connections;
(19) 2 each furnishing and installing 1-in. bronze corporation cock, including outlet in pipe;
(20) 1200 lbs. furnishing and installing steel plate pipe, fabricated bends, reducers, flanges and connection material not included in other bid items, 12-in. ID and smaller, coated and lined where applicable in accordance with the specifications, price based on weight of steel only;
(21) 3700 lbs. furnishing and installing miscellaneous steel work, trap doors, gratings, vents, etc., including cost of painting or coating where applicable;
(22) 400 lbs. loading, transporting and installing valves, fittings and miscellaneous metal work furnished by city and not included in other bid items;
(23) 3 each furnishing and installing 22-in. cast iron manhole frame and cover;
(24) 6 each furnishing and installing 6-in. cast iron valve cover;
(25) 500 lbs. furnishing and installing ladder rungs, genuine wrought iron, Byers or equal;
(26) 55 cu. yds. reinforced concrete in place in chambers and other thin or heavily reinforced structures, exclusive of reinforcing steel;
(27) 35 cu. yds. plain or lightly reinforced concrete in anchors, piers, footings, encasements, etc., exclusive of reinforcing steel;
(28) 1 cu. yds. miscellaneous concrete removed and replaced (where not covered in other bid items);
(29) 9000 lbs. furnishing and placing reinforcing steel;
(30) 16,900 sq. ft. cutting existing pavement or oil surfacing and replacing with 3-in. plant mix pavement;
(31) 1100 sq. ft. cutting existing pavement or oil surfacing and replacing with 4-in. plant mix pavement.

If awarded Schedules 1-a and 2, deduct.

If awarded Schedules 1-b and 2, deduct.

Plans and specifications available from the office of the purchasing agent, Room 273 Civic Center, San Diego, upon deposit of $10.

LOS ANGELES RIVER CHANNEL IMPROVEMENTS

Los Angeles River Channel improvements; Spec. 47-21 Cost, $2,469,577

LOS ANGELES COUNTY, Calif. Between Ninagara St. and Lankershim Blvd., river mile 33.7 to river mile 35.4 in the cities of Burbank and Los Angeles.

Owner—Los Angeles District Corps of Engineer, War Department, 751 S. Figueroa St., Los Angeles, Calif.

Plans by engineering department of owner.

9000 lin. ft. of river channel improvement and appurtenant consisting of rectangular reinforced concrete section with a rectangular low water channel in the center. Portions of the invert or curve will be superelevated. Subdrainage will consist of a sand and gravel filter under the invert supplemented by tile drains, embedded in gravel, placed behind the channel walls and beneath the invert. An additional span, concrete bearing piles, steel bearing piles, concrete diaphragm, pier extensions will be required for the Barham Blvd. bridge, which will require construction and removal of a detour on Rose St. Other features include removing the existing downstream sheet pile cutoff and bank protection structures; construction of concrete and metal pipe side drains, fencing, planting lawn and installing suspended water line and timber guard railings.

Low Bidder — United Concrete Pipe Corp., Vinnell Co. and Ralph A. Bell (a joint venture), P. O. Box 425, Baldwin Park, Calif., $2,369,577 (total 1st 37 items).

The work involves:

(1) lump sum, diversion and control of water;
(2) lump sum, clearing site and removing existing obstructions;
(3) 3000 cu. yds. rock excavation;
(4) 408,000 cu. yds. channel excavation;
(5) 200 cu. yds. structure excavation;
(6) 9460 cu. yds. levee and spillway excavation;
(7) 24,000 cu. yds. excavation for removal of unsuitable soils;
(8) 178,800 cu. yds. compacted fill;
(9) 24,000 cu. yds. structure fill;
(10) lump sum, Rose St. detour;
(11) 36,595 cu. yds. concrete in invert slab;
(12) 1225 cu. yds. concrete in walls of low water channel;
(13) 12,900 cu. yds. concrete in wall bases and footings;
(14) 12,800 cu. yds. concrete in main channel walls;
(15) 325 cu. yds. concrete in substructures;
(16) 70 cu. yds. concrete in superstructures;
(17) 290 cu. yds. concrete in spillways;
(18) 70 cu. yds. concrete, miscellaneous;
(19) 96,385 bbls. portland cement;
(20) 6,405,000 lbs. steel reinforcing bars;
(21) 6200 lbs. steel reinforcing fabric;
(22) 12,100 each sleeves for type A joint;
(23) 17,800 each sleeves for type E joint;
(24) 495 lin. ft. concrete piles;
(25) 3200 lin. ft. driving steel bearing piles;
(26) 150 each splices of steel bearing piles;
(27) 128 each cape for steel bearing piles;
(28) 2100 sq. ft. steel sheet piles, 22 lbs. per sq. ft.;
(29) 1100 sq. ft. steel sheet piles, 32 lbs. per sq. ft.;
(30) 68,500 lbs. structural steel;
(31) lump sum, handrailing;
(32) 31,700 cu. yds. drain material;
(33) 24,000 cu. yds. filter material;
(34) 7770 cu. yds. filter drain material;
(35) 240 lin. ft. removing and replacing existing 6-in. tile drain;
(36) 120 lin. ft. 6-in. tile drain;
(37) 32,000 lin. ft. 8-in. perforated VCP drain;
(38) 1930 lin. ft. 12-in. perforated VCP drain;
(39) 100 lin. ft. 12-inch corrugated metal pipe;
(40) 276 lin. ft. 18-inch corrugated metal pipe;
(41) 223 lin. ft. 24-inch corrugated metal pipe;
(42) 112 lin. ft. 36-inch corrugated metal pipe;
(43) 93 lin. ft. 48-inch corrugated metal pipe;
(44) deleted;
(45) 2 each subdrain riser and hood;
(46) 2500 sq. yds. planting grass;
(47) 425 tons bituminous surfacing;
(48) 200 cu. yds. derrick stone;
(49) lump sum, suspended water line;
(50) 17,700 lin. ft. chain fence;
(51) 340 lin. ft. removing and replacing existing channel fence;
(52) 100 lin. ft. spillway fence;
(53) 40 sq. ft. brickwork in wall openings;
(54) 72 lin. ft. timber guardrail;
(55) 20 lin. ft. removing and relaying 10-in. CIP blowoff line;
(56) 192 lin. ft. relaying 60-in. corrugated metal pipe;
(57) 50,000 squares (100 sq. ft.) additional sheepsfoot rolling;

Alternate for Item No. 32 and 33

(58) 55,700 cu .yds. filter drain material.

Alternate for Item No. 37

(59) 32,000 lin. ft. 8-in. perforated corrugated metal drain;

Alternate for Item No. 38

(60) 1930 lin. ft. 12-inch perforated corrugated metal drain;
(61) 111,500 sq. ft. suction processing of concrete.

The total bids submitted Feb. 25 on the first 37 items were:

(A) United Concrete Pipe Corp., Vinnell Co. and Ralph A. Bell, $2,469,-577.50.
(B) E. B. Bishop, Orland, Calif., $2,-551,200.90.
(C) Hensler Constr. Co., MacDonald & Kruse, Inc., and Jas. L. and John M. Ferry, $2,713,581.

Contracts Awarded
BOULDER CANYON PROJECT, Arizona-Nevada-California; and Rio Grande Project, New Mexico-Texas—John W. Beam, Denver, Colo., at (Sch. 1,) $5500 awarded contract on Schedule 1, at $5500; and Pacific Coast Engineering Co., Oak and Clement, Alameda, Calif., at (Sche. 2) $13,070 awarded contract by the Bureau of Reclamation, Denver, Colo under Spec. 1605 for furnishing radial gates and gate hoist for the White water siphon, Coachella canal, Boulder Canyon project, Ariz-Nev-Calif; and for the Mesilla dam, Rio Grande project, N. M-Tex; Bids were received Jan. 24.

3/4/47 43
Transformers
Contract Awarded
CENTRAL VALLEY PROJECT, Calif. —Westinghouse Electric Corp., Denver, Colo., at (Sched. 2) $16,206 awarded contract by the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1675 for furnishing and delivering f.o.b. cars at the shipping point and/or Concord, Calif., transformers for Clayton Canal pumping plant.

3/4/47 43
Sale of Gage Glasses
SAN FRANCISCO. — War Assets Admin., Customers' Service Center, Maple & Butler Aves., Fresno, Calif. announces sale at fixed prices of gage glasses to priority claimants and normal trade channels concurrently with closing date set for March 26.

3/4/47 43
Sale of Automotive Parts
SACRAMENTO, Calif.,—War Assets Admin., District Disposal Office, Bldg. T-627-A, McClellan Field, Sacramento, Calif., announces sale of automotive parts at fixed prices March 18.

3/4/47 43
School Bus Chassis
Bids Wanted
FALLON, Nevada.—Until April 8, 8 p. m. bids will be received by the Consolidated School District B. A. B. Andrews, President of Board of Trustees, and Albert Seeliger, School Supt., Oaks Park School ,Fallon, Nev., for one school bus chassis for delivery on or before June 2, 1947.
Specifications obtainable from the above office.

3/4/47 43
Load Protection Equipment
Contract Awarded
OAKLAND, Calif., Alameda Co.—Kelman Electric Mfg. Co., at $3546 awarded contract by the East Bay Municipal Utility District, Room 312, 512 16th St., Oakland, Calif., under Pro. No. 1816 for furnishing overload protection equipment for 11 kv. power distribution system.
Bids on the storage batteries were rejected.

3/4/47 43
Radial Gates
Low and Only Bidders
BOISE PROJECT, Idaho.—The following submitted bids Feb. 24 to the U. S. Bureau of Reclamation, Customs House, Denver, Colo., under Spec. 1658 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Mountain Home, Idaho, two 25-foot by 22-foot radial gates with 5-inch diameter rollers, pin bearings, 10-inch wall plates with butt splices and gate sills: two 40,000-lb. capacity motor-driven radial-gate hoists for installation in the spillway of Anderson Ranch Dam, Boise Project, Idaho. The gates and hoists will be installed by the government.
Denver Steel & Iron Works, f.o.o. Denver, (1) $10,450; 75,000 lbs.; 5th class. No equalization.
Newport News Shipbuilding & Dry dock Co., f.o.b. Newport News, Va., (1) $13,550, 84,0000 lbs.; (2) $16,500; 25,000 lbs. No equalization.
Southwest Welding & Mfg. f.o.b. Alhambra, Calif., (1) $11,870, 84,000 lbs. No equalization.
Berkeley Steel Construction Co., Inc., f.o.b. Berkeley, (1) $12,420; 92,-000 lbs. No equalization.
Consolidated Steel, f.o.b. Los Angeles, (2) $16,600; 21,500 lbs.
Valley Iron Works, f.o.b. Yakima, Wash., (1) 19460, 73,600 lbs. (2) $10,000 17,500 lbs. Combination bid, $18,200. No equalization.
Steel Tank & Pipe Co., of California, f.o.b. Berkeley, (1) $15,180; 45,-000 lbs. No equalization.
Western Gear Works, f.o.b. Seattle, Wash., (2) $13,901, alt. $12,620. Alt based on paragraph 18 in specifications based on method of payment. No equalization.
Monarch Forge & Machine Works, f.o.b. Portland, Ore., (2) $11,390; 21,-000 lbs. No equalization.
American Bridge Co., Denver, f.o.b. Ambridge, Pa., (1) $13,374; 80,400 lbs. No equalization.
Dravo Corp, Pittsburgh, Pa., f.o.b. Neville Island, (1) $12,880; 80,000 lbs.; (2) $15,050, 21,000 lbs. No equalization.
Pacific Coast Engineering Co., Alameda, f.o.b. Alameda, (1) $10,97b, 79,000 lbs.; (2) $11,920. 23,000 lbs. No equalization.
Willamette Iron & Steel, f.o.b. Portland, Ore., (1) $15,634.75; 87,000 lbs.

3/4/47 43
Gate Assemblies
Low and Only Bidders
COLUMBIA BASIN PROJECT, Washington, and MISSOURI BASIN PROJECT, South Dakota.—The following submitted bids February 24 to the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1638 for furnishing two gate assemblies and a gate hoist for the Angostura Dam, Missouri Basin Project, South Dakota, and one gate assembly each for the Long Lake Dam and Potholes Dam, oClumbia Basin Project, Washington:
Willamette Iron & Steel Co., f.o.b. Portland, Ore., (1) $26,961, (2) $17,-709, (3) $15,948, (4) $15,948, net. Combination (1), (2), (3) and (4), $64,727, and (2), (3) and (4) $37,766.
Filer & Stowell, f.o.b. Milwaukee, Wis., (1) $32,400, (2) $22,500, (3) $15,-900, (4) $18,900, net. Combination (1), (2), (3) and (4) $79,000; (2), (3) and (4) $46,140; no equalization.
Joshua Hendy Iron Works, f.o.b. Sunnyvale, Calif., (1) $33,566, (2) $19,-757, (3) $16,641, (4) $16,641, net. Combination (1), (2), (3) and (4) $80,244; (2), (3) and (4) $46,967; (3), (4) $29,-412. No equalization.
McKiernan-Terry Corp., f.o.b. Harrison, N. J., (1) $34,700, (2) $20,000, (3) $16,000, (4) $16,000, net. Combination (1), (2), (3) and (4) $86,000. No equalization.
Baldwin Locomotive Works, f.o.b. Eddystone, Pa., (1) $37,200, (2) $23,-350, (3) $19,150, (4) $19,150, net. No combination bid. No equalization.
Consolidated Steel Corp., f.o.b. Los Angeles, (1) $43,200, (2) $28,490, (3) $22,880, (4) $22,880, net. Combination (1), (2), (3) and (4) $103,600. No equalization.
Waterliet Arsenal, f.o.b. Waterliet, N. Y., (1) $53,000, (2) $34,000, (3) $21,-700, (4) $21,700, net. Combination (1), (2), (3) and (4) $21700, net. Combination 1), (2), (3) and (4) $105,000; (2), (3) and (4) $61,000; (3) and (4) $37,-000; (2) and (3) $45,500; (1) and (2) $74,000. No equalization.

3/4/47 43
Disconnecting Switch
Bids Rejected—To Be Readvertised as Spec. 1730 to Open April 15
FORT PECK PROJECT, Montana. Bids submitted January 22 were rejected by the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1600 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Savage, Mont., one (1) $60,000-volt, 600-ampere, 3-pole, single-throw, manually-gang operated, outdoor type disconnecting switch, with manually-gang operated ground blades, for the Savage pumping plant, 69-kv. transmission line, Fort Peck Project, Montana. The apparatus will be installed by the government.

44— SUB-CONTRACT INFORMATION

3/3/47 44
Regrading—Bids Wanted
LOS ANGELES, Calif., Los Angeles Co.—Until March 26, 2 P. M., bids will be received by the Federal Works Agency, Public Buildings Administration, office of the district engineer, 538 U. S. Appraiser's Bldg., San Francisco, Calif., for regrading approach arches at the U. S. Post Office and Courthouse, Los Angeles, Calif. Plans and specifications obtainable from the above office of the district engineer.

3/4/47 44
Seals in Refrigerated Compressors—No Bids Received
LOS ANGELES, Calif., Los Angeles Co.—No bids were received February 26th, by the Federal Works Agency, Public Buildings Administration, Office of the District Engineer, 538 U. S. Appraiser's Building, San Francisco, California, for furnishing and installing seals in refrigerated compressors at the U. S. Post Office and Courthouse, Los Angeles, California.

3/4/47 44
Motors, Etc.
Low and Only Bidder
COLUMBIA BASIN PROJECT, Wash. —General Electric Co., Denver, Colo., at $4237.35; ship 581 days; 3500 lbs. Schenectady, N. Y., ¾ f.o.b. destination; net; will equalize; 30% price clause given, submitted only bid Feb. 25 to the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1637 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Odair, Wash., one 35-hj. wound-rotor induction motor with mounted motor pinion, mounted electric solenoid brake, drum controller and resistor bank for the crane hoisting motion; one 5-hp. wound-rotor induction motor with mounted motor pinion, mounted brake wheel, drum controlled and resistor bank for the crane travel motion; one alternating current-direct current conversion unit and all other electrical control apparatus for replacement of the present electric motors and control apparatus for the 14-ton draft tube gantry crane, left power plant, Grand Coulee Dam, Columbia Basin Project, Washington. The brake wheel to be mounted on the 5-hp. travel motor will be used in connection with an existing mechanical foot brake. All electrical conduit and wiring required to interconnect the apparatus covered by these specifications will be furnished and installed by the government. The apparatus will be installed by the government.

3/4/47 44
Aluminum Railings, Etc.
Bid Opening Date Extended from March 18 to March 27, 2 P. M.
BOULDER CANYON PROJECT, Ariz-Calif.-Nev. —Until March 27, 2 p. m. bids will be received by the U. S. Bureau of Reclamation, Customhouse, Denver, Colo., under Spec. 1695 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Boulder City, Nevada, aluminum railings in the switch houses for units A1 and A2-A3, and metal partitions, steel doors, steel stairs. aluminum doorframes, aluminum railings, aluminum curbs and trim, and miscellaneous structural and architectural metalwork for units A1, A2, A5, and N7 in the Boulder Power Plant, Boulder Canyon Project, Arizona-California-Nevada. The materials will be installed by the Government.
No charge for copies of the specifications to prospective bidders; to others, $1, per copy, not returnable.

2/28/47 44
Prefabricated Building
Bid Rejected
COLORADO RIVER CONTROL PROJECT, Arizona - California - Nevada.—The only bid submitted Feb. 17 by the Truscon Steel Co., Denver, Colo., at $9850, was rejected by the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1644 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Needles, Calif., one (1) 40-foot by 100-foot prefabricated steel building for shops and storage space in Needles, Calif., Colorado River Control Project, Arizona-California-Nevada.

2/28/47 44
Prefabricated Steel Building
Bid Rejected—To Be Readvertised as Spec. No. 1724 to Open April 9
HUNGRY HORSE PROJECT, Montana. —The only bid submitted December 11 by Titan Metal Products Corp., 625 NW. Couch, Portland, Ore., at (Sch. 1) $10,312, f.o.b. destination, 49,419 lbs., ship 30 and 60 days, 30% 10 days and 2% 20 days, equalization offered, was rejected by the U. S. Bureau of Reclamation, Denver, Colo., under Spec. 1539 for furnishing and delivering f.o.b. cars at the shipping point or f.o.b. cars at Columbia Falls, Mont., one (1) 80-foot by 100-foot prefabricated steel building to be used for a fire station and shop at Hungry Horse Government Camp, Hungry Horse Project, Montana. The building will be erected by the government.

2/28/47 44
Acoustic Ceiling—Contract Awarded
SAN FRANCISCO, Calif. — Johns Manville Sales Corp., 116 New Montgomery St., San Francisco, Calif., at $2,565 awarded contract by the Federal Works Agency, Public Buildings Administration, Office of the District Engineer, 538 U. S. Appraiser's Building, San Francisco, Calif., for acoustic ceilings in telephone room and disbursing office at the Federal Office Building, San Francisco, Calif.

2/28/47 44
Sheet Metal Work (Furnish and Install)
Bids Wanted
CENTRAL VALLEY PROJECT, California.—Until April 1, 10 A. M., bids will be received by the U. S. Bureau of Reclamation, Redding, Calif., under Spec. 1708 for furnishing and installing sheet metal ducts with hangers and accessories for the ventilating system for the Shasta power plant, Central Valley Project, Calif. Shasta power plant is situated at the Shasta Dam on the Sacramento River in the State of California.
Copies of the specifications may be obtained from the following offices of the Bureau of Reclamation: Walker R. Young, chief engineer, U. S. Customs House, Denver 2, Colo.; R. L. Boke, regional director, P. O. Box 2511, Sacramento 10, Calif.; I. C. Harris, construction engineer, Redding, Calif., and Michael W. Straus, commissioner, Bureau of Reclamation, Washington 25, D. C. Prospective bidders desiring to visit the site of the work should communicate with the construction engineer.
No charge to prospective bidders for specifications; to others, $1, per copy, not refundable.

3/5/47 44
Sub-Contracts Awarded—Construction Started February 24
School Addition (4 Classrooms and Sanitary Facilities) Cost $50,713
RIVERDALE, Calif., Fresno County.
Riverdale Elementary School.
Owner—Riverdale Union School District, Riverdale, Calif.
Architects—David Horn and Marshall Mortland., Rowell Bldg., Fresno, Calif.
Includes four classrooms and sanitary facilities.
Contractor—Harris Construction Co., P. O. Box 109, Fresno, Calif.
Masonry—H. E. Feller, 215 Cambridge Ave., Fresno, Calif.
Millwork—Hollenbeck-Bush Planing Mill Co., P. O. Box 1006, Fresno, Calif.
Lathing and Plastering—Nick Masi, 511 Oleander, Fresno, Calif.
Roofing—Faris-Osborne Co., 1360 N. Fresno, Fresno, Calif.
Glass and Glazing—W. P. Fuller & Co., Los Angeles and M Sts., Fresno, Calif.
Painting—Paul Nixon, 1587 N. Calaveras, Fresno, Calif.
Steel Sash and Miscellaneous Iron and Steel—Kyle & Co., 346 G St., Fresno, Calif.
Plumbing—Fred W. High & Son, 224 Belmont, Fresno, Calif.
Electric Work—Electric Construction Co., 831 Fulton St., Fresno, Calif.
Floor Coverings — Bray Floorcraft Co., 741 Divisadero, Fresno, Calif.
Blackboards — Healey & Popovich, 1312 Broadway, Fresno, Calif.
Sheet Metal and Ventilating—New England Sheet Metal Works, 400 Broadway, Fresno, Calif.

3/5/47 44
Exterior Painting—Contract Awarded
SAN DIEGO, Calif., San Diego Co. —Kolpacoff Painting Service, 3874 American Ave., La Mesa, Calif., at $2,535, awarded contract by the Federal Works Agency, Public Buildings Administration, Office of the District Engineer, 538 U. S. Appraiser's Building, San Francisco, Calif., for exterior painting, etc., at the U. S. Custom House, San Diego, Calif.

Official Proposal

Fusion Welded Sheet Steel Pipe

NAPA CITY WATER WORKS
CONN CREEK PROJ. PIPE LINE

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the City Clerk at Napa, California, until 7:30 P. M. March 11, 1947, covering the supplying of fusion welded sheet steel water pipe together with certain of its accessories and appurtenances for use by the City of Napa in the construction of the proposed Conn Creek Project Pipe Line, which pipe line is to be used for the conveyance of water from the existing Conn Creek Reservoir.
Prospective bidders are advised that the issuance of general obligation bonds in a sum ample to cover the cost of the said pipe line has been authorized at an election heretofore duly held.
Proposals as solicited will have particular reference to fusion welded sheet steel pipe as per specifications attached thereto, but proposals also will be received covering pipe which the bidder may consider to be in all respects the equivalent thereof and economically competitive therewith.
Proposal Schedules will cover the furnishing of pipe as follows:
Schedule A Approximately 7500 lineal feet of 36 in. I.D x¼ in. i.e. 36½ in. O.D. fusion welded sheet steel pipe, to be double dipped only, together with
Schedule B Approximately 97,000 lineal feet of 24 in. I.D. x ¼ in. i.e. 24½ in. O.D. fusion welded sheet steel pipe, to be double dipped and wrapped, or
Schedule C Approximately 97,000 lineal feet of 30 in. I.D. x ¼ in. i.e. 30½ in. O.D. fusion welded sheet steel pipe, to be double dipped and wrapped, or
Schedule D Approximately 97,000 lineal feet of 36 in. I.D. x ¼ in. i.e. 36½ in. O. D. fusion welded sheet steel pipe, to be double dipped and wrapped.
Attention is directed to the fact that the bidding schedules include certain accessories and appurtenances upon which bid figures will be required.
Specifications and proposal forms are on file at the office of the City Clerk, City Hall, Napa, California, and also at the office of A. Kempkey, Consulting Engineer, Balboa Building, San Francisco, California.
A certified check in the sum of not less than ten per cent of the maximum "Comparative Bid Total" as shown in the proposal must accompany each bid.
The City of Napa reserves the right to reject any and/or all bids, or to accept other than the lowest bid, as may appear to its best interests.

A Triumph of War Research, Ceraseal Has Many Applications in Building Industry

A football coach in Wisconsin discovered a treatment to protect all of Marquette University's football shoes from mold when the shoes were stored in damp places.
A manufacturer of lawn and patio furniture in Florida was pleased to find that another preservative of the same type made vat-dyed colors fade-proof, and that weaker colors were made 75% more sun-fast.

In Denver a contractor used the preservative to waterproof a concrete hearth which previously had leaked very badly and on mortar joints of glass brick which also had leaked.

Two Wood Types

"We are planning to treat all of our concrete and tile floors in our engine rooms and brew house, and also to treat the wood in our wash house and bottle shop," a Chicago brewery official announced. "We are further planning to request the manufacturers of all our cases to treat them with this seal for water-proofness, insect - proofness and toughness," he added.

Across the nation people in every profession, every walk of life, are turning to a new and almost magic liquid to solve the problem of protecting their possessions from water, weather, insects, fungus, stains and other destructive forces. The name of this amazing new preservative — another triumph of war research—is Ceraseal.

One of the special properties of this extraordinary new product is that it acts as a complete seal. Not only does it form an outer protective shell but also it permeates the substance carrying its preservative effect throughout the material treated.

There are two types and two weights or consistencies of Ceraseal for use on wood—one type for hardwood and one for softwood. As already noted, it is not merely a coating but is also a penetrant that saturates every fibre of the wood and insures against rot and deterioration. It contains pentachlorophenol to protect against undue weather damage, dry rot and warpage, termite and insect infestation, mildew and fungus growth. Redwood when treated with Ceraseal no longer presents any danger of staining.

Seals Concrete Buildings

Ceraseal has been used successfully on floors, woodwork, furniture, doors, windows, frames, sashes, cabinets, posts, boats, chicken coops, hardware, metals and plain materials. Its various uses for farm buildings have proved extremely valuable.

Ceraseal "double-L-Use" comes in types developed specifically for protection of masonry, of wood, of textiles and of leather. It protects against water, moisture, and weather and guards against cracking and dusting as well as against stains from oil, greases or acids. It is equally useful for homes, factories, office buildings and farm buildings.

Used on insulation Ceraseal assures the building contractor, insulator and decorator of protection against moisture absorption and transmittal. It has proved unusually efficient in protecting fibre, asbestos, paper, rock wool, wallboards, pulps, sawdust and prest products.

Concrete block buildings are made damp-proof despite inclement weather conditions with a mixture of 40 per cent Ceraseal, 30 per cent white lead and oil, and 30 per cent aluminum paint. It is applied both on the outside and on the inside to produce an attractive aluminum white surface color. Several companies, after experimenting with Ceraseal for concrete structures, found the results so successful that they followed through

(Continued on Page 7)

CPA to Continue Some Shop Lumber Restrictions

WASHINGTON. — The sale of 8/4-in. and thinner Douglas Fir and Western Pine shop lumber from sawmills will be held to 85 per cent of production in any one quarter under terms of the new Veterans' Housing Program Order 5.

Beginning April 1, the delivery of this lumber type, including No. 5 clears, will be restricted by the new VHPO-5 instead of by Limitation Order L-359.

Ratings applied or extended for lumber prior to the April 1 date will not be affected by the transfer of regulation, the Civilian Production Administration pointed out.

After April 1, any persons who certify in writing that they will sell to millwork or cut-stock manufacturers may be considered in the same category with other distributors and receive shipments from the sawmills—that is, they may be included for a part of the 85 per cent per quarter which sawmills will be allowed to sell to manufacturers or distributors of millwork or cut-stock.

Continuation of some form of restrictive measure was deemed necessary, according to CPA, because:

"There is a shortage in the supply of Douglas Fir and Western Pine shop lumber for defense, for private account and for export. Douglas Fir and Western Pine shop lumber are suitable for the manufacture of millwork needed for the construction and completion

GROOVER AND I

FRIDAY, THE 7th

Make this a lucky day—turn joss and rub your favorite rabbit's foot. On the serious side, it is time that we offer prayers to the God of our Forefathers for our future.

☆ ☆ ☆

After World War I President Wilson went to Versailles, carrying with him the resources of a Nation, and possibly the Destiny of Civilization.

☆ ☆ ☆

Perhaps never in history has such a responsibility rested on the shoulders of one man.

☆ ☆ ☆

The dream of Wilson, Roosevelt and Churchill seems further than ever beyond our reach, despite the existence of a United Nations.

☆ ☆ ☆

We have spent our resources down to our undershirt trying to buy peace through appeasement. We only know we are now far down the road on which there is no turning. It seems to be a case of "shoots the works — double or nothing".

☆ ☆ ☆

Our little home front bickering and quarreling becomes very insignificant when viewed against the backdrop of World future. We should stop and offer a moment of prayer, asking strength and guidance for the one man upon whom so much depends.

☆ ☆ ☆

This is a milestone in History—our prayer is that it is not the gravestone of Civilization.

#

Lumber Merchants Committee to Meet Saturday, March 8

The Legislative Committee of the Lumber Merchants Association of Northern California will meet at 11 a. m., Saturday, March 8, at the Palace Hotel in San Francisco to discuss pending legislation introduced into the State of California Legislature.

The discussion will cover more than 40 Senate and Assembly bills concerning construction, housing, labor and rent control.

The findings and recommendations of the Committee will be reported to the Board of Directors and to the membership of the Association. A definite course of action will be decided upon regarding several bills that directly affect the lumber and building materials industry.

Members of the Legislative Committee are George K. Adams, Walnut Grove, President of the Lumber Merchants Association; Wendell Robie, Auburn, Chairman of the Committee; M. A. Harris of Van - Arsdale - Harris Lumber Co., San Francisco; Henry Laws of Laws & Yeager Co., Santa Rosa; F. L. Dettmann of Allen & Dettman Lumber Co., San Francisco; Jo Shepard of the Builders Emporium, El Cerrito.

#

AED MEETS MONDAY

Traffic accidents will be discussed in detail by John E. Curley, of the National Safety Council, when the Construction Equipment Distributors Association holds its monthly meeting Monday evening, March 10, at the St. Julian Cafe.

He will be introduced by President L. T. Peckman. Reports will be received from members of the Association who attended the national convention in Chicago recently.

Home Price, Sales Volume Expected to Drop In Majority of Cities in 1947, Survey Shows

Price and volume of sales of homes are both expected to drop in a majority of the cities of the country during 1947, the National Association of Real Estate Boards reported today on the basis of returns from its 46th semi-annual survey of the real estate market. The survey brought replies from local real estate boards in 475 cities in 45 states.

The returns thus dispelled the specter of "an uncontrolled boom" in real estate which is being held up by some to justify continuing rent control.

Prices of residential property are expected to be lower as the year progresses in 53 per cent of the reporting cities, and to remain at their present level in 36 per cent. Only 11 per cent of the cities believe that prices will continue to rise.

Not one of the largest cities with population of more than 500,000 looks for higher home prices, and only 3 percent of the cities with population of 100,000 or more anticipate such a rise. In fact, 57 per cent and 64 per cent, respectively, forecast lower residential prices.

Volume of home sales is expected to dwindle still further during 1947 in 63 per cent of the reporting cities. Only 11 per cent expect a greater volume, and this 11 per cent does not include even one of the cities with a population of more than 500,000.

Indicating the increasing tempo anticipated in new home construction, 44 per cent of the cities expect higher prices for home sites. Only 7 per cent forecast softening prices.

A need for new commercial building was reported by 91 per cent of the cities. Reflecting this heightened demand for well-located downtown and business property, 51 per cent of the cities expect a rise in prices during 1947. Only 4 per cent of the cities forecast any drop in prices, and not one of the largest cities is in this category.

Business property rents will continue to rise, in the opinion of 62 per cent of the cities, but 37 per cent anticipate no change. The outlook for higher rents is in proportion to the size of the cities. For example, 86 per cent of the largest cities expect a rise, but only 49 per cent of the small cities with population under 10,000 look for a gain.

Much the same picture was painted for office rents. A rise is expected by 60 per cent of the cities, and the larger the city, the more likely is the anticipation of a jump.

Wartime industrial expansion did not result in an over-supply of factories and other production facilities, the survey showed. A demand for industrial real estate in excess of supply was reported by 76 per cent of the cities, and all of the largest cities so replied. Of those indicating this demand, 42 per cent listed warehousing as a principal need; 23 per cent, general utility buildings; 15 per cent, factory buildings, 10 per cent, all types.

A trend toward higher real estate taxes was reported in 85 per cent of the cities. This reflects the fact that cities are again coming into a position to make major public improvements that were banned during the war period or that have been impossible because of lack of materials.

In 15 per cent of the reporting cities, the real estate taxes are expected to stay on the same level as last year. Only 2 per cent look for lower taxes. The larger the city, the more general is the trend to higher real estate taxes.

New non-real estate sources of revenues have been adopted recently in 28 per cent of the reporting cities, and new sources are under consideration in a number of other communities. Sales tax is the source in 16 per cent of the cities which told where they got their new revenue; utility tax, in 16 per cent; business tax, in 6 per cent; amusement levy, in 5 per cent; licences, in 9 per cent. Parking meters were named by 54 per

Plans Completed for $20 Million Rental Project—Billings

Plans for a $20 million San Francisco apartment house project are complete, it was announced Friday by officers of the Mayfair Heights Corporation, owners of the development.

The area, to be known as Anzavista, is situated on one of the city's highest and most easily accessible plateaus. It is bounded by Geary Street on the north, Turk Street on the south, Masonic Ave. on the west, and St. Jospeh's Ave. on the east.

The development, once the site of historic Calvary Cemetery, is made up of 235 lots. Each lot has a minimum frontage of 37½ feet and averages 100 feet in depth.

In announcing construction plans for the first buildings, H. C. "Josh" Billings, secretary of the Mayfair Heights Corporation, described the development as one of San Francisco's most desirable apartment house areas.

Scenery Featured

Residences in the newly-developed area, he pointed out, will be within seven minutes driving time and 15 minutes by street car from Market Street and the city's main business district. A nearby area has been zoned commercial to assure quick and easy shopping for Anzavista residents. The new commercial sector features off-street parking to assure customer safety.

Billings cited Anzavista as being an ideal location for growing children. The John Geary grammar school is just a few short blocks from the heart of the development and the school's accommodations are soon to be increased to provide for additional pupils. The city has announced plans to provide playground facilities on the Turk Street side of Anzavista. The new Lowell High School will be built in the Laurel Hill development north of Anzavista. Parochial schools and the University of San Francisco are within walking distance of the newly developed tract. Freedom from industrial smoke and noise also help to make this one of San Francisco's most desirable neighborhoods.

The architectural firm of Ward & Bolles has plans for rental units which would utilize all the advantages of the hilltop area. Each apartment features wide full view windows and terraced courts. Each unit is to have a half-court; the half-court formed by one apartment faces that of the adjacent apartment, thus forming a wide panation for gracious California living.

Utilities Underground

Upon completion of the architectural plans, the project was turned over to E. Elmore Hutchison, well known local civil engineer. Mr. Hutchison worked out terrain plans to give each living unit a sweeping view of the city and a great part of the Bay Area.

Engineering plans also called for the erection of light standards without unsightly wires being strung through the area. This eliminated fire hazards and assured further beautification of the entire Anzavista site. All utilities are underground.

Assured that the architectural and engineering plans were the

Plans Completed

(Continued from Page One)

best possibly obtainable, directors of the Mayfair Heights Corporation began the great task of preparing the basic landscape work. Massive bulldozers and graders began leveling and grading the homesite area. Utility lines were installed. Streets and curbings were set in place. These attractive streets have been laid out to conform to the most modern practices and to increase traffic safety. Geary Boulevard, which defines the northern limits of the development, is being widened 56 feet.

Sell Some Lots

The Mayfair Heights Corporation, in compliance with great public demand, has set aside a limited number of desirable lots for sale. The corporation plans construction of numerous multiple-family units in this scenic area.

Ceraseal

(Continued from Page One)

by painting a number of sets of wood farm buildings with a mixture containing this remarkable preservative.

Textile Application

The Ceraseal formula designed for textiles is being used by many hotels and other institutions to prolong the life and cut down the cleaning costs of furniture, upholstery and rugs. This amazing treatment completely seals the fibres of the cloth and produces a moisture repellent quality that does not disappear with washing. A girl wearing a white dress treated with Ceraseal "doub-L-life" sat on a chair on which a child had left a handful of blackberries. However, since the cloth fibres had been sealed and made water-repellent, the juice could not penetrate. After she wiped the blackberries away there was no stain.

Ceraseal "doub-L-life" for leather makes the material water and moisture - repellent, mildew and mold-proof and keeps it soft, pliable and long-wearing. Especially suggested uses are for fur coats pelts, leather coats, shoes, leather gloves, boots, leather luggage, leather harness and leather belting.

Valuable to Industry

This preservative has already proved of tremendous value to individuals and especially to contractors, architects and builders. It should mean a great saving in money and material when the beneficial properties of Ceraseal become even more widely known and its use more extensive.

Lumber Restrictions

(Continued from Page One)

of housing accommodations in rural and urban areas and for construction and repair of essential farm buildings."

The 85 per cent restriction applies to distributors as well as the sawmills. The so-called middle men must pass on to millwork or cut-stock manufacturers, 85 per cent of all such lumber they receive from the mills in any quarter.

For purposes of this restrictive order, sawmills will include all operations sawing Douglas Fir and Western Pine in quantities of 5,000 feet a quarter or more. Exempted are mills that saw less than 5,000 feet a quarter for their own use.

Processors of Douglas Fir and Western Pine come under the measure if 25 per cent or more of the total volume of fir and pine they receive is worked over.

A distributor is described as "any person who buys and stocks Douglas and Western Pine lumber for resale as lumber.

cent as a new incidental revenue source.

The survey gave some indication, although only a faint one, that the long stretch of falling interest rates for real estate loans, which became measurable with the creation of Home Loan Banks and the FHA, may be approaching a turn or a stabilization. The outlook for 1947 is a steady continuance of the present mortgage money rates in 85 per cent of the reporting cities.

One of every four cities reported blighted areas so extensive that they could be rebuilt only through some large - scale program that would insure change in the character of the neighborhood. Of these cities with a blight problem (27 per cent), 45 per cent have plans underway or proposals under discussion for meeting this need. The survey showed that the larger the city, the more likely it is to have extensive blighted areas.

Chicago Chemist Is Honored for Studies Extending Iron Supply

ST. LOUIS.—Dr. Anderson W. Ralston, whose work at the Armour Research Laboratories, Chicago, Ill., resulted in extending the nation's failing iron ore supplies for at least 150 years, was named today as the winner of the 1947 Midwest Award of the St. Louis Section of the American Chemical Society.

A large number of new chemicals resulted from Dr. Ralston's work at the Armour laboratories under a program designed to find valuable uses for fatty acids which comprise the bulk of fats. Among these chemicals are fatty amines, one of which can be used in concentrating low grade iron ore. Dr. Ralston's development, by using known deposits of low grade iron ore, has assured the United States of adequate supplies of high grade smelting ores for at least 150 years. Otherwise, total exhaustion of the nation's high grade iron ore reserves would occur within a few years.

A further development by Dr. Ralston and his associates provides for a continued supply of potash and phosphate as fertilizers vitally important to agriculture. A mixture of amines makes possible the recovery of potash and phosphate from ores of such low grade that the ores would otherwise be of little value. Because the deposits of potash and phosphate, rich enough in their natural state for use as a fertilizer, are rapidly disappearing, future supplies of these products may depend on the use of amines.

Dr. Ralston's laboratory work began in 1931 when Armour and Company's president, George A. Eastwood, then vice-president, instituted a program of research and development aimed at finding more valuable uses for fatty acids. Previously, a substantial portion of the annual production of fats and oils had to be relegated to the soap kettles because no outstanding chemical uses had been found for the fatty acids which comprise the bulk of the fats.

Out of this research program came a fractionating process for separating fatty acids into their component parts, and Armour's fractionating units are regularly producing such pure fatty acids as stearic, myristic, lauric, capric and caprylic. These are in addition to highly concentrated unsaturated acids including oleic, linoleic, and clupanodonic. All of these purified fatty acids have definite uses in industry.

Dr. Relston began his career as a chemist in boyhood by setting up a laboratory in his bedroom. His father was a pharmacist in Martins Ferry, Ohio where son Ralston was born in 1899—just two days before the beginning of the century to which chemistry was to contribute so much.

Magazine Announces Improvement Contest

A national contest to beautify and improve American cities and industrial sites has been announced by Better Homes & Gardens magazine. Termed the Fourth More Beautiful American Competition, its purpose is "to reawaken Americans to the need of beautifying our country after 4 years of war-born neglect."

The competition is open to any civic, religious , fraternal, or other group, and offers $6100 in prizes in two divisions: community and industrial. The contest runs from March 1, 1947, to October 1, 1948.

The 3 previous More Beautiful America Competitions, sponsored by the magazine during the '30's, proved highly successful. Projects carried on for these contests included reclaiming wasteland areas, making neglected wooded sections into spacious park zones, boulevard beautification, and waterfront improvements.

PLASTIC BOOKLET OUT

A new brochure has just been issued by United States Plywood Corporation describing Decorative Micarta, a plastic surface material. Home, store, office, hotel and transportation uses of the material are outlined. The booklet may be obtained without cost from United State Plywood Corporation, 55 West 44th Street, New York 18, N. Y.

Two Kinds of Coils Suitable for Use In Radiant Panel Heat

Engineers have developed two distinct types of coils for use in radiant panel heating installations either in the floor, ceiling, or wall.

The two types of coils are the sinuous coil and the grid coil. Sometimes a combination of the two is used.

The sinuous coil is the cheapest and has the least chance for leakage because it contains the fewest joints. On the other hand it offers the highest resistance to the flow of water and if the coil is too long, it may require a special pump for circulating the water.

The grid coils consist of two headers and a large number of small pipes passing between them, all of them parallel. Such a design necessitates a large number of welded joints. On the other hand, it offers the least resistance to flow of water. The usual solution to the problem is to place several sinuous coils of reasonable length in parallel when the panel is large. In any case the coil arrangement should always be such that the hottest water is at the coolest place in the room and also, in the case of a floor panel, at a place where people do not stand for any length of time.

Not only should coils be designed so that the hottest water is at the point where the heat loss is greatest, but most engineers design the system in such a way that the space between coils is less at this point, thus providing greater heat output. In grid systems, too, the pipes may be installed with narrower center to center dimensions.

In constructing a coil, it is best to fasten the panel coil to some structural members, such as small angles or to some pieces of pipe, so that the coil is a unit in itself and can be properly leveled or inclined to make air venting easier. This can be accomplished by either welding lightly the coils to the angle, or by fastening them with screws or rivets by means of a strap.

#

New Engineering Service Offered For Concrete Forms

With the opening of the new warehouse of the Superior Concrete Supply Co. in Oakland a new service on concrete form engineering is now available to contractors, engineers, and architects.

New methods of securing concrete forms for such jobs as water tight walls in tanks, basements and reservoirs are now available.

Stadium construction with detailed information on seating and chair mounting is another service offered free to architects and engineers.

Jobs with difficult forming problems will be detailed and laid out along the lines the contractor suggests with short cuts and time saving details noted.

Literature on any of the above items will be mailed on request. Write to Superior Concrete Supply company, 321 Sixth street, Oakland 7, or telephone TWin oaks 8383.

#

TRACTOR JOCKEY IS TECHNICIAN

Today's successful earthmover is a technician with an ability to apply his earthmoving equipment when and where it will do the most good toward quick and economic disposal of earth.

The subject, with proper application of track - type tractors, wheel - type tractors and motor graders highlighted, themes the eight-page booklet TRACKS, RUBBER OR BOTH published by Caterpillar Tractor Co., Peoria 8, Illinois, manufacturer of both types of earthmoving equipment.

Editorially and pictorially the publication stresses a message of the practical application of the theory that where tracks and rubber are concerned in earthmoving there is "a place for each and each in its place."

Copies of the booklet are available by writing the manufacturer, requesting Form 9786.

General Motors Puts Out Apartment Type Small Refrigerator

DAYTON, Ohio.—A new compact apartment house refrigerator, which provides six cubic feet of food storage space in a cabinet of about the same dimensions of the conventional four-cubic-foot model, is being introduced by Frigidaire Division of General Motors, according to announcement by H M. Kelley, Appliance Sales Manager.

"Production of the six-cubic-foot apartment house refrigerator is already well underway" Mr. Kelley said. "The new line is being produced exclusively for apartment house and multiple housing projects" he explained.

The unique new model, which features 11.6 square feet of shelf space, is only 51-11/16 inches high, 24 inches wide and 26¾ inches deep. There is a large super-freezer compartment, complete with two ice-making trays. The freezer chest will hold 16 pounds of frozen food. Directly below the freezer is a new all aluminum cold-storage and defroster tray.

There are four full-width, rust-resisting shelves of bar-type construction. A control switch has 10 separate dial adjustments to govern food storage compartment temperatures and regulate freezing speeds This new refrigerator is equipped with Frigidaire's exclusive sealed compressor unit, which uses about the amount of electrical current as an ordinary light bulb. The interior of the food compartment is finished in porcelain. Automatic lighting is also included.

Potts Is Named Export Sales Head Of Kaiser Firms

Permanente Cement Company today announced appointment of Frank Potts as export sales manager of the Henry J. Kaiser-managed organization which recently revealed plans to increase production from 5 million to 5.5 million barrels annually.

Potts qualified for the new position through his experience in the general export sales department of the several Kaiser companies, which have been decentralized because of increased business in each of their fields.

The new export sales manager joined the Kaiser organization in 1943. He will have offices in Oakland, California and will report to Permanente Cement's general sales manager, James K. Beatty.

In a similar move to strengthen export sales operations, Kaiser Company, Inc., Iron and Steel Division, has announced the appointment of W. J. Gleason as export sales manager. Gleason formerly headed the centralized general export sales department serving the Kaiser organization.

Warm Air Heating, Air Conditioning Studies Presented

CLEVELAND.—Praised as one of the outstanding educational and training programs ever sponsored by an industry in the interest of its members and the public, indoor comfort conferences start this month on a tour of major cities in the eastern and southern states for the purpose of improving the installation, operation and maintenance of warm air heating and air conditioning equipment in the home.

Sponsored by the National Warm Air Heating and Air Conditioning Association, the conferences will be under the supervision of Guy A. Voorhees, application engineering director of the association.

Utilizing the latest methods of visual instruction including sound films, visual casts and charts, the conferences emphasize the importance of consumer satisfaction through correct layout and design of a heating system by the contractor.

Code Requirements Excessive In Interest Of Pressure Groups, Says Standard Chief

UNWIELDY CODES BLAMED FOR HIGH COSTS, LACK OF PROGRESS IN BUILDING INDUSTRY

WASHINGTON, (Exclusive—While the construction industry benefits daily from the results of experiments conducted at the Bureau of Standards in Washington, D. C., bureau administrators feel that a great amount of basic information remains to be disseminated.

The search is going forward constantly here for better ways of building; principles involved in construction of everything from a small hut to the largest sky-scraper. Experimentation ranges from strain tests to development of wet-proof paper and the discovery of substitute materials to replace the scarce products in processing a thousand building items.

High in importance among the many types of information felt to be lacking in the building industry is that concerned with stress as it develops in floor construction, Bureau of Standards officials say. In this respect, the laboratories are now engaged in determining what deflection occurs under varying loads in the various types of floor construction and just how much of such deflection is tolerable.

Results of all tests, of course, are made known to industry as soon as they are felt to be conclusive and thus can serve their intended purpose.

The Bureau presently is carrying on extensive studies in its metallurgy division. These pertain particularly to alloys and corrosion.

Substitution Needed

In the mineral products section, for example, the scientists have been investigating plaster failures. In the course of their complicated tests they discovered that use of dolomite lime in the manufacture of raw plaster weakened its eventual strength. As a result a corrective in the manufacturing process was developed and this one change has resulted in great saving and convenience to future householders.

In the opinion of Dr. Edward U. Condon, the bureau's chief official, the housing industry is not, technologically, "our most advanced industry." It falls short of this high goal in many respects, he believes, especially where building codes are concerned.

In the interest of pressure groups, he points out, the codes often require unnecessarily expensive specifications. Large vent pipes in connection with domestic sewage are an example of his point.

General Donald Armstrong, of the American Standards Association, has called attention to the fact that the nation is "running low" in its supply of some raw materials. "We have fought our last extravagant war," he said. And now attention must be focused on substitution of plentiful materials for those raw items that are striking bottom on the supply scale. (For example, magnesium may be developed as a substitute for scarce copper.)

Industry Approval

The work of the Bureau of Standards reaches well beyond the construction field, of course, but its searches into the mysteries of physics, chemistry and engineering result in a constant flow of information helpful to private industry.

(The American Standards Association, which watches the work of the government Bureau closely, is made up of 98 trade and engineering societies and 2,000 individual company members. It operates democratically, no standard being proclaimed without agreement of five-sixths of the membership and, even then, the standards it issues are not mandatory.)

Economic Operation

Money statistics on the Bureau of Standards show it to be one of Uncle Sam's more economical operations in view of range and importance of work. Only five million dollars a year is spent for all its activities.

Of this amount, $350,000 a year is spent in the electrical division which establishes fundamental electrical measurements and studies underground corrosion. This outlay is modest compared with the three billion dollar output of the electrical industry. B of S research also embraces insulation, heating devices and fire-resistant materials.

#

STOKER SALES RISE TO 50% OVER 1945

WASHINGTON.—Factory sales of mechanical stokers in 1946 totaled 191 thousand units, according to a report released today by the Bureau of the Census.

This represented a 50 per cent increase over 1945 sales and was nearly twice the number reported sold in 1939. Average monthly sales in 1946 amounted to about 16,000 units, ranging from a peak of 20,781 units in August to a low of 7,932 units in December.

Factory sales of residential and small apartment house type stokers accounted for 95 per cent of the total sales in 1946.

Factory Efficiency Is Aided by Judicious Use of Color Energy

PITTSBURGH, PA.—How scientific use of the energy in color is currently employed in the nation's plants and factories to increase over-all efficiency is shown graphically in a new full-color, 32-page booklet now being published by the Pittsburgh Plate Glass Company according to E. D. Peck, general paint manager.

With facts and figures, plus numerous views of actual use of color in manufacturing and processing plants, the booklet demonstrates how industrial officials, by following the principles of color dynamics, can (1) Promote continuity of employment, (2) Improve efficiency of operation, and (3) Maintain quality of production. It reveals how dynamic colors will bring about more and better work per man-hour and more man-hours per man by making the employee's working environment cheerful and safe.

In a special section the booklet outlines the scientific facts about color. "The medical profession," it states, "has long realized that colors can be used to stimulate or depress. Some colors help people relax and be cheerful. Others stimulate and invigorate them. Still others set up irritation and actual physical discomfort.

The booklet points out that use of color is in no way an experiment. Color principles have been widely tested in both laboratory and in all types of plants. These tests and experiences prove that there is energy in color which affects the health, comfort, morale, and safety of employees.

Individual sections are devoted to the use of color on machinery and equipment; on walls and ceilings; and on floors, aisles, and mobile equipment with emphasis on color for safety. Each section is illustrated with full-color applications. A special section contains simplified and practical material specifications for industrial painting.

Copies of the booklet may be had (free of charge) from Dept. N I B Public Relations Department, Pittsburgh Plate Glass Company, 632 Duquesne Way, Pittsburgh 22, Pa.

#

Interior Department Shows Reclamation Projects Pay Off

WASHINGTON.—A strong case for continued investment of government funds in construction of water reclamation projects is made by the Department of the Interior in its announcement today that farmers on irrigated lands produced crops of record value in 1946. Crops harvested last year are valued at $502 million, 15 per cent over 1945.

Michael W. Straus, acting secretary of the Interior Department, pointed out that the 1946 crop value return is equal to about one half of the total expenditures made by the government for all reclamation construction in 45 years. These figures provide considerable justification for such public works programs.

Straus said:

"I believe the record demonstrates the soundness of reclamation investments. Out of this sizeable income created each year and from other income such as dairy products and cattle feeding, reclamation construction costs are repaid to the government by water and power users. So, in effect, the reimbursable reclamation appropriations represent a loan by the government secured by crop income."

Reclamation bureau systems now are serving 4,366,000 acres of land that was not productive before the dams and water ways were installed.

Largest single tract irrigated from the bureau's construction projects in 1946 was the 415,000 acre tract in the Imperial Valley of California.

Low and Only Bidder
Bridge (Remove and Erect)

HUMBOLDT COUNTY, Cost $32,227
Calif. Across Redwood Creek, about 30 miles east of Eureka.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Remove an existing timber span and erect a salvaged structural steel span.
Only Bidder—James H. McFarland, 266 Laguna Honda Blvd., San Francisco, Calif., $32,227.
The work involves:
(1) remove existing bridge;
(2) 50 cu. yds. structure excavation;
(3) 75 cu. yds. class A portland cement concrete;
(4) handling and erecting salvaged structural steel span;
(5) straightening, cleaning and painting salvaged structural steel span;
(6) 2500 lbs. structural steel;
(7) 120 lbs. miscellaneous steel;
(8) 16,000 lbs. bar reinforcing steel;
(9) miscellaneous items of work.
The State will furnish salvaged structural steel for use in the work.
Unit prices submitted March 5 were:

(1)	$2,472.00	(6)	$ .26

Low and Only Bidders
Bridges and Underpass Cost $378,247

SISKIYOU COUNTY, Calif. Across Cottonwood Creek and under the tracks of S. P. Co. about 2 and 5.5 miles north of Hornbrook, respectively.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engr.—G. T. McCoy, Public Works Bldg., Sacramento.
Low Bidder—Carl N. Swenson Co., Box 558, San Jose, Calif., $378,247.
Work involves:
(1) clear and grubb;
(2) 14,000 cu. yds. rdwy. excav;
(3) 2,550 cu. yds. struct. excav.;
(4) 6,000 cu. yds. struct. backfill;
(5) 2,000 cu. yds. import borrow;
(6) 2,090 cu. yds. class A port. cem conc. structs.;
(7) 480 cu. yds. class A port. cem conc. arch rib;
(8) 324 lin. ft. conc. railing;
(9) 224 lin. ft. rubber waterstops;
(10) 5,770 lin. ft. furnish steel pilings;
(11) 268 each steel piles;
(12) 26 each steel pile splices;
(13) 800 sq. yds. membrane waterproofing;
(14) 40 lin. ft. 8 in. CMP 16 gage;
(15) 168 lin. ft. 8 in. perf. metal underdrains 16 gage;
(16) 2 2cu. yds. filter mtl.;
(17) 380,000 lbs. furnish bar reinf steel;
(18) 380,000 lbs. place bar reinf. steel;
(19) 3 each portable timber barricades;
(20) 1,100 lbs. misc. iron and steel;
(21) 60 M ft. BM Doug. fir timber shoofly trestle;
(22) 10,000 lbs. struct. steel shoofly trestle;
(23) 6,210 lin. ft. furnish timber piling shoofly trestle;
(24) 138 each drive timber piles, shoofly trestle;
(25) 990 lin. ft. furnish steel piling shoofly trestle;
(26) 2 2each drive steel piles shoofly trestle;
(27) track work;
(28) track work, shoofly;
(29) removing shoofly trestle;
(30) Engineer's office.
All materials in connection with items 27 and 28 will be furnished free of cost to the contractor.
Total bids submitted March 5 were:

34—DAMS, RESERVOIRS & DREDGING

3/7/47 • 34

Owner Taking Bids—Due March 25, 10 A. M. — Gould Canyon Debris Dam, Channel, Appurtenant Works

LOS ANGELES COUNTY, Calif. 25a Canada, located about a mile north of Oakwood Ave. and Foothill Blvd.
Owner—Los Angeles County Flood Control Dist., 501 Hall of Records, Los Angeles, Calif.
Plans by H E Hedger, chief engineer, 751 S. Figueroa St., Los Angeles, Calif.
The work involves:
(1) lump sum for removal of existing obstructions;
(2) lump sum for clearing and grubbing;
(3) 5,500 c.y. stripping;
(4) 8,900 c.y. basin excavation;
(5) 960 c.y. cut off trench excav.;
(6) 2,170 c.y. struc. excav.;
(7) 30,000 c.y. borrow pit excav.;
(8) 18,000 c.y. channel excav.;
(9) 1,770 c.y. access road excav.;
(10) 22,850 c.y. compacted fill;
(11) 98c c.y. compacted backfill;
(12) 5,550 c.y. loose fill;
(13) 100,000 c.f. wetting loose fill in dam;
(14) 25,000 squares each addl. roller trip;
(15) 2,750 c.y. uncompacted backfill for structures;
(16) 280 c.y. rockfill around outlet tower;
(17) 6,015 bbls. portland cement;
(18) 3,193 c.y. Class A concrete;
(19) 505 c.y. Class B concrete;
(20) 140 c.y. Class C concrete;
(21) 10 c.y. Class D concrete;
(22) 741,522 lbs. placing reinf. steel;
(23) lump sum placing outlet tower above base;
(24) 325 l.f. placing 6-in. conc. pipe drains;
(25) 291 l.f. placing 8-in. do;
(26) 195 c.y. furnish and place gravel backfill for drain outlet;
(27) 288 l.f. install 36-in. reinf. conc. outlet pipe;
(28) 160 l.f. install 15-in. reinf. conc. pipe in culvert;
(29) 40 l.f. install 24-in. reinf. conc. pipe in storm drain and culvert;
(30) 190 sq. yds. cemented rock paving;
(31) 1600 sq. ft. furnish and place 8-in. asphaltic concrete gutter;
(32) 945 sq. ft. furnish and place asphaltic concrete channel embankment lining;
(33) 7,480 l.f. install channel wide fencing;
(34) 3,450 l.f. install debris basin right of way wire fencing.
Note: The District will furnish all reinforcing steel cut to length and bent to shape at site of work.
Specifications obtainable from the office of the chief engineer upon payment of $2.50.

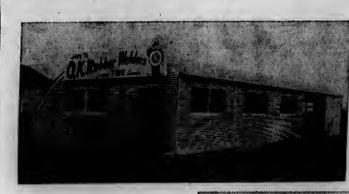
(Continued from Page 10)

Plans by engineering department of owner.
Consists of construction of fills for the reclamation of tide land and water areas and other low-lying ground adjacent to the existing developed area of the airport, roadway embankments, fill on the developed area to raise grades, drainage pipelines and related work. The required work is divided into two sections designated "A" and "B"; in section "A" the fill materials is to be placed in the fill in a dry condition. In section "B" the entire fill may be constructed as dry fill or at the contractor's option the main bulk of the fill may be a hydraulic fill of sand. In the latter case some dry fill will also be required for coving the sand. Proposition A covers the wor kin section "A"; proposition B that in section "B"; proposition "C" the entire work in both sections "A" and "B". Contractors may bid on any one, any two or all three of the proposals.
Completion time 330 calendar days.
Unit quantities were published March 6.

Plans and specifications obtainable from the cashier's office, 6th floor, San Francisco Water Department Bldg., 425 Mason St., San Francisco, Calif., upon deposit of $10, refundable, and may be examined at the office of DAILY PACIFIC BUILDER, 465 10th St., San Francisco, Calif.

Prospective Bidders

Big Dry Creek Reservoir & Outlets near Clovis; Spec. 1241



BIDS: U. S. Engr. Office, Wright Bldg., Sacramento, Calif., March 11, 2 P. M.
The following contractors have been furnished with plans:
Johnson Western Co., Box 416, Alameda, Calif.
Basich Bros. Construction Co., Box 151, Alhambra, Calif.
Parish Bros., Box 6, Benicia, Calif.
N. M Ball Sons, Box 430, Berkeley, Calif.
Lee J. Immel, Box 65, Station, A, Berkeley, Calif.
Excavators Inc., Box 750, Pittsburg, Calif.
J. A. Terteling & Sons, Inc., Boise, Idaho.
J. F. Shea Co., Inc., 617 S. Olive St., Los Angeles, Calif.
Fredericksen Bros., 1259 65th St., Emeryville, Calif.
Clyde W. Wood, Inc., 816 W. 5th St., Los Angeles, Calif.
Bresnel & Bevanda Constructors, 417 S. Hill St., Suite 764, Los Angeles, Calif.
Grafe - Callahan Construction Co., 714 W. Olympic Blvd., Los Angeles, Calif.
L. A. & R. S. Crow, 4756-4760 Valley Blvd., Los Angeles, Calif.
L. E. Dixon Co., 909 S. Grand Ave., Los Angeles, Calif.
Griffith Co., 1060 S. Broadway, Los Angeles, Calif.

These FOUR BIG ADVANTAGES account for RECORD QUONSET SALES by KRAFTILE

1. Permanence
2. Low Cost
3. Adaptability
4. Flexibility of Sizes

WHAT IS YOUR NEED? . . . as small as 240 sq. ft. or up to 240,000 sq. ft. of floor space? You can find it with a Quonset — like the compact "24" of Joy's O. K. Rubber Welders, Redwood City, shown above; or the 7-arch multiple (right), owned by Clara-Val Packing Co. of Morgan Hill.

Kraftile's Stran-Steel Division maintains a large and complete inventory of Quonset models . . . 20's, 24's, 40's, and multiples . . . to provide immediate delivery to farmers, industrialists, and businessmen. More than 400 buildings have already been purchased from Kraftile—providing almost a million square feet of needed space. There's public acceptance that says:—

Official Proposals

FIRST PUBLISHED TODAY

New East Ward Unit and Convalescent Barracks, Veterans Home, Yountville.

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF ARCHITECTURE

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the Division of Architecture, Public Works Building, 12th and "N" Streets, Sacramento, California, up to 2:00 P. M., Tuesday, April 1, 1947, and bids thereafter on said day to be publicly opened and read for New East Ward Unit and Convalescent Barracks No. 11, Veterans' Home, Yountville, California, in accordance with plans and specifications therefor.

The New East Ward Unit is a four (4) story reinforced concrete wing to be added to the existing Hospital and has a total floor area of approximately 33000 sq. ft.

The Convalescent Barracks is a one (1) story reinforced concrete building with a floor area of 38,400 sq. ft. approximately.

Separate bids for each building and combined bids for both buildings will be entertained for each of the following segregations of the work:
General Work
Heating and Ventilating Work
Plumbing Work
Electrical Work

Combination bids to include both the General Work and the Mechanical Work will be entertained for each

TRAXCAVATE for PROFIT

The profitable machine on any job is the machine that keeps busy

The TRAXCAVATOR—front-end loader built by THE TRACKSON CO. and mounted on a "CATERPILLAR" diesel tractor—has been called "the busiest machine on the job" by many builders. It's the perfect machine for jobs that involve digging, loading, leveling, or backfilling, and for the handling and rehandling of materials.

HIGHLY VERSATILE
EASILY MOVED FROM JOB TO JOB

building and also for both buildings.

Alternate Bids will be required for the omission of a part of the work.

Prevailing Wage Scale: In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Hourly Rate
Asbestos Workers	$1.75
Bricklayers	2.05
Bricklayers Hod Carriers	1.40
Carpenters	1.75
Cement Finishers	1.75
Electric Workers	2.00
Engineers, Portable Hoist or Otherwise	1.85
Glass Workers	1.65
Iron Workers Architectural	1.85
Iron Workers Reinforcing - Steel	1.75
Laborers Building	1.25
Lathers	2.00
Painters	1.75
Plasterers	1.83-½
Plasterers' Hod Carriers	1.40
Plumbers	1.87-½
Roofers	1.75
Steam Fitters	2.00
Tile Setters	1.80
Tile Setters Helpers	1.37-½
Operator of Power Shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.25
Operator of Power Shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.35
Tractor Driver	1.95
Truck Driver (8 cu. yds. water level capacity and over)	1.87-½
Truck Driver (6 cu. yds. and less than 8 cu. yds. water level capacity)	1.50
Truck Driver (4 cu. yds. and less than 6 cu. yds. water level capacity)	1.40-¾
Truck Driver (less than 4 cu. yds. water level capacity)	1.28-½
Any classification omitted herein not less than	1.25

Overtime—One and one-half times the above rates.

Apprentices may be employed provided they are properly indentured to the Contractor in full compliance with the provisions of Section 1777.5 of the Labor Code.

Plans and specifications for examination are on file in the Office of the Division of Architecture, Public Works Building, Sacramento, and Room 363 State Office Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Contractors who are desirous of securing plans, specifications and proposal forms for the purposes of preparing and submitting a proposal for this work may do so subject to certain conditions as hereinafter stated by requesting same in writing from the Division of Architecture, Public Works Building, Sacramento. Such request shall be accompanied by a deposit of Twenty Five ($25.00) dollars. Check shall be made payable to the Division of Architecture. Such deposit is required to guarantee the safe return in good condition of the plans and specifications to the Division of Architecture within 30 days after the date set for opening bids. Failure to so return the plans will cause forfeiture of the Deposit to the State.

No bid will be considered unless it is made on a blank form furnished by the Division of Architecture, and is made in accordance with the provisions of the Proposal Requirements and conditions set forth under Section 1 of the Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

No bidder may withdraw his bid for a period of thirty (30) days after the time set for opening thereof.

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on March 19, 1947, at which time they will be publicly opened and read, in the Assembly Room of said building, for constructing State Highway in accordance with the specifications therefor, to which special reference is made, as follows:

Humboldt County, between one and two-tenths (1.2) miles east of Korbel Road to two and seven-tenths (2.7) miles east of Redwood Summit (I-Hum-20-B), portions, a net distance of about ten (10) miles, imported base material to be furnished and placed and, at various locations, sand and screenings to be furnished and stockpiled.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate Per Hour
Skilled Labor	
Motor grader operator	$2.10
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Intermediate Grade Labor	
Jackhammer operator	1.375
Oiler power shovels or cranes	1.50
Truck driver (4 cubic yards and less than 6 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Unskilled Labor	
Flagman	1.15
Laborer	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.25 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.15 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefor all applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Engineer, Room 401, Public Works Building, Sacramento, California, until 2 o'clock p. m. Wednesday, March 19, 1947, at which time they will be publicly opened and read, in the Assembly Room of said building, for performing work in accordance with the specifications therefor, to which special reference is made as follows:

Pipe Line from the Rector Creek Reservoir to the Veterans' Home, Napa County, California.

State Engineer's Estimate

Items included only in Plan 1

Item 1. 5980 lineal feet 18-inch No. 7 gage, asphalt dipped and asbestos felt wrapped welded steel pipe, in place.

Item 2. 9840 lineal feet 12 inch No. 10 gage, asphalt dipped and asbestos felt wrapped welded steel pipe, in place.

Item 3. Lump sum — Napa River Crossing, Station L/26 + 40 to L/28 + 00.

Item 4. Special connections at Sta L/59 + 17.67 to L/0 + 11.29 and Sta. L/21 + 32.6 to L/21 + 50.9.

Items included only in Plan 2

Item 1-a. 10,720 lineal feet 18-inch No. 7 gage, asphalt dipped and asbestos felt wrapped welded steel pipe in place.

Item 2-a. 5,100 lineal feet 12 inch No. 10 gage, asphalt dipped and asbestos felt wrapped welded steel pipe, in place.

Item 3-a. Lump sum—Napa River Crossing, Station L/26 + 49 to L/28 +00.

Item 4-a. Special connections at Sta L/59 + 17.67 to L/0 + 06.99 and Sta. L/49 + 00.83 to L/49 + 10.16 and Sta. L/52 + 00 to L/52 + 18.3.

Items included in both Plans 1 and 2

Item 5. Lump sum—54 lineal feet 30-inch welded steel pipe—install only, and furnish and install 30-inch by 22-inch reducer.

Item 6. 2900 lineal feet 22-inch No. 7 gage asphalt dipped and asbestos felt wrapped welded steel pipe, in place.

Item 7. 5740 lineal feet 10-inch cast iron pipe, recondition, transport and install only.

Item 8. 760 lineal feet 10-inch cast iron pipe, recondition and transport only.

Item 9. 8 1-inch Type A air valve assemblies, in place.

Item 10. 1 1-inch Type B air valve assembly, in place.

Item 11. 1 3-inch air valve, in place in valve house.

Item 12. 4 2-inch Type air valve assemblies, in place.

Item 13. 1 4-inch gate valve, flanged ends, 150 pounds working pressure, in place.

Item 14. 1 6-inch gate valve, flanged ends, 150 pounds working pressure, in place.

Item 15. Install 8-inch gate valve and furnish and install valve box.

Item 16. 1 8-inch gate valve, hub ends, 150 pounds working pressure, in place.

Item 17. Install 12-inch gate valve and furnish and install valve box.

Item 18. 1 6-inch Type A blowoff assembly, in place.

Item 19. 2 4-inch Type B blowoff assemblies, in place.

Item 20. 3 4-inch Type C blowoff assemblies, in place.

Item 21. 4 2-inch Type B blowoff assemblies, in place.

Item 22. 2 2-inch Type C blowoff assemblies, in place.

Item 23. 1 6-inch water meter, in place.

Item 24. 1 8-inch water meter, in place.

Item 25. 60 lineal feet 24-inch No. 10 gage corrugated metal pipe under State Highway and railroad, in place.

Item 26. 60 lineal feet 6-inch concrete pipe cover on 18-inch pipe.

Item 27. 75 lineal feet 9-inch concrete pipe cover on 18-inch pipe

Item 28. 233 lineal feet gravel surfacing over pipe trench.

Item 29. 331 lineal feet armor coat surfacing over pipe trench.

Item 30. 43 lineal feet concrete road surfacing over pipe trench.

Item 31. Lump sum—Connection to 6-inch pipe line at Sta. K15 + 60.5.

Item 32. Lump sum—Special connection at Sta. K30 + 22.3 to K30 + 39.4.

Item 33. Lump sum—Connection to 6-inch pipe line at Sta. L/53 + 58.

Item 34. Lump sum—Special connection at Sta. L/100 + 20.00 to L/100 + 23.33.

Item 35. Lump sum—Connection to 8-inch pipe line at Sta. L/106 + 95.3.

Item 36. Lump sum—Building for Chlorination Plant and Pit for Venturi meter.

Item 37. Lump sum—Equipment in Chlorination Plant, and Venturi Meter, in place.

Plans 1 and 2 are alternatives, Plan 1 comprises Items 1 to 4, inclusive, and Items 5 to 37, inclusive. Plan 2 comprises Items 1-a to 4-a, inclusive, and Items 5 to 37, inclusive. Bids must be submitted on both plans. The Department of Public Works reserves the right to award a contract to perform the work embraced in Plan 1, or to perform the work embraced in Plan 2, whichever is considered to be to the advantage of the State after bids have been opened.

The foregoing quantities are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed necessary or expedient by the Engineer.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Boring Machine Operator	$1.95
Carpenter	1.75
Compressor Operator	1.60
Concrete finisher	1.875
Concrete mixer operator (up to one cu. yd.)	1.60
Concrete mixer operator (over one cu. yd.)	1.90
Concrete worker	1.25
Dragline or Shovel operator (up to and including one cu. yd.)	2.10
Dragline or Shovel operator (over one cu. yd.)	2.25
Electrician	2.00
Flagman	1.25
Guard	1.25
Derrickman - Crane operator	2.10
Laborer	1.25
Oiler and Helper	1.50
Painter (brush)	1.75
Plumber (Utility)	2.00
Pipeline laborer	1.25
Pipe fitter	2.00
Pipe treater	1.75
Pipe wrapper	1.75
Pneumatic tool operator	1.375
Powderman	1.50
Power grader operator	2.10
Pump operator	1.60
Roofer	1.875
Steel worker (reinforcing)	1.75
Tractor operator	1.95
Trenching machine operator	2.00
Truck driver (8 cu. yds. water level capacity or more)	1.875
Truck driver (6 cu. yds. and less than 8 cu. yds. water level capacity)	1.50
Truck driver (4 cu. yds. and less than 6 cu. yds. water level capacity)	1.4075
Truck driver (less than 4 cubic yards water level capacity)	1.2825
Water truck driver	1.3475
Any classification omitted herein not less than	1.25

Overtime one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

The attention of bidders is particularly directed to the provisions of Section 7 of the Standard Specifications published by the Department of Public Works, Division of Highways, in April, 1945, regarding the laws to be observed, and Section 8, articles (a) and (b) of the Standard Specifications, and to Sections 4100 to 4106, inclusive, of the Government Code, State of California, regarding subcontracting and assignment of any subcontracts, respectively.

Plans, forms of proposal, bonds, contract, and specifications may be seen and obtained at the office of the State Engineer, Public Works Building, Sacramento, California, and they may be seen at the office of the State Engineer, 803 California State Building, Los Angeles, and at the offices of the Associated General Contractors in San Francisco.

A representative from the State Engineer's office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and contractors are urged to investigate the location, character, and quantity of work to be done with a representative of the State Engineer. It is requested that arrangements for joint field inspection be made as far in advance as possible.

No bid will be considered unless it is made on a blank form furnished by the State Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.

YOU GET EXTRA PROFITS
from
American Mutual's
All American Plan

Here's a simple way to get three important extra's . . . **Complete Insurance Protection . . . Protection At Its Best . . .** and **Savings Through Lower Costs.** American Mutual's All American Plan for Contractors shows you quickly and simply how you may get these three extra's for your next contract:

Complete Protection—American Mutual writes practically every type of insurance coverage for all types of construction projects. All forms are modern, and comprehensive to give maximum protection.

Protection At Its Best—Every American Mutual policy is backed by complete service to assure maximum value to you for the insurance dollars you spend.

Savings Through Lower Cost—Since 1887, American Mutual has returned 20% or more to policyholders—more than $100,000,000 in dividends.

Highway Improvements—San Mateo County

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p.m. on **March 19, 1947,** at which time they will be publicly opened and read in the Assembly Room of said building, for constructing State Highway in accordance with the Specifications therefor, to which special reference is made as follows:

San Mateo County on Bayshore Freeway in the City of South San Francisco (IV - S.M - 68 - SSF), three bridges and the substructures for two railroad overheads to be constructed.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per Hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Carpenter	1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity)	1.90
Electrician	2.00
Motor grader operator	2.10
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.25
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.35
Pile driver hoistman or operator	2.10
Pile driver man	1.86
Reinforcing steel worker	1.75
Roller operator	1.95
Tractor driver	1.95
Truck driver (8 cubic yards water level capacity or more)	1.875
Truck driver (6 cubic yards and less than 8 cubic yards water level capacity)	1.50
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oil distributor bootman	1.275
Oiler, power shovels or cranes	1.60
Truck driver (4 cubic yards and les sthan 6 cubic yards water level capacity)	1.4075
Truck driver (less than 4 cubic yards water level capacity)	1.2825
Unskilled Labor	
Flagman	1.25
Laborer	1.25

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.25 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.25 per hour.

Overtime—One and one-half (1½) times the above rates.

Sundays and holidays—One and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work heerin proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, Calif., and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the district in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and conditions.)

The Department of Public Works reserves the right to reject any or all bids.

DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS
G. T. McCOY,
State Highway Engineer.

(Feb. 21-28, March 7, 1947)

Troutdale - Wahkeena Creek Section, Columbia River Highway; Federal Aid Project No. FI-248 (11), 6.07 Miles of Hydraulic - dredged Embankment.

NOTICE TO CONTRACTORS

Sealed bids on the following projects will be received by the Oregon State Highway Commission in the auditorium on the third floor of the Public Service Building, Portland, Oregon, at 2:00 p. m. on Monday, March 24, and at 3:00 a. m. on Tuesday, March 25, 1947.

Bids To Be Opened at 2:00 p. m., on Monday March 24, 1947

Multnomah County: Troutdale-Wahkeena Creek Section of the Columbia River Highway, Federal Aid Project No. FI-248 (11). 6.07 miles of hydraulic - dredged embankment. Requires approximately 3,200,000 cu. yds. of embankment. This project may be bid in combination with Oregon Forest Highway Project No. 28-D, Unit 1, for similar work on an adjoining section and for which bids are to be received by the Public Roads Administration at their Portland, Oregon, office at 2:00 p. m., March 24, 1947.

Bids To Be Opened at 9:00 a. m., on Tuesday, March 25, 1947

Multnomah County: Troutdale-Wahkenna Creek Section of the Columbia River Highway, Federal Aid Project No. FA-248 (11). 0.90 mile of rock toe, 2.55 miles of rock slope protection, 8.43 miles of roadbed topping, and topsoiling and seeding. Requires approximately 185,000 cu. yds. rock excavation; 114,000 cu. yds. topsoil materials; and 280 acres seeding.

Multnomah County: Construct concrete bridge over O.W.R.R. & N. Co. tracks at Bridal Veil on the Columbia River Highway. Federal Aid Project No. FGI-248 (12). Requires approximately 890 cu. yds. structural excavation; 3,300 cu. yds. concrete; 582,000 lbs. reinforcing; and 2,000 lin. ft. metal railing.

Unskilled labor employed for the Federal projects shall be obtained from lists prepared by agencies designated by the Oregon State Employment Service.

The minimum wage paid to all labor employed on the Federal projects shall be as follows: Skilled labor $1.40 per hour; intermediate labor $1.30 and $1.15 per hour; unskilled labor $1.00 per hour.

Prequalification of bidders will be required in accordance with provisions of Secs. 93-102 to 93-106, O. C. L. A. inclusive. Full information for bidders may be obtained at the office of the Oregon State Highway Commission, Room 319, State Office Building, Salem, Oregon. Proposal blanks, plans, specifications, and form of contracts may be inspected at the same place and may be obtained by eligible bidders upon payment of $2.00 per each set.

A complete set of plans and specifications may be inspected at the offices of the Associated General Contractors, in Los Angeles and San Francisco, California.

The right is reserved to reject any and all proposals or to accept the proposal deemed best for the State of Oregon.

Davis Campus

"ADVERTISEMENT FOR BIDS

"Subject to the conditions prescribed by the undersigned, sealed bids are invited for the following work for the construction of the Soils and Irrigation Building on the Davis Campus, University of California, Davis, California: (1) General Construction, (2) Electric Work, (3) Air Conditioning Work, (4) Plumbing Work, (5) Heating and Ventilating Work, (6) Combination Plumbing and Heating and Ventilating Work, (7) Combination Plumbing, Heating and Ventilating and Electrical Work, (8) Combination General Construction, Electric, Plumbing and Heating and Ventilating Work. This project has been granted CPA authorization under VHP-1. Plans and specifications will be issued to intending bidders upon the deposit of fifty ($50) dollars per set. No bids will be received after 2:00 P .M. March 24, 1947. Plans, specifications and information will be available starting February 26, 1947, at the Cashier's office, 105 Administration Building, University of California, Berkeley, California, and at the Business Office, 101 Administration Building, University of California, Davis, California. The right to reject any and all bids is reserved.

Architects Caution Congress In Its Labor Legislation

The American Institute of Architects, through its spokesman, Edmund R. Purves, is urging caution on Congress in its deliberations on labor legislation.

Kernel of the Architects' contentions is that the professional planner should be allowed to determine policies for his own group without interference from outside architectural personnel.

Purves, who is director of public and professional relations for the Institute, testified before the Senate Labor and Public Welfare subcommittee. He told the senators that employes of architectural offices should not be forced against their desire to join a labor organization as a condition of employment.

The AIA spokesman's testimony was given in connection with proposed amendments to the National Labor Relations Act.

Purves urged the Senators to consider two recommendations in their revision of labor laws:

1—That any collective bargaining groups formed in professional offices should not be forced to affiliate with non-professional labor organizations.

2—That the right of employes in such offices to designate their own representatives should be strictly maintained.

"It is obvious from that the same precepts should apply to architects who are employed by corporations or by governmental bodies," Purves added.

On the subject of rights of professional men to set their own policies, Purves made this statement before the subcommittee group:

"We feel that only those who are engaged in a career such as architecture are qualified to determine policies affecting the welfare of that career. We cannot conceive how anyone outside the architectural ranks could have the knowledge and experience necessary to represent intelligently a professional collective bargaining unit.

"The work of the architect and office employee cannot be governed on a quantitative basis. The standards that apply to the production of materials cannot be adopted for use in the professional office. No standard could be established as to the number of drawings a draftsman should produce each day or of the number of pages of specifications he should write, or the number of items he should supervise in the field.

"Service rendered by the employee is like that of the employer, essentially intellectual and varied in character. Creative ability, originality, and individual talents cannot be measured on a quantitative basis. Regimentation of those qualities is impossible."

Several pointed differences between the architectural profession and other less technical fields of endeavor were posed by the AIA representative in his remarks to the Senate group. The evident ovarian in duties of employer and employee is one condition that places this profession in a category where general application of broad labor rules and regulations could not be fairly made, the architects point out.

Purves described is this way:

"It is found that the daily work and duties of the employer and employee overlap; an employer, for instance, may often work beside his own men doing the same work as they do. He often requires the employee to take over some of his duties, such as conferences with clients and supervision of construction. A definite assignment of duties is not practical. Only the individual office can determine for itself how it can best tender its particular service to the client."

CPA Making Bid For Full Budget On Veteran Need

WASHINGTON—While congressional committees deliberate on what to do about deleting operating funds from OPA and CPA budgets, this clear analysis of the latter agency's remaining activities has come from the testimony.

CPA (while still a part of the Office of Temporary Controls) is responsible for the complete administration of the order requested by the Housing Expediter's Order limiting non-essential and deferrable construction. Abandonment of this program, according to Major General Philip B. Fleming, administrator of OTC, would mean "a sharp expansion in non-housing construction at the expense of veterans' housing."

CPA is assisting industry in increasing the production of scarce building materials.

Distribute Scarce Items

CPA is distributing to industry a few basic materials which continue in short world supply.

The agency has been carrying out the responsibilities imposed under Section 17 of the Contract Settlement Act of 1944, the Tax Amortization Act and the Requisitioning Acts.

Furthermore, it is preparing a summary of industrial mobilization during World War II which can be used in any future emergency to avoid costly mistakes of the past.

Witnesses calling for a prolonged life for the CPA cited that agency's selective use of priorities and allocations and its help in expanding the production of scarce building materials. "This activity," one witness said. "should be continued until supplies of the scarce items are adequate."

Controls Imports, Exports

By its priorities and allocation system, CPA is controlling import

RFC Intervention In Western Freight Rate Denounced

Opposition was growing in Washington today to Reconstruction Finance Corporation's successful intervention in the western steel freight rate case which would have placed lower rail rates in effect March 1.

Point of the matter is that RFC intervened on behalf of the Henry J. Kaiser Company which has many millions of dollars outstanding on its Fontana, California, steel plant, money loaned by RFC.

Now comes Representative Dawson (r., Utah), with a hot denunciation of the RFC practice.

The proposed lower rail rate would have affected steel shipped from the large Geneva, Utah, plant to the west coast. Geneva now is operated by United States Steel, which purcased the huge interests from the government several months ago with the understanding operation would not be interrupted.

These lower western steel rates would have become effective March 1 had not Kaiser interests, thru RFC, and representatives of other shippers intervened. it is being charged here. A hearing will be held March 11 to consider the new angles of the case in an effort to make a new determination.

Principal objectors, naturally enough, were the competitors of United States Steel. They realize that the lower rates will permit a cheaper distribution of Utah-produced steel in west coast states, cutting in on the few steel industries that are doing business there.

Representative Dawson, in his wrath, added that this might be a good time for a general investigation of RFC.

GROOVER AND I

YES, BUT WHERE?

One of our Romantic Institutions gave way to 50 mile-per-hour progress when the ferry boats were abandoned for a bridge.

☆ ☆ ☆

There is now talk of another bridge to the Continental side of San Francisco Bay, and again the talk is of bringing main-line railway trains directly into San Francisco.

☆ ☆ ☆

Counting the SP peninsula run, that would mean four lines terminating in San Francisco. Would also probably mean a Union Station.

☆ ☆ ☆

But will someone please point out just what space would be used for the necessary yards and trackage?

VA Fresno Hospital Bid Call Slated For March 15

WASHINGTON, Mar. 7.—Army engineers today announced a new list of Veterans Administration hospitals on which construction bids will be taken during the month.

The several projects, including a 250-bed general medical and surgical hospital at Fresno, Calif., are part of the $770,000,000 hospital construction program which the Army Engineering Corps has undertaken for the Veterans Administration.

First on the March, 1947 program was the 150-bed general medical and surgical hospital at Minot, S. D., as advertised on March 1. Bids on this hospital have been rejected twice by the engineers. It was designed by the Veterans Administration Construction Service.

The other seven hospitals to be advertised in March are:

Altoona, Pa., 200 - bed general medical and surgical, designed by Marlier, Wolfe & Johnstone, Pittsburgh, Pa., architects-engineers.

Buffalo, N. Y., 1,000-bel general medical and surgical, designed by Greene & James of Buffalo, and Eggers & Higgins, New York City engineers.

Fresno, Calif., 250-bed general medical and surgical, designed by Masten & Hurd and Huber & Knapik, San Francisco, architect-engineers.

Fort Hamilton, Brooklyn, N. Y., 1,000-bed general medical and surgical, designed by Skidmore, Owings and Morrill, New York, architect-engineers.

Miles City, Mont., 100-bed general medical and surgical, designed by McIver, Cushing and Terrell, Billings, Montana, architect - engineers.

Omaha, Neb., 500 - bed general medical and surgical, designed by Ellerbe and Co., St. Paul, Minn., and Leo A. Daly and Co., Omaha, Neb., architect-engineers.

Wilkes-Barre, Pa., 475-bed general medical and surgical, designed by Kelly & Gruzen, Jersey City, N. Y., and New York City, architect-engineers.

The War Department said that district engineers will advertise for bids on all these hospitals on Mar. 15, with the exception of the Miles City, Montana, hospital, which will be advertised on March 7.

Bids will be asked on the Albany, N. Y., and Wilmington, Del., hospitals some time during April. The exact date was not given.

Industry-Wide Wage Stabilization Program Revealed at Contractors' Legislative Session

By PHILIP G. BRADY

SACRAMENTO.—Behind closed doors some 30 representatives of construction industry groups met here Friday and Saturday for a show-down meeting on exactly how cooperative the various branches will be on legislation scheduled to come before the state legislature when it convenes in regular session next Monday.

No area of disagreement was found in Friday morning's opening session, as the discussion centered around the comparatively safe topics of labor bills and unemployment insurance.

Don Kerby, Oakland architect and conference chairman, barred the press from the meeting on the grounds that certain unnamed industry members were not inclined to make their views public. He refused to divulge further details, although it was apparent that some of the most influential delegates showed no fear of making their opinions public.

Cliff Dorwin, Oakland Builders Exchange secretary, whom Kirby named spokesman for the group, disclosed that a Sacramento committee would be appointed "to keep on top" of legislation as it developed. Dorwin said the group strongly opposes all bills extending the limits of days work and force contracts.

"Since these bills were introduced," Dorwin stated, "conditions have changed radically. A return to competitive bidding is on hand." Some divergence of opinion existed as to escalator clauses in public works contracts and other devices to pass on fluctuating costs, he said.

Other sources, however, revealed a much stronger divergence might occur over controversial measures introduced since the last meeting of the conference. Some of the proposed bills would legalize city and county examinations for contractors and sub-contractors, long a bone of contention between generals and subs.

It was learned that for the first time the industry was informed of efforts being made by Dan Hayes, San Francisco plumbing contractor, and others, to establish an industry-wide wage stabilization program along the lines recently and successfully adopted in New York. Under such a program, all crafts would bargain collectively and do away with "envy" bargaining by separate crafts.

While some delegates professed a belief that the conference would take only one day, it was noticeable that many representatives came prepared to spend the week-end.

Among the bills filed to allow cities the right to examine contractors, in addition to the state exam., is one specifically aimed at electrical contractors. It is S B. 1160, filed by Senator Keating.

S. B. 1160 provides "it is unlawful for any person, firm or corporation to carry on a business of installing, altering or extending any electrical wiring or devices in, or about buildings in any city without having first successfully passed an examination by the city as to his qualifications to conduct such business, when such examination is required by city ordinance."

Matters affecting the contractors' state license board were reserved for Friday afternoon's session. Two bills have been filed which would separate regulation of the industry, including architects and engineers, from the jurisdiction of the Department of Professional and Vocational Standards.

It was also expected some question would be raised as to why the examiner was omitted in a bill which would increase the salaries of the registrar, deputy registrars and inspectors.

Also on the agenda was a scheduled discussion of financing the activities of the conference. At present, the three chapters of the AGC have provided fulltime representation, although the conference is composed of many more groups.

Bill Introduced To Suspend Present Copper Import Tax

WASHINGTON.—While subcontractors need not be told that there is a very real shortage of copper for the manufacture of electrical and other building items, there is one man in Congress—Representative Grant, Indiana Republican—who has decided to do something about it.

Rep. Grant has introduced a bill to suspend for three years the present import tax of $80 a ton on the needed metal. He expects the House Ways and Means committee, of which he is a member, to act quickly on the legislation.

(Another pending measure would wipe out the levy entirely on a permanent basis.)

The Congressman feels that his approach to the import problem will meet with greater favor from legislators from copper producing states because they would be certain to oppose any measure which would do away with the import tax, endangering future production of domestic mines.

The Indiana representative feels that there is an immediate need for increasing the supply of copper and stopping the spiraling price of the raw product. This price, incidentally, is at the highest peak now since 1929.

Deep inroads into the available stocks of copper have been made in recent months by the building industry, electrical, automobile, radio, and other manufacturers.

Rep. Grant calls the current shortage of copper for key industries "critical". And well he might. Reconstruction Finance Corporation is drawing heavily on its war-built stockpile to meet domestic demands. In his words, RFC is "scraping the bottom of the barrel" with its proposed sale of 55,000 tons in the next two or three months.

Modernistic Office Is At Top of PBA List

WASHINGTON — Architectural design including modern building materials, is being applied to plans for the government's future buildings, it was indicated here this week when W. E. Reynolds, public buildings commissioner ,testified before a house public works subcommittee.

Excavation Complete

Commissioner Reynolds confined his remarks to structure of the proposed general accounting office building here in Washington, which is to be "an ideal building" with glass brick walls. This bit of information which congressmen heard from the FWA official points out a trend in public building designing which incorporates modern materials and modern methods, an agency spokesman said.

Much of the federal construction work, planned by the Public Buildings Administration is in the completed plan stage awaiting availability of materials and supplies, at the same time hoping for lower cost prices when the items become more plentiful.

Reynolds, in his testimony before the Senate group, placed the need for the modernistic GAO office at the top of a priority list.

CPA PERMITS GRANTED

SAN FRANCISCO. — The Civilian Production Administration, C. J. Grier, regional director, 1355 Market St., has announced the following permits granted for the above office for the construction of dwelling or rental units (other than for owner-occupancy) in the San Francisco area for applicants as noted:

Mar. 4, 1947

MFG PRECISION TOOLS & DIES, $55,000; Chilton & Hopkins, Redwood City; owner, Advance Tool Mfg. Co; 638 Main St, Redwood.

SERVICE STATION, $3,581; 5th & Franklin, Oakland; owner, Elgo Pasquini, 435 43rd St., Oakland.

BARBER SHOP, $2,550; 4th at Santa Clara, San Jose; owner, Peter Farnese, 424 Atlanta, San Jose.

BANK, $94,980; Franklin & Main, Santa Clara, Calif. owner, Capital Company, No 1, Powell, San Francisco.

SODA FOUNTAIN and VARIETY STORE, $9000; owner, Manuel J Hidalgo, 6th and H, Decoto.

TRUCK REPAIRS, $2,800; Morgan Hill; owner, R V Littleton, Morgan Hill.

DINING ROOM at State Park, $5,000; Big Sur; owner, Harry L. Crawford, Big Sur.

AUTO & TRUCK Repairs, $4,700; owner, Howard F Miller, 333 11th St., Richmond.

FLOOR COVERINGS, $11,050; owner, Anderson Carpet & Linoleum, 1045 Broadway, Oakland

ERECT RESTAURANT on old foundation, $3,930; 2500 Bdwy, Oakland; owner, West Coast Properties Ltd, 1706 Bdwy, Oakland.

PARTITIONS FOR AUTO Sales & Service, $3,500; owner, Sacramento, Nash Inc, 1619 L, Sacramento.

REAL ESTATE Office (evicted) $4,750; 440 10th St., Richmond; owner, H Plate, 1628 Macdonald, Richmond.

BAKERY, $35,000; 16th at Shotwell, San Francisco; owner, Kilpatrick's San Francisco Bakery, 2020 Folsom,San Francisco.

REMODEL STORE (evicted), $7,500; 17th & Bdwy, Oakland; owner, Arthur H Licht, 1970 Bdwy, Oakland.

DINING ROOM Alterations, lighting, $2,350; owner, Union League Club, 555 Post, San Francisco.

DRIVE-IN RESTAURANT, for transient farm labor, $15,000; 511 Colusa, Yuba City; owner, Harold W Moore, 657 Plumas, Yuba City.

FARM EQUIP, Repairs $2,750; 2175 W 182nd Ave, San Leandro; owner, Wm F Spacks, 2355 W, 135th Ave, San Leandro.

BOXING; TEMPORARY STORAGE Bldg., $15,980; 17th St; owner, G W Thomas Dmyage, 114 14th St., San Francisco.

ALTERATIONS TO CHURCH, $1,800 owner, Temple of Trust Baptist Church, 10th & Market ,Oakland.

CLASSROOMS, $55,000; Fremont and Middle Road, Menlo Park; owner, Menlo Park Elementary School District.

FLOOR overings, $40,000; 2077 Broadway, Oakland; owner, Lewis and Lewis, 2093 Broadway, Oakland.

BAKERY, $8,000; Walnut Creek; owner, C. F. Hendrick, Box 1207 Walnut Creek.

CHURCH, $35,000; 24th and Andrade, Richmond; owner, Bethany Presbyterian Church, 2611 Gaynor, Richmond.

CLASSROOMS, $44,000; 12th and K Sts., Reedley; owner, Reedley Joint School District, Box 507, Reedley.

HARDWARE store, $9800; San Carlos; owner, Victor M. Robelet, 152 Crescent, Burlingame.

REPAIR store, $5500; Madera Co.; owner, A Mecchi, Avahnee, Calif.

ELECTRO-PLATING, $6500; Modesto; owner, Winn Stambaugh, 298 Rosemont, Modesto.

MILKING Barn, $3494; near Tulare; owner, Eldon Nagel, Tulare.

RESTAURANT, $4000; near 500 California, Fresno; owner, J. D. Capps, 329 Atchison, Fresno.

WAREHOUSE for steel products, $490,000; Hollis and 63th Streets, Emeryville; owner, Jos. T. Ryerson & Son, Box 8000-A, Chicago.

SHOE repair shop, $7500; 319 Broadway, Millbrae; owner, Robt Bebrini, 610 4th St., South San Francisco.

PRUNE dehydrator, $54,000; nr Grilley; owner, Feather River Cooperative Dryer, Box 670, San Jose.

SHEET Metal Shop, $6500; Florin Road, Florin; owner, Leroy Hall, 5124 U St., Sacramento.

REPAIR store, $4500; E Alisal, Salinas; owner, Wilma M. Williamson, 121 E. San Luis, Salinas.

REPAIR store, $58,200; Washington and 12th Sts., Oakland; owner, MacDonald Products Co., 1 Montgomery St., San Francisco.

COMPLETE real estate office, $800; 7518 E 14th St., Oakland; owner, Edward A. Rohey, 4622 E 14th St., Oakland.

FOOD Market, $35,000; 27th Avenue, San Mateo; owner, George P. Brady 1926 Quint St., San Francisco.

TRANSIT office, $2500; 117 W Pine, Lodi; owner, Lodi Transit System, 2 North Sacramento St., Lodi.

FHA PERMITS ISSUED

SAN FRANCISCO. — The Federal Housing Administration, D. C. McGinness, district director, 315 Montgomery St., San Francisco, has announced the following list of permits granted by the above office for the construction of dwelling or rental units (other than for owner-occupancy) in the San Francisco area for applicants as noted:

65 UNITS—El Dorado Park; Associates, Inc, 1127 Solano Ave, Albany.
2 UNITS—Jackson; Geo M Thomas and Marucci, 9 South Ave, Jackson.
1 UNIT—San Carlos; Norman W Edwards, 1115 Hawthorne Dr, San Mateo.
4 UNITS—Millbrae; James W McCabe, 7 El Bonito Way, Millbrae.
2 UNITS — Sacramento; Wright & Frank, Builders, Box 638, Sacramento.
2 UNITS—Manteca; Floyd W Stevens, Box 425, Manteca.
4 UNITS—Fresno; Ben Baxter, 4205 Butler Ave, Fresno.
1 UNIT—Fresno; Mrs Norene M Fitch, 1422 Courtland, Fresno.
1 UNIT—Watsonville; Karl J Bergland, Route 5, Box 246, Watsonville.
3 UNITS—Marysville; E V Gilkey, 207 E 15th St, Marysville.
2 UNITS—Salinas; James A Barrow, 90 Paloma Ave, Salinas.
2 UNITS—Santa Cruz; L F Sayre, 15 N Seabright Ave, Santa Cruz.
2 UNITS—Oakland; Philip W Ware, 2803 Broadway, Oakland.
4 UNITS—Sacramento; Ed H Wilkes, 815 California Life Bldg, Sacramento.
2 UNITS—Santa Rosa; Thomas M Daniels, 2147 Orchard St, Santa Rosa.
2 UNITS—San Francisco; Joseph F Dolan, San Francisco.
2 UNITS—Oakland; Mrs F Y Chapman, 900 Creed St, Oakland.
2 UNITS—San Jose; Jay W Morris, 1707 S 1st St, San Jose.
10 UNITS—Chico; Lewis G Beebe, 1236 Ivy, Chico.
2 UNITS—Albany; Louis Erickson, 1725 5th St, Berkeley.
4 UNITS—Porterville; John A Todd, 315 3rd St, Long Beach.

Contract Awarded
Timber Bridge and Weir; Spec. 1617 ..... Cost, $30,650
CENTRAL VALLEY PROJ., Calif. About 11 miles NE of Madera.
Owner—U. S. Bureau of Reclamation, Friant, Calif.
Plans by Engrg. Dept. of Owner.
Timber bridge across Fresno River and timber weir in Fresno River siphon wasteway, Madera Canal.
Contractor—Munn & Parkins, Route 4, Box 1930, Modesto, Calif.

34—DAMS, RESERVOIRS & DREDGING

3/10/47 • 34
Low and Only Bidders
Earthwork, Pipelines, Structures; Spec. 1672
YAKIMA PROJECT, Washington. Roza Division, pump areas No. 1 and 9; pump area No. 1, located about six miles north of Yakima, and pump area No. 9, about six miles northwest of Sunnyside.
Owner—U. S. Bureau of Reclamation, 7½ N. 2nd St., Yakima, Wash.
Construction of earthwork, pipelines and structures, lateral distribution systems.
Low Bidder—Morrison-Knudsen Co., Boise, Idaho (Sch. 1) $87,340.80, and (Sch. 2) $47,688.20.
J. A. Terteling & Sons, Inc., Boise, Idaho, at (Sch. 1) $97,008.50, (Sch. 2) $55,182.88, submitted only other bid March 5.

3/10/47 • 34
Owner Taking Bids—Due March 14, 11 A. M. (Time Extended From March 11)
Narrows Dam and Power Plant; Serial 47-143
PIKE COUNTY, Arkansas. Little Missouri River, tributary of Quachita River, approximately seven miles from Murfreesboro.
Onew—Vicksburg District, Corps of Engineers, War Department, Col. R. G. Lovett, district engineer, Vicksburg, Miss.
Plans by owner.
Gravity concrete dam and reservoir storage, capacity approximately 410,000 acre feet, and power paint at damsite with installation of hydroelectric generating facilities; capacity approximately 20,000-kw.
Specifications obtainable from the above office.

38—ELECTRIC LIGHTING & TRANSMISSION LINES

3/10/47 • 38
Low and Only Bidders
Traffic Signals and Illumination ..... Cost $34,914
VENTURA COUNTY, Calif. At intersection of Ventura Blvd. and Telephone Rd., and intersection of Ventura Blvd. and Telegraph Rd.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Bids opened in the State Bldg., Los Angeles, Calif.
Low Bidder—L. H. Leonardi Electric Construction Co., 717 Francisco Blvd., San Rafael, Calif., $34,914.
The work involves:
(1) furnish and install intersection illumination at intersection of Ventura Blvd. and Telephone Rd.;
(2) furnish and install full traffic actuated signal system and intersection illumination at intersection of Ventur aBlvd. and Telegraph Rd.
Bids submitted March 6 were:
L. H. Leonardi Electric Co., (1) $8806, (2) $26,108; total, $34,914.
Econolite Corp., Los Angeles, (1) $12,241, (2) $28,197; total, $40,438.
C. D. Draucker Co., Los Angeles, (1) $12,225, (2) $29,480; total, $41,705.

39—SEWERS

3/10/47 39
Owner Taking Bids—Due March 24, 4 P. M.
Sewer Lines ..... Cost $116,691.96
NEWPORT BEACH, Calif., Orange County. Corona Del Mar.
Owner—City of Newport Beach, City Hall, Newport Beach, Calif.
City Engineer—J. B. Webb, City Hall, Newport Beach, Calif.
Specifications obtainable from the office of the city engineer upon deposit of $15, refundable.

40— STREETS AND HIGHWAYS

4/10/47 • 40
Owner Taking Bids—Due March 11, 2 P. M. (Unit Quantities)
Access Road; Project Calif. 0-5 (6)
RICHMOND, Calif., Contra Costa Co. To Naval Fuel Annex.
Owner Public Roads Administration, C. C. Morris, division engineer, 720 Phelan Bldg., San Francisco, Calif.
Plans by engineering department of owner.
About 0.571 mile.
The work involves:
(1) 1350 cu. yds. unclassified excavation;
(2) 90 cu. yds. unclassified excavation for structures;
(3) 317,000 lbs. cy. overhaul;
(4) 1,000 M gals. watering of embankment;
(5) 100 M gals. watering of subgrade;
(6) 100 M. gals. watering of base course;
(7) lump sum, provide and maintain water plant or plants;
(8) 2800 tons crushed gravel or crushed stone base course Class 2, Grading C-1;
(9) 14 tons medium curing cutback asphalt, Grade MC-2 for prime coat;
(10) 5 tons rapid curing cutback asphalt, Grade RC-1 for seal coat;
(11) 900 tons Class F pavement type P-1 plant mixture, Grading B;
(12) 43 tons asphalt, Grade 150-200 for Type F-1;
(13) 2.5 cu. yds. concrete, Class A;
(14) 20 lbs. reinf. steel;
(15) 208 lin. ft. 24-inch corrug. galv sheet metal culvert pipe;
(16) 2each timber guide posts.
(17) 20 each timber guide posts.
Specifications obtainable from the above office upon deposit of $10 refundable.

3/10/47 40
Contract Awarded
Utilities ..... Cost $122,255
DORENA, Ore., Lane County. Dorena Dam housing site.
Owner—Portland District, Corps of Engineers, War Department, Col. O. E. Walsh, district engineer, 628 Pittock Block, Portland, Ore.
Plans by engineering department of owner.
Includes roads, parking areas and sidewalks, sanitary sewer system, water supply lines and distribution system and electric distribution system.
Contractor — Ramsey Construction Co., 558 Jefferson St., Corvallis, Ore.

3/10/47 40
Contract Awarded
Grading and Surfacing ..... Cost $94,486
SAN BERNARDINO COUNTY, Calif. Between one mile east of Victorville and Victorville.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
About 1.4 miles grading and applying bituminous surface treatment.
Bids opened in the State Bldg., Los Angeles, Calif.
Low Bidder—Matich Bros., Box 390, Colton, Calif., $94,486.
The work involves:
(1) clearing and grubbing;
(2) 50,600 cu. yds. roadway excavation;
(3) 420 cu. yds. ditch and channel excavation;
(4) 420 cu. yds. structure excavation;
(5) 380,000 sta. yds. overhaul;
(6) 65 sta. finish roadway;
(7) 25,000 sq. yds. prepare, mix and shape surfacing, bituminous surface treatment;
(8) 290 tons liquid asphalt SC-3 or SC14 bituminous surface treatment;
(9) 130 tons screenings seal coat;
(10) 11 tons asphaltic emulsion seal coat;
(11) 45 cu. yds. class A portland cement concrete structures;
(12) 3800 lbs. bar reinforcing steel;
(13) 30 each monuments;
(14) 100 lin. ft. laminated timber guard railing;
(15) 340 lin. ft. metal plate guard railing;
(16) 40 each guide posts;
(17) 20 each culvert markers;
(18) 90 lin. ft. 18-in. CMP culverts, 16-gage;
(19) 612 lin. ft. 24-in. CMP culverts, 14-gage.
Total bids February 27 were:
(A) Matich Bros., $94,486.
(B) Clifford C. Bong & Co., Los Angeles, $96,183.70.

GROOVER AND I

WHAT'S BEYOND INFINITY?

New Deal is extending to financially anemic Cheesemania a "line of credit" then that country can purchase American goods. Our manufacturers are happy because they have sold their goods for sound American taxpayers' dollars to a customer who hasn't quibbled about price. Who said repayment?

☆ ☆ ☆

But what happens when Cheesemania comes back for the second "line of credit"? Is that the Second Deal?

☆ ☆ ☆

My first memories are of plantation life in the Deep South. Living where was then a day's trip from the County Seat, we kids devised most of our amusements. Being children of a land-poor cotton Planter our amusements were improvised and inexpensive.

☆ ☆

On rainy days we were corralled to play in the attic of the Plantation House. One favorite game was "playing store". One was elected "storekeeper" who gathered up all forms of junk, trivia and oddments as "merchandise".

☆ ☆

The others would go to an old battered leather trunk containing about 1¼ million dollars. Each would take a handful of currency and the "trading" would begin.

☆ ☆ ☆

After the storekeeper had sold out, the merchandise would be returned, the money again divided— and the game would start over again. What is new about the New Deal?

☆ ☆ ☆

About the trunk—suppose the currency was issued by the Confederate States of America—is was worth more than the Hungarian pengo—

☆ ☆ ☆

Which was quoted last August at 500 quadrillion times its original value!

WAA SELLS ENTIRE UTAH TOWN OUTRIGHT

Uncle Sam today realized a realtor's dream — the government sold an entire town in a single sale. And everybody seemed satisfied, including the 2,500 townspeople, who had sought to purchase the property for its perpetuation.

War Assets Administration announced that Dragerton, Utah, a war-born town of mine workers, has been sold to the Geneva Steel Company—lots, stocks and wheelbarrows—for $1,553,000 cash.

It was developed by the government in 1943 at a cost of more than $4,530,000 to provide accommodations for families of coal miners employed at the Geneva Coal Mines which supply the fuel necessary for the operation of the Geneva Steel Plant at nearby Geneva, Utah.

#

KENT ADDRESSES BICB

Thomas J. Kent, Jr., director of planning, San Francisco Planning Commission, will speak before a luncheon meeting of the Building Industry Conference Board in the Commercial Club, Wednesday. He will discuss the relation of the San Francisco master plan to the second bay bridge crossing.

Kent was named to the director post vacated by L. Deming Tilton recently. He is one of the youngest planning directors San Francisco has ever had.

#

SUFFICIENT MATERIALS

WASHINGTON. — Production of almost all items of construction materials is expected to be sufficient in 1947 to meet the demands of the anticipated large building program, the Construction Division, Department of Commerce, reported today.

CAA to Be Notified If Landing Field Is Built Within 5 Miles

WASHINGTON. — Government today made public an amendment to its civil air regulations expressly forbidding construction of a landing area within five miles of an existing airport, without previous notification.

Contractors who hold work orders for such projects will do well to check this proximity provision on their contemplated jobs.

The published orders reads that any person who engages in the construction of a landing area, any boundary of which will be within five miles of the nearest boundary of an existing landing field shall give notice to the Administrator of Civil Aeronautics.

☆

The basis and purpose of the amendment is outlined as follows:

"The construction of a landing area within five miles of an existing landing area may constitute a hazard to the navigation of aircraft in air commerce, unless proper notice of such construction is given to all airmen and the traffic pattern for such landing area is coordinated with that of the existing landing area. To accomplish such notice and coordination, the Administrator of Civil Aeronautics must be notified of the construction of any landing area and any boundary of which will be located within five miles of an existing landing area."

#

PRESIDENT ASKS $50 MILLION TO FINISH VETS' TEMP. PROGRAM

WASHINGTON. — Latest word from Capitol Hill tells of President Truman asking congress for an additional $50 million for the veterans temporary housing program.

A total of $445,627,000 appropriated under the Lanham Act for conversion of surplus war structures into temporary housing units for veterans and their families has been exhausted. (Most of this was used for converting Army barracks.)

As a result, only 150,000 of the 200,000 housing units originally contemplated can be finished with present funds.

The additional $50 million requested by the White House would enable the Federal Public Housing Authority to finish about 13,000 additional units on which there are commitments. It also would provide for reimbursing local governments that have completed units on which work was halted earlier by FPHA—those communities that have finished this work at their own expense.

Approximately half the units under this program were allocated to colleges attended by veterans and the balance to over-crowded communities.

LICENSE BOARD TO STUDY CONTRACTOR'S SCOPE OF OPERATIONS

The need of regulations to establish the scope in which a contractor may operate under his classification will be considered at a special meeting of the Contractor's State License Board at Sacramento, Friday, March 14.

In announcing the special meeting, Chairman J. Philip Murphy set the time at 10 o. m. and the place in the auditorium of the Business and Professions Building, 1020 N Street.

Much interest has been expressed in defining and limiting operational spheres for various contractors classifications and the meeting is expected to be well-attended.

Spring to Emphasize Scarcity of Skilled Construction Labor

WASHINGTON. — Like spring and prosperity that long-expected labor shortage in the construction trades might be just around the corner.

Late last summer Wilson W. Wyatt, then housing expediter, said that scarcity of workers in the building trades might develop early in 1947 as the number one problem in housing the nation's home searchers. He said then that he expected a search for workmen to develop comparable to the search for materials that consumed so much of the contractors' time in 1946.

Now, with the coming of spring, hundreds of thousands of laboring and semi-skilled jobs will open up on construction cites throughout the country. This call for workers, government sources say, is expected to more than drain any reservoir of joblcas that has been on the employment service books this winter.

After these unemployed have been absorbed, the search for bricklayers, carpenters, cement finishers, and workmen in a host of other trades is expected to begin.

No figures on the estimated demand for spring and summer work throughout the country are available but local conditions throughout the nation have indicated the need will surpass the supply.

In the District of Columbia, for example, employment authorities are estimating that there will be room for 10,000 more unskilled and semi-skilled workers in the building trades when spring work really gets underway.

On the other hand, local job turnovers have dropped to the point in many localities where the only recognizable changes are in seasonable employment.

Gwynne Bill Okayed, Qualifications Are Rejected In House

WASHINGTON.—Last week the house passed, without amendments, the Gwynne Portal-to-Portal Bill known as House Resolution 2157. The vote was 345 to 56 after all amendments had been rejected.

Little public notice has been given to the house amendments that killed the bill. Here they are, in brief, with their proponents:

By Rep. Price (d., Ill.) providing that nothing in the act shall permit prevailing wage and hour standards to be lowered. (By a voice vote).

By Rep. Devitt (r., Minn.) limiting the employers' right to claim good faith as a defense against portal suits. (By a voice vote).

By Rep. Celler (d., N. Y.) providing a two-year statute of limitations. (By vote of 124 to 73).

By Rep. Walters (d., Pa.) providing a three-year statute of limitations. (By vote of 145 to 40).

By Rep. Javits (r., N. Y.) exempting workers not covered by collective bargaining agreements from provisions of the bill. (By vote of 131 to 53).

These defeated amendments indicate the sentiment of congressional thought in regard to the portal-to-portal pay matter.

H. R. 2157, having passed the house by an overwhelming majority, the senate this week considers its own portal-to-portal pay bill, S. 70.

#

VETS MEET WITH CSLB

Representatives of the Veterans Administration and organizations will meet with officials of the Contractors State License Board at the board offices, State building, San Francisco, Wednesday, March 12, at 10:30 a. m. to discuss complaints against practices by some contractors in this area in regard to home building.

City License Examinations Purpose to Stifle Competition, Electricians Allege at Conclave

By PHILIP G. BRADY

SACRAMENTO.—The first discordant note in the seemingly unified front of the construction industry sounded loud and long at the industry legislative conference last weekend. The conference, largest and most diversified yet held, voiced unanimity on pending labor and compensation bills, referred most matters to a steering committee and then split right down the middle on the issue of city license examinations.

Crux of the controversy was several measures, introduced by electricians and other sub-contractors, seeking legislative approbation of municipal authority to license and examine prospective contractors. Within the past year, two court decisions have held that cities lack such authority under present statutes.

Local Exams Superfluous

A showdown was narrowly avoided by what was termed the "arbitary action" of Chairman Don Kurby in refusing to entertain a motion opposing the bills. Instead the chairman referred the issue to the steering committee. Proponents of the bills claimed such local examinations would establish the competency of contractors.

Opponents vigorously denied that this was the motive or that such further protection was necessary. The sole motive, they said, was to discriminate against potential competitions. The opposition, led by the general contractors, included several influential sub-contractors who said the state licensing system was entirely adequate.

Lacking a pre-determined agenda the meeting wallowed from point to point in what one participant described as a "haphazard manner". Several members characterized the session as "a waste of time" and stated that "if everything was going to be referred to the steering committee why didn't the chairman do it by mail instead of dragging us up here from all over the state?"

First tipoff that a stormy session might be ahead came when the chairman barred the press from the meeting on the grounds that certain unnamed members objected to voicing their views in public. A survey of the group, taken after the meeting, elicited such comments as: "As far as I'm concerned, the press could be allowed in, we don't have anything to hide", and "I don't like the public suspicion attached the closed meetings."

No CSLB Wage Hike

Only member of the Contractor's State License Board present was Joseph McNeill of Los Angeles who asked support of a measure to increase salaries of the License Board staff. However. it was learned that state officials would attempt to delete provisions of the bill granting wage hikes to civil service employees of the board.

James A. Arnerich, director of the Department of Professional & Vocational Standards, was called before the conference to explain a pending bill (S. B. 1282) which would transfer buildings and real property now controlled by his department to the jurisdiction of the Department of Finance. The conference was assured the bill would not pass control of contractor's board funds to the finance agency.

Approve Plans Move

The conference also approved bills which would enable private architects to do state plans.

William C. Tait, San Francisco general contractor and chairman of the steering committee, stated that he had received encouragement from many segments of the industry on plans to establish "home-rule" for the construction industry by banding contractors, engineers and architects into a separate department or division of state government.

Delay In Hospital Building Program Blamed On VA

WASHINGTON.—(Exclusive)—Responsibility for laxity in progress of the veterans' hospital building program was laid squarely in the lap of the Veterans' Administration when delegates to the American Legion's National Rehabilitation Conference in Washington told of citing the need for additional beds years ago.

Most outspoken in criticism of the VA's alleged failure to heed the Legion's pleas was William R. McCauley of Olney, Ill., chairman of the department of rehabilitation.

He scored VA for not listening to the Legion's request that it provide thousands of additional beds for veterans needing hospitalization. "The present record," McCauley said, "shows that the veterans' administration hasn't scratched the surface in this matter of providing additional beds during the past five years. Between 250,000 and 300,000 new beds will be needed when the peak demand arises. The time has come now to expand the present facilities.

"We of the Legion are not to be blamed for VA's failure to build beds."

The Illinois delegate pointed out that there is a vast difference between the veteran that can afford to pay for hospital care and the veteran who cannot afford hospitalization.

In answer to those who have criticized VA for not making use of surplus Army and Navy hospital plants, it was explained that to date some of these surplus establishments have been transferred to VA use.

The outpatient medical service in Chicago came in for discussion with a need mentioned for additional facilities there. Because of the nature of industrial activity in the Chicago area, which is on a 24-hour shift basis, many veterans needing medical attention cannot receive it since the clinics are not open to them when they are off duty.

Dr. Paul R. Hawley, chief medical director for the administration, explained to delegates that the VA now finds itself short of funds. In explaining why that government agency is "out of money", he told how estimates for the current fiscal year had to be submitted 19 months ago—as long ago as V-J Day. These early estimates, he said, were based on Army and Navy demobilization rates that were given at that time. Since, demobilization had been greatly accelerated.

"If Army and Navy had held to the demobilization rates originally given," Dr. Hawley added, "we would have enough money now. But as it is, the administrator has gone to congress to ask for a deficiency appropriation to carry on to the end of the fiscal year (July 1)."

Operations of the VA depend on two contingencies:

1—The reaction of congress to request for a deficiency appropriation, and

2—Congress' attitude toward the VA budget proposal for the next fiscal year. This budget request for 1947-1948 may be cut substantially, some quarters strongly feel.

In 13 branch areas the Veterans' Administration is operating (as of January 28, 1947) 121 hospitals, proposes erection of 74 new hospitals, and additions to or conversion of 28 more.

Correction
All Bids Rejected Except Low Bid, Which is Being Held Under Advisement — Veterans' Emergency Dwelling Units (197)
Owner — Monterey County Housing Authority, Mrs. Walters, executive secretary, Salinas, Calif.
Architect—Charles E. Butner, 7 Winham St., Salinas, Calif.
Involves erection of 46 new prefabricated steel buildings, alteration of 143 wood units now up on the site, and moving and altering eight wood units, also on site, to provide 2- and 1-bedroom dwelling units; includes new sewer system, water, gas and electrical services.
Low Bidder—E. M. Carlsen, 16 Monterey Rd., Salinas, Calif., $334,905.
Other bidders March 6 were:
Stolte, Inc., Oakland, Calif., $369,600.
Robert McCarthy Co., San Francisco, Calif., $385,000.
Wallace D. Harkins, Inc., San Francisco, Calif., $388,900.
Biltwell Construction Co., San Francisco, Calif., $447,777.
Correction in low bidder's name.

31-32—WATER SUPPLY & SEWAGE DISPOSAL PLANTS

3/11/47 32
Hearing of Protests Set For April 1, 11 A. M.
Sewage Treatment Plant and Sanitary Sewers; Resolution 2528
SAN MATEO CO., Calif. Emerald Lake Subdivision One
Owner—County of San Mateo, Board of Supervisors, W. H. Augustus, County Clerk, Court House, Redwood City, Calif.
Engineer—Edwin H. Smith, Spring & Chestnut Sts., Redwood City, Cal.
Includes sewage treatment plant consisting of septic tank, chlorination tank, shed for chlorinating equipment, measuring devices and appurtenances and sanitary sewers, mains and laterals, manholes, lampholes and appurtenances.

3/11/47 32
Survey Completed—Engineers Authorized to Start Preliminary Plans
PORTERVILLE, Calif., Tulare Co.
Owner—City of Porterville, Irvin H. Althouse, city engineer, City Hall, Porterville, Calif.
Consulting Engineers—Quinton Engineers, Ltd., 816 S. Figueroa St., Los Angeles, Calif.
Proposed 3 steps or rebuilding and expansion include (1) provision for city population of 8,500 including construction of a new inlet structure, primary reduction basin, automatic electric pump, conversion of present Imhoff tank to a digester, a trickling filter and distribution system, additional 1.56 acres of percolation beds, new sludge drying beds and conversion of the dosing chamber into an office, laboratory and storeroom.
Cost $100,000 (2) provision for 17,000 population $66,900; (3) provision for population of 21,000 including facilities for handling sewage from new state hospital, $35,500.

3/11/47 32
Bids Rejected—Owner Will Take New Bids at Later Date
Sewage Treatment Plant (Addns.)
ESCONDIDI, Calif., San Diego Co. Southwest Section.
Owner — City of Escondido, City Clerk, City Hall, Escondido, Calif.
Engineers—Quinton Engineers Ltd., 816 South Figueroa St., Los Angeles, Calif.
Alteration to existing structures to change the plant from an activated sludge process to a standard filter process plant and addition of new filters, new digester, new sedimentation basin, new chlorine contact chamber and new sludge beds.
Bids submitted March 5 were:
Johnson Western Co., $145,000.
Hoagland-Finlay Engineering Co., $149,444.
Haddock-Engineers, Ltd., $159,150.
Phillip Haik, $159,823.
Walter Barber and H. R. Breeden, $178,706.
Jas. Huntley, $182,563.
Contracting Engineers Co., $183,500.

33— BRIDGES

3/11/47 • 33
Owner Taking Bids—Due April 9, 2 P. M.
Bridge
SAN JOAQUIN COUNTY, Calif. Across Mokelumne River, about 5 fives northwest of Lodi.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Structural steel and reinforced concrete bridge.
The work involves:
(1) 430 cu. yds. structure excavation;
(2) 50 cu. yds. class A portland cement concrete footing block;
(3) 1275 cu. yds. class A portland cement concrete structures;
(4) 1454 lin. ft. concrete railing;
(5) 208,000 lbs. furnish structural steel;
(6) 208,000 lbs. erect structural steel;
(7) 2400 lbs. cast steel;
(8) 1960 lin. ft. furnish Douglas fir piling;
(9) 48 each drive timber piles;
(10) 5760 lin. ft. furnish concrete piling;
(11) 128 each drive concrete piles;
(12) 255,000 lbs. furnish bar reinforcing steel;
(13) 255,000 lbs. place bar reinforcing steel;
(14) engineer's office.
Specifications obtainable from the above office.

3/11/47 • 33
Owner Taking Bids—Due April 9, 2 P.M.
Bridge
FRESNO and KINGS COUNTIES, Calif. Across Kings River near Hardwick.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Reinforced concrete girder bridge.
The work involves:
(1) clearing and grubbing;
(2) 1050 cu. yds. structure excavation;
(3) 1133 lin. ft. timber bridge railing;
(4) 197 cu. yds. class A portland cement concrete footing blocks;
(5) 1460 cu. yds. class A portland cement concrete structures;
(6) 706 lbs. miscellaneous iron and steel;
(7) 3400 lin. ft. furnish concrete piling;
(8) 113 each drive piles;
(9) 200,000 lbs. furnish bar reinforcing steel;
(10) 200,000 lbs. place bar reinforcing steel;
(11) 2 each clearance markers;
(12) engineer's office.
Specifications obtainable from the above office.

3/11/47 • 35
Owner Taking Bids—Due April 9, 2 P. M.—Steel Bridge
STANISLAUS and SAN JOAQUIN COS., Calif. Across Stanislaus River about 8 miles NW of Modesto.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Unit quantities will be given tomorrow.

34—DAMS, RESERVOIRS & DREDGING

3/11/47 34
Owner Taking Bids—Due About March 21
Dredging
WRANGELL NARROWS, Alaska and Lake Crockett, Washington.
Owner—Seattle Dist., Corps of Engineers, War Dept., Col. L. H. Hewitt, Dist. Engr., Textile Tower, Seattle 1, Wash.
Plans by owner.
Includes (1) Wrangell Narrows project consisting of dredging approx 16,000 cu. yds. ledge rock and 245,000 cu. yds. of other than ledge rock and (2) Lake Crockett project consisting of 400,000 cu. yds. dredging of material in the lake with an entrance channel from Admiralty Bay and construction of a rubblestone breakwater containing approx. 28,000 tons of stone, in vicinity of Ft. Casey, Whidbey Island, Wash.

3/11/47 • 34
Owner Taking Bids—Due April 22, 2 P. M.
Scotts Flat Dam and Appurtenances
NEVADA COUNTY, Calif. About 4.5 miles east of Nevada City.
Owner — Nevada Irrigation District, Elizabeth P. Frey, secretary; Thos. Mulcahy, president, board of directors, Grass Valley, Calif.
Engineer—Blackie & Wood, 344 Market St., San Francisco, Calif.
The work involves:
(1) diversion and care of creek and unwatering foundation, lump sum;
(2) foundation excavation in streambed above elevation 2910, 4750 cu. yds.;
(3) foundation excavation below elevation 2910, 17,500 cu. yds.;
(4) foundation excavation for impervious embankment above elevation 2910, 20,000 cu. yds.;
(5) foundation excavation for pervious embankment above elevation 2910, 2500 cu. yds.;
(6) cutoff trench excavation, 2000 cu. yds.;
(7) stripping spillway, 30,000 cu. yds.;
(8) drilling grout holes from 0 to 25 ft. in depth, 4760 lin. ft.;
(9) drilling grout holes from 25 to 75 ft. in depth, 300 lin. ft.;
(10) drilling grout holes from 75 to 100 ft. in depth, 150 lin. ft.;
(11) grout connections, washing and testing, and equipment setups, 260 holes;
(12) mixing and placing grout under pressure, 7500 cu. ft.;
(13) impervious embankment in backfill of exploration tunnels below dam foundation, 375 cu. yds.;
(14) impervious embankment in Zone 1 of dam, 260,000 cu. yds.;
(15) impervious embankment in abutment blankets of dam, 16,500 cu. yds.;
(16) pervious embankment in Zone 2 of dam, 50,000 cu. yds.;
(17) pervious embankment in Zone 3 of dam, 307,500 cu. yds.;
(18) pervious embankment in rock riprap on upstream face of dam, 19,000 cu. yds.;
(19) concrete in cutoff walls under spillway lining, 350 cu. yds.;
(20) concrete in spillway lining, weir and bucket, 1975 cu. yds.;
(21) concrete in outlet structure, 65 cu. yds.;
(22) concrete in outlet pipe saddles and anchors and in tunnel plug, 30 cu. yds.;
(23) placing reinforcing steel, 145,000 lbs.;
(24) installing miscellaneous metal work, 12,500 lbs.;
(25) installing 30-in. butterfly valves and appurtenances, lump sum;
(26) installing 36-in. pipe in outlet tunnel, 585.5 lin. ft.;
(27) gravel drains under spillway lining, 1250 lin. ft.
Specifications obtainable from the office of the engineers upon payment of $5, not refundable.

35—SEWERS

3/11/47 39
Low Bidder
Outfall Trunk Line; Unit No. 4 Cost $79,416
LONG BEACH, Calif., Los Angeles County. From proposed pumping plant located at Reeves and Gaylord north on Fashion to near Hill St., Long Beach, Calif.
Owner—Los Angeles County Sanitation District No. 3. A. M. Rawn, chief engineer and general manager, 3rd floor, 1206 S. Maple Ave., Los Angeles, Calif.
Plans by owner.
Owner will furnish pipe.
Low Bidder—P. & J. Artukovich, 12,305 So. San Pedro St., Los Angeles, Calif., $79,416

3/11/47 39
Engineering Report Submitted to District
Sewer Mains, Etc. Cost $96,000
NILES, Calif., Alameda Co. South end of King Ave.
Owner—Niles Sanitary District, Attorney Leon Clark, E. E. Dias, Secretary, Niles, Calif.
Engineer—Roy Edwin Ramseier, 3813 Parker St. Berkeley, Calif.
Includes about 5.5 miles sewer mains, lift station and pumping plant, five crossing under railroads and 3 under highways, 37 manholes, etc.

3/11/47 39
Bond Election in Amount of $140,000 Set for May 12
Sewer System Additions Cost $231,000
WATSONVILLE, Calif., Santa Cruz County.
Owner—City of Watsonville, F. J. O'Brien, city clerk, City Hall, 268 Main St., Watsonville, Calif.
City Engineer—H. E. Eitchen, City Hall, Watsonville, Calif.
Includes 16-inch ocean outfall line, new pumps, motors and switches, and chlorinators; the building of an extension into the industrial district and newly annexed territory.

40— STREETS AND HIGHWAYS

3/10/47 40
Low and Only Bidders
Grading, Etc. Cost $32,671.50
INYO COUNTY, Calif. From 1.6 miles north of Shoshone on State Highway Route 127 extending westerly over Salsbury Pass to boundary of Death Valley National Monument.
Owner—County of Inyo, Fay Lawrence, county clerk, Courthouse, Independence, Calif.
Plans by owner.
Includes net distance of 14.75 miles grading and applying penetration treatment, together with drainage facilities.
Low Bidder—Roland T. Reynolds, Route 4, Box 139, Anaheim, Calif., $32,671.50.
Other bids March 3 were:
Foster & McHarg, Riverside, Calif., $39,854.40.
Silva & Hill, Los Angeles, $43,897.

3/11/47 • 40
Owner Taking Bids—Due March 25, 4 P. M.
Sidewalk and Yard Alterations
OAKLAND, Calif., Alameda County. Montclair School, 1757 Mountain Blvd.
Owner—Oakland, Board of Education, John W. Edgemond, Secretary, Admin., Bldg., 1025 2nd Ave., Oakland, Calif.
Plans by owner.
Specifications obtainable from the above office upon deposit of $25 refundable.

3/11/47 • 40
Owner Taking Bids—Due April 9, 2 P. M.
Surfacing
YOLO COUNTY, Calif. Between 1¼ miles north of Solano County line and Woodland and between 3¾ miles north of Woodland and 1 mile south of Knights Landing.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
Net length of about 9.2 miles repairing with plant mix surfacing and seal coat.
The work involves:
Location No. 1
(1) 4775 cubic yds. imported borrow;
(2) develop water supply and furnish water equipment;
(3) 215 M gallons apply water;
(4) 2050 tons crusher run base;
(5) 5 tons liquid asphalt SC-2 prime coat;
(6) 46 tons sand prime coat;
(7) 6 tons asphaltic emulsion seal coat;
(8) 48 tons screenings seal coat;
(9) 10 tons asphalt paint binder;
(10) 5400 tons plant mix surfacing;
Location No. 2
(11) 5300 cu. yds. imported borrow;
(12) develop water supply and furnish water equipment;
(13) 100 M gallons apply water;
(14) 14 tons asphalt paint binder;
(15) 10,200 tons plant mix surfacing.
Specifications obtainable from the above office.

3/11/47 • 40
Owner Taking Bids—Due April 9, 2 P. M.
Resurfacing
MARIN COUNTY, Calif. Between San Rafael and Waldo.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
About 2.2 miles net length resurfacing with asphalt concrete and construct shoulders with crusher run base and seal coat.
The work involves:
(1) 1420 lin. ft. remove existing raised bars;
(2) 3750 tons crusher run base;
(3) 19 tons liquid asphalt SC-1 prime coat;
(4) 36 tons asphaltic emulsion paint binder and seal coat;
(5) 211 tons screenings seal coat;
(6) 8135 tons asphaltic concrete leveling course;
(7) 4575 tons asphaltic concrete, type A, surface course;
(8) 425 lin. ft. raised bars.
Specifications obtainable from the above office.

3/11/47 • 40
Owner Taking Bids—Due April 9, 2 P. M.—Grading and Surfacing
PLUMAS and LASSEN COS., Calif. Between 0.3 mile west and 0.8 mile east of Plumas-Lassen county line.
Owner—State of California, Division of Highways, Public Works Bldg., Sacramento, Calif.
State Highway Engineer—G. T. McCoy, Public Works Bldg., Sacramento, Calif.
About 1.1 miles grading, surfacing with plant-mix surfacing and applying seal coat thereto.
Unit quantities will be given tomorrow.

41—GAS, WATER AND OIL PIPE LINES

3/11/47 41
Bond Election in Amount of $200,000 Set for May 12
Water System Additions Cost $200,000
WATSONVILLE, Calif., Santa Cruz County.
Owner—City of Watsonville, F. J. O'Brien, city clerk, City Hall, 268 Main St., Watsonville, Calif.
City Engineer—H. B. Kitchen, City Hall, Watsonville, Calif.
Includes replacing the main line from Sudden street to the Varni road, larger lines on Van Ness avenue, Wall street, West Lake avenue, Third street and Beck avenue, and balancing towers and pumps.

Conductor and Assemblies
Bids Wanted
CENTRAL VALLEY PROJECT, California.—Until March 20, 2 P. M., bids will be received by the U. S. Bureau of Reclamation, Customs House, Denver 2, Colo., under Inv. E-33,165-A for conductor and assemblies, etc., f.o.b. shipping point and/or Antioch, Calif., as follows:
Schedule No. 1
(1) 344,164 lin. ft. 266,800 C.M.A.C.S.R. bare stranded conductor;
(2) 850 each tapered armor rod assemblies;
(3) 60 each parallel groove clamps;
(4) 80 each compression joints;
(5) 210 vibration dampers;
(6) 1 set wrenches for installing armor rods on conductor;
(7) 25 compression repair sleeves;
(8) 1 set compressor dies;
(9) 1 set compressor dies;
Schedule No. 2
(10) 344,164 lin. ft. No. 3/9 AWG., 7-strand hard-drawn copper conductor;
(11) 80 each seamless single-tube copper sleeves;
(12) 60 each 3-bolt parallel groove clamps.
Schedule No. 3
(13) 344,164 lin. ft. No. 3/0 copper equivalent 7-strand copper weld copper conductor;
(14) 80 each seamless single-tube copper sleeves;
(15) 60 each 3-bolt parallel groove clamps.
Specifications obtainable from the above office.

ELECTRIC HEATERS
for bedrooms, dens, dressing rooms, bathrooms or breakfast nooks

For difficult rooms to heat—for a lot of heat quickly—for changing the damp chill of a room to sunny warmth—there is nothing better or easier to install than a dependable built-into-the-wall Electric Heater.

Many homes use these quality electric heaters in rooms where children study or the family gathers to read or listen to the radio. They are a blessing too, for those times when the big furnace is not on and the small folk must be dressed in healthful comfort.

See about permanent, built-in electric heating for your home. Thousands say electric heat is one of the greatest home conveniences they ever bought.

Right now your electrical dealer or contractor has a limited supply of fine quality electric heaters on hand. Drop in and see them. You will certainly be doing yourself and family a good turn when you have an electric heater installed.

There are several types and sizes of electric heaters available now. Some have fans too, to throw out the heat.

Copyright 1946 by F. W. Dodge Corporation

PLANS and Speculations

Furniture and equipment declared surplus may be allocated these schools: California College of Chiropody at San Francisco; San Mateo union high school district at San Mateo: Kingsburg joint union high school district at Kingsburg; San Francisco State College at San Francisco; Berkeley unified school district of Alameda County, and Thatcher high school district No. 4, Graham County, Ariz.

oOo

A new softball diamond—complete with bleachers and lights for night games — will be rushed so that the 1947 playing session may begin late in May. It will be located at Parkside, Eureka's huge potential recreation center just east of Sequoia Park.

oOo

Fullerton Junior College at Fullerton has been allocated surplus war structures to be re-erected at the school farm and to be used by the agriculture department.

oOo

A new College Elementary School on the site of the present Central School is planned in proposals in the 1947-48 budget for the Chico State College.

oOo

Santa Clara County supervisors are studying a proposal that some 66 acres of land outside the city limits be used for a governmental building center. Cost of the project would run between six and eight million dollars.

oOo

WAA will open bids for purchase or lease of the guayle plant at Spence near Salinas on April 8, in its San Francisco offices. The Salinas war plant will be sold complete. Original cost was $372,000.

NEW ARCHITECTURAL HORIZONS

By Thomas S. Holden, President, F. W. Dodge Corporation,
Before San Francisco Building Industry Conference Board, Associated General Contractors and American Institute of Architects

Significant among new projects now being planned is the group of buildings to be erected in New York City for headquarters of the United Nations.

Its location in the metropolis of the Western world signifies the removal of the capital of western civilization to this hemisphere.

Many people, of whom I am one, thought before the decision was made that the new world organization might be better served by placing the world capital even more remote from Europe than New York, on the west coast of the United States instead of the east coast. It seems to me the nations of Western Europe need, in addition to the leadership which the forces of history have thrust upon the United States of America, also an enlightening acquaintance with the functioning of a federal union of forty-eight states and the rejuvenating tonic of intimate association with the spirit of the west.

The U. N. headquarters is also significant as architecture. It will be a group of tall urban-like structures, original in design, but following the pattern set by Rockefeller Center. Thus its architectural inspiration is derived, not from the palaces of emperors and kings, but from a modern American masterpiece of design and structure.

This is but one of many tributes paid to the twentieth century preeminence of American designers and builders by peoples of other countries. In recent years various European governments have sent to this country officials, commissions of architects, engineers and builders to survey our methods and our achievements in planning and building. They have sought here information about our materials and their manufacture, our construction methods and our design ideas. They have expected to find here the ideas and the inspiration for the solution of their postwar reconstruction problem.

About two years ago I was asked to speak about the American construction industry at a dinner given in New York to a visiting commission of Russian construction experts. I described the industry as one made up principally of operating units that are quite small in comparison with our great manufacturing corporations, small but resourceful, flexible, and versatile. Surrounded as I was by representatives of the Soviet Union, I did not attribute our high competence in construction techniques to the virtues of our free enterprise system, which I might have quite truthfully done.

I did say that a tremenously important factor was the free flow of information throughout the industry, of technical, professional and market information, information disseminated by professional and trade publications, by professional societies and trade associations.

I might well have added some cogent exposition of the contributions made to construction progress by our great freedom of experimentation, by the American spirit of inventiveness, and by modern product and design research.

I might have pointed out the great challenge to American ingenuity that arises from the high

(Continued on Page 7)

Army Engineers Offer Lease on Eastern Industrial Plants

WASHINGTON.— Carrying out plans for quicker industrial mobilization in event of another conflict (plans reported earlier in the Dodge newspapers) Army engineers this week announced their offer to lease to private industry portions of 31 United States Government-owned industrial installations.

Construction varies from the brick and reinforced concrete "permanent" type to the skeleton steel and wood construction with masonite or wood walls known as "temporary". Floors fit specific requirements and ceiling clearances are from eight to 30 feet, the Army said.

Plants considered for the reserve status would be those which could be re-converted to wartime production in from 60 to 120 days from the time they pass from civilian to military control.

With such a condition in industry, only marshalling of necessary personnel would be required for speedy reconversions.

The army said this week that its first list of plants offered for private operation on a leasing agreement have available railroad transportation, with in-plant railroad networks and mainline onnections to plant and, warehouse facilities. Electrical power, steam, water and sewage disposal equipment already are installed. Local labor is said to be plentiful at all sites.

Suggested products for manufacture at the 31 plants offered—most of the mare chemical concerns — include fertilizer, wood pulp and paper products, textile and textile products, large and small industrial operations in the chemical products, building materials and furniture, metal and alloy products, electronic equipment and electrical appliances and accessories.

Investigate Effects Of VEHP, Whitlock Urges Congressman

WASHINGTON—Douglas Whitlock, chairman of the Building Products Institute, yesterday urged Chairman Jesse Wolcott (r., Mich.) of the house banking and currency committee to conduct a thorough inquiry into the extent to which the veterans' emergency housing program is helping or hampering the efforts of construction industry to provide homes for veterans.

Leading veterans' organizations and all segments of the building industry have become convinced that all or most of the remaining controls over home building and construction should be removed, Whitlock stated in a letter to Chairman Wolcott.

"If removal of controls will mean more homes this year as experienced industry representatives believe, congress should lose no time in taking the necessary action," Whitlock declared.

#

GROOVER AND I

GREECE

According to a recent report only about 50 per cent of the Greek people want our intervention. On the other side are 15 per cent Communists, and 35 per cent Royalists and war profiteers who have grown filthy rich through black market operations.

☆ ☆ ☆

This "Greek emergency" which has so suddenly exploded is the result of many months of carefully planned propaganda build-up—the situation did not develop just since last week.

☆ ☆ ☆

Congress is being asked for 250 million dollars as a down payment by us on the ancient Mediterranean troubles which date back before the Christian era.

☆ ☆ ☆

An untold amount of military equipment and supplies is being transferred to Greece—without the approval of Congress.

☆ ☆ ☆

Once money or property is separated from the taxpayer—regardless of the cause for which appropriated—it is then used in any way HYCOM sees fit. The taxpayer no longer has right, title, interest—or voice.

☆ ☆ ☆

We are being told today that we must step into Greece in order to prevent the spread of Communism. This point is neither disputed nor denied in this column.

☆ ☆ ☆

Here is asked only one question: Why do we go a half-world away, spend billions to prevent the spread of Communism, and—

☆ ☆ ☆

Here at home we treat the Commies with such loving care and tenderness?

#

WELCH ASKS FEDERAL AID TO BUILD NON-PROFIT TOLL ROADS

WASHINGTON.—A federal bill introduced by Representative Richard J. Welch (r., Calif.), would permit federal-aid grants for construction or maintenance of toll roads by any state or local government or non-profit corporation.

Representative Snyder (W. Va.) has proposed a system of six transcontinental limited access toll roads with a right-of-way of 450 feet, divided into one road 70 feet wide for passenger cars and a second road 80 feet wide for trucks and buses. Its administration would be vested in the Streamlined Highway Corporation with power to issue 30-year bonds in the amount of $12 billion.

BUILDERS EXCHANGE TO ELECT DIRECTORS NEXT MONDAY; 13 CANDIDATES

Eleven directors will be chosen when the Builders' Exchange of San Francisco holds its annual election of officers Monday, March 17. Exchange officers will be elected at a later date by the new board of directors.

Thirteen members have announced that they will run for the director post. Those who have announced candidacy include A. I. Bos, Al W. Cobby, A. F. Edwards, E. J. Finnerty, Charles E. Gordon, E. E. Hundley, G. H. Martinelli, H. N. Patterson, Rex Penlon, E. H. Peterson, Geo. W. Reed, L. R. Steinberg and A. H. Wilhelm.

The polls will open at noon on Monday, and will close at 3 p. m., it was announced. Mail ballots will not be accepted.

Creedon Undismayed By Fund Slashing; to Retain All Controls

WASHINGTON. — Housing Expediter Frank R. Creedon told reporters over the weekend he intended to retain all housing controls essential to successful operation of the veterans emergency housing program.

Calling a press conference after his meetings with heads of veteran organizations, Creedon said, "As long as I am housing expediter, I am determined to carry on the housing program with all the controls necessary to make it a success. The mechanics of financing it are now being studied."

'Hands Off' Rent

In event of CPA's demise, which is certain, in view of congressional action with regard to temporary agencies, the national housing office is prepared to take over administration of VHP-, the restriction on non-housing construction, the expediter said. Also to NHA and the expediter's office would fall the duty of administering PR-2s, the bottleneck order which assures machinery to manufacturers of critical materials including building products.

Regarding his meetings with veteran heads, Creedon said he went into the matter of veterans' preference regarding government housing controls because he was not satisfied with the vet position as outlined at the recent meeting of home buildings in Chicago. "It was not clear to me from the convention just what the veterans wanted," he added.

On rent ceilings, the expediter said: "We will continue rent ceilings as they are, pending consideration of the matter by congress."

VHP-1 Is Vital

Principal factors that will limit building in 1947, he stated, are limited materials and limited construction labor—in that order of importance.

"If VHP-1 were rescinded, there would be a mad scramble for materials, prices would go up and the result would be fewer houses started and fewer homes completed," he said.

#

W-E-T BILL BACK

WASHINGTON. — The Wagner-Ellender-Taft bill—defeated in congress last year—was reintroduced this week as a measure to set up a permanent national housing commission and "encourage construction of 15 million city and rural homes in the next ten years."

#

SEMINAR IN APRIL

A seminar of review lectures for persons preparing for the architectural state boards this summer will be given starting early in April by the San Francisco Architectural Club. Well-qualified men of the architectural and engineering professions will give lectures covering the seven divisions of the exams.

Rivers and Harbors Construction Jobs To Start by July 1

WASHINGTON. — The budget bureau said today that construction on all rivers and harbors projects for which funds are available probably will be started before July 1.

This was the first official announcement on this subject following the freeze action clamped on rivers and harbors and reclamation funds by President Truman last August.

Because of that order the army engineering corps has been unable to proceed with work on any of the projected waterway jobs.

The budget bureau announced through its assistant acting director, F. J. Lawton, that a recent survey has been made by John R. Steelman, the War Department "and this office" and that "it is contemplated that construction will be started by the begining of the next fiscal year."

This means that this portion of the government's largest construction effort—reclamation and rivers and harbors — will be started up again during the next three or four months.

The expenditure of millions of dollars is involved.

#

CITY DEPARTMENTS IN ACCORD ON ARMY-NAVY BAY CROSSING—KENT

There is no dissent among city departments on the proposed San Francisco Bay crossing, City Planning Director Thomas H. Kent, Jr., emphasized at a luncheon meeting of the Building Industry Conference Board Wednesday.

"All city departments are in complete agreement that the physical development of the city would best be served by support of the recommendation of the joint army-navy board," he told the group.

"I believe this plan would be most advantageous for the city and for the development of the Bay region as a whole."

Kent also discussed the recently-released mayor's transportation plan.

#

DROP CONTROLS ON NEW CONSTRUCTION—AMVETS

WASHINGTON.—AMVETS national executive committee has voted in favor of removing rent ceilings on newly-constructed houses and apartments, it was disclosed today.

The veterans' organization pledged support to Housing Expediter Frank R. Creedon on those general points: channelization of scarce material into vets housing; prohibiting construction of large-size luxury mansions during the acute housing shortage; limiting non-housing construction; retention of veterans preferences; retention of sales prices and rent ceilings on HH priority-constructed houses.

#

ELMER JOHNSON IS ACPA PRESIDENT

ST. LOUIS—Elmer L. Johnson of Colton, Calif., was re-elected president of the American Concrete Pipe Association at its recent annual convention here. It is the second term for the Concrete Conduit Company executive

Hugh P. Ford, of Eugene, Ore., was one of three new directors elected. He is with the Eugene Concrete Pipe and Products Co.

#

FRACTIONAL HP. MOTOR OUTPUT UP

WASHINGTON. — Announcing the 1946 shipments of fractional horsepower AC motors totaled 19,546,599 units, the Civilian Production Administration said today that monthly shipments had climbed from 873,376 in January, 1946, to 2,117,943 in December.

This was an increase of almost 150 per cent in the monthly shipment rate.

INDUSTRIAL STEEL DOORS
NOW AVAILABLE! from our Pacific Coast Factory

Fenestra Industrial Steel Doors are available in a variety of stock types and sizes. They are ideal for stairway and service entrances, furnace rooms and fire exits (where label doors are not required) of commercial and public buildings — stores, laundries, schools, public garages, filling stations. Also for industrial buildings such as tool and die shops, machine shops, bakeries, dairies and many other types of structures.

(Right) Typical Single Swing Door • Well Designed, Sturdy • Long-lasting

STOCK TYPES . . . Sizes range from 2'8" to 7'4" width and 6'8" to 7'4" height—providing variety for many needs. For dimensions by types illustrated, send for our catalog.

Holden Speech
—(Continued from Page One)

wage scale we pay our building craftsmen.
The American architectural profession was in partial eclipse during the decade of the 1930's. There were a number of reasons for this. One of them was the great emphasis on low-cost single-family houses, a large proportion of which are thought to be too small to stand the overhead cost of individual architectural design. Another factor was the growth of governmental design bureaus, which accomplished the useful purpose of improving standards for some types of buildings, but which tended toward governmental regimentation and standardization and toward an undesirable limitation of the functions of private architects. Then there was the propaganda about the supposed backwardness and inefficiency of the construction industry, largely based upon superficial comparisons with the techniques of automobile production.
The architectural profession itself was divided and confused, fighting internal battles about the merits of traditional versus contemporary styles. It had not quite outlived its preoccupation with aristocratic forms, with monumental structures, with buildings for conspicuous display.
With large sectors of the public, architects were still looked upon as stylists whose services were a luxury only the rich could afford.
The architects themselves were not too clever in the means they used in trying to get the truth about their functions before the public. They talked a great deal about selling the architect to the public at a time when the principal job was to sell the public to the architect. Some people were even saying that the private architect was being eliminated as an important industry factor.

3656 1363 41st Ave; owner, Warda Bros; contractor, Granai Electric; 10 outlets; 11 switches; 16 plugs; service

3657 2124 Taraval; owner, Van Der Kong; contractor, Dover Electric Co; alterations.

3658 28 Sylvan Way; owner, J Dietcks; contractor, Crown Electric; 4 outlets; 3 switches; 3 plugs.

3659 68 Hoff Ave; owner ,Home Laundry Co; contractor, Marine Electric; 2 outlets; 1 switch.

3660 1860 Lombard; owner, ...; contractor, Silvio Chrosso; underground service.

3661 815 Columbus; owner, Mayori; contractor, Brumfield Electric Sign Co; sign.

3662-63 629 Green St; owner, Farris; contractor, Brumfield Electric Sign Co; sign.

3664 1603 Haight; owner, Scapozi; contractor, Brumfield Electric Sign Co; sign.

3665 1798 San Jose; owner, ...; contractor, Retter Electric; alterations.

3666 250 Grand View Ave; owner, Hagen; contractor, Retter Electric; 3 outlets; 3 switches; 3 plugs; meter loops.

3667 720 Market St; owner, H S Crocker; contractor, Cimino Electric; 7 outlets; 2 switches; 2 plugs.

3668 1077 Howard; owner, Parasite Wire Co; contractor, Victor Lemoge; 3 outlets; 2 switches; 1 plug; alterations.

3669 Rivera S side 100 ft E of 30th Ave; owner, ...; contractor, Richmond Electric; temporary saw service.

3670-71 Various locations on Fanning Way; owner, Doelger; contractor, Richmond Electric; 8 outlets; 8 switches; 8 plugs; service.

3672 3235 22nd; owner, Worley; contractor, Weber-Conroy; sign feed.

3673 471 Hazelwood Ave; owner, Horlwitz; contractor Weber-Conway; range.

3674 369 5th St; owner, ...; contractor, Eveready Electric Service; 10 outlets; 2 switches; 6 plugs; service; motors.

3675 347 Hayes; owner, American Tailors; contractor, Eveready Electric; 2 outlets; 2 plugs.

3676 345 Church St; owner, ...; contractor, Els-Hokin & Galvan; temporary saw service.

3677 260 O'Farrell; owner, United Nations Theater; contractor, Mateon Electric; 2 temporary searchlights.

3678 272 Post St; owner, ...; contractor, Frank F Goodman; 16 outlets.

3679 601 Montgomery St; owner, San Francisco Operating Co; contractor, Byington Electric; 1 pin ball plug.

3680 1482 Sutter; owner, Dorchester Hotel ;contractor, Byington Electric; correct sub-standard wiring.

3681 1704 Fillmore; owner, Da's Liquor Store; contractor, Byington Electric; 3 plugs.

3682 127 Clement; owner, Rosenberg; contractor, Byington Electric; 3 outlets; 1 switch; motors.

3683 1354 Post St; owner, B & M Auto Co; contractor, Byington Electric; 3 outlets; 1 switch; 2 plugs; service.

3684 14 Sansome St; owner, American Trust Co; contractor, Central Electric; 14 plugs.

Official Proposal

Davis Campus

"ADVERTISEMENT FOR BIDS

"Subject to the conditions prescribed by the undersigned, sealed bids are invited for the following work for the construction of the Soils and Irrigation Building on the Davis Campus, University of California, Davis, California: (1) General Construction, (2) Electric Work, (3) Air Conditioning Work, (4) Plumbing Work, (5) Heating and Ventilating Work, (6) Combination Plumbing and Heating and Ventilating Work, (7) Combination Plumbing, Heating and Ventilating and Electrical Work, (8) Combination General Construction, Electric, Plumbing and Heating and Ventilating Work. This project has been granted CPA authorization under VHP-1. Plans and specifications will be issued to intending bidders upon the deposit of fifty ($50) dollars per set. No bids will be received after 2:00 P .M. March 24, 1947. Plans, specifications and information will be available starting February 26, 1947, at the Cashier's office, 102 Administration Building, University of California, Berkeley, California, and at the Business Office, 101 Administration Building, University of California, Davis, California. The right to reject any and all bids is reserved.

What makes
28,000,000
Houses "Old"?

A surprisingly few of the Nation's approximately 28,000,000 wired homes contain sufficient wire and enough outlets to provide convenient, efficient use of electricity.

For that reason, many millions of homes are considered old and out-of-date, no matter what their actual age.

The installation of up-to-date wiring in an old home will bring the comfort and conveniences of electrical service, and also enhance the value of the house for rental or sale purposes.

Alert architects, now remodeling outmoded houses, are recommending rewiring as a No. 1 modernization essential. They KNOW!

PLANS and Speculations

Robert D. Dier has been named to the newly-created post of traffic engineer of Fresno. He formerly was an assistant traffic engineer in Seattle.

oOo

Construction of a thousand foot long and 25-foot high dam in Clear Creek canyon in Ormsby County to store water for use in reclaiming arid portions of the 2000-acre prison farm (cost about $50,000) would be authorized should a bill introduced recently in the Nevada assembly be passed.

oOo

Lodi Mayor Robert H. Rinn has been authorized to take action to acquire the local muny airport now up for disposal by WAA.

oOo

Establishment of a union terminal at Oakland's 40th Street and San Pablo Avenue was advocated recently by the Oakland Real Estate Board.

oOo

A Nevada legislative bill provides that an educational survey to determine the state's elementary and high school needs would be carried out.

oOo

Sewerage problems of the suburban areas linked to San Jose will be studied by the city engineer, and the report will be used as a basis for considering requests for further connections to the city system.

oOo

San Mateo vet organizations are making an actual door-to-door inquiry to determine that city's housing needs.

oOo

An application for permission to build the new Walnut Grove Bridge has been submitted to the army engineers by Sacramento County Engineer E. A. Fairbairn.

oOo

Badly needed additions to the Burlingame fire department can be financed only through a bond issue, it was pointed out at a joint city council-fire commission meeting recently.

oOo

Salinas citizens will vote on parking meters April 15.

oOo

El Cerrito citizens will vote on proposals for a long-range street improvement and establishment of a park system on April 22.

oOo

Surplus structures allocated to the California Polytechnic School, Voorhies Unit, at San Dimas, will be converted into about 8,000 sq. ft. of classroom facilities.

oOo

Hanford (Kings County) supervisors have authorized purchase of an army barracks building for use as a recreation center in Avenal. Cost of the structure, moving and installation was set at $4,300.

Bids Asked for Vet Hospitals in Fresno, Montana, in March

WASHINGTON. — Army engineers have announced a new list of Veterans Administration general medical and surgical hospitals on which construction bids will be taken during March. Two of the hospitals are located in the far west. They are:

Fresno, 250-bed, designed by Masten & Hurd, and Huber & Knapik, San Francisco, architect-engineers.

Miles City, Mont., 100-bed, designed by McIver, Cushing & Terrell, Billings, Mont., architect-engineers.

In the midwest there is the 500-bed hospital at Omaha, Nebr., designed by Ellerbe and Company, St. Paul, Minn., and Leo A. Daly and Company, Omaha, architect - engineers.

San Carlos Vets Take Grievance to Contractors' Board

Charges that W. A. Gould, San Carlos contractor, was staging "a freezeout on veterans" at his Sunset Highland development after securing veterans priorities to begin construction were voiced Wednesday at a conference of federal, state and veterans representatives at the San Francisco office of the Contractor's State License Board.

Freeman S. Waterman, San Carlos city councilman and attorney for 25 vets contesting the action, stated the charges and averred that his group "would use strong arm methods, if necessary" to prevent other veteran purchasers from cancelling their contracts.

He indicated that he would bring suit to cloud the title of the development and was also considering petitioning for a formal hearing seeking revocation of Gould's license. Waterman contends that his clients signed sales contracts early in 1946 and that in November of last year, "when the buildings were 95 per cent completed", some of them were notified of a reduction in price. Later this reduction was rescinded, he said.

The contracts, contained an escalator clause but, he asserted, "increases up to $2875" could not be supported by added costs in completing the remaining five or ten per cent of the dwelling. J. B. Barton, representing the FHA, explained his agency's procedures and admitted granting a price increase, which, he said, was based on additional footage not in the original plans.

In reply to a question by Waterman, Barton stated that his agency known of the existence of the sales contracts it probably wouldn't have approved the increase.

R. W. Briggs, office of housing expediter official, pointed out that neither Gould nor his attorney was present at the meeting and that he understood they were invited. Briggs also informed the gathering that in a similar dispute at Redwood Village, the Peninsular Contractors had agreed to submit the case to arbitration.

Waterman announced that he would ask a San Carlos city council investigation into the alleged action of Gould in receiving building permits for 600 sq. ft. buildings and "then building 1200-ft. ones."

James W. Cowan, of the Department of Veterans Affairs, who has been conducting a probe of veterans' housing, presided. The meeting was attended by Louis Erb and N. J. Morrissey, deputy registrars of contractors, with whom, Waterman said he would file a formal complaint.

WAA OFFERS 40 MILLION FEET WIRE, CABLE AT SAN FRANCISCO YARDS

WASHINGTON.—Approximately 40 million feet of surplus, government-owned electrical wire and cable worth ten million dollars (new cost) are being offered for sale by War Assets Administration on a competitive bid basis.

The material includes types of one to 44 conductors; 1,630 to two million circular mils; varnish cambric, rubber and synthetic insulations; rubber jackets, asbestos and cotton braids; lead sheaths and basket weave armors; voltage rating 300 to 600.

Packaged in coils and reels, most of this wire and cable is unused.

Although located in most of WAA's regional offices, largest inventories are held in New York, Los Angeles and San Francisco. Detailed information may be obtained in these offices.

No longer subject to priority regulations, the wire and cable are offered f.o.b. location.

Contract for Conchas Canal Awarded Idaho Contractor Terteling

WASHINGTON. — Construction of laterals and a 3.3 mile section of the Conchas Canal on the Tucumcari project in eastern New Mexico has been ordered by the Bureau of Reclamation under a contract totaling $875,759.

This contract was awarded to the J. A. Terteling & Sons, Inc., of Boise, Ida., low bidder, Acting Secretary of the Interior Oscar L. Chapman, announced today.

All work must be completed within seven months after the company receives notice to proceed.

This project will provide irrigation facilities for 45,000 acres of land now generally devoted to livestock grazing and some dry farming. Irrigation water will supplement the livestock industry and stabilize the general economy of the area. A total of 560 families will be provided with irrigation farms as a result of the construction work, Department of Interior said.

Work on the Conchas Canal was stopped early during the war but was resumed in April, 1944, as a war food project. The work to be done now will extend it to the Hudson Canal. The laterals to be constructed are in units 3, 3 and 4.

Major contract items include 260,000 cubic yards of common and rock excavation, pouring of 5,600 cubic yards of concrete requiring 8,400 barrels of cement, installation of nearly 14,500 lineal feet of concrete pipe in sizes varying from 18 inches to five feet in diameter, and installation of more than 240 tons of reinforcement bars and other metal work.

Rail Car Officials Study Freight Car Rapid Production

WASHINGTON. — Colonel J. M. Johnson announced today that he is calling a group of representatives of the railroads, car lines, and car builders to meet in Washington on March 14 for the purpose of developing an aggressive production program for the building of new freight cars on a minimum monthly schedule of 10,000 cars.

Colonel Johnson has also invited representatives of specialties and component manufacturers to meet with him on March 18 to survey the field to study meeting the minimum 10,000 car per month production schedule in addition to the requirements necessary for a freight car repair program. Among them is H. B. Spencer, president Fruit Growers Express Company.

The representatives of the various groups will be asked to select a task committee to work and advise ODT in maintaining a proper flow of steel in each plant, including the specialties components, advising the railroad car builders and component manufacturers of available steel items that they are unable to locate and assist in overcoming any bottlenecks that may develop.

#

AMBROSE REAPPOINTED

William Clement Ambrose has been reappointed to the state board of architectural examiners, according to an announcement Wednesday by Governor Earl Warren. He was first appointed in 1933, and has practised in San Francisco since 1927.

Treasurer of the Northern California chapter, American Institute of Architects, he is a graduate of the University of California, and a veteran of World War I. His San Francisco address is 251 Kearny.

Also announced was the reappointment of Herbert J. Powell of Los Angeles.

Superhighway Bill Voted by State Senate; Final Action to Be Taken in Assembly Soon

SACRAMENTO.—The California senate has passed the $2.8 billion super-highway bill by a vote of 32 to 5. The bill has been returned to the assembly for further action, and observers are predicting a stormy session in the lower house.

One of the chief reasons for demanding immediate action is the fast mounting fatality and injury rate on the state's highways. Traffic accidents killed 41 and injured 851 of every 100,000 persons in the state in 1946, Governor Warren declared today. Without final figures, at least 3,900 people met violent death on roads and streets last year. Approximately 80,000 were injured.

"There was a time when California had the outstanding highways in the union, but they have failed to keep abreast of population growths and transportation demands. Their inadequacy today is apparent to everyone — and in tragic terms," Governor Warren said.

He pointed out that 5,000 miles of the state's 13,086 were two-lane roads less than 20 feet wide, while 360 miles were of the three-lane type. Two-lane roads are bottlenecks and three-lane are death traps, he declared. Against this, he cited the desperate need for at least 2,500 miles of divided highways to protect lives and eliminate congestion.

It was the governor's belief that the state's finances were badly out of balance between needs and revenues, and they are getting worse all the time, he added. He announced that in preparing the budget for the coming fiscal year it was necessary to defer some $40 million in urgently needed work. "The plans were ready and the projects approved by the state highway commission, but the necessary funds were not available," he said.

Tax Is Low

Funds provided by gasoline taxes, federal aid, motor vehicle fees and taxes on diesel fuel will allow only $27 million for new construction and reconstruction on California highways this year, Governor Warren continued. He compared this with the estimate made in 1943 that work costing $700 million would be required in addition to a regular building program to provide an adequate highway system.

In discussing highway user revenues, Governor Warren called attention to the fact that California was one of seven states having a 3 cents gas tax, while 40 states had taxes ranging from 4 to 7½ cents. Only Missouri has a lower tax rate, but the two cents a gallon that state exacts is augmented by city and county gas taxes. California's gas tax brings in approximately $75 million a year, but one-third of this is distributed to the counties for road work and one-sixth goes to the cities. This leaves $37,500,000 for the state roads. Maintenance, right-of-way purchases, engineering, planning, administration and other items cut this to the $27 million already mentioned. This sum is divided equally between the northern and southern counties of the state.

"This is obviously insufficient for there are cases in which $15,500,000 could be wisely spent in one county alone, and still fall short of providing adequate highways," the governor asserted.

Reorganize Patrol

In further discussion of highway revenues, Governor Warren expressed a belief that trucks and busses, operating commercially or privately, make greater demands upon a highway system and therefore should pay comparable taxes for comparable use of the highways. "It is only fair, and coincides with national experience, that heavier vehicles should pay an additional tax," was his statement.

California's governor, in touching on all phases of highway improvement, advocated a reorganization of the state highway patrol under a Department of Traffic Enforcement. He saw immediate results from this coordination of

GROOVER AND I

WHAT PRICE APPEASEMENT?

On Wednesday President Truman made what may be the most important speech to be heard during the life time of any person hearing it.

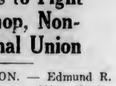
☆ ☆ ☆

After careful analysis and study it might appear differently, but at this moment it sounded like the first official speech of World War III.

☆ ☆ ☆

What are we doing—buying the bankrupt stock of the British Colonial Empire, which sank even with our help—or

☆ ☆ ☆



Are we paying for two years of appeasement?

☆ ☆ ☆

ADDENDA: In the eight hours between the President's talk and press time a number of people have mentioned that this matter should be turned over to United Nations. The President tried to close that door by saying UN was too young and inexperienced.

☆ ☆ ☆

The President may have been pitching a curve. The real reason is: The Russian Veto.

Architects to Fight Closed Shop, Non-Professional Union

WASHINGTON. — Edmund R. Purves, director of public and professional relations of the American Institute of Architects, this week told a subcommittee of the senate committee on labor and public welfare that employees of architectural offices should not be forced against their desire to join a labor organization as a condition of employment.

Testifying with respect to proposed amendments to the National Labor Relations Act, Purves also urged that any collective bargaining groups formed in professional offices should not be forced to affiliate with non-professional labor organizations and that the right of employes in such offices to designate their own representatives should be strictly maintained.

Two New Berkeley Campus Buildings

BERKELEY.—Contracts for two new buildings to east crowded conditions on the Berkeley and Los Angeles campuses of the University of California were awarded last week, and ground for the structures will be broken this month.

On the Berkeley campus construction of the new forestry building begins this week, and work on the business administration and economics building on the Los Angeles campus will begin in the near future. Already under construction on the Berkeley campus is a new chemistry building.

CPA PERMITS GRANTED

SAN FRANCISCO. — The Civilian Production Administration, A. J. Grier, regional director, 1355 Market St., has announced the following permits granted for construction of commercial and industrial buildings in the San Francisco area:

March 7, 1947

FOOD MARKET, $36,770; 1901 Telegraph Ave, Oakland; owner, L J Skaggs, Mary Skaggs, & T H Zimmerman, Oakland.

MEAT PROCESSING, $86,000; Rt 7, Box 218, Fresno; owner, Fred T Homan, Antronig Magarian, Fresno

FOUNTAIN LUNCH, Ice Cream, $5,350; 1072 Willow St, San Jose; owner, L H Miller, 415 El Centro Rd, San Mateo.

PROCESSING DRIED Fruits, $6,000; 2099 East Ave, Fresno; owner, Bonner Packing Co. 626 Brix Bldg, Fresno.

GROCERY STORE, $5,200; 922 McHenry Ave, Modesto; owner, Paul Russell, 922 McHenry Ave, Modesto.

NURSERY BUSINESS, $6,000; 4000 El Camino, San Mateo; owner, Walter Mfg Co, Belmont.

LAUNDRY, $5,500; Mt. View; owner, Frank Guerrero, 745 Front St., Mt. View.

MFG VENETIAN BLINDS, $3,300; Sacramento, 521 U St; owner, Anthony Rubio, 935 61st St, Oakland.

LABELS,, $14,000; 815 Harrison St; San Francisco; owner, Lehmann Printing & Litho Co, 400 4th St., San Francisco.

MEAT MARKET, $2,745; 4599 Mission St, San Francisco; owner, Joe Giannini, 4599 Mission St., San Francisco.

GROCERY STORE, $9,000; San Ramon; owner, Lester C Haworth, Box 207, Danville.

ADDITION TO LAUNDRY, $6,500; 2212 Poplar, Oakland; owner, Superior French Laundry.

ICING PLATFORM, $47,308; Roseville; owner, Pacific Fruit Express Co, 85 Second St., San Francisco.

TRUCK REPAIR, $7,500; Sacramento, 3rd & U St; owner, Geo C Clark, 719 6th St, Sacramento.

REAL ESTATE, $1,750; Eden Township; 21491 East 14th; owner, E A Robey & Co, Inc, 4622 East 14th Oakland.

TRUCK REPAIR SHOP, $3,000; 402 Jackson St, Hayward; owner, John Tachello, Box 24754 Soto Rd, Hayward.

LUMBER RE-MFG, $4,200; 9th & L Sts, Arcata, Arcata; owner, N P Green, 8601 New Hampshire Ave, St Louis, Missouri.

MARCH 10, 1947

PRINTING plant, $26,500; 643 Emerson St; owner, Clifton S and Evelyn R Shoaniker, 225 Hamilton St, Palo Alto.

SKATING rink, $9761; Riverbank; owners, John J Schutz and Merle W. Schutz, Rte. 2, Box 628, Escalon.

LUNCH ROOM, $5737; 510 H Street, Modesto; owner, Wm L Smalley, 816 13th St., Modesto.

FRUIT and vegetable packing house, $30,000; Exeter; owner, American Fruit Growers, Inc, Box 398, Exeter.

ICE CREAM processing plant, $30,015; 1101 26th Street, Oakland; owner, Golden State Co., Ltd., 425 Battery St. San Francisco.

STORAGE vault for alcohol, $1700; Fresno; owner, Reeding Park Phcy 43 Belmont Ave., Fresno.

UPHOLSTERY Shop, $5500; Yuba City; owner, C. P. Thompson, 841 Taber Ave., Yuba City.

FROZEN Food Lockers, $5000; Fair Oaks Blvd., California Ave., Sacramento; owner, Sherman L. Proapp, Rte 5, Box 5930, Sacramento.

SHOP for mfg galv. tanks, $20,000; San Pablo; owner, Rheem Mfg. Co., Richmond.

OUT-PATIENT Clinic, $40,000; San Francisco; owner, Mount Zion Hospital.

WAREHOUSE for contractor, $9500; 13901 E 14th St, Eden; owners, D. D and G. G. Risdon, 3977 Majestic, Oakland.

RETAIL seed and supplies, $20,000; 519 Market St, San Francisco.

AUTO repair shop, $4000; 49 Woodward St., San Francisco; owner, Edward J. Lybrand, Jr., 2745 Mission St., San Francisco.

NEW Improved SCOOPMOBILE Five NEW IMPROVEMENTS!

1 NEW "Shovel Action" BUCKET
A full load . . . plus! No more ramming into stock pile. Simply ease SCOOPMOBILE into pile and lift bucket with a full load . . . easier on the machine . . . faster, fuller!

2 HAND LEVER CONTROL
Two hand levers at operator's fingertips give positive, flexible control of bucket action. No more trip rope and "shock dumping" from unhandy elevations.

3 DISCHARGE ACTION
Full loads can now be discharged from very top of rack. (Up to 8 ft.) Partial loads can be discharged by closing bucket at any height while pouring.

4 NEW COUNTER BALANCE
The new SCOOPMOBILE keeps its feet on the ground! New counter balance (optional) is easy to attach to rear of Scoopmobile to accommodate heavy loads at top of rack.

5 CONTROLLED DIGGING ACTION
Improved double sheaves and mechanical improvements give entirely new control of digging angle. New design of bucket means NO spillage over rough terrain.

Official Proposal

COUNTY OF SAN MATEO
STATE OF CALIFORNIA
NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the Purchasing Agent, County of San Mateo, in the County Court House, Redwood City, California, until 10:00 A. M., March 21, 1947, at which time they will be publicly opened and read in the office of the Purchasing Agent, for the performance in accordance with the plans and specifications therefor, to which special reference is made, of the CLEARING AND GRUBBING OPERATIONS for the realignment of County Road No 20, also known as Cañada Road, San Mateo County, California, as follows:

From the existing Canada Road near the entrance to the property known as Canada Road Park, being approximately 2.5 miles along said road in a generally northerly direction from Woodside, California; thence in a generally northerly direction to the intersection of the said Canada Road with County Road No. 19, also known as Ralston Avenue, said proposed realignment being approximately 4.7 miles in length (Engineer's Station 134+00 to Station 382+30.84).

Item 1. Clearing and Grubbing Lump Sum.

Prevailing rates of wages shall be paid on the work.

The attention of bidders is particularly directed to the provisions of Section 8, Articles (a) and (b), of the Standard Specifications, which are hereby cancelled, as no sub-contractors or assignments will be permitted.

No bid will be accepted from a contractor who is not licensed in accordance with the laws of the State of California.

Plans and specifications, forms of proposal, and contract may be seen and obtained at the Office of the Purchasing Agent in the County Court House, Redwood City, California. Plans may be taken therefrom upon deposit of $10.00 per set. Said deposit will be refunded upon return of the plans in good condition.

The County of San Mateo reserves the right to reject any or all bids.

E. B. SMITH, Purchasing Agent.
San Mateo County, Calif.

Highway Bill

(Continued from Page One)

state, county and city highway traffic problems.

Statistics cited by Governor Warren on the state's need for remedial action in the whole highway set-up were impressive. The state's population has increased by more than 2 million since World War II began. California has 2,800,000 passenger cars registered or one for every 2.5 persons, as against a national average of 4.1 persons. California's 300,000 trucks carry loads larger by 44 per cent than the national average. The state operates 3,100 school busses involving the safety of 100,000 children. Thousands of commercial busses carry millions of passengers daily to and from work and between cities.

TRAXCAVATE for PROFIT

The profitable machine on any job is the machine that keeps busy
The TRAXCAVATOR—front-end loader built by THE TRACKSON CO. and mounted on a "CATERPILLAR" diesel tractor—has been called "the busiest machine on the job" by many builders. It's the perfect machine for jobs that involve digging, loading, leveling, or backfilling, and for the handling and rehandling of materials.
HIGHLY VERSATILE
EASILY MOVED FROM JOB TO JOB

Official Proposals

COUNTY OF SAN MATEO
STATE OF CALIFORNIA
NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the Purchasing Agent, County of San Mateo, in the County Court House, Redwood City, California, until 10:00 A. M., March 21, 1947, at which time they will be publicly opened and read in the office of the Purchasing Agent, for the performance in accordance with the plans and specifications therefor, to which special reference is made, of the CLEARING AND GRUBBING OPERATIONS for the realignment of County Road No 20, also known as Canada Road, San Mateo County, California, as follows:

From the existing Canada Road near the entrance to the property known as Canada Road Park, being approximately 2.5 miles along said road in a generally northerly direction from Woodside, California; thence in a generally northerly direction to the intersection of the said Canada Road with County Road No. 20, also known as Ralston Avenue, said proposed realignment being approximately 4.7 miles in length (Engineer's Station 134+00 to Station 382+30.84).

Item 1. Clearing and Grubbing Lump Sum

Prevailing rates of wages shall be paid on the work.

The attention of bidders is particularly directed to the provisions of Section 8, Articles (a) and (b), of the Standard Specifications, which are hereby cancelled, as no sub-contracts or assignments will be permitted.

No bid will be accepted from a contractor who is not licensed in accordance with the laws of the State of California.

Plans and specifications, forms of proposal, and contract may be seen and obtained at the Office of the Purchasing Agent in the County Court House, Redwood City, California. Plans may be taken therefrom upon deposit of $10.00 per set. Said deposit will be refunded upon return of the plans in good condition.

The County of San Mateo reserves the right to reject any or all bids.

E. B. SMITH, Purchasing Agent.

Placer County at Nevada Street

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 703, B Street, Marysville, California at 2 o'clock p. m. on Mar 25, 1947 at which time and place they will be publicly opened and read, for performing work as follows:

In Placer County, at Nevada Street and in the vicinity of East Street Undercrossing (III-Pla-17,37-B, Aub), a highway lighting system to be furnished and installed.

Plans and specifications, and forms of proposal, bonds, and contract may be obtained at the above address.

No bid will be considered unless it is made on a proposal form furnished by the District Engineer, and is made in accordance with the provisions set forth under Section 2, "Proposal Requirements and Conditions" of the Standard Specifications. Each bid must be accompanied by a proposal guaranty in accordance with the requirements of article (f) of the said Section 2 of the Standard Specifications.

The Department of Public Works reserves the right to reject any or all bids.

The quantities listed in the State Highway Engineer's Estimate hereinafter stated, are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed by the Engineer to be necessary or advisable.

Bids are required on the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Carpenter	$1.75
Cement finisher	1.875
Concrete mixer operator (one cubic yard capacity or less)	1.60
Concrete mixer operator (over one cubic yard capacity and paving type)	1.90
Concrete vibrator operator	1.75
Electrician	1.875
Flagman	1.15
Laborer	1.15
Any classification omitted herein not less than	1.15

Overtime one and one-half (1½) times the above rates.

Sundays and holidays one and one-half (1½) times the above rates.

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on April 9, 1947, at which time they will be publicly opened and read in the Assembly Room of said building, for repairing State Highway in accordance with the Specifications therefor, to which special reference is made, as follows:

Yolo County, between 1¼ miles north of Solano County line and Woodland and between 3¾ miles north of Woodland and 1 mile south of Knights Landing (III-Yol-7,87-A, Wd, A), a net length of about nine and two - tenths (9.2) miles to be repaired with plant-mixed surfacing and seal coat.

Bids required for the entire work described herein.

State Highway Engineer's Estimate

LOCATION 1

Item 1. 4,775 cubic yards imported borrow.

Item 2. Developing water supply and furnishing watering equipment.

Item 3. 215 thousand gallons applying water.

Item 4. 2,050 tons crusher run base

Item 5. 48 tons liquid asphalt SC-2 (prime coat).

Item 6. 46 tons sand (prime coat).

Item 7. 6 tons asphaltic emulsion (seal coat).

Item 8. 48 tons screenings (seal coat).

Item 9. 10 tons asphaltic paint binder.

Item 10. 5,400 tons plant-mixed surfacing.

LOCATION 2

Item 11. 5,369 cubic yards imported borrow.

Item 12. Developing water supply and furnishing watering equipment.

Item 13. 160 thousand gallons applying water.

Item 14. 14 tons asphaltic paint binder.

Item 15. 10,200 tons plant-mixed surfacing.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Flagman	1.25
Laborer	1.25
Motor grader operator	2.10
Oil distributor bootman	1.275
Oiler power shovels or cranes	1.50
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Pile driver man	1.86
Reinforcing steel worker	1.75
Roller operator	1.95
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (14 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (8 cubic yards and less than 14 cubic yards water level capacity)	1.525
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Any classification omitted herein not less than	1.25
Overtime—one and one-half (1½) times the above rates.	

Sundays and holidays—one and one-half (1½) times the above rates.

The foregoing quantities are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, or to omit portions of the work, as may be deemed necessary or expedient by the Engineer.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the Associated General Contractors in San Francisco, and at the office of the County Engineer or County Surveyor at the county seat of the county in which the work is to be performed.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. (Mar. 14, 21, 28, 1947)

New East Ward Unit and Convalescent Barracks, Veterans Home, Yountville.

STATE OF CALIFORNIA
DEPARTMENT of PUBLIC WORKS
DIVISION OF ARCHITECTURE

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the Division of Architecture, Public Works Building, 12th and "N" Streets, Sacramento, California, up to 2:00 P. M., Tuesday, April 1, 1947, said bids thereafter on said day to be publicly opened and read for New East Ward Unit and Convalescent Barracks No. 11, Veterans' Home, Yountville, California, in accordance with plans and specifications therefor.

The New East Ward Unit is a four (4) story reinforced concrete wing to be added to the existing Hospital and has a total floor area of approximately 33000 sq. ft.

The Convalescent Barracks is a one (1) story reinforced concrete building with a floor area of 38,400 sq. ft. approximately.

Separate bids for each building and combined bids for both buildings will be entertained for each of the following segregations of the work:
General Work
Heating and Ventilating Work
Plumbing Work
Electrical Work

Combination bids to include both the General Work and the Mechanical Work will be entertained for each building and also for both buildings.

Alternate Bids will be required for the omission of a part of the work.

Prevailing Wage Scale: In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

	Hourly Rate
Asbestos Workers	$1.75
Bricklayers	2.05
Bricklayers Hod Carriers	1.40
Carpenters	1.75
Cement Finishers	1.75
Electric Workers	2.00
Engineers, Portable Hoist or Otherwise	1.85
Glass Workers	1.65
Iron Workers Architectural	1.85
Iron Workers Reinforcing Steel	1.75
Laborers Building	1.25
Lathers	2.00
Painters	1.75
Plasterers	1.83-⅓
Plasterers Hod Carriers	1.40
Plumbers	1.87-½
Roofers	1.75
Steam Fitters	2.00
Tile Setters	1.80
Tile Setters Helpers	1.37-½
Operator of Power Shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.25
Operator of Power Shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.33
Tractor Driver	1.95
Truck Driver (8 cu. yds. water level capacity and over)	1.87-½
Truck Driver (6 cu. yds. and less than 8 cu. yds. water level capacity)	1.50
Truck Driver (4 cu. yds. and less than 6 cu. yds. water level capacity)	1.40-¾
Truck Driver (less than 4 cu. yds. water level capacity)	1.28-½
Any classification omitted herein not less than	1.25
Overtime—One and one-half times the above rates.	

Apprentices may be employed provided they are properly indentured to the Contractor in full compliance with the provisions of Section 1777.5 of the Labor Code.

Plans and specifications for examination are on file in the Office of the Division of Architecture, Public Works Building, Sacramento, and Room 803 State Office Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Contractors who are desirous of securing plans, specifications and proposal forms for the purposes of preparing and submitting a proposal for this work may do so subject to certain conditions as hereinafter stated by requesting same in writing from the Division of Architecture, Public Works Building, Sacramento. Such request shall be accompanied by a deposit of Twenty Five ($25.00) dollars. Check shall be made payable to the Division of Architecture. Such deposit is required to guarantee the safe return in good condition of the plans and specifications to the Division of Architecture within 30 days after the date set for opening bids. Failure to so return the plans will cause forfeiture of the Deposit to the State.

No bid will be considered unless it is made on a blank form furnished by the Division of Architecture, and is made in accordance with the provisions of the Proposal Requirements and conditions set forth under Section 1 of the Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids and to waive any informality in any bid received.

No bidder may withdraw his bid for a period of thirty (30) days after the time set for opening thereof.

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the State Highway Engineer, Room 373, Public Works Building, Sacramento, California, until 2 o'clock p. m. on April 2, 1947, at which time they will be publicly opened and read in the Assembly Room of said building, for repairing State Highway in accordance with specifications therefor, to which special reference is made, as follows:

Lassen County, between 2 miles north of Milford and Bird Flat (11-Las-29-D), about twelve and four-tenths (12.4), miles in length to be surfaced with plant-mixed surfacing and shoulders to be constructed of imported borrow.

Bids are required for the entire work described herein.

In accordance with the provisions of Section 1770 of the Labor Code, the Department of Public Works has ascertained the general prevailing rate of wages applicable to the work to be done to be as follows:

Classification	Rate per hour
Skilled Labor	
Asphalt plant dryerman or fireman	$1.60
Asphalt plant mixer operator	1.65
Asphalt spreading machine operator	1.95
Flagman	1.15
Laborer	1.15
Motor grader operator	2.10
Oil distributor bootman	1.275
Oiler power shovels or cranes	1.50
Operator of power shovel or other excavating equipment, shovel type controls (up to and including one cubic yard)	2.10
Operator of power shovel or other excavating equipment, shovel type controls (over one cubic yard)	2.25
Pile driver hoistman or operator	2.10
Pile driver man	1.86
Reinforcing steel worker	1.75
Roller operator	1.95
Structural steel worker	2.00
Tractor driver	1.95
Truck driver (18 cubic yards water level capacity or more)	1.7125
Truck driver (8 cubic yards and less than 18 cubic yards water level capacity)	1.5875
Truck driver (6 cubic yards and less than 14 cubic yards water level capacity)	1.525
Intermediate Grade Labor	
Concrete vibrator operator	1.375
Jackhammer operator	1.375
Oiler power shovels or cranes	1.50
Truck driver (4 cubic yards and less than 8 cubic yards water level capacity)	1.3375
Truck driver (less than 4 cubic yards water level capacity)	1.25
Unskilled Labor	
Flagman	1.15
Laborer	1.15

Positions not listed above will be allocated in accordance with the definitions which appear in the special provisions, as interpreted in the light of this classification.

The minimum wage paid to all skilled labor for which rates are not shown above shall be not less than $1.375 per hour.

The minimum wage paid to all intermediate labor for which rates are not shown above shall be not less than $1.15 per hour.

The minimum wage paid to all unskilled labor for which rates are not shown above shall be not less than $1.15 per hour.

Overtime—one and one-half (1½) times the above rates.

Sundays and holidays—one and one-half (1½) times the above rates.

The attention of bidders is directed to the fact that the work herein proposed to be done will be financed in whole or in part with Federal funds and that therefore all of the applicable Federal statutes, rules, and regulations will apply to such work.

The attention of bidders is particularly directed to the provisions of Section 7, article (a), subarticle (6), of the Standard Specifications regarding the use of domestic materials; and also to the provisions of Section 8, articles (a) and (b), of the Standard Specifications, regarding subcontracting and assignment of the contract, respectively.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the State Highway Engineer, Public Works Building, Sacramento, California, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, at the office of the District Engineer of the District in which the work is situated, and at the office of the Associated General Contractors in San Francisco.

No bid will be considered unless it is made on a blank form furnished by the State Highway Engineer and is made in accordance with the provisions of the Proposal Requirements and Conditions set forth under Section 2 of the Standard Specifications. Each bidder must be licensed and also prequalified as required by law. (See said Proposal Requirements and Conditions.)

The Department of Public Works reserves the right to reject any or all bids.
